## Editorial Board

### Chair

**G. Banting** • Bristol

### Vice Chair, The Americas

**G. Salvesen** • La Jolla

### Reviews Editor

**A. Toker** • Boston

### Deputy Chairs

**D. R. Alessi** • Dundee

**S. V. Graham** • Glasgow

**S. Gutteridge** • Newark, DE

**D. Hoekstra** • Groningen

**N. M. Hooper** • Leeds

**J. P. Kehler** • Pullman, WA

**C. MacKintosh** • Dundee

**K. H. Mayo** • Minneapolis

**P. R. Shepherd** • Auckland

**H. M. Wallace** • Aberdeen

**M. P. Walsh** • Calgary

### Publisher

**P. J. Starley**

### Production Editor

**M. D. Cunningham**

### Executive Editor

**M. R. Thorne**

### Senior Staff Editor

**S. M. Hobday**

### Staff Editors

**L. Ball**

**E. A. G. Elloway**

**J. W. Mockridge**

### Editorial Assistant

**E. E. C. Bible**

### Administrative Editor, US Office

**S. Schendel**

- **Cover illustration:** Molecular structure of HvUGE1, a UDP-D-glucose 4-epimerase from barley (*Hordeum vulgare* L.). For further details, see Zhang et al. (2006) *Biochem. J.* **394**, 115–124.

## Instructions to Authors

**● General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in unrefereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

**Research Papers** are the normal form of publication, and may be of any length that is

justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

**Accelerated Publications (APs)** are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. One colour figure will be published free of charge in APs; subsequent figures will cost £300 each.

**Reviews** will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

**● Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work'

must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

**● Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

**● Immediate Publications** Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

**● Queries and correspondence** Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email [editorial@biochemjusa.org](mailto:editorial@biochemjusa.org)). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email [editorial@portlandpress.com](mailto:editorial@portlandpress.com)).

**● Colour figures** The first colour figure is published at no charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers (a saving of £550). Subsequent colour figures in the same paper cost £300 each.

**● Multimedia adjuncts** The *Biochemical Journal* Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies and PDB for structures. There is no extra charge associated with the publication of a multimedia adjunct online.

## Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2006 volumes 393–400 (three parts each) will appear. The subscription also includes an author and key-word index.

**● Abstracted by/indexed in:** BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information & Learning, Science Citation Index.

**● Subscription rates** Institutional subscription rates for 2006 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma

invoice. Orders should be sent to the address shown, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols) Print and online	US\$3084	£1630	€2774
Online only	US\$2600	£1378	€2340
Single issues (print only)	US\$152	£80	€136

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £64.90/€110.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

**● Electronic back archive** This is freely available to all users with Internet access.

**● Microfiche and back issues** Volumes 102–336 of the *Biochemical Journal* are available

on microfiche. Back issues are also available. Further details may be obtained from the address below.

The N-terminal domain of the human eIF2 $\beta$ subunit and the CK2 phosphorylation sites are required for its function <i>Published as BJ Immediate Publication 14 October 2005,</i> <i>doi:10.1042/BJ20050605</i>	F. Llorens, A. Duarri, E. Sarró, N. Roher, M. Plana and E. Itarte	 227–236
Rescue of cell growth by sphingosine with disruption of lipid microdomain formation in <i>Saccharomyces cerevisiae</i> deficient in sphingolipid biosynthesis <i>Published as BJ Immediate Publication 17 October 2005,</i> <i>doi:10.1042/BJ20051354</i>	M. Tani, A. Kihara and Y. Igarashi	237–242

Spectroscopic and kinetic characterization of the light-dependent enzyme protochlorophyllide oxidoreductase (POR) using monovinyl and divinyl substrates <i>Published as BJ Immediate Publication 7 November 2005, doi:10.1042/BJ20051635</i>	D.J. Heyes, J. Kruk and C.N. Hunter	243–248
Oxidative folding of hirudin in human serum <i>Published as BJ Immediate Publication 7 November 2005, doi:10.1042/BJ20051660</i>	J.-Y. Chang, B.-Y. Lu and P.-H. Lai	249–257
Coupling of protein motions and hydrogen transfer during catalysis by <i>Escherichia coli</i> dihydrofolate reductase <i>Published as BJ Immediate Publication 24 October 2005, doi:10.1042/BJ20051464</i>	R.S. Swanwick, G. Maglia, L.-h. Tey and R.K. Allemann	259–265
 online data		
Regulation of cysteine dioxygenase degradation is mediated by intracellular cysteine levels and the ubiquitin–26 S proteasome system in the living rat <i>Published as BJ Immediate Publication 1 November 2005, doi:10.1042/BJ20051510</i>	J.E. Dominy, Jr, L.L. Hirschberger, R.M. Coloso and M.H. Stipanuk	267–273
Metallothionein protects against oxidative stress-induced lysosomal destabilization <i>Published as BJ Immediate Publication 19 October 2005, doi:10.1042/BJ20051143</i>	S.K. Baird, T. Kurz and U.T. Brunk	275–283
Identification of the anti-inflammatory protein tristetraprolin as a hyperphosphorylated protein by mass spectrometry and site-directed mutagenesis <i>Published as BJ Immediate Publication 1 November 2005, doi:10.1042/BJ20051316</i>	H. Cao, L.J. Deterding, J.D. Venable, E.A. Kennington, J.R. Yates III, K.B. Tomer and P.J. Blackshear	285–297
 online data		
Intestinal alkaline sphingomyelinase hydrolyses and inactivates platelet-activating factor by a phospholipase C activity <i>Published as BJ Immediate Publication 31 October 2005, doi:10.1042/BJ20051121</i>	J. Wu, Å. Nilsson, B.A.G. Jönsson, H. Stenstad, W. Agace, Y. Cheng and R.-D. Duan	299–308
Biochemical characterization of RGS14: RGS14 activity towards G-protein $\alpha$ subunits is independent of its binding to Rap2A <i>Published as BJ Immediate Publication 25 October 2005, doi:10.1042/BJ20051086</i>	V. Mittal and M.E. Linder	309–315
Induction of spermidine/spermine N <sup>1</sup> -acetyltransferase (SSAT) by aspirin in Caco-2 colon cancer cells <i>Published as BJ Immediate Publication 1 November 2005, doi:10.1042/BJ20051298</i>	N. Babbar, E.W. Gerner and R.A. Casero, Jr	317–324
Effects of hypoxia, glucose deprivation and acidosis on phosphatidylcholine synthesis in HL-1 cardiomyocytes. CTP:phosphocholine cytidylyltransferase activity correlates with sarcolemmal disruption <i>Published as BJ Immediate Publication 20 October 2005, doi:10.1042/BJ20050834</i>	E. Sarri, D. Garcia-Dorado, A. Abellan and J. Soler-Soler	325–334
Comparative characterization and expression analysis of the four Old Yellow Enzyme homologues from <i>Shewanella oneidensis</i> indicate differences in physiological function <i>Published as BJ Immediate Publication 18 November 2005, doi:10.1042/BJ20050979</i>	A. Brigé, D. van den Hemel, W. Carpentier, L. De Smet and J.J. Van Beeumen	335–344
Binding of the C-terminal domain of the HIV-1 capsid protein to lipid membranes: a biophysical characterization <i>Published as BJ Immediate Publication 31 October 2005, doi:10.1042/BJ20051487</i>	F.N. Barrera, E. Hurtado-Gómez, M.C. Lidón-Moya and J.L. Neira	345–353
Role of N-terminal residues in the ubiquitin-independent degradation of human thymidylate synthase <i>Published as BJ Immediate Publication 1 November 2005, doi:10.1042/BJ20051479</i>	M.M.O. Peña, Y.Y. Xing, S. Koli and F.G. Berger	355–363
Characterization of the reversible phosphorylation and activation of ERK8 <i>Published as BJ Immediate Publication 9 December 2005, doi:10.1042/BJ20051288</i>	I.V. Klevernic, M.J. Stafford, N. Morrice, M. Peggie, S. Morton and P. Cohen	365–373

## Editorial Board

### Chair

**G. Banting** • Bristol

Vice Chair, The Americas

**G. Salvesen** • La Jolla

### Reviews Editor

**A. Toker** • Boston

### Deputy Chairs

**D. R. Alessi** • Dundee

**S. V. Graham** • Glasgow

**S. Gutteridge** • Newark, DE

**D. Hoekstra** • Groningen

**N. M. Hooper** • Leeds

**J. P. Kehler** • Pullman, WA

**C. MacKintosh** • Dundee

**K. H. Mayo** • Minneapolis

**P. R. Shepherd** • Auckland

**H. M. Wallace** • Aberdeen

**M. P. Walsh** • Calgary

### Publisher

**P. J. Starley**

### Production Editor

**M. D. Cunningham**

### Executive Editor

**M. R. Thorne**

### Senior Staff Editor

**S. M. Hobday**

### Staff Editors

**L. Ball**

**E. A. G. Eolloway**

**J. W. Mockridge**

### Editorial Assistant

**E. E. C. Bible**

### Administrative Editor, US Office

**S. Schendel**
