VERSATILITY plus FLEXIBILITY

B.T.L. unit metal laboratory furniture at present comprises nine different units which in various combinations can be made up into laboratories to suit a wide range of individual requirements. They also allow for replanning and developing laboratories as needs change. They simplify the estimation of costs. Delivery is speedy and installation simple. Write for folder (BJ3) giving full details.

PHOTOELECTRIC EQUIPMENT

THE PORTABLE COLORIMETER

Combines in a robust case, the Colorimeter, Microammeter and power supply. This instrument provides a simple photoelectric means of accurately assessing the colour density of a liquid. Any variations can be immediately read on the logarithmic scale of the microammeter. A scientific apparatus with many applications in medical and chemical spheres.

PRICE 26 GUINEAS

Complete with filters, matched test tubes and accumulator.

A.C. MODEL 30 GUINEAS
Incorporating constant voltage transformer

Send for full details of this and other photoelectric equipment incorporating the famous "EEL" selenium cells.

THE

HILGER

BIOCHEM ABSORPTIOMETER

A RAPID DIRECT READING PHOTOELECTRIC INSTRUMENT for colorimetric analyses

Used with test-tubes or precision all-glass cells.

Specially suitable for vitamin A assay by the Carr-Price reaction.

Six-volt lamp run from battery or constant voltage transformer.

Ask for Catalogue B/314

HILGER & WATTS LTD. 98 St Pancras Way, Camden Rd. LONDON, N.W.1
HILGER DIVISION Phone: GULiver 5571
Unicam Spectrophotometer S.P. 500; monochromator with instrument panel, cell chamber, lamp and photo tube housings.

The wavelength range of this instrument is 200-2,000 millimicrons. A quartz hydrogen discharge lamp is used for the U.V. region and a tungsten filament lamp for the visual. Separate photo-tubes are switched in for each region. Further details will gladly be sent on request.

Unicam Instruments are used by research laboratories in almost every country in the world

UNICAM CAMBRIDGE

The Philosophy of Sir Arthur Eddington

A. D. RITCHIE

The first Eddington Memorial Lecture given at Cambridge last November, in which Professor Ritchie expounds the bases of Eddington's general philosophy, discusses the notion of the Cosmic Number, and examines the relation between science and religion. 2s. net

Rhenium: Dvi-Manganese

J. G. F. DRUCE

The element of atomic number 75 was discovered in 1925 by three independent groups of investigators. This book gives a comprehensive survey of what is now known about the chemistry of rhenium. 10s. 6d. net

Fourier Technique in X-ray Organic Structure Analysis

A. D. BOOTH

The latest monograph in the Cambridge Series of Physical Chemistry, edited by Professor E. K. Rideal, intended for the research student and advanced worker in crystallography. 12s. 6d. net

CAMBRIDGE UNIVERSITY PRESS
Research in Pharmacology and Chemotherapy

THE QUARTERLY JOURNAL OF PHARMACY AND PHARMACOLOGY

publishes original research papers, and abstracts of the world’s literature on pharmacology, chemotherapy, biochemistry, pharmacy, pharmacognosy and allied subjects. The following are examples of research papers included in the current issue:

Editor: C. H. Hampshire, M.B., B.S., B.Sc., Ph.DE., F.R.I.C.

Annual Subscription (including binding cover): 30s.

THE PHARMACEUTICAL PRESS
17 Bloomsbury Square, London, W.C.1
(Publishers of the British Pharmacopoeia and the Extra Pharmacopoeia)

8 more B.D.H.

AMINO ACIDS

are now available in adequate quantities for laboratory use from normal B.D.H. production, and again enquiries for larger amounts are invited. The new additions are:

DL-Glutamic acid
DL-Methionine
Glycocyamine
DL-Norepinephrine
DL-Histidine
DL-Ornithine (hydrobromide)
(Also DL-Histidine monohydrochloride)
DL-Histidine dihydrochloride
DL-Isoleucine
DL-Tyrosine
Prices may be obtained on request for these substances as well as for the amino acids already announced as in regular production—

DL-Alanine
L-Lysine hydrochloride
L-Arginine hydrochloride
DL-Norleucine
DL-Aspartic acid
DL-Pheynylalanine
L-Glutamic acid
DL-Serine
L-Leucine
DL-Threonine
DL-Leucine
DL-Tryptophane

Development work continues on L-glutamme, DL-lysine hydrochloride and DL-threonine, and also on β-alanine and sarcosine. It is expected that these and others will be ready for issue shortly.

Pioneers in Vitamin Research
WELWYN GARDEN CITY, ENGLAND

The Royal Institute of Chemistry of Great Britain and Ireland

PATRON: H.M. THE KING

THE INSTITUTE OF CHEMISTRY was established in 1877 to provide the Government and the public with the means of recognising those who have been properly trained and proved to be competent to practise chemistry as a profession. In 1885 the Institute was granted a Royal Charter with authority to grant certificates of competency, and to register such persons. The aims of the Institute include the elevation of the profession and the maintenance of the efficiency, integrity and usefulness of persons practising the same, by compelling the observance of strict rules of membership and by setting up a high standard of scientific and practical efficiency. The designation “Royal” was conferred on the Institute by a Supplemental Charter in 1944.

Particulars of the Regulations and Examinations of the Institute can be obtained (free) on application to the Registrar
