OBITUARY NOTICE	PAGE
Professor James Norman Davidson, C.B.E., M.D., D.Sc.Edin., F.R.C.P.E., F.R.C.P.G., F.R.I.C., F.R.S., F.R.S.E.	315
SPECIAL LECTURE	
Chemical and genetic studies on the biosynthesis of ubiquinone by <i>Escherichia coli</i> . By F. Gibson	317
ABSTRACTS OF COMMUNICATIONS	
534th Meeting, Nottingham	
The nature and extent of lipid-protein interactions in cell membranes. By J. B. Finean	327
Magnetic-resonance studies of the molecular motion of lipids in bilayers and membranes. By J. C. Metcalfe, N. J. M. Birdsall & A. G. Lee	329
Comparative permeability studies on liposomal and biological membranes with various compositions. By J. de Gier	331
Hydrocarbon chain structure and function in bacterial phospholipids. By P. Overath	333
Significance of phospholipid turnover. By C. A. Pasternak	333
Relationship between sphingolipid and phospholipid metabolism. By W. Stoffel	336
New concepts in brain cholesterol metabolism. By R. B. Ramsey	341
The base-exchange pathway for phospholipid synthesis in nervous membranes. By G. E. de Medío, A. Gaiti, G. Goracci & G. Porcellati	348
Effect of neurotransmitters and other pharmacological agents on the metabolism of phospholipids in pineal-gland cultures and cloned neuronal and glial cells. By J. Eichberg, H. M. Shein & G. Hauser	352
Polyphosphoinositides and the conduction of nerve impulses. By J. N. Hawthorne & G. L. White	359
Changes in the phospholipid composition of the liver endoplasmic reticulum after induction with drugs and carcinogens. By S. C. Davison & E. D. Wills	362
The enrichment of erythrocyte membranes and phosphatidylcholine dispersions with cholesterol. By J. R. Green & C. Green	365
Molecular aggregation between a phosphatidylinositol-specific phospholipase C-type enzyme and microtubules. By P. J. Quinn & N. Freinkel	368
	1973

	PAGE
Permeability of phospholipid vesicles to amino acids. <i>By</i> P. D. Wilson & K. P. Wheeler	369
External and internal binding of cytochrome <i>c</i> by liposomes. <i>By</i> P. Nicholls & A. N. Malviya	372
Kinetic studies on the biosynthesis of alkyl and alkenyl lipids in mouse fibroblasts. <i>By</i> H. Diringer	375
Glycerolipid metabolism in experimental hyperplasia of the epidermis. <i>By</i> P. J. Hartop & C. Prottey	378
Production of a specific collagenase by rabbit synovial cells in continuous cell culture. <i>By</i> Z. Werb, M. C. Burleigh & J. J. Reynolds	379
Action on collagen of cathepsins B1 and D. <i>By</i> M. C. Burleigh	380
Binding and inhibition of cathepsin B1 by α_2 -macroglobulin. <i>By</i> P. M. Starkey	381
Inhibition of specific collagenase by α_2 -macroglobulin. <i>By</i> Z. Werb	382
Studies on the action of retinol on cartilage. <i>By</i> R. M. Hembry	383
The purification and properties of rabbit liver β -glucuronidase. <i>By</i> R. T. Dean	384
Purification and properties of ovine testicular hyaluronidase. <i>By</i> D. B. Morton	385
Photoconduction in dry cytochrome <i>c</i> oxidase preparations. <i>By</i> D. D. Eley, E. Metcalfe & R. J. Mayer	385
Alternative-current conduction in dry native and modified cytochrome <i>c</i> oxidase. <i>By</i> D. D. Eley, S. J. Rooker, M. Landon & R. J. Mayer	388
Observations on the role of inorganic orthophosphate in the regulation of the formation of <i>Bacillus amyloliquefaciens</i> extracellular ribonuclease. <i>By</i> D. A. Stormonth & G. Coleman	392
The relationship between the 'nucleotide' pool of <i>Bacillus amyloliquefaciens</i> and the control and secretion of extracellular enzymes. <i>By</i> G. Coleman & D. A. Stormonth	394
Preliminary observations on the starch-degrading system elaborated by <i>Bacillus polymyxa</i> . <i>By</i> P. J. Griffin & W. M. Fogarty	397
The neutral protease of <i>Bacillus polymyxa</i> . <i>By</i> W. M. Fogarty & P. J. Griffin.	400
A preliminary study on the extracellular amylase of a <i>Bacillus</i> sp. that increases the permeability of water-stored Sitka spruce (<i>Picea sitchensis</i>). <i>By</i> O. P. Ward & W. M. Fogarty	403
The determination of folate coenzymes by the use of antifolate-resistant folate-dependent microbes. <i>By</i> G. M. Court, J. Dow, P. C. H. Newbold & N. G. L. Harding	406
Selective microbial degradation of folate coenzymes and their inhibitory analogues. <i>By</i> L. M. M. Bergius, G. M. Court, J. Dow & N. G. L. Harding	408
Comparison of the effects of 2-phenylindolone and <i>N</i> -ethylmaleimide on energy-linked reactions in submitochondrial particles. <i>By</i> A. P. Green, A. J. Sweetman, M. Hooper, K. J. Cattell, C. R. Lindop & R. B. Beechey	410
Ferricyanide-supported swelling in liver mitochondria. <i>By</i> J. M. Wrigglesworth & H. Baum	413
The effects of extraction with diethyl ether on the sensitivity to inhibitors of mitochondrial adenosine triphosphatase activity. <i>By</i> J. M. Broughall, C. R. Lindop, D. E. Griffiths & R. B. Beechey	416
The interaction of positively and negatively charged dye molecules with submitochondrial particles during oxidative phosphorylation. <i>By</i> D. Layton, P. Symmons & P. Williams	418

	PAGE
Dehydrogenation of methylphenylcarbinol (1-phenylethanol) by soluble preparations of rat liver. <i>By</i> P. Callaghan, P. A. Borge, J. Elsdon & R. P. Hopkins	421
The incorporation of [U - 3H]glycerol into subcellular fractions of rat liver. <i>By</i> P. N. Hambrey & C. H. Wynn	424
Protein and carbohydrate composition of lysosomal membranes. <i>By</i> D. W. Milsom & C. H. Wynn	426
Inositol 1:2-cyclic phosphate in tissues. <i>By</i> R. H. Michell & E. G. Lapetina	429
Serum-mediated membrane changes. <i>By</i> P. Knox & C. A. Pasternak	430
Glycolipids and biological membranes: the replacement of phospholipids by glycolipids in <i>Pseudomonas diminuta</i> . <i>By</i> D. E. Minnikin, H. Abdolrahimzadeh, J. Baddiley & S. G. Wilkinson	431
Diabetes and anoxia: studies with the isolated perfused rat heart. <i>By</i> D. J. Hearse, A. J. Mullins & E. B. Chain	432
The comparative effects of glucose and fructose on the hepatic secretion of very-low-density lipoproteins. <i>By</i> D. L. Topping & P. A. Mayes	433
The peptide composition of cod serum high-density lipoprotein. <i>By</i> E. R. Skinner	434
Effects of dietary lipids on the fatty acids of tissue phospholipids. <i>By</i> C. Galli	436
Palmitate-coenzyme A ligase and <i>sn</i> -glycerol 3-phosphate acyltransferase in the microsomal fraction of rat liver. <i>By</i> K. A. Lloyd-Davies & D. N. Brindley	436
The effect of ethionine on triglyceride synthesis in rat liver. <i>By</i> M. Vavrečka	438
Calcium ion-induced modifications of charged groups in erythrocyte membranes. <i>By</i> C. Hallam & J. M. Wrigglesworth	440
D-Gluconate transport in <i>Bacillus subtilis</i> . <i>By</i> M. N. McKillen & J. H. Rountree	442
Purification and some properties of <i>Rhizopus arrhizus</i> β -1,3-glucanase. <i>By</i> J. J. Marshall	445
Chain initiation in glucan synthesis in mung beans. <i>By</i> J. Kemp & B. C. Loughman	446
Cell-surface mucosubstances from trypsin disaggregation of normal and polyoma-virus-transformed lines of baby-hamster kidney cells. <i>By</i> A. Allen & S. M. Minnikin	448
Factors affecting the gelling of gastric mucus. <i>By</i> D. Snary, A. Allen & R. H. Pain	450
The effects of an exonuclease, specific for single-stranded deoxyribonucleic acid, on the properties of newly synthesized deoxyribonucleic acid from BHK (baby-hamster kidney)-21/C13 cells. <i>By</i> G. J. Hayton, C. K. Pearson & H. M. Keir	452
A serological investigation of ribulose 1,5-diphosphate carboxylase and its subunits. <i>By</i> J. C. Gray & R. G. O. Kekwick	455
Infrared and chemical analysis of glycosaminoglycans in oral calculus. <i>By</i> C. I. Osuji & S. L. Rowles	458
The metabolism of molecular species of phosphatidylinositol and phosphatidic acid in guinea-pig brain. <i>By</i> M. G. Luthra & A. Sheltawy	461
The incorporation of linoleate and arachidonate into liver and brain lipids of developing rats. <i>By</i> A. J. Sinclair & M. A. Crawford	462
Turnover of brain-cortex phospholipids and its relation to endogenous acetylcholine. <i>By</i> L. Widlund & E. Heilbronn	463
Inhibition of fatty acid synthesis in central nervous tissue in phenylketonuria. <i>By</i> J. M. Land & J. B. Clark	463

	PAGE
A phospholipase C in brain tissue active towards phosphatidylethanolamine. <i>By D. J. Williams, S. Spanner & G. B. Ansell</i>	466
The activity of acetyl-coenzyme A carboxylase in rat brain. <i>By R. E. Kelley, Jr. & C. D. Joel</i>	467
The presence of combined homocysteine in hair of homocystinuric patients. <i>By J. M. Woodhouse & R. A. Rajkotwala</i>	469
The effects of demethylimipramine and some diphenylpropene derivatives on rat brain lipid biosynthesis <i>in vivo</i> . <i>By P. Johnson, T. J. Rising & D. G. Trist</i>	471
Choline metabolism in discrete areas of the brain: the effect of hemicholinium-3. <i>By S. Spanner & G. B. Ansell</i>	475
A simplified procedure for the determination of adenylate cyclase activity. <i>By J. D. M. Albano, D. V. Maudsley, B. L. Brown & G. D. Barnes</i>	477
 535th Meeting, Strathclyde 	
Reproduction of the female mammal: variation on a theme. <i>By A. L. Walpole</i>	481
Pituitary-ovarian interactions. <i>By J. Watson</i>	481
'Receptors' and the action of sex steroid hormones. <i>By E. E. Baulieu</i>	486
Uterine metabolism in early pregnancy in the rat. <i>By P. J. Heald</i>	487
α -Mannosidase in the ram testis, epididymis and semen. <i>By S. Bullock & B. Winchester</i>	491
Properties of purified human placental amine oxidase and a possible role for this enzyme in normal pregnancy. <i>By W. G. Bardsley & M. J. C. Crabbe</i>	494
Radioimmunoassay of rat luteinizing hormone. <i>By F. B. Anderson, J. E. O'Grady & W. Niederer</i>	496
The secretion of oestrogen and progesterone in response to luteinizing hormone by pig luteal tissue under superfused conditions. <i>By J. T. S. Leask, M. Alam & J. Watson</i>	498
Effect of compound I.C.I. 46474 (Nolvadex) on the uptake of [³ H]oestradiol by human uterine endometrium. <i>By C. B. Lunan & B. Green</i>	500
Ovarian-pituitary regulation of the human menstrual cycle. <i>By K. S. Dodson, J. R. T. Coutts & M. C. MacNaughton</i>	502
Human foetal blood as a steroid-metabolizing tissue. <i>By T. Taylor, J. R. T. Coutts & M. C. MacNaughton</i>	505
Androgen-responsive cells in culture: steroid metabolism and binding. <i>By J. A. Smith, J. Gordon & R. J. B. King</i>	507
Ribonucleic acid metabolism in androgen-responsive cells in culture. <i>By R. Jagus-Smith, J. A. Smith & R. J. B. King</i>	509
Effects of nordihydroguaiaretic acid on rat hepatic microsomal enzymes. <i>By D. V. Parke, A. Rahim & R. Walker</i>	511
The kinetics of 5-hydroxytryptamine uptake by rat brain synaptosomes. <i>By M. R. Kibby & H. McKenzie</i>	514
SCINTPOL: a scintillation-counter pseudo-on-line computing system. <i>By B. Seaton</i>	517
Purification of mushroom tyrosinase by affinity chromatography. <i>By S. Gutteridge & D. A. Robb</i>	519

CONTENTS

vii

	PAGE
Partial characterization of polynucleotide ligase from baby-hamster kidney cells. <i>By H. Young, T. S. Har, L. A. F. Morrice, R. R. Feldberg & H. M. Keir</i>	520
Experimental routes to male fertility control. <i>By H. Jackson & A. R. Jones</i>	523
Non-steroidal anti-implantation agents. <i>By D. N. Richardson</i>	528
The role of prostaglandins in fertility control. <i>By N. L. Poyser</i>	535
New developments in anti-fertility drugs: clinical perspectives. <i>By W. J. A. Francis & H. H. Francis</i>	539
 BOOK REVIEWS	 543
