

Reviews

- Nodulation outer proteins: double-edged swords of symbiotic rhizobia** C. Staehelin and H.B. Krishnan 263–274
Version of Record published 4 September 2015,
doi:10.1042/BJ20150518
- Redox and trace metal regulation of ion channels in the pain pathway** J.G. Evans and S.M. Todorovic 275–280
Version of Record published 4 September 2015,
doi:10.1042/BJ20150522

Online Commentaries

- Targeting cancer metabolism at the plasma membrane by limiting amino acid access through SLC6A14 A.N. McCracken and A.L. Edinger e17–e19
Version of Record published 4 September 2015,
doi:10.1042/BJ20150721
- LRRK2 and ubiquitination: implications for kinase inhibitor therapy H.L. Melrose e21–e24
Version of Record published 4 September 2015,
doi:10.1042/BJ20150785

Research Papers

- Down-regulation of *EPHX2* gene transcription by Sp1 under high-glucose conditions A. Oguro, S. Oida and S. Imaoka 281–291
Accepted Manuscript online 15 July 2015,
doi:10.1042/BJ20150397
- The miRNA *miR-34a* enhances HIV-1 replication by targeting PNUTS/PPP1R10, which negatively regulates HIV-1 transcriptional complex formation R. Kapoor, S. Arora, S.S. Ponia, B. Kumar, S. Maddika and A.C. Banerjea 293–302
Accepted Manuscript online 16 July 2015,
doi:10.1042/BJ20150700
- Phosphorylation of FE65 Ser⁶¹⁰ by serum- and glucocorticoid-induced kinase 1 modulates Alzheimer's disease amyloid precursor protein processing W.N.V. Chow, J.C.K. Ngo, W. Li, Y.W. Chen, K.M.V. Tam, H.Y.E. Chan, C.C.J. Miller and K.-F. Lau 303–317
Accepted Manuscript online 17 July 2015,
doi:10.1042/BJ20141485
- ATP stimulates pannexin 1 internalization to endosomal compartments A.K.J. Boyce, M.S. Kim, L.E. Wicki-Stordeur and L.A. Swayne 319–330
Accepted Manuscript online 20 July 2015,
doi:10.1042/BJ20141551
- The mucopolipidosis IV Ca²⁺ channel TRPML1 (MCOLN1) is regulated by the TOR kinase R.U. Onyenwoke, J.Z. Sexton, F. Yan, M.C.H. Diaz, L.J. Forsberg, M.B. Major and J.E. Brenman 331–342
Accepted Manuscript online 20 July 2015,
doi:10.1042/BJ20150219
- Formation of the ether lipids archaetidylglycerol and archaetidylethanolamine in *Escherichia coli* A. Caforio, S. Jain, P. Fodran, M. Siliakus, A.J. Minnaard, J. van Der Oost and A.J.M. Driessen 343–355
Accepted Manuscript online 20 July 2015,
doi:10.1042/BJ20150626
- A unique serpin P1' glutamate and a conserved β -sheet C arginine are key residues for activity, protease recognition and stability of serpinA12 (vaspin) D. Ulbricht, J. Pippel, S. Schultz, R. Meier, N. Sträter and J.T. Heiker 357–367
Accepted Manuscript online 21 July 2015,
doi:10.1042/BJ20150643
