SCIENTIFIC BOOKS

on Biochemistry, Physiology, Medicine; Physical, Organic and Inorganic Chemistry and related subjects supplied from stock, or obtained to order.

FOREIGN DEPARTMENT
A twelve-page list, together with two eight-page supplements giving details of reproductions of German technical publications issued under the authority of the Alien Property Custodian in Washington have been prepared; copies will be sent on application.

SECOND-HAND DEPARTMENT
A large stock of Books and Journals always available at 140 Gower Street.

TRIKETO-
HYDRINDENE
HYDRATE

Van Slyke et al. have described in the Journal of Biological Chemistry, 1941, 141, 627 and 671, the use of ninhydrin (triketo-hydrindene hydrate) in the determination of free amino acids. The gasometric determination of carboxyl groups in free amino acids, and the determination of free amino acids by titration of the carbon dioxide formed in the reaction with ninhydrin are described in the two papers concerned.

Descriptive literature is available and price will be quoted on request.

The Royal Institute of Chemistry of Great Britain and Ireland

PATRON: H.M. THE KING

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register such persons. The aims of the Institute include the elevation of the profession and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership and by setting up a high standard of scientific and practical efficiency.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar,
