The Royal Institute of Chemistry of Great Britain and Ireland

PATRON: H.M. THE KING

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register such persons. The aims of the Institute include the elevation of the profession and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership and by setting up a high standard of scientific and practical efficiency. The designation "Royal" was conferred on the Institute by a Supplemental Charter in 1944.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar

Determination of Hæmoglobin and Serum Proteins

The method of R. A. Phillips and collaborators enables the total proteins in serum to be determined in a few minutes without recourse to Kjeldahl combustions.

The B.D.H. has now made available a complete, self-contained and portable outfit for applying the method to serum protein and hæmoglobin determinations. Price £7. 10s. od. complete in wood carrying case. Supplies are limited, early ordering is strongly recommended.
