CONTENTS OF VOLUME 46, NO. 2, 1950

(All rights reserved)

A limited number of separates of these papers are available. Orders must be addressed to Biochemical Journal, Postgraduate Medical School of London, Ducane Road, London, W. 12, and must be accompanied by a remittance of 1s. 6d. for each copy.

Page

Autodigestion of the fatty acids. 3. The oily products from elaidic and oleic acids. The formation of monoacetyl derivatives of dihydroxystearic acid and of \( \alpha \beta \)-unsaturated keto acids. By G. W. Ellis. (With three figures) .................................................. 129

Studies on the more soluble complexes of soil organic matter. 2. The composition of the soluble polysaccharide fraction. By W. G. C. Forsyth ................................................................. 141

The porphyrins of acute porphyria. The detection of hitherto unrecognized porphyrins. By R. R. McSwiney, R. E. H. Nicholas and F. T. G. Prunty. (With eight figures) .................. 147

A note on the urinary uroporphyrin in acute porphyria. By Q. H. Gibson and D. C. Harrison .......................... 154

The site of action of penicillin. 1. Uptake of penicillin on bacteria. By D. Rowley, P. D. Cooper, P. W. Roberts and E. Lester Smith. (With three figures) ............................................ 157

The effect of high- and low-plane feeding on the serum protein levels of pregnant ewes, foetuses and young lambs. By A. DalCarno, W. Godden and E. F. McCarthy. (With two figures) ...................... 162

Iron metabolism and haemoglobin formation in the embryonated hen egg. 1. The overall production of haem pigments during incubation. By W. N. M. Ramsay. (With five figures) ............... 168

Determination of \( \beta \)-naphthoxyethanol in blood. By A. Spinks. (With five figures) ............................................. 178

Metabolism of \( \beta \)-naphthoxyethanol in the rabbit. By A. Spinks. (With six figures) ........................................... 182

The quantitative determination and identification of pregnane-3\( \alpha \):20\( \alpha \)-dil in the urine of the pregnant rabbit. By W. G. Verly, I. F. Sommerville and G. F. Marrian. (With seven figures) ..................................................... 186

Lysine analogues as inhibitors of bacterial growth. By J. I. Harris and T. S. Work ............................................... 190

The synthesis of peptides related to gramicidin S and the significance of optical configuration in antibiotic peptides. 1. Tripeptides. By J. I. Harris and T. S. Work. (With one figure) .................. 196

The steady state, a test for electrophoretic homogeneity. By H. Hock. (With five figures) ................................. 199

The irreversibility of the deamination of threonine in the rabbit and rat. By D. F. Elliott and A. Neuberger ................................................................. 207

The oxidation of various synthetic \( \alpha \)-amino-acids by mammalian \( \delta \)-amino-acid oxidase, \( \lambda \)-amino-acid oxidase of cobra venom and the \( \lambda \)- and \( \delta \)-amino-acid oxidases of Neurospora crassa. By A. E. Bender and H. A. Krebs .......................... 210

The biosynthesis of prodigiosin, the tripyrrolmethene pigment from Bacillus prodigiosus (Serratia marcescens). By R. Hubbard and C. Rimington. (With two figures) .................. 220

Oral toxicity and lipotropic potency of the triethyl homologue of choline. By C. S. McArthur and C. C. Lucas. (With two figures) ................................................................. 226

The effect of surface-active agents on bacterial glutamic decarboxylase and glutaminase. By D. E. Hughes. (With one figure) ................................................................. 231

Studies in detoxication. 30. The metabolism of benzene. (a) The determination of benzene. (b) The elimination of unchanged benzene by rabbits. By D. V. Parke and R. T. Williams. (With nine figures) ............................ 236

Studies in detoxication. 31. The isolation of \( m \)- and \( p \)-cyanophenols as metabolites of cyanobenzene (benzonitrile) and the problem of the orientation of hydroxyl groups formed in vivo. By J. N. Smith and R. T. Williams ................................................................. 243

The oxidation of pyruvate and fatty acids by Mycobacterium ranae. By M. Lindsay, T. V. O'Donnell and N. L. Edson. (With two figures) ................................................................. 248

A new naturally occurring amino-acid. By E. Work

The interaction between simple sugars and amino-acids. By A. Gottschalk and S. M. Partridge

The measurement of vitamin B₁₂ by biological assay with chicks. By M. E. Coates, G. F. Harrison and S. K. Kon

The distribution of cholinesterase types in autonomically innervated tissues. By M. G. Ord and R. H. S. Thompson

Supplementary enzyme in brown adipose tissue. By N. H. Creasey and C. H. Gray

Comparative studies of 'bile salts'. 1. Preliminary survey. By G. A. D. Haslewood and V. Wootton

Comparative studies of bile salts. 2. The nature of pythonic acid. By G. A. D. Haslewood and V. Wootton

The solubility of enamel nitrogen. By D. J. Anderson

Organic constituents of dentine. By M. V. Stack

Estimation of trichloroethylene in blood. By F. H. Brian and P. Helliwell

Comparative studies of bile salts. By V. Wootton

A three-dimensional scatter diagram. By J. N. Hunt

The estimation of nitrogen in dental enamel. By D. J. Anderson

A case of virilizing tumour of the ovary. By W. H. H. Merivale
