

THE TOP DRIVE MACERATER

DESIGNED FOR SCIENTIFIC WORK

10,000 R.P.M. and over

•
Interchangeable Glass Jars

•
Readily Cleanable

•
Very Low Price

**"IT DISINTEGRATES ANYTHING—
from VEGETABLES TO VOLES!"**

The stainless steel shaft from the bottom bearing can be readily cleaned, unlike the normal American patterns.

There is special provision for washing down the lid and shaft straight into the jar, and the bearings are of large size, with rubber shock absorbing drive.

TOWNSON & MERCER LTD.

CROYDON, SURREY

**The British Pharmaceutical Codex
1949**

Prescribes standards for and gives comprehensive details of the action, uses, and methods of administration of over 1000 substances used in medicine—vegetable and animal drugs, synthetic chemicals, antibiotics, biological products. Other sections provide standards for and information on blood products, surgical sutures, ligatures and dressings.

There are nearly 900 formulae of tested pharmaceutical preparations; appendices give details of tests, reagents, methods of sterilization, etc.

Pp. xxv + 1563. Price 63s. (inland postage 1s.)

**The Pharmaceutical Pocket Book
15th edition. 1948**

For Student and Practitioner

Pp. 427. Price 12s. 6d. (postage 4d.)

Journal of Pharmacy & Pharmacology

A monthly journal containing records of original research in pharmacy, pharmacology, chemotherapy, biochemistry and allied subjects as well as abstracts of papers on these subjects published in leading scientific journals of the world, book reviews and review articles.

Annual subscription 40s. Members 25s.

biology*
Series

**An
Introduction
to the Study of
VIRUSES**

By Kenneth M. Smith, F.R.S., Director of the Plant Virus Research Institute, Molteno Institute, Cambridge. This new book covers the whole field of viruses, and is useful not only for the specialist in virus study, but also for the biochemist, the biologist and the medical student. It is illustrated with sixteen plates which include some remarkable electron micrographs. 10s. 6d. net

UNICAM INSTRUMENTS (CAMBRIDGE) LTD · ARBURY WORKS · CAMBRIDGE

Complete Culture Media

IN TWO ENTIRELY NEW FORMS*

* TABLETS

— for preparation of single tubes and small quantities of media. Each tablet when dissolved in water produces a convenient quantity.

* GRANULES

— for larger scale preparations. Hard and of even size, the granules are less hygroscopic and easier to handle than spray-dried powder.

Both tablets and granules retain all the properties of the original medium, from which they are indistinguishable when reconstituted.

ADVANTAGES ARE APPARENT—

Big time-saving in preparation • No specialised equipment needed
Variability reduced to minimum • Easily portable for field work
Results reproducible from one laboratory to another when using media from central source • Economical, as only sufficient for immediate requirements need be used.

THE FOLLOWING ARE AMONG THE MEDIA AVAILABLE AS TABLETS AND GRANULES

Nutrient Broth • Nutrient Agar • McConkey Broth
McConkey Agar • Peptone Water • Glucose Peptone Broth
Glucose Peptone Agar • Agar-Agar
