- The *Biochemical Journal* (ISSN 0264-6021 for print/online journal; ISSN 1470-8728 for online only journal) is published and distributed by Portland Press Ltd on behalf of the Biochemical Society (the owner), and appears twice monthly.
- **Editorial and publishing offices:** *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K.
- **Biochemical Journal**, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Subscriptions department:** Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K.
- All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any forms or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0264-6021/2005/\$40.00 + 0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the above-mentioned address.
- Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the editors nor the publisher assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editors, the publisher or the owner.
- Periodicals postage paid at Rahway, NJ, U.S.A.
- **Postmaster:** send address corrections to *Biochemical Journal*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.
- **Cover illustration:** Surface electrostatic potential maps of the lipophilic monocation methyltriphenylphosphonium and the lipophilic dication 1,2-ethanediybis(triphenylphosphonium) and 1,6-hexanediybis(triphenylphosphonium). Image kindly supplied by Michael Murphy (MRC Dunn Human Nutrition Unit, Cambridge, UK).

Instructions to Authors

● **General policy** The *Biochemical Journal* publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to biochemical knowledge. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered equally with papers dealing with experimental work. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, confirmatory or inconclusive work will not be published. The *Biochemical Journal* will not publish material that has been wholly or largely published elsewhere, even as a preliminary communication or in refereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of paper are included in the journal.

● **Research Papers** are the normal form of publication, and may be of any length that is justified by their content. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted

if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the *Biochemical Journal* are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

● **Accelerated Publications (APs)** are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full but accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Papers reporting nucleotide sequences only are not acceptable as APs. From January 2007, colour figures will be published free of charge in APs, provided the use of colour is deemed scientifically necessary by the reviewers.

● **Reviews** will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

● **Procedure for submission** These instructions do not replace the official *Biochemical Journal* Instructions to Authors (<http://www.BiochemJ.org>). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of cross-headings, layout of tables and figures and citation of references. A full page of text in the *Biochemical Journal* contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work' must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of

citation are permitted in the text only, not in the list of references.

● **Submit manuscripts online** Authors should submit manuscripts electronically using the Online Submission and Review System available at <http://www.BiochemJ.org/submit/>

● **Immediate Publications** Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Immediate Publications are listed in and accessible through Medline, and are freely available to anyone with Internet access.

● **Queries and correspondence** Authors in the Americas should address all queries and correspondence about their submission to: Dr Sharon Schendel, BJ USA, The Burnham Institute, 10901 N. Torrey Pines Road, La Jolla, CA 92037, U.S.A. (telephone +1 858 713 6283; fax +1 858 713 6284; email editorial@biochemjusa.org). Authors in the U.K., the rest of Europe, Japan and the rest of the world should contact: The Publisher, *Biochemical Journal*, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K. (telephone +44 20 7280 4110; fax +44 20 7280 4169; email editorial@portlandpress.com).

● **COPE** The *Biochemical Journal* is a member of the Committee on Publication Ethics and endorses its guidelines, which are available at <http://publicationethics.org.uk>

● **Colour figures** From January 2007, colour figures are published free of charge provided that one author has been a member of the Biochemical Society for at least 2 years and that the use of colour is deemed scientifically necessary by the reviewers. Otherwise the charges are £550 for the first colour figure and £300 for each subsequent colour figure.

● **Multimedia adjuncts** The Biochemical Journal Online offers authors the opportunity to enhance their papers with multimedia adjuncts (e.g. time-lapse movies, three-dimensional structures, animated schemes). These will be submitted to peer review alongside the manuscript. To submit a paper with a multimedia adjunct, please attach the file when you submit your manuscript electronically. Preferred formats are QuickTime for time-lapse movies, PDB for structures and Flash for animated schemes. There is no extra charge associated with the publication of a multimedia adjunct online.

Other information

The *Biochemical Journal* is published and distributed by Portland Press Ltd on behalf of the Biochemical Society. It is published twice monthly; in 2006 volumes 393–400 (three parts each) will appear. The subscription also includes an author and key-word index.

● **Abstracted by/indexed in:** BIOBASE, BIOSIS, CAB International, Chemical Abstracts Service, Current Contents, EMBASE, International Food Information Service, Medline/Index Medicus, Proquest Information & Learning, Science Citation Index.

● **Subscription rates** Institutional subscription rates for 2006 are shown below. Subscribers to the *Biochemical Journal* can subscribe additionally to *Biochemical Society Transactions* and *Biotechnology and Applied Biochemistry* on a joint subscription at a reduced rate. Terms are cash with order (US\$ in N. America, £ sterling for rest of the world, or US\$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma

invoice. Orders should be sent to the address shown, or through your usual agent.

	N. America	Rest of world	Euro price
One year (8 vols)	US\$3084	£1630	€2774
Print and online	US\$2600	£1378	€2340
Online only	US\$152	£80	€136
Single issues (print only)			

Overseas rates include airfreight delivery. Priority delivery is available at an additional cost of £64.90/€110.

VAT is due on some supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

● **Electronic back archive** This is freely available to all users with Internet access.

● **Microfiche and back issues** Volumes 102–336 of the *Biochemical Journal* are available

on microfiche. Back issues are also available. Further details may be obtained from the address below.

● **Advertising** Enquiries about advertising should be addressed to: Mark Burgess, Editorial Department, Portland Press Ltd, Third Floor, Eagle House, 16 Procter Street, London WC1V 6NX, U.K., tel.: +44 (0)20 7280 4110, fax: +44 (0)20 7280 4169, email: editorial@portlandpress.com

● The paper and cover-boards used in this journal are sourced from sustainable, managed and renewed commercial forests, and are fully recyclable. The bleaching process used for the pulp is 100% ECF (elemental chlorine free).

Research Papers

- Functional characterization of the dimerization domain of the ferric uptake regulator (Fur) of *Pseudomonas aeruginosa*
Published as BJ Immediate Publication 24 August 2006, doi:10.1042/BJ20061168 E. Bai, F.I. Rosell, B. Lige, M.R. Mauk, B. Lelj-Garolla, G.R. Moore and A.G. Mauk **385–392**
- Transmembrane proteins are not required for early stages of nuclear envelope assembly
Published as BJ Immediate Publication 6 September 2006, doi:10.1042/BJ20061218 C. Ramos, E.R. Rafikova, K. Melikov and L.V. Chernomordik **393–400**
- Spatial segregation of transport and signalling functions between human endothelial caveolae and lipid raft proteomes
Published as BJ Immediate Publication 4 August 2006, doi:10.1042/BJ20060355 R.R. Sprenger, R.D. Fontijn, J. van Marle, H. Pannekoek and A.J.G. Horrevoets **401–410**
- Regulation of the cardiac L-type calcium channel in L6 cells by arginine-vasopressin
Published as BJ Immediate Publication 16 August 2006, doi:10.1042/BJ20060742 B.M. Hantash, A.P. Thomas and J.P. Reeves **411–419**
- Primary attachment of murine leukaemia virus vector mediated by particle-associated heparan sulfate proteoglycan
Published as BJ Immediate Publication 8 August 2006, doi:10.1042/BJ20060825 N. Kureishy, D. Faruque and C.D. Porter **421–430**
- Role of nucleotides and phosphoinositides in the stability of electron and proton currents associated with the phagocytic NADPH oxidase
Published as BJ Immediate Publication 14 July 2006, doi:10.1042/BJ20060578 G.L. Petheö, N.C. Girardin, N. Goossens, G.Z. Molnár and N. Demareux **431–438**
- Recruitment of histone deacetylase 4 by transcription factors represses interleukin-5 transcription
Published as BJ Immediate Publication 22 August 2006, doi:10.1042/BJ20061085 S. Han, J. Lu, Y. Zhang, C. Cheng, L. Han, X. Wang, L. Li, C. Liu and B. Huang **439–448**
- Structural studies on the RNA-recognition motif of NELF E, a cellular negative transcription elongation factor involved in the regulation of HIV transcription
Published as BJ Immediate Publication 9 August 2006, doi:10.1042/BJ20060421 J.N. Rao, L. Neumann, S. Wenzel, K. Schweimer, P. Rösch and B.M. Wöhrl **449–456**
- Protein 4.1R self-association: identification of the binding domain
Published as BJ Immediate Publication 2 August 2006, doi:10.1042/BJ20060644 C.M. Pérez-Ferreiro, E. Lospitao and I. Correas **457–465**
- A novel locust (*Schistocerca gregaria*) serine protease inhibitor with a high affinity for neutrophil elastase
Published as BJ Immediate Publication 13 July 2006, doi:10.1042/BJ20060437 M. Brillard-Bourdet, A. Hamdaoui, E. Hajjar, C. Boudier, N. Reuter, L. Ehret-Sabatier, J.G. Bieth and F. Gauthier **467–476**
- ATPase activity associated with the magnesium chelatase H-subunit of the chlorophyll biosynthetic pathway is an artefact
Published as BJ Immediate Publication 24 August 2006, doi:10.1042/BJ20061103 N. Sirijovski, U. Olsson, J. Lundqvist, S. Al-Karadaghi, R.D. Willows and M. Hansson **477–484**

SREBP-2 positively regulates transcription of the cholesterol efflux gene, ABCA1, by generating oxysterol ligands for LXR <i>Published as BJ Immediate Publication 11 August 2006, doi:10.1042/BJ20060914</i>	J. Wong, C.M. Quinn and A.J. Brown		485–491
Characterization of A-kinase-anchoring disruptors using a solution-based assay <i>Published as BJ Immediate Publication 1 September 2006, doi:10.1042/BJ20060962</i>	A.J. Stokka, F. Gesellchen, C.R. Carlson, J.D. Scott, F.W. Herberg and K. Taskén		493–499
Multiple forms of copper (II) co-ordination occur throughout the disordered N-terminal region of the prion protein at pH 7.4 <i>Published as BJ Immediate Publication 22 August 2006, doi:10.1042/BJ20060721</i>	M.A. Wells, C. Jelinska, L.L.P. Hosszu, C.J. Craven, A.R. Clarke, J. Collinge, J.P. Waltho and G.S. Jackson		501–510
Phosphorylation inhibits turnover of the tau protein by the proteasome: influence of <i>RCAN1</i> and oxidative stress <i>Published as BJ Immediate Publication 29 August 2006, doi:10.1042/BJ20060463</i>	D. Poppek, S. Keck, G. Ermak, T. Jung, A. Stolzing, O. Ullrich, K.J.A. Davies and T. Grune		511–520
Invariant Thr ²⁴⁴ is essential for the efficient acylation step of the non-phosphorylating glyceraldehyde-3-phosphate dehydrogenase from <i>Streptococcus mutans</i> <i>Published as BJ Immediate Publication 8 September 2006, doi:10.1042/BJ20060843</i>	A. Pailot, K. D'Ambrosio, C. Corbier, F. Talfournier and G. Branlant		521–530
Directed evolution of a monomeric, bright and photostable version of <i>Clavularia</i> cyan fluorescent protein: structural characterization and applications in fluorescence imaging <i>Published as BJ Immediate Publication 24 July 2006, doi:10.1042/BJ20060874</i>	H.-w. Ai, J.N. Henderson, S.J. Remington and R.E. Campbell		531–540
Investigation of the mechanism of proton translocation by NADH:ubiquinone oxidoreductase (complex I) from bovine heart mitochondria: does the enzyme operate by a Q-cycle mechanism? <i>Published as BJ Immediate Publication 8 August 2006, doi:10.1042/BJ20060766</i>	S. Sherwood and J. Hirst		541–550
Serase-1B, a new splice variant of polyserase-1/TMPRSS9, activates urokinase-type plasminogen activator and the proteolytic activation is negatively regulated by glycosaminoglycans <i>Published as BJ Immediate Publication 28 July 2006, doi:10.1042/BJ20060212</i>	Y. Okumura, M. Hayama, E. Takahashi, M. Fujiuchi, A. Shimabukuro, M. Yano and H. Kido		551–561
The Dbs PH domain contributes independently to membrane targeting and regulation of guanine nucleotide-exchange activity <i>Published as BJ Immediate Publication 28 September 2006, doi:10.1042/BJ20061020</i>	M.A. Baumeister, K.L. Rossmann, J. Sondek and M.A. Lemmon		563–572
TopBP1 contains a transcriptional activation domain suppressed by two adjacent BRCT domains <i>Published as BJ Immediate Publication 20 September 2006, doi:10.1042/BJ20060831</i>	R.H.G. Wright, E.S. Dornan, M.M. Donaldson and I.M. Morgan		573–582
