- 
- The *Biochemical Journal* (ISSN 0264-6021 for print/online journal; ISSN 1470-8728 for online only journal) is published and distributed by Portland Press Ltd on behalf of the Biochemical Society (the owner), and appears twice monthly.
 - **Editorial and publishing offices:** *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K.
 - **Biochemical Journal**, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
 - **Subscriptions department:** Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.
 - All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0264-6021/2005/\$40.00 + 0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the above-mentioned address.
 - Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editors, the publisher or the owner.
 - Periodicals postage paid at Rahway, NJ, U.S.A.
 - **Postmaster:** send address corrections to *Biochemical Journal*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
 - **Cover illustration:** Discoid arrangement of pentameric pentraxin. For further details, see Brinda et al. (2005) *Biochem. J.* **391**, 1–15.

Instructions to Authors

● General policy The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

● Procedure for submission These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

● Submit manuscripts online Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

● Immediate Publications Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● Queries and correspondence Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

● Colour figures The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

● Multimedia adjuncts The *Biochemical Journal* Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2005 volumes 386–392 (three parts each) will appear. The subscription also includes an author and key-word index.

● Abstracted by/indexed in: BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information & Learning, Science Citation Index.

● Subscription rates Institutional subscription rates for 2005 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate

of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols) Print and online	US\$2830	£1496	€2545
Online only	US\$2500	£1325	€2250
Single issues (print only)	US\$138.70	£73	€124.10

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £61.80/€105.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● Electronic back archive This is freely available to all users with Internet access.

● Microfiche and back issues Volumes 102–336 of the *Biochemical Journal* are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

● Subscription Department
Portland Customer Services

221–230

High-affinity interaction of the N-terminal myristylation motif of the neuronal calcium sensor protein hippocalcin with phosphatidylinositol 4,5-bisphosphate

*Published as BJ Immediate Publication 29 July 2005,
doi:10.1042/BJ20051001*

D.W. O'Callaghan, L.P. Haynes and R.D. Burgoyne

231–238

Identification of a novel p300-specific-associating protein, PRS1 (phosphoribosylpyrophosphate synthetase subunit 1) <i>Published as BJ Immediate Publication</i> 9 June 2005, doi:10.1042/BJ20041308	A. Kaida, Y. Ariumi, K. Baba, M. Matsubae, T. Takao and K. Shimotohno	239–247
Mutations in dopachrome tautomerase (Dct) affect eumelanin/pheomelanin synthesis, but do not affect intracellular trafficking of the mutant protein <i>Published as BJ Immediate Publication</i> 16 June 2005, doi:10.1042/BJ20042070	G.-E. Costin, J.C. Valencia, K. Wakamatsu, S. Ito, F. Solano, A.L. Milac, W.D. Vieira, Y. Yamaguchi, F. Rouzaud, A.-J. Petrescu, M.L. Lamoreux and V.J. Hearing	249–259
The GTPase RhoA increases utrophin expression and stability, as well as its localization at the plasma membrane <i>Published as BJ Immediate Publication</i> 20 June 2005, doi:10.1042/BJ20050024	A. Bonet-Kerrache, M. Fortier, F. Comunale and C. Gauthier-Rouvière	261–268
A novel α -glucosidase from the acidophilic archaeon <i>Ferroplasma acidiphilum</i> strain Y with high transglycosylation activity and an unusual catalytic nucleophile <i>Published as BJ Immediate Publication</i> 7 June 2005, doi:10.1042/BJ20050346	M. Ferrer, O.V. Golyshina, F.J. Plou, K.N. Timmis and P.N. Golyshin	269–276
Enhanced catabolism of mitochondrial superoxide/hydrogen peroxide and aging in transgenic <i>Drosophila</i> <i>Published as BJ Immediate Publication</i> 14 June 2005, doi:10.1042/BJ20041872	A.-C.V. Bayne, R.J. Mockett, W.C. Orr and R.S. Sohal	277–284
Mutating His ²⁹ , His ¹²⁵ , His ¹³³ or His ¹⁵⁸ abolishes glycosylphosphatidylinositol-specific phospholipase D catalytic activity <i>Published as BJ Immediate Publication</i> 8 June 2005, doi:10.1042/BJ20050656	N.S. Raikwar, R.F. Bowen and M.A. Deeg	285–289
The selective recruitment of mRNA to the ER and an increase in initiation are important for glucose-stimulated proinsulin synthesis in pancreatic β -cells <i>Published as BJ Immediate Publication</i> 23 June 2005, doi:10.1042/BJ20050468	I.C. Greenman, E. Gomez, C.E.J. Moore and T.P. Herbert	291–300
Zn ²⁺ -induced reversible dissociation of subunit Rpn10/p54 of the <i>Drosophila</i> 26 S proteasome <i>Published as BJ Immediate Publication</i> 10 June 2005, doi:10.1042/BJ20050523	P. Kiss, Á. Szabó, É. Hunyadi-Gulyás, K.F. Medzihradzky, Z. Lipinszki, M. Pál and A. Udvárdy	301–310
Carbonic anhydrase (Nce103p): an essential biosynthetic enzyme for growth of <i>Saccharomyces cerevisiae</i> at atmospheric carbon dioxide pressure <i>Published as BJ Immediate Publication</i> 13 June 2005, doi:10.1042/BJ20050556	J. Aguilera, J.P. van Dijken, J.H. de Winde and J.T. Pronk	311–316
Brown recluse spider (<i>Loxosceles reclusa</i>) venom phospholipase D (PLD) generates lysophosphatidic acid (LPA) <i>Published as BJ Immediate Publication</i> 1 June 2005, doi:10.1042/BJ20050043	S. Lee and K.R. Lynch	317–323
Slx4 becomes phosphorylated after DNA damage in a Mec1/Tel1-dependent manner and is required for repair of DNA alkylation damage <i>Published as BJ Immediate Publication</i> 23 June 2005, doi:10.1042/BJ20050768	S. Flott and J. Rouse	325–333
α B-crystallin-assisted reactivation of glucose-6-phosphate dehydrogenase upon refolding <i>Published as BJ Immediate Publication</i> 13 June 2005, doi:10.1042/BJ20050506	M.S. Kumar, P.Y. Reddy, B. Sreedhar and G.B. Reddy	335–341
Structural and functional differences in isoforms of mouse major urinary proteins: a male-specific protein that preferentially binds a male pheromone <i>Published as BJ Immediate Publication</i> 3 June 2005, doi:10.1042/BJ20050404	S.D. Armstrong, D.H.L. Robertson, S.A. Cheetham, J.L. Hurst and R.J. Beynon	343–350

A direct, continuous, sensitive assay for protein disulphide-isomerase based on fluorescence self-quenching <i>Published as BJ Immediate Publication 17 June 2005, doi:10.1042/BJ20050770</i>	A. Raturi, P.O. Vacratsis, D. Seslija, L. Lee and B. Mutus	351–357
Regulation of FAK Ser-722 phosphorylation and kinase activity by GSK3 and PP1 during cell spreading and migration <i>Published as BJ Immediate Publication 24 June 2005, doi:10.1042/BJ20050282</i>	M. Bianchi, S. De Lucchini, O. Marin, D.L. Turner, S.K. Hanks and E. Villa-Moruzzi	359–370
Modulation of differential transcription of tRNA genes through chromatin organization <i>Published as BJ Immediate Publication 13 July 2005, doi:10.1042/BJ20050304</i>	A. Parthasarthy and K.P. Gopinathan	371–381
Ammodytoxin, a secretory phospholipase A ₂ , inhibits G ₂ cell-cycle arrest in the yeast <i>Saccharomyces cerevisiae</i> <i>Published as BJ Immediate Publication 11 July 2005, doi:10.1042/BJ20050417</i>	U. Petrović, J. Šribar, M. Matis, G. Anderluh, J. Peter-Katalinić, I. Križaj and F. Gubenšek	383–388
Investigating the allosterism of acyl-CoA:cholesterol acyltransferase (ACAT) by using various sterols: <i>in vitro</i> and intact cell studies <i>Published as BJ Immediate Publication 4 July 2005, doi:10.1042/BJ20050428</i>	J. Liu, C.C.Y. Chang, E.J. Westover, D.F. Covey and T.-Y. Chang	389–397
Tumour necrosis factor α induces co-ordinated activation of rat GSH synthetic enzymes via nuclear factor κ B and activator protein-1 <i>Published as BJ Immediate Publication 13 July 2005, doi:10.1042/BJ20050795</i>	H. Yang, N. Magilnick, X. Ou and S.C. Lu	399–408
UDP-glucose dehydrogenases of maize: a role in cell wall pentose biosynthesis <i>Published as BJ Immediate Publication 21 June 2005, doi:10.1042/BJ20050800</i>	A. Kärkönen, A. Murigneux, J.-P. Martinant, E. Pepéy, C. Tatout, B.J. Dudley and S.C. Fry	409–415
Generation of protein kinase C κ mutants which discriminate between canonical and non-canonical substrates <i>Published as BJ Immediate Publication 24 June 2005, doi:10.1042/BJ20050717</i>	V.H. Bustos, O. Marin, F. Meggio, L. Cesaro, C.C. Allende, J.E. Allende and L.A. Pinna	417–424
Phenotypic analysis of trypanothione synthetase knockdown in the African trypanosome <i>Published as BJ Immediate Publication 12 July 2005, doi:10.1042/BJ20050911</i>	M.R. Ariyanayagam, S.L. Oza, M.L.S. Guther and A.H. Fairlamb	425–432
Nogo-B is a new physiological substrate for MAPKAP-K2 <i>Published as BJ Immediate Publication 12 August 2005, doi:10.1042/BJ20050935</i>	S. Rousseau, M. Peggie, D.G. Campbell, A.R. Nebreda and P. Cohen	433–440
Neutrophil gelatinase-associated lipocalin as a survival factor <i>Published as BJ Immediate Publication 2 August 2005, doi:10.1042/BJ20051020</i>	Z. Tong, X. Wu, D. Ovcharenko, J. Zhu, C.-S. Chen and J.P. Kehrer	441–448
