NEW

HIGH-SPEED "ANGLE-13" CENTRIFUGE

REFRIGERATED MODEL

This new MSE Centrifuge has a top speed of 13,000 r.p.m., giving a centrifugal force of 20,000 × gravity. It has a capacity of 400 ml. (c.c.) and will carry either 8 × 50 ml. tubes or 8 × 7 ml. tubes in a totally enclosed angle head. The built-in refrigeration unit enables controlled centrifuging temperatures as low as minus 15° C. to be readily achieved. The machine is self-contained and compact and is mounted on castors.

OTHER NEW MODELS: The "Angle-13" is only one of several interesting new MSE Centrifuges. They are described in the latest edition of Publication 888, which gives a brief review of all MSE Centrifuges, Homogenisers and Microtomes and ancillary equipment. Copies gladly supplied on request.

MEASURING & SCIENTIFIC EQUIPMENT LTD., SPENSER STREET, LONDON, S.W.1

A NEW

Biochem Absorptiometer

Completely redesigned to provide the user with just those facilities he most needs

★ Accurate Reading
★ Speedy Operation
★ Eight Narrow-band Filters in Rotating Disc, protected from dirt or damage
★ Precision Cells ½ to 4 cm. long
★ Usable with less than 4 ml. in a 1 cm. cell
★ Test Tube Mount optically compensated
★ Built-in Constant Voltage Transformer for use on 50 c.p.s. A.C. at 100–125 volts or 200–250 volts

RELIABLE IN ALL WORKING CONDITIONS

"... the most convenient method was found to be ultraviolet absorption measurement ..."

"... all absorption spectra for this work were measured with a Unicam Quartz Spectrophotometer model SP.500 ..."

The frequency with which the Unicam SP.500 is mentioned in the literature is convincing proof of the sustained quality of its performance and of the wide variety of applications for which it is particularly suitable. For the maintenance of standards of both raw materials and the final product, for academic and medical research, wherever there is a problem of analysis or control, the easiest, most efficient, most economical answer may well be the Unicam SP.500 Spectrophotometer.

*An illustrated leaflet describing the instrument in detail will gladly be sent on request.*

'OXOID'
Bacteriological Peptone

Peptone so controlled during manufacture as to ensure batch to batch variation to a minimum.

A peptone for the general culture of micro-organisms. It is particularly valuable in the selection of foodstuffs and for the production of disinfectants and culture media.

Other 'OXOID' Laboratory Preparations include:—

Agar-Agar
Bacteriological Yeast Extract
Desiccated Ox-Bile
Bile Salts
'Lab-Lemco'

"QUICKFIT"
Interchangeable
SPHERICAL
Ground Glass
Joints

The use of one or two Spherical Joints in a conical jointed assembly of glass apparatus provides a useful degree of flexibility. Such joints also overcome problems of seizure and are, for example, extremely useful in complex high vacuum lines. The reliable "Quickfit" standard of grinding accuracy and interchangeability is maintained to the full in "Quickfit" Spherical Joints. Conical-Spherical adapters are available to simplify the insertion of a Spherical Joint into assemblies of standard glassware.

“A Novelty! something cheap from T & M.”

THE ALIGLASS PIPETTE WASHER

GLASS JACKET (for visibility)
ALUMINIUM CASTINGS (for simplicity)
ALUMINIUM CAGE (for softness)

This is an entirely new, simplified design and takes up to 10-10 ml. bulb pipettes or 24 assorted Bacteriological pipettes. The simplicity permits a very low price and the softness of the aluminium cage greatly reduces chipping of the pipettes. Price—(without stand) £3. 3s.
