THE JOURNAL OF
PHYSIOLOGY

Vol. 106, No. 4

October 1947

CONTENTS

ANREP, G. V., BARSOUM, G. S. AND IBRAHIM, A. THE HISTAMINOLYTIC ACTION OF BLOOD DURING PREGNANCY.

VOG'T, MARTHE. CORTICAL LIPIDS OF THE NORMAL AND DENERVATED SUPRARENAL GLAND UNDER CONDITIONS OF STRESS.

CUTTING, MARGERY AND McCANCE, R. A. THE EFFECT OF CALCIUM IONS ON THE RESPIRATION OF KIDNEY SLICES OF NEWBORN AND MATURE RATS.

KATZ, BERNHARD. THE EFFECT OF ELECTROLYTE DEFICIENCY ON THE RATE OF CONDUCTION IN A SINGLE NERVE FIBRE.

WEST, G. B. QUANTITATIVE STUDIES OF ADRENALINE AND NORADRENALINE.

WEST, G. B. THE ESTIMACIÓN OF ADRENALINE IN NORMAL RABBIT'S BLOOD.

DEAN, R. F. A. AND McCANCE, R. A. INULIN, DIODONE, CREATININE AND UREA CLEARANCES IN NEWBORN INFANTS.

EGGLETON, M. GRACE. SOME FACTORS AFFECTING THE ACIDITY OF URINE IN MAN.

WALSH, E. G. VAGAL NERVE FIBRE ACTIVITY FOLLOWING MULTIPLE PULMONARY EMBOLISM.

EMMENS, C. W. THE MOTILITY AND VIABILITY OF RABBIT SPERMATOZOA AT DIFFERENT HYDROGEN-ION CONCENTRATIONS.

EMMELIN, N. AND FELDBERG, W. THE SMOOTH MUSCLE CONTRACTING EFFECTS OF VARIOUS SUBSTANCES SUPPOSED TO ACT ON NERVOUS STRUCTURES IN THE INTESTINAL WALL.

THE BRITISH JOURNAL OF NUTRITION

Published for The Nutrition Society

A new quarterly journal devoted to the publication of reports of original work in all branches of nutrition and incorporating the Proceedings of The Nutrition Society, at present published separately.

SUBSCRIPTIONS: Payable in advance are £3 per volume (including postage), single parts 20s. each (postage extra). Volume 1, No. 1, will be published in October 1947.

Copies may be ordered from your bookseller or direct from the publishers the

CAMBRIDGE UNIVERSITY PRESS

SCIENTIFIC PUBLICATIONS

Back Numbers Needed

The Overseas Libraries have been seriously depleted throughout the war years, and Publications of the following Societies are URGENTLY required:

- Chemical Society
- Society of Chemical Industry
- Society of Public Analysts
- The Faraday Society
- The Biochemical Society
- Society of Chemical Engineers
- Society of Dyers and Colourists
- Institute of Petroleum Technologists
- Institute of Textiles

Etc.

Offers of Long Runs, Complete Sets, or Single Issues will be gratefully accepted. Good Prices Given

"OXOID" Therapeutical Preparations

For Culture Media

"OXOID" Brand

BACTERIOLOGICAL PEPTONE

USE
A Peptone of the highest quality for the general culture of all species of Bacteria.

SUPPLIED
As a readily soluble granular powder. Packed in sizes to suit all requirements.

NOTES
Particularly useful for Presumptive Coll and Indol tests. Further information may be obtained from "Oxoid" Leaflet No. 122.

LAB LEMCO

USE
Standardised meat extract specially manufactured for Bacteriological Laboratories.

SUPPLIED
In 2-oz. jars.

NOTES
Each batch issued can be guaranteed to yield identical analytical figures. Further information may be obtained from "Lab Lemco" leaflet.

The Royal Institute of Chemistry of Great Britain and Ireland

PATRON: H.M. THE KING

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognizing those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register such persons. The aims of the Institute include the elevation of the profession and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership and by setting up a high standard of scientific and practical efficiency. The designation "Royal" was conferred on the Institute by a Supplemental Charter in 1944.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar

Duty-free Solvent for Blood Stains

Solvent methyl alcohol B.D.H. can now be supplied for use as a solvent for Giemsa's, Jenner's and Leishman's stains, and for Knuyt-Gordon's panoptic stain.

As solvent methyl alcohol B.D.H. is a non-excisable quality of methyl alcohol its use reduces considerably the cost of preparing solutions of this group of stains, for which methyl alcohol AnalalR (duty paid) has previously been recommended.

Prices:
100 g. 2/-
