- The *Biochemical Journal* (ISSN 0264-6021 for print/online journal; ISSN 1470-8728 for online only journal) is published and distributed by Portland Press Ltd on behalf of the Biochemical Society (the owner), and appears twice monthly.
- **Editorial and publishing offices:** *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K.
- **Biochemical Journal**, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Subscriptions department:** Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.
- All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0264-6021/2005/\$40.00 + 0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the above-mentioned address.
- Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editors, the publisher or the owner.
- Periodicals postage paid at Rahway, NJ, U.S.A.
- **Postmaster:** send address corrections to *Biochemical Journal*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Cover illustration:** Interaction between a GST-HMGB1 fusion protein and A431 human epidermoid carcinoma cells. For further details, see Sparatore et al. (2005) *Biochem. J.* **389**, 215–221.

● **General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unreferenced symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

● **Research Papers** are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

● **Accelerated Publications (APs)** are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

● **Reviews** will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

● **Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● **Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

● **Immediate Publications** Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● **Queries and correspondence** Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

● **Colour figures** The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

● **Multimedia adjuncts** The *Biochemical Journal Online* offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2005 volumes 386–392 (three parts each) will appear. The subscription also includes an author and key-word index.

● **Abstracted by/indexed in:** BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information & Learning, Science Citation Index.

● **Subscription rates** Institutional subscription rates for 2005 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate

of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols) Print and online	US\$2830	£1496	€2545
Online only	US\$2500	£1325	€2250
Single issues (print only)	US\$138.70	£73	€124.10

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £61.80/€105.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● **Electronic back archive** This is freely available to all users with Internet access.

● **Microfiche and back issues** Volumes 102–336 of the *Biochemical Journal* are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

● **Subscription Department**
Portland Customer Services
P.O. Box 32, Commerce Way
Colchester CO2 8HP, Essex, U.K.
(telephone 01206 796351; fax 01206 799331;
email sales@portland-services.com).

● **Advertising** Enquiries about advertising should be addressed to: Nicky Peacock, Mainline Media Ltd, The Barn, Oakley Hay Lodge Business Park, Great Folds Road, Great Oakley, Corby, Northamptonshire NN18 9AS, U.K. (telephone 01536 747333; email Nickyppm@aol.com).

Demonstration and characterization of phosphate transport in mammalian peroxisomes <i>Published as BJ Immediate Publication 23 February 2005,</i> <i>doi:10.1042/BJ20041846</i>	W.F. Visser, C.W. van Roermund, L. Ijlst, K.J. Hellingwerf, R.J.A. Wanders and H.R. Waterham	717–722
IGF-I stimulation of proteoglycan synthesis by chondrocytes requires activation of the PI 3-kinase pathway but not ERK MAPK <i>Published as BJ Immediate Publication 1 April 2005,</i> <i>doi:10.1042/BJ20041636</i>	B.G. Starkman, J.D. Cravero, M. DelCarlo, Jr and R.F. Loeser	723–729
Spectral and catalytic properties of aryl-alcohol oxidase, a fungal flavoenzyme acting on polyunsaturated alcohols <i>Published as BJ Immediate Publication 6 April 2005,</i> <i>doi:10.1042/BJ20041903</i>	P. Ferreira, M. Medina, F. Guillén, M.J. Martínez, W.J.H. Van Berkel and Á.T. Martínez	731–738
The N domain of somatic angiotensin-converting enzyme negatively regulates ectodomain shedding and catalytic activity <i>Published as BJ Immediate Publication 6 April 2005,</i> <i>doi:10.1042/BJ20050187</i>	Z.L. Woodman, S.L.U. Schwager, P. Redelinghuys, A.K. Carmona, M.R.W. Ehlers and E.D. Sturrock	739–744
Characterization of mouse amino acid transporter B ⁰ AT1 (slc6a19) <i>Published as BJ Immediate Publication 1 April 2005,</i> <i>doi:10.1042/BJ20050083</i>	C. Böhmer, A. Bröer, M. Munzinger, S. Kowalczyk, J.E.J. Rasko, F. Lang and S. Bröer	745–751
Molecular action of 1,25-dihydroxyvitamin D ₃ and phorbol ester on the activation of the rat cytochrome P450C24 (CYP24) promoter: role of MAP kinase activities and identification of an important transcription factor binding site <i>Published as BJ Immediate Publication 19 April 2005,</i> <i>doi:10.1042/BJ20041947</i>	B.K. Nutchey, J.S. Kaplan, P.P. Dwivedi, J.L. Omdahl, A. Ferrante, B.K. May and C.S.T. Hii	753–762
Thromboxane A ₂ -induced contraction of rat caudal arterial smooth muscle involves activation of Ca ²⁺ entry and Ca ²⁺ sensitization: Rho-associated kinase-mediated phosphorylation of MYPT1 at Thr-855, but not Thr-697 <i>Published as BJ Immediate Publication 11 April 2005,</i> <i>doi:10.1042/BJ20050237</i>	D.P. Wilson, M. Susnjar, E. Kiss, C. Sutherland and M.P. Walsh	763–774
Identification of calcium-regulated heat-stable protein of 24 kDa (CRHSP24) as a physiological substrate for PKB and RSK using KESTREL <i>Published as BJ Immediate Publication 24 May 2005,</i> <i>doi:10.1042/BJ20050733</i>	G.C. Auld, D.G. Campbell, N. Morrice and P. Cohen	775–783
Proteomic detection of hydrogen peroxide-sensitive thiol proteins in Jurkat cells <i>Published as BJ Immediate Publication 31 March 2005,</i> <i>doi:10.1042/BJ20050337</i>	J.W. Baty, M.B. Hampton and C.C. Winterbourn	785–795
Mobilization of the iron centre in IscA for the iron–sulphur cluster assembly in IscU <i>Published as BJ Immediate Publication 14 April 2005,</i> <i>doi:10.1042/BJ20050405</i>	B. Ding, E.S. Smith and H. Ding	797–802
Secretion of cryptococcal phospholipase B1 (PLB1) is regulated by a glycosylphosphatidylinositol (GPI) anchor <i>Published as BJ Immediate Publication 8 April 2005,</i> <i>doi:10.1042/BJ20050063</i>	J.T. Djordjevic, M. Del Poeta, T.C. Sorrell, K.M. Turner and L.C. Wright	803–812

Relative contribution of PDX-1, MafA and E47/ β 2 to the regulation of the human insulin promoter <i>Published as BJ Immediate Publication 29 April 2005, doi:10.1042/BJ20041891</i>	H.M. Docherty, C.W. Hay, L.A. Ferguson, J. Barrow, E. Durward and K. Docherty	813–820
Different phospholipase-C-coupled receptors differentially regulate capacitative and non-capacitative Ca^{2+} entry in A7r5 cells <i>Published as BJ Immediate Publication 26 May 2005, doi:10.1042/BJ20050145</i>	Z. Moneer, I. Pino, E.J.A. Taylor, L.M. Broad, Y. Liu, S.C. Tovey, L. Staali and C.W. Taylor	821–829
Characterization of a novel Foxa (hepatocyte nuclear factor-3) site in the glucagon promoter that is conserved between rodents and humans <i>Published as BJ Immediate Publication 14 April 2005, doi:10.1042/BJ20050334</i>	S.K. Sharma, U. Leinemann, R. Ratke, E. Oetjen, R. Blume, C. Dickel and W. Knepel	831–841
Characterization of the <i>Bacillus subtilis</i> GTPase YloQ and its role in ribosome function <i>Published as BJ Immediate Publication 14 April 2005, doi:10.1042/BJ20041873</i>	T.L. Campbell, D.M. Daigle and E.D. Brown	843–852
Purification, characterization and molecular cloning of glycosylphosphatidylinositol-anchored arginine-specific ADP-ribosyltransferases from chicken <i>Published as BJ Immediate Publication 21 April 2005, doi:10.1042/BJ20042019</i>	M. Terashima, H. Osago, N. Hara, Y. Tanigawa, M. Shimoyama and M. Tsuchiya	853–861
Expression of functional recombinant von Willebrand factor-A domain from human complement C2: a potential binding site for C4 and CRIT <i>Published as BJ Immediate Publication 11 April 2005, doi:10.1042/BJ20050183</i>	K.-M. Hui, G.L. Orriss, T. Schirmer, B. Magnadóttir, J.A. Schifferli and J.M. Inal	863–868
The iron-siderophore transporter FhuA is the receptor for the antimicrobial peptide microcin J25: role of the microcin Val ¹¹ –Pro ¹⁶ β -hairpin region in the recognition mechanism <i>Published as BJ Immediate Publication 29 April 2005, doi:10.1042/BJ20042107</i>	D. Destoumieux-Garzón, S. Duquesne, J. Peduzzi, C. Goulard, M. Desmadril, L. Letellier, S. Rebuffat and P. Boulanger	869–876
Radiation-induced cell death: importance of lysosomal destabilization <i>Published as BJ Immediate Publication 6 April 2005, doi:10.1042/BJ20050271</i>	H.L. Persson, T. Kurz, J.W. Eaton and U.T. Brunk	877–884
Folding pathway of the pyridoxal 5'-phosphate C-S lyase MalY from <i>Escherichia coli</i> <i>Published as BJ Immediate Publication 11 April 2005, doi:10.1042/BJ20050279</i>	M. Bertoldi, B. Cellini, D.V. Laurents and C. Borri Voltattorni	885–898
Structure–function relationship in annexin A13, the founder member of the vertebrate family of annexins <i>Published as BJ Immediate Publication 7 April 2005, doi:10.1042/BJ20041918</i>	J. Turnay, E. Lecona, S. Fernández-Lizarbe, A. Guzmán-Aránguez, M.P. Fernández, N. Olmo and M.A. Lizarbe	899–911
Englitzzone administration to late pregnant rats produces delayed body growth and insulin resistance in their fetuses and neonates <i>Published as BJ Immediate Publication 6 April 2005, doi:10.1042/BJ20041837</i>	J. Sevillano, I.C. López-Pérez, E. Herrera, M. del Pilar Ramos and C. Bocos	913–918
Retraction		
Retention of the 4-pro-R hydrogen atom of mevalonate at C-2,2' of bacterioruberin in <i>Halobacterium halobium</i>	I.E. Swift and B.V. Milborrow (Volume 187, pp. 261–264, 1980)	919
Stereochemistry of allene biosynthesis and the formation of the acetylenic carotenoid diadinoxanthin and peridinin (C37) from neoxanthin	I.E. Swift and B.V. Milborrow (Volume 199, pp. 67–74, 1981)	919
Correction		
Up-regulation of phospholipid hydroperoxide glutathione peroxidase in rat casein-induced polymorphonuclear neutrophils	H. Hattori, H. Imai, A. Hanamoto, K. Furuhashi and Y. Nakagawa (Volume 389, pp. 279–287, 2005)	920
