- The *Biochemical Journal* (ISSN 0264-6021 for print/online journal; ISSN 1470-8728 for online only journal) is published and distributed by Portland Press Ltd on behalf of the Biochemical Society (the owner), and appears twice monthly.
- **Editorial and publishing offices:** *Biochemical Journal*, 59 Portland Place, London W1B 1QW, U.K.
- **Biochemical Journal**, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Subscriptions department:** Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.
- All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0264-6021/2004/\$36.00 + 0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the above-mentioned address.
- Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editors, the publisher or the owner.
- Periodicals postage paid at Rahway, NJ, U.S.A.
- **Postmaster:** send address corrections to *Biochemical Journal*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Cover illustration:** Localization of EEN wild-type and deletion mutants to midbody in HeLa cells. For further information, see Cheung et al. (2004) *Biochem. J.* **383**, 27–35.

Instructions to Authors

● General policy The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

● Procedure for submission These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

● Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, 59 Portland Place, London W1B 1QW, U.K. (telephone +44 20 7637 5873; fax +44 20 7323 1136; email editorial@portlandpress.com).

● Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

● Multimedia adjuncts The *Biochemical Journal* Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2004 volumes 377–384 (three parts each) will appear. The subscription also includes an author and key-word index.

● Subscription rates Institutional subscription rates for 2004 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address below, or through your usual agent.

One year (8 vols)	N. America	Rest of world	Euro price
Print and online	US\$2414	£1373	€2335
Online only	US\$2220	£1260	€2145
Print only	US\$2337	£1335	€2264
Single issues (print only)	US\$116	£67	€110

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £58.80/€100.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● Electronic back archive This is freely available to all users with Internet access.

● Microfiche and back issues Volumes 102–336 of the *Biochemical Journal* are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

● Subscription Department

Portland Customer Services

Research Papers

Targeting the A site RNA of the *Escherichia coli* ribosomal 30 S subunit by 2'-O-methyl oligoribonucleotides: a quantitative equilibrium dialysis binding assay and differential effects of aminoglycoside antibiotics

Published as BJ Immediate Publication 4 August 2004,
DOI 10.1042/BJ20040246

Upstream stimulatory factors, USF1 and USF2, bind to the human haem oxygenase-1 proximal promoter *in vivo* and regulate its transcription

Published as BJ Immediate Publication 9 July 2004,
DOI 10.1042/BJ20040794

Development of a chimaeric receptor approach to study signalling by tumour necrosis factor receptor family members

Published as BJ Immediate Publication 14 July 2004,
DOI 10.1042/BJ20040961

C-terminus of mitotic centromere-associated kinesin (MCAK) inhibits its lattice-stimulated ATPase activity

Published as BJ Immediate Publication 14 July 2004,
DOI 10.1042/BJ20040736

Vectorial proteomics reveal targeting, phosphorylation and specific fragmentation of polymerase I and transcript release factor (PTRF) at the surface of caveolae in human adipocytes

Published as BJ Immediate Publication 9 July 2004,
DOI 10.1042/BJ20040647

Roles of USF, Ikaros and Sp proteins in the transcriptional regulation of the human reduced folate carrier B promoter

Published as BJ Immediate Publication 24 June 2004,
DOI 10.1042/BJ20040414

Protein arginine methylation during lytic adenovirus infection

Published as BJ Immediate Publication 9 July 2004,
DOI 10.1042/BJ20040210

Phosphorylation of androgen receptor isoforms

Published as BJ Immediate Publication 8 July 2004,
DOI 10.1042/BJ20040683

Stabilization of model membranes during drying by compatible solutes involved in the stress tolerance of plants and microorganisms

Published as BJ Immediate Publication 30 June 2004,
DOI 10.1042/BJ20040746

Protein disulphide-isomerase reduces ricin to its A and B chains in the endoplasmic reticulum <i>Published as BJ Immediate Publication</i> 30 June 2004, DOI 10.1042/BJ20040742	R.A. Spooner, P.D. Watson, C.J. Marsden, D.C. Smith, K.A.H. Moore, J.P. Cook, J.M. Lord and L.M. Roberts	285–293
Opposing actions of cellular retinol-binding protein and alcohol dehydrogenase control the balance between retinol storage and degradation <i>Published as BJ Immediate Publication</i> 14 June 2004, DOI 10.1042/BJ20040621	A. Molotkov, N.B. Ghyselinck, P. Chambon and G. Duester	295–302
Copper homoeostasis in <i>Drosophila melanogaster</i> S2 cells <i>Published as BJ Immediate Publication</i> 7 July 2004, DOI 10.1042/BJ20040745	A. Southon, R. Burke, M. Norgate, P. Batterham and J. Camakaris	303–309
Comparative biochemical analysis of three bacterial prolyl endopeptidases: implications for coeliac sprue <i>Published as BJ Immediate Publication</i> 12 July 2004, DOI 10.1042/BJ20040907	L. Shan, T. Marti, L.M. Sollid, G.M. Gray and C. Khosla	311–318
Two related ARID family proteins are alternative subunits of human SWI/SNF complexes <i>Published as BJ Immediate Publication</i> 1 June 2004, DOI 10.1042/BJ20040524	X. Wang, N.G. Nagl, Jr, D. Wilsker, M. Van Scoy, S. Pacchione, P. Yaciuk, P.B. Dallas and E. Moran	319–325
Hazelnut (<i>Corylus avellana</i>) vicilin Cor a 11: molecular characterization of a glycoprotein and its allergenic activity <i>Published as BJ Immediate Publication</i> 5 July 2004, DOI 10.1042/BJ20041062	I. Lauer, K. Foetisch, D. Kolarich, B.K. Ballmer-Weber, A. Conti, F. Altmann, S. Vieths and S. Scheurer	327–334
The human multidrug-resistance-associated protein MRP1 mediates ATP-dependent transport of unconjugated bilirubin <i>Published as BJ Immediate Publication</i> 8 July 2004, DOI 10.1042/BJ20040599	I. Rigato, L. Pascolo, C. Fornetti, J.D. Ostrow and C. Tiribelli	335–341
Substrate specificity of <i>Helicobacter pylori</i> histone-like HU protein is determined by insufficient stabilization of DNA flexure points <i>Published as BJ Immediate Publication</i> 16 July 2004, DOI 10.1042/BJ20040938	C. Chen, S. Ghosh and A. Grove	343–351
Dual sensitivity of sarcoplasmic/endoplasmic Ca^{2+} -ATPase to cytosolic and endoplasmic reticulum Ca^{2+} as a mechanism of modulating cytosolic Ca^{2+} oscillations <i>Published as BJ Immediate Publication</i> 20 July 2004, DOI 10.1042/BJ20040629	K. Yano, O.H. Petersen and A.V. Tepikin	353–360
Anti-apoptotic protein Bcl-2 interacts with and destabilizes the sarcoplasmic/endoplasmic reticulum Ca^{2+} -ATPase (SERCA) <i>Published as BJ Immediate Publication</i> 12 July 2004, DOI 10.1042/BJ20040187	E.S. Dremina, V.S. Sharov, K. Kumar, A. Zaidi, E.K. Michaelis and C. Schöneich	361–370
The strong efficiency of the <i>Escherichia coli</i> <i>gapA</i> P1 promoter depends on a complex combination of functional determinants <i>Published as BJ Immediate Publication</i> 14 July 2004, DOI 10.1042/BJ20040792	B. Thouvenot, B. Charpentier and C. Branst	371–382

Requirement of different mitochondrial targeting sequences of the yeast mitochondrial transcription factor Mtf1p when synthesized in alternative translation systems

*Published as BJ Immediate Publication 16 July 2004,
DOI 10.1042/BJ20040691*

T.K. Biswas and G.S. Getz

383–391

Sp1 and Smad transcription factors co-operate to mediate TGF- β -dependent activation of amyloid- β precursor protein gene transcription

*Published as BJ Immediate Publication 9 July 2004,
DOI 10.1042/BJ20040682*
