General policy

The Biochemical Journal publishes papers in English in all fields of biochemistry and cellular and molecular biology, provided that they make a sufficient contribution to knowledge in these fields. Papers may include new results obtained experimentally, descriptions of new experimental methods of biochemical importance, or new interpretations of existing results. Novel theoretical contributions will be considered, although these papers should also contain some experimental testing of the theory. All work presented should have as its aim the development of biochemical concepts rather than the mere recording of facts. Preliminary, theoretical contributions will be considered, although or new interpretations of existing results. Novel published material that has been wholly or largely published elsewhere, even as a preliminary communication or in refereed symposium proceedings or on the World Wide Web (WWW); equally, fragmentation of research into the 'least publishable unit' is discouraged.

Submission of a paper implies that it has been approved by all the named authors, that all persons entitled to authorship have been so named, that it reports unpublished work that is not under consideration elsewhere, and that if the paper is accepted for publication the authors will transfer to the Biochemical Society the copyright in the paper, which will then not be published elsewhere in the same form, in any language, without the consent of the Society. Authors will be required to sign an undertaking to these effects.

Authors may suggest potential reviewers for their papers, but the journal is under no obligation to follow such suggestions. Authors may also specify the names of those they wish to be excluded from the review process, and such wishes are usually respected unless, in the opinion of the journal, such a request unreasonably excludes all the expertise available to it in that scientific area.

To allow the reviewers to assess possible overlap with previous work, all submitted papers must be accompanied by duplicate copies of the author's relevant published work, including that on the WWW, and of all related papers in press or under editorial consideration in this or other journals.

The following types of papers are included in the journal.

Research Papers are the normal form of publication, and may be of any length that is justified. However, because of pressure for space in the journal, no paper, whatever its scientific merits, will be accepted if it exceeds the minimum length required for precision in describing the experiments and clarity in interpreting them. As a guide, most Research Papers published in the Biochemical Journal are of between six and eight printed pages. A concise well-written paper tends to be published more rapidly.

Accelerated Publications (APs) are short (normally four printed pages) papers bringing particularly novel and significant findings to the attention of the research community. It is intended that a decision on acceptance or rejection will be made within 10 working days of receipt, and publication of accepted APs in an issue will follow within 2 months. APs receive full accelerated reviewing. The criteria of 'novelty and significance' are strictly enforced, and papers may be rejected solely on the grounds of lack of novelty and significance. APs are not a path to accelerated publication of sound but non-urgent material. Authors must include in their letter of submission a brief statement of why they believe their AP merits accelerated treatment. Colour figures will be published free of charge in APs, provided the use of colour is deemed scientifically necessary by the reviewers.

Reviews will usually be solicited, although unsolicited reviews will be considered for publication. Prospective writers of reviews should first consult the Reviews Editor, via the editorial office, and should enclose a short (one page) summary of the area they propose to cover.

Procedure for submission

These instructions do not replace the official Biochemical Journal Instructions to Authors (http://www.biochemj.org). Authors are encouraged to refer to these for overall guidelines on submitting a paper. Before preparing papers for the journal, authors should consult a current issue to make themselves familiar with the general format, such as the use of crossheadings, layout of tables and figures and citation of references. A full page of text in the Biochemical Journal contains approximately 1200 words; when calculating the printed length of papers, allowance must be made for the space occupied by tables and figures and the number of text words reduced accordingly.

The numerical system of references must be used. A reference to 'unpublished work' must be accompanied by the names of all persons concerned: a reference to a 'personal communication' must be supported by written permission for the quotation from the person or persons concerned; both of these types of citation are permitted in the text only, not in the list of references.

Submit manuscripts online

Authors should submit manuscripts electronically using the Online Submission and Review System available at http://www.biochemj.org.

Accepted Manuscripts

Accepted Manuscripts are published online in PDF format as soon as they are accepted, unless on submission the author requests that this not be done. Accepted Manuscripts are listed in and accessible through PubMed.

Open access option

For more information about making a paper open access, see www.portlandpress.com/content/open-access-policy

Queries and correspondence

Authors in China should contact: Dr Lin Huo, Institute of Biophysics, Chinese Academy of Sciences, Room 5202, 15 Datun Road, Chaoyang District, Beijing 100101 (telephone +86 10 64888573; email editorial@biochemj.cn). Authors in the rest of the world should contact: Biochemical Journal Portland Press Limited, Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2UJ, U.K. (telephone +44 20 7685 2410; fax +44 20 7685 2469; email editorial@portlandpress.com).

COPE

The Biochemical Journal is a member of the Committee on Publication Ethics and endorses its guidelines, which are available at http://publicationethics.org.uk

Instructions to Authors

Instructions to Authors

The Biochemical Journal is published by Portland Press Limited on behalf of the Biochemical Society. It is published twice monthly; in 2016 volume 473 (24 parts) will appear.

Subscription rates

Institutional subscription rates for 2016 are shown below. The Biochemical Journal is available in a range of packages with other journals at reduced rates (see www.biochemj.org/content/subscription-rates-and-pricing or email licensing@portlandpress.com for further details). Terms are cash with order (US$ in N. America, £ sterling for rest of the world, or US$ equivalent at current rate of exchange; subscribers in the EU may pay in £ sterling or Euros), or against pro forma invoice. Orders should be sent to the address shown, to your usual agent or purchased online at www.portlandpress.com.

One year (24 issues)

Value Added Tax (VAT) on online-only and ‘combined’ subscriptions is due on supplies to subscribers within the UK, and to non-registered subscribers elsewhere in the EU. If in the EU please state your VAT number otherwise VAT may be charged at the appropriate national rate.

Electronic back archive

The archive of Portland Press journals is available to purchasers either as an annual subscription or for a perpetual access and annual hosting fee. Contact licensing@portlandpress.com for more information.

Subscription Department

Portland Press Third Floor, Charles Darwin House, 12 Roger Street, London WC1N 2UJ, U.K. (telephone 020 76852444; fax 020 76852468; email licensing@portlandpress.com).

Advertising

Enquiries about advertising should be addressed to advertising@portlandpress.com.

The paper and cover-boards used in this journal are sourced from sustainable, managed and recycled commercial forests, and are fully recyclable. The bleaching process used for the pulp is 100% ECF (elemental chlorine free).
Reviews

New photosensitizers for photodynamic therapy
H. Abrahamse and M.R. Hamblin
347–364

Accelerated Publication

The STAS domain of mammalian SLC26A5 prestin harbours an anion-binding site
G. Lolli, G. Pasqualetto, E. Costanzi, E. Bonetto and R. Battistutta
365–370

Research Papers

Inhibition of Wnt signalling and breast tumour growth by the multi-purpose drug suramin through suppression of heterotrimeric G proteins and Wnt endocytosis
A. Koval, K. Ahmed and V.L. Katanaev
371–381

Actin polymerization is stimulated by actin cross-linking protein palladin
383–396

A ternary complex comprising FAK, PTPα and IP3 receptor 1 functionally engages focal adhesions and the endoplasmic reticulum to mediate IL-1-induced Ca2+ signalling in fibroblasts
Q. Wang, Y. Wang, G.P. Downey, S. Plotnikov and C.A. McCulloch
397–410

Kinetic analysis of structural influences on the susceptibility of peroxiredoxins 2 and 3 to hyperoxidation
411–421

Autism-associated R451C mutation in neuroligin3 leads to activation of the unfolded protein response in a PC12 Tet-On inducible system
L. Ulbrich, F.L. Favaloro, L. Trobiani, V. Marchetti, V. Patel, T. Pascucci, D. Comoletti, S.J. Marciniak and A. De Jaco
423–434

Calpain-controlled detachment of major glycoproteins from the cytoskeleton regulates adhesive properties of activated phosphatidylserine-positive platelets
435–448

The cancer-promoting gene fatty acid-binding protein 5 (FABP5) is epigenetically regulated during human prostate carcinogenesis
K. Kawaguchi, A. Kinameri, S. Suzuki, S. Senga, Y. Ke and H. Fuji
449–461

The crystal structure of an inverting glycoside hydrolase family 9 exo-β-D-glucosaminidase and the design of glycosynthase
Y. Honda, S. Arai, K. Suzuki, M. Kitaoka and S. Fushinobu
463–472
Emodin inhibits coxsackievirus B3 replication via multiple signalling cascades leading to suppression of translation
H.M. Zhang, F. Wang, Y. Qiu, X. Ye, P. Hanson, H. Shen and D. Yang
473–485

Palmitate-induced impairment of glucose-stimulated insulin secretion precedes mitochondrial dysfunction in mouse pancreatic islets
J. Barlow, V.H. Jensen, M. Jastroch and C. Affourtit
487–496

Determination of sites of U50,488H-promoted phosphorylation of the mouse κ opioid receptor (KOPR): disconnect between KOPR phosphorylation and internalization
C. Chen, Y.-T. Chiu, W. Wu, P. Huang, P. Mann, S. Schulz and L.-Y. Liu-Chen
497–508

Protein kinase Cζ exhibits constitutive phosphorylation and phosphatidylinositol-3,4,5-triphosphate-independent regulation
I.S. Tobias, M. Kaulich, P.K. Kim, N. Simon, E. Jacinto, S.F. Dowdy, C.C. King and A.C. Newton
509–523
