### ABSTRACTS OF COMMUNICATIONS

#### 536th Meeting, London

	PAGE
Initiation of eukaryotic protein synthesis: native 40S subunits bind initiator transfer ribonucleic acid before associating with messenger ribonucleic acid. <i>By</i> S. Legon, C. H. Darnbrough, T. Hunt & R. J. Jackson	553
Translational control of immunoglobulin synthesis. <i>By</i> R. H. Stevens	557
Translation of lens messenger ribonucleic acid in heterologous systems. <i>By</i> H. Bloemendal, A. J. M. Berns & G. J. A. M. Strous	558
3'-Hydroxyl terminal sequences of the rabbit haemoglobin messenger ribonucleic acids. <i>By</i> J. B. Lingrel, H. Burr, S. Brinkley, M. Morrison, C. Merkel & J. Gorski	560
Haemoglobin messenger in the post-ribosomal supernatant of reticulocytes. <i>By</i> H. R. V. Arnstein, S. A. Bonanou-Tzedaki & I. B. Pragnell	561
The search for the messenger ribonucleic acid of $\alpha$ -lactalbumin in extracts of guinea-pig mammary gland. <i>By</i> P. N. Campbell, P. J. Davey, P. Ashby & D. McIlreavy	565
Chairman's introduction: the wherewithal for gel electrophoresis. <i>By</i> E. Reid	567
Trends in gel electrophoresis. <i>By</i> R. Tsanev	568
Preparative polyacrylamide-gel electrophoresis. <i>By</i> A. D. Brownstone	570
High-voltage preparative block electrophoresis. <i>By</i> J. B. Weiss & P. Brenchley	571
Longitudinal temperature gradients in transphoresis and isotachophoresis in relation to detection. <i>By</i> J. O. N. Hinckley	574
The use of metrizamide for the isopycnic gradient fractionation of unfixed ribonucleoprotein particles. <i>By</i> B. M. Mullock & R. H. Hinton	579
Effect of ribonuclease on rat liver ribosomal subunits produced by treatment with ethylenediaminetetra-acetate. <i>By</i> P. Huvos	582
Protein-synthetic activity of a rat liver microsomal fraction that sediments at 600g. <i>By</i> J. A. Lewis & J. R. Tata	585
Effect of diabetes on protein synthesis in a postmitochondrial supernatant system from rat liver. <i>By</i> V. M. Pain	587
The polyadenylate regions of mouse haemoglobin messenger ribonucleic acid. <i>By</i> J. N. Mansbridge, J. A. Crossley, W. G. Lanyon & R. Williamson	588
Changes in the protein-synthetic activity of male <i>Xenopus laevis</i> liver after hormonal induction of the formation of egg-yolk protein. <i>By</i> M. J. Clemens, R. Lofthouse & J. R. Tata	589

	PAGE
Corticosteroid receptors and the control of enzyme synthesis in rat liver. <i>By</i> R. E. Shepherd & R. S. Snart	591
Stimulation of protein breakdown in <i>Escherichia coli</i> by dihydrostreptomycin. <i>By</i> A. R. Hipkiss & M. Kogut	594
The metabolism of cholecalciferol (vitamin D <sub>3</sub> ) in 1-hydroxyethyl-1,1-diphosphonate-treated chicks. <i>By</i> C. M. Taylor, E. B. Mawer & A. Reeve	596
Effects of heart work and insulin on the incorporation of [ <sup>14</sup> C]glucose into hexose phosphates and uridine diphosphate glucose in normal and diabetic perfused rat heart. <i>By</i> I. Das & E. B. Chain	599
Phosphorylation of histones from pregnant and lactating guinea-pig mammary gland. <i>By</i> B. R. Barraclough & P. N. Campbell	601
The nature and location of the adenosine triphosphatase activity in the epithelial cells of human small intestine. <i>By</i> P. Mooney & C. F. McCarthy	603
γ-Radiation inactivation of yeast alcohol dehydrogenase in the presence of oxidized nicotinamide-adenine dinucleotide. <i>By</i> A. Wiseman & G. C. Granville	604
Ultrasonic inactivation of yeast alcohol dehydrogenase: protection by oxidized nicotinamide-adenine dinucleotide. <i>By</i> A. Wiseman, P. H. Leslie & G. C. Granville	606
Decline of jaundice in rats during chronic carbon tetrachloride poisoning and regeneration of biliary excretory function of the liver as measured by the hepatic elimination of phenolphthalein glucuronide. <i>By</i> M. M. Abou-El-Makarem & M. Z. Barakat	609
Analysis of amino acids attached to transfer ribonucleic acid by means of gas-liquid chromatography. <i>By</i> M. Butler, A. Darbre & H. R. V. Arnstein	610
Purification and characterization of carcinoembryonic antigen from human colonic carcinomas. <i>By</i> C. Turberville, J. Pelly, E. W. Johns, D. A. Darcy & D. J. R. Laurence	611
Changes in enzyme and protein content in mammalian erythroblasts. <i>By</i> M. J. Denton	612
 <b>537th Meeting, Canterbury</b>	
The intrinsic fluorescence of multisubunit proteins. <i>By</i> J. J. Holbrook	615
Physicochemical studies on regulatory enzymes. <i>By</i> R. A. Dwek, J. R. Griffiths & G. K. Radda	617
Regulation of threonine biosynthesis in <i>Escherichia coli</i> : biochemical aspects. <i>By</i> B. Burr, P. Cossart, F. Falcoz-Kelly, N. Guiso, J. Janin, J. C. Saari, L. Sibilli, J. Theze, P. Truffa-Bachi, M. Veron & G. N. Cohen	623
Half-of-the-sites reactivity and flip-flop type mechanisms: an example, alkaline phosphatase. <i>By</i> M. Lazdunski	623
Subunit interactions in alkaline phosphatase. <i>By</i> S. E. Halford & H. Gutfreund	623
The activities of deoxyribonucleic acid polymerase and other enzymes in the various types of nuclei found in liver and brain tissue. <i>By</i> A. P. Mathias & M. Stambolova	624
Deoxyribonucleic acid-synthesizing activity of nuclei and nuclear extracts from mouse L929 cells. <i>By</i> R. L. P. Adams & W. M. Wood	627
Deoxyribonucleic acid polymerases of <i>Escherichia coli</i> . <i>By</i> B. Otto	629
Nuclear ribonucleases. <i>By</i> P. Mandel, M. E. Ittel, H. Okasaki, C. Niedergang, F. Petek & D. Munoz	634
	1973

	PAGE
The role of enzymic acetylation and phosphorylation in the control of binding of chromosomal basic proteins to deoxyribonucleic acid. <i>By</i> G. H. Dixon, E. P. M. Candido & A. J. Louie	634
Nicotinamide-adenine dinucleotide-related enzymes in tumour-cell nuclei. <i>By</i> S. Green & F. P. Mamaril	636
Properties of poly(adenosine diphosphate ribose) polymerase, poly(adenosine diphosphate ribose) glycohydrolase and poly(adenosine diphosphate ribose). <i>By</i> T. Sugimura, M. Yamada, M. Miwa, T. Matsushima, T. Hidaka, M. Nagao, N. Inui & S. Takayama	642
Poly(adenosine diphosphate ribose) polymerase in regenerating rat liver and in other tissues. <i>By</i> H. Hilz, M. Kittler & P. Adamietz	644
Purification and characteristics of poly(adenosine diphosphate ribose) polymerase of rat liver. <i>By</i> S. S. Koide & K. Yoshihara	644
Enzymes of nuclear nicotinamide-adenine dinucleotide metabolism. <i>By</i> S. Shall	648
Template integrity and activity of eukaryotic deoxyribonucleic acid-dependent ribonucleic acid polymerase <i>in vitro</i> . <i>By</i> P. H. W. Butterworth, S. J. Flint & C. J. Chesterton	650
Recent studies on animal ribonucleic acid polymerases. <i>By</i> P. Chambon	655
Promoter conformations and ribonucleic acid polymerase conformations. <i>By</i> A. A. Travers	655
Nuclear organization and transcription. <i>By</i> J. R. Tata	657
Regulation of the enzymes of aromatic ring fission in the genus <i>Nocardia</i> . <i>By</i> D. L. Rann & R. B. Cain	658
Changes in isoenzymes of $\alpha$ -galactosidase in <i>Vicia faba</i> seeds. <i>By</i> P. M. Dey, A. Khaleque, P. R. Palan & J. B. Pridham	661
The kinetics and mechanism of action of rabbit muscle L- $\alpha$ -glycerol phosphate dehydrogenase. <i>By</i> P. Bentley & F. M. Dickinson	663
Purification and properties of flavin pyruvate oxidase from an acetate-requiring mutant of <i>Escherichia coli</i> . <i>By</i> R. L. Houghton & B. E. P. Swoboda	665
The metabolism of tetramethylammonium chloride by bacterium 5H2. <i>By</i> D. Hampton & L. J. Zatman	667
Isocitrate lyase and adenosine triphosphate malate lyase as key enzymes for the methylotrophic growth of bacterium 5H2. <i>By</i> R. B. Cox & L. J. Zatman	669
On the specificity of the transfer ribonucleic acid aminoacylation reaction. <i>By</i> J. P. Ebel, R. Giege, J. Bonnet, D. Kern, N. Befort, C. Bollack, F. Fasiolo, J. Gangloff & G. Dirheimer	671
Nicotinamide-adenine dinucleotide phosphate-linked glutamate dehydrogenase activity and ammonium regulation in <i>Aspergillus nidulans</i> . <i>By</i> J. R. Kinghorn & J. A. Pateman	672
Ammonium regulation in <i>Aspergillus nidulans</i> . <i>By</i> J. A. Pateman, J. R. Kinghorn, E. Dunn & E. Forbes	674
The regulation of nicotinamide-adenine dinucleotide-linked glutamate dehydrogenase in <i>Aspergillus nidulans</i> . <i>By</i> J. R. Kinghorn & J. A. Pateman	675
Wheat-germ aspartate transcarbamoylase: potentiation of end-product inhibition <i>in vitro</i> by deoxycholate. <i>By</i> R. J. Yon	676

	PAGE
Bacterial threonine aldolase and serine hydroxymethyltransferase enzymes. <i>By</i> S. C. Bell & J. M. Turner	678
Electrophoretic separation of acid $\alpha$ -D-glucosidases in several human tissues. <i>By</i> M. Mathieu	681
Histone phosphorylation, binding to deoxyribonucleic acid and chromosomal coiling. <i>By</i> A. J. Louie & G. H. Dixon	682
Phosphorylation of nuclear proteins in rodent tissues. <i>By</i> P. G. Riches, K. R. Harrap, S. M. Sellwood, D. Rickwood & A. J. MacGillivray	684
Further characterization of the chromatin non-histone proteins by ion-exchange chromatography and two-dimensional gel electrophoresis. <i>By</i> A. J. MacGillivray & D. Rickwood	686
The circular dichroism of deoxyribonucleic acid and the effect of complex-formation with pancreatic ribonuclease. <i>By</i> G. R. Barker & W. Harrison	690
Synthesis and degradation of poly(adenosine diphosphate ribose) in mouse fibroblasts (LS cells). <i>By</i> P. R. Stone, W. J. D. Whish & S. Shall	692
Changes in poly(adenosine diphosphate ribose) polymerase on stimulation of pig lymphocytes with phytohaemagglutinin. <i>By</i> A. R. Lehmann, S. Kirk-Bell & S. Shall	694
Poly(adenosine diphosphate ribose) in <i>Physarum polycephalum</i> . <i>By</i> W. J. D. Whish, P. R. Stone, M. K. O'Farrell & S. Shall	695
Characterization of a deoxyribonucleic acid polymerase from a replicating nuclear system of the synchronously growing <i>Physarum polycephalum</i> . <i>By</i> W. Schiebel & U. Bamberg	696
The ribonucleic acid- and deoxyribonucleic acid-dependent activities of rat liver nuclear deoxyribonucleic acid polymerase. <i>By</i> R. G. Wickremasinghe, A. M. Holmes & I. R. Johnson	696
Stimulation of chromatin-bound ribonucleic acid polymerase activity by oestradiol <i>in vitro</i> . <i>By</i> R. F. Cox	698
Thiols and ribonucleic acid polymerase- $\sigma$ factor interaction. <i>By</i> P. A. Lowe & B. H. Nicholson	699
Modifications of deoxyribonucleic acid-dependent ribonucleic acid polymerase during sporogenesis in <i>Bacillus thuringiensis</i> . <i>By</i> A. F. Klier, M. M. Lecadet & R. Dedonder	700
A constant ratio of transfer to ribosomal ribonucleic acid in <i>Anacystis nidulans</i> grown with differing mean generation times. <i>By</i> N. Mann & N. G. Carr	702
The effect of aflatoxin B <sub>1</sub> on ribonucleic acid synthesis in rat liver. <i>By</i> G. E. Neal	704
The existence of two forms of the competence factor in <i>Bacillus subtilis</i> . <i>By</i> S. R. Ayad & E. R. A. Shimmin	705
Metabolism of propionate by sensitive and resistant strains of blue-green algae. <i>By</i> A. J. Smith, A. Evans, C. Lucas & W. G. Lewis	707
Metabolism of acetate by facultatively heterotrophic blue-green algae. <i>By</i> C. Lucas, A. J. Smith & M. London	710
Urinary protein excreted by rats after the administration of mercuric chloride and <i>p</i> -nitrophenylarsonic acid. <i>By</i> I. F. Williams, R. G. Price & D. Exley	713
The effect of ethanol administration on drug oxidations and possible mechanism of ethanol-barbiturate interactions. <i>By</i> C. Ioannides & D. V. Parke	716

	PAGE
Adenosine 3':5'-cyclic monophosphate response elicited by histamine and adrenaline in lungs of normal and allergic pigs: relationship of histamine release and adenylate cyclase activity. <i>By</i> J. Wohnlich, F. Ruff & J. L. Parrot	720
Cell-directed antimetabolites: alternative syntheses of cytotoxic methotrexate-containing macromolecules. <i>By</i> D. A. Robinson, J. M. Whiteley & N. G. L. Harding	722
Studies on the sites of electron donation of diphenylcarbazide, quinol and manganese ions to photosystem 2 by using 1,1,1-trichloro-2,2-bis-( <i>p</i> -chlorophenyl)ethane (DDT) as an inhibitor. <i>By</i> M. E. Delaney & L. J. Rogers	726
The control of chlorophyll biosynthesis in the leaves of <i>Phaseolus vulgaris</i> . <i>By</i> R. B. Watts & R. G. O. Kekwick	729
Evidence for mast-cell origin of proteinase in skeletal-muscle homogenates. <i>By</i> D. C. Park, M. E. Parsons & R. J. Pennington	730
Removal of stored sucrose from cultured mouse macrophage and human fibroblast cells with $\beta$ -fructofuranosidase-containing liposomes. <i>By</i> R. A. Buckland & G. Gregoriadis	733
The uptake and metabolism of several $^{14}\text{C}$ -labelled sugars by muscle from a normal human foetus and from a human foetus affected with muscular dystrophy. <i>By</i> J. M. Strickland & D. A. Ellis	735
The conversion of glucose into fructose in muscle from a normal human foetus and a foetus affected with muscular dystrophy. <i>By</i> J. M. Strickland & D. A. Ellis	738
The effects of fructose, glucose 6-phosphate and acetate on the metabolism of [ $^{14}\text{C}$ ]glucose by normal and dystrophic human foetal muscle. <i>By</i> J. M. Strickland & D. A. Ellis	740
Uric acid: a possible regulator of xanthine oxidase activity in Q-strain mice. <i>By</i> J. P. Ryan, K. McKenna & E. J. Duke	742
Quantitative determination of creatine kinase activity after separation of isoenzymes by starch-gel electrophoresis. <i>By</i> R. L. Watts & J. Eve	746
Rapid location of acetylcholinesterase and other esterases, after separation of enzyme components on columns or by electrophoresis, by means of the fluorescent hydrolysis products of the substrate <i>N</i> -methoxyindoxyl acetate. <i>By</i> M. J. Seghatchian, R. L. Watts & D. C. Watts	747
Induction, partial purification and properties of ornithine transaminase from <i>Aspergillus nidulans</i> . <i>By</i> L. Stevens & A. Heaton	749
Iodinin biosynthesis by a pseudomonad. <i>By</i> S. C. Bell & J. M. Turner	751
Abnormalities of 17-oxo steroid conjugate amounts in human hepatic porphyria. <i>By</i> J. W. Paxton, M. R. Moore, A. D. Beattie & A. Goldberg	754
Steroid sulphation by human female reproductive tissues <i>in vitro</i> . <i>By</i> E. Melville & H. Braunsberg	757
Observations on the sterol sulphates and sterol esters of the echinoderm <i>Asterias rubens</i> . <i>By</i> R. Goodfellow & L. J. Goad	759
Rabbit uterus in culture: oestrogen uptake and turnover. <i>By</i> S. L. Russell & G. H. Thomas	761
Steroidogenesis in human breast cancer, benign breast disease and normal breast tissue. <i>By</i> W. R. Miller, D. McDonald & A. P. M. Forrest	762
Conversion of oestradiol-17 $\beta$ by human breast tumours <i>in vitro</i> . <i>By</i> E. Melville	766
Identification of the product of the reaction of progesterone with cortisone reductase and reduced nicotinamide-adenine dinucleotide. <i>By</i> I. H. White & J. Jeffery	767

	PAGE
A time-course study of the effects of gonadal hormone administration on lipogenic enzyme activity in the liver of the immature pullet. <i>By</i> J. Pearce & D. Balnave	769
Regulatory elements involved in methionine biosynthesis in <i>Saccharomyces cerevisiae</i> . <i>By</i> H. Cherest, Y. Surdin-Kerjan & H. de Robichon-Szulmajster	772
