## Instructions to Authors

**● General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

**Research Papers** are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

**Accelerated Publications (APs)** are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

**Reviews** will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one typed page) summary of the area they propose to cover.

**● Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

**● Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

**● Immediate Publications** Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

**● Queries and correspondence** Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email [editorial@biochemjusa.org](mailto:editorial@biochemjusa.org)). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email [editorial@portlandpress.com](mailto:editorial@portlandpress.com)).

**● Colour figures** The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Subsequent colour figures in the same paper cost £300 each.

**● Multimedia adjuncts** The *Biochemical Journal* Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

## Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2005 volumes 386–392 (three parts each) will appear. The subscription also includes an author and key-word index.

**● Abstracted by/indexed in:** BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information & Learning, Science Citation Index.

**● Subscription rates** Institutional subscription rates for 2005 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate

of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols) Print and online	US\$2830	£1496	€2545
Online only	US\$2500	£1325	€2250
Single issues (print only)	US\$138.70	£73	€124.10

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £61.80/€105.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

**● Electronic back archive** This is freely available to all users with Internet access.

**● Microfiche and back issues** Volumes 102–336 of the *Biochemical Journal* are available on microfiche. Back issues are also available. Further details may be obtained from the address below.

**● Subscription Department**  
Portland Customer Services  
P.O. Box 32, Commerce Way  
Colchester CO2 8HP, Essex, U.K.  
(telephone 01206 796351; fax 01206 799331;  
email [sales@portland-services.com](mailto:sales@portland-services.com)).

**● Advertising** Enquiries about advertising should be addressed to: Nicky Peacock, Mainline Media Ltd, The Barn, Oakley Hay Lodge Business Park, Great Folds Road, Great Oakley, Corby, Northamptonshire NN18 9AS, U.K. (telephone 01536 747333; email [Nickyppm@aol.com](mailto:Nickyppm@aol.com)).

## Review

**Structure and function of steroid receptor AF1 transactivation domains: induction of active conformations**

*Published on the Internet 25 October 2005,  
doi:10.1042/BJ20050872*

**D.N. Lavery and I.J. McEwan**

**449–464**

## Online Commentary

New insights into the families of PLC enzymes:  
looking back and going forward

*Published on the Internet 25 October 2005,  
doi:10.1042/BJ20051506  
(see accompanying paper pp. 667–676)*

**M. Katan**

**e7–e9**

## Research Papers

Defective insulin receptor activation and altered lipid rafts in Niemann–Pick type C disease hepatocytes

*Published as BJ Immediate Publication 9 June 2005,  
doi:10.1042/BJ20050460*

**S. Vainio, I. Bykov, M. Hermansson, E. Jokitalo,  
P. Somerharju and E. Ikonen**

**465–472**

Preferential localization of hyperphosphorylated replication protein A to double-strand break repair and checkpoint complexes upon DNA damage

*Published as BJ Immediate Publication 2 June 2005,  
doi:10.1042/BJ20050379*

**X. Wu, Z. Yang, Y. Liu and Y. Zou**

**473–480**

Attempts to characterize the NBD heterodimer of MRP1: transient complex formation involves Gly<sup>771</sup> of the ABC signature sequence but does not enhance the intrinsic ATPase activity

*Published as BJ Immediate Publication 14 July 2005,  
doi:10.1042/BJ20050897*

**O. Ramaen, C. Sizun, O. Pamlard, E. Jacquet and  
J.-Y. Lallemand**

**481–490**

N-glycans of core2 β(1,6)-N-acetylglucosaminyltransferase-I (C2GnT-I) but not those of α(1,3)-fucosyltransferase-VII (FucT-VII) are required for the synthesis of functional P-selectin glycoprotein ligand-1 (PSGL-1): effects on P-, L- and E-selectin binding

*Published as BJ Immediate Publication 1 June 2005,  
doi:10.1042/BJ20050344*

**M. Prorok-Hamon, F. Notel, S. Mathieu, C. Langlet,  
M. Fukuda and A. El-Battari**

**491–502**

Cancer cells activate p53 in response to 10-formyltetrahydrofolate dehydrogenase expression

*Published as BJ Immediate Publication 14 July 2005,  
doi:10.1042/BJ20050533*

**N.V. Oleinik, N.I. Krupenko, D.G. Priest and S.A. Krupenko**

**503–511**

Ubiquilin regulates presenilin endoproteolysis and modulates γ-secretase components, Pen-2 and nicastrin

*Published as BJ Immediate Publication 24 June 2005,  
doi:10.1042/BJ20050491*

**L.K. Massey, A.L. Mah and M.J. Monteiro**

**513–525**

Mn <sup>2+</sup> -adenosine nucleotide complexes in the presence of the nitrogenase iron-protein: detection of conformational rearrangements directly at the nucleotide binding site by EPR and 2D-ESEEM (two-dimensional electron spin-echo envelope modulation spectroscopy) <i>Published as BJ Immediate Publication 21 June 2005, doi:10.1042/BJ20050226</i>	J. Petersen, C. Gessner, K. Fisher, C.J. Mitchell, D.J. Lowe and W. Lubitz	<b>527–539</b>
		
Nitric oxide formation in acutely rejecting cardiac allografts correlates with GTP cyclohydrolase I activity <i>Published as BJ Immediate Publication 7 July 2005, doi:10.1042/BJ20050575</i>	G.M. Pieper, V. Nilakantan, N.L.N. Halligan, A.K. Khanna, G. Hilton and J. Vásquez-Vivar	<b>541–547</b>
Liver fatty-acid-binding protein (L-FABP) gene ablation alters liver bile acid metabolism in male mice <i>Published as BJ Immediate Publication 21 June 2005, doi:10.1042/BJ20050296</i>	G.G. Martin, B.P. Atshaves, A.L. McIntosh, J.T. Mackie, A.B. Kier and F. Schroeder	<b>549–560</b>
Cyclo-oxygenase-2 contributes to constitutive prostanoid production in rat kidney and brain <i>Published as BJ Immediate Publication 12 July 2005, doi:10.1042/BJ20050451</i>	P.-O. Hétu and D. Riendeau	<b>561–566</b>
Diversification in substrate usage by glutathione synthetases from soya bean ( <i>Glycine max</i> ), wheat ( <i>Triticum aestivum</i> ) and maize ( <i>Zea mays</i> ) <i>Published as BJ Immediate Publication 11 July 2005, doi:10.1042/BJ20050718</i>	M. Skipsey, B.G. Davis and R. Edwards	<b>567–574</b>
Lipopolysaccharide rapidly modifies adenosine receptor transcripts in murine and human macrophages: role of NF- $\kappa$ B in A <sub>2A</sub> adenosine receptor induction <i>Published as BJ Immediate Publication 15 July 2005, doi:10.1042/BJ20050888</i>	L.J. Murphree, G.W. Sullivan, M.A. Marshall and J. Linden	<b>575–580</b>
Weaning induces NOS-2 expression through NF- $\kappa$ B modulation in the lactating mammary gland: importance of GSH <i>Published as BJ Immediate Publication 15 June 2005, doi:10.1042/BJ20050507</i>	R. Zaragozá, V.J. Miralles, A.D. Rus, C. García, R. Carmena, E.R. García-Trevijano, T. Barber, F.V. Pallardó, L. Torres and J.R. Viña	<b>581–588</b>
		
Rat liver betaine–homocysteine S-methyltransferase equilibrium unfolding: insights into intermediate structure through tryptophan substitutions <i>Published as BJ Immediate Publication 8 June 2005, doi:10.1042/BJ20050505</i>	F. Garrido, M. Gasset, J. Sanz-Aparicio, C. Alfonso and M.A. Pajares	<b>589–599</b>
Conformational changes in dynamin on GTP binding and oligomerization reported by intrinsic and extrinsic fluorescence <i>Published as BJ Immediate Publication 15 June 2005, doi:10.1042/BJ20050707</i>	E. Solomaha and H.C. Palfrey	<b>601–611</b>
Functional analysis of the promoter of the mitochondrial phosphate carrier human gene: identification of activator and repressor elements and their transcription factors <i>Published as BJ Immediate Publication 29 June 2005, doi:10.1042/BJ20050776</i>	V. Iacobazzi, V. Infantino, P. Costanzo, P. Izzo and F. Palmieri	<b>613–621</b>
FoxO6 transcriptional activity is regulated by Thr <sup>26</sup> and Ser <sup>184</sup> , independent of nucleocytoplasmic shuttling <i>Published as BJ Immediate Publication 29 June 2005, doi:10.1042/BJ20050525</i>	L.P. van der Heide, F.M.J. Jacobs, J.P.H. Burbach, M.F.M. Hoekman and M.P. Smidt	<b>623–629</b>
Characterization of a c-Jun-responsive module in the 5'-flank of the human <i>CYP2J2</i> gene that regulates transactivation <i>Published as BJ Immediate Publication 12 July 2005, doi:10.1042/BJ20050798</i>	N.Y. Marden and M. Murray	<b>631–640</b>

Kinetic probes for inter-domain co-operation in human somatic angiotensin-converting enzyme <i>Published as BJ Immediate Publication</i> 20 July 2005, doi:10.1042/BJ20050702	O.E. Skirgello, P.V. Binevski, V.F. Pozdnev and O.A. Kost	<b>641–647</b>
Amino-acid limitation induces transcription from the human <i>C/EBP<math>\beta</math></i> gene via an enhancer activity located downstream of the protein coding sequence <i>Published as BJ Immediate Publication</i> 18 July 2005, doi:10.1042/BJ20050882	C. Chen, E. Dudenhausen, H. Chen, Y.-X. Pan, A. Gjymishka and M.S. Kilberg	<b>649–658</b>
Synaptic vesicle chips to assay botulinum neurotoxins <i>Published as BJ Immediate Publication</i> 13 July 2005, doi:10.1042/BJ20050855	G. Ferracci, R. Miquelis, S. Kozaki, M. Seagar and C. Lévéque	<b>659–666</b>
Molecular cloning and characterization of PLC- $\eta$ 2 <i>Published as BJ Immediate Publication</i> 18 August 2005, doi:10.1042/BJ20050839	Y. Zhou, M.R. Wing, J. Sondek and T.K. Harden	<b>667–676</b>
The penta-EF-hand protein ALG-2 interacts directly with the ESCRT-I component TSG101, and Ca $^{2+}$ -dependently co-localizes to aberrant endosomes with dominant-negative AAA ATPase SKD1/Vps4B <i>Published as BJ Immediate Publication</i> 8 July 2005, doi:10.1042/BJ20050398	K. Katoh, H. Suzuki, Y. Terasawa, T. Mizuno, J. Yasuda, H. Shibata and M. Maki	<b>677–685</b>
The caspase-3 cleavage product of the plasma membrane Ca $^{2+}$ -ATPase 4b is activated and appropriately targeted <i>Published as BJ Immediate Publication</i> 4 August 2005, doi:10.1042/BJ20051012	K. Pászty, G. Antalfy, A.R. Penheiter, L. Homolya, R. Padányi, A. Iliás, A.G. Filoteo, J.T. Penniston and Á. Enyedi	<b>687–692</b>
Role of peroxisome proliferator-activated receptor $\gamma$ in amyloid precursor protein processing and amyloid $\beta$ -mediated cell death <i>Published as BJ Immediate Publication</i> 9 June 2005, doi:10.1042/BJ20050560	C. d'Abramo, S. Massone, J.-M. Zingg, A. Pizzuti, P. Marambaud, B. Dalla Piccola, A. Azzi, U.M. Marinari, M.A. Pronzato and R. Ricciarelli	<b>693–698</b>
The Rab27a-binding protein, JFC1, regulates androgen-dependent secretion of prostate-specific antigen and prostatic-specific acid phosphatase <i>Published as BJ Immediate Publication</i> 8 July 2005, doi:10.1042/BJ20050380	J.L. Johnson, B.A. Ellis, D. Noack, M.C. Seabra and S.D. Catz	<b>699–710</b>
<b>Corrections</b>		
Examination of mitochondrial protein targeting of haem synthetic enzymes: <i>in vivo</i> identification of three functional haem-responsive motifs in 5-aminolaevulinate synthase (Volume 386, pp. 381–386, 2005)	T.A. Dailey, J.H. Woodruff and H.A. Dailey	<b>711</b>
Roles of 14-3-3 and calmodulin binding in subcellular localization and function of the small G-protein Rem2 (Volume 390, pp. 67–75, 2005)	P. Béguin, R.N. Mahalakshmi, K. Nagashima, D.H.K. Cher, N. Kuwamura, Y. Yamada, Y. Seino and W. Hunziker	<b>712</b>
