LECTURE

The Second BDH Lecture

PAGE

Affinity, competition and specific interactions in the biochemistry and histochemistry of polyelectrolytes. *By* J. E. Scott 787

ABSTRACTS OF COMMUNICATIONS

538th Meeting, Birmingham

- The chemistry of the acidic mucopolysaccharides (glycosaminoglycans). *By* J. F. Kennedy 807
- The biosynthesis of glycosaminoglycans. *By* C. F. Phelps 814
- Sequestering agents and biochemical systems: the possibilities for cross-fertilization of ideas between industrial and biological chemistry. *By* R. L. Smith 819
- Ion selectivity and ligand design. *By* R. J. P. Williams 826
- X-ray-diffraction studies of peptide ionophores and related compounds. *By* M. Dobler 828
- The significance of ionophores in ion transport through biological membranes. *By* A. P. Dawson & M. J. Selwyn 832
- Proteoglycans of elastic cartilage: comparative studies on bovine cartilages. *By* G. P. White, A. H. Olavesen & F. S. Wusteman 837
- The metabolic fate of chondroitin 4-³⁵S]sulphate in the rat. *By* K. M. Wood, C. G. Curtis, G. M. Powell & F. S. Wusteman 840
- Glycoproteins and acid mucopolysaccharides (glycosaminoglycans) in rabbit trachea: a study in organ culture. *By* J. T. Gallagher & P. W. Kent 842
- Investigation of urinary glycosaminoglycans in the mucopolysaccharidoses. *By* P. W. Lewis, J. F. Kennedy & D. N. Raine 844
- Urinary mucopolysaccharides in a case of morquio syndrome (mucopolysaccharidosis type IV). *By* D. A. Applegarth, G. Bozoian & R. B. Lowry 847
- Stimulation of phospholipase A₂ of synaptosomes of guinea-pig brain by noradrenaline and other amines. *By* R. J. Gullis & C. E. Rowe 849
- The effects of catecholamines on drug metabolism in the rat. *By* A. R. Boobis & G. Powis 849
- Heterogeneity of cholinesterases in rat jejunum and heart tissues. *By* K. Sayer & P. K. Das 852

	PAGE
An ionophore for calcium ions and the stimulation of histamine secretion from rat peritoneal mast cells. <i>By</i> J. C. Foreman, B. D. Gomperts & J. L. Mongar	853
Calcium ion-induced loss of respiratory control in rat liver mitochondria in the presence of inhalational anaesthetic agents. <i>By</i> G. M. Hall, S. J. Kirtland, E. M. Grist & H. Baum	854
Fluxes of [⁴⁵ Ca]calcium ions in exocrine rat pancreas and their relation to protein secretion. <i>By</i> R. M. Case, T. Clausen & R. K. Smith	857
Conformational changes in the calcium-binding protein of the troponin complex (troponin-C) from rabbit skeletal muscle. <i>By</i> J. F. Head & S. V. Perry	858
Interaction of myosin with insolubilized actin. <i>By</i> R. C. Bottomley & I. P. Trayer	859
Phosphorylation of light-chain components of red, white and cardiac muscles by phosphorylase <i>b</i> kinase. <i>By</i> W. T. Perrie, M. A. W. Thomas & S. V. Perry	860
A histidine-methylating enzyme of rabbit skeletal muscle. <i>By</i> M. F. Hardy, N. Frearson & S. V. Perry	861
Active-site labelling of cytoplasmic aspartate aminotransferase from pig heart by L-serine <i>O</i> -sulphate. <i>By</i> R. John, F. Bossa, D. Barra & P. Fasella	862
The lytic properties of the two forms of the competence-inducing factor in <i>Bacillus subtilis</i> . <i>By</i> S. R. Ayad & E. R. A. Shimmin	864
Deoxyribonucleic acid polymerases from <i>Euglena gracilis</i> . <i>By</i> A. G. McLennan & H. M. Keir	866
Myocardial enzyme release under conditions of graded hypoxia: studies with the isolated perfused rat heart. <i>By</i> D. J. Hearse, S. M. Humphrey & E. B. Chain	869
The effect of reoxygenation on enzyme release from the anoxic isolated perfused rat heart. <i>By</i> D. J. Hearse, S. M. Humphrey & E. B. Chain	871
Some aspects of glycogen metabolism in skeletal muscle. <i>By</i> K. A. Rookledge & H. M. R. Zanellotti	873
The role of insulin in regulating glucose metabolism of the newborn rat. <i>By</i> K. Snell & D. G. Walker	875
Affinity-chromatographic studies on rat hepatic glucokinase. <i>By</i> J. M. E. Chesher, I. P. Trayer & D. G. Walker	876
Fast and slow inhibitors of ox heart succinate dehydrogenase: action of oxaloacetate and its fluoro analogues. <i>By</i> L. S. Kappen, J. D. Brodie & P. Nicholls	877
The effect of ischaemic limb injury on the rate of utilization of ketone bodies in the post-absorptive rat <i>in vivo</i> . <i>By</i> R. N. Barton	880
The cyanide-insensitive oxidation of ascorbate plus <i>NNN'</i> -tetramethyl- <i>p</i> -phenylenediamine mixture by mung-bean (<i>Phaseolus aureus</i>) mitochondria. <i>By</i> S. B. Wilson & A. L. Moore	881
A micro method for the measurement of the oxygen-haemoglobin equilibrium. <i>By</i> M. McCabe	882
The influence of magnesium deficiency and parathyroid hormone on adenosine 3':5'-cyclic monophosphate concentrations in rat kidney cortex. <i>By</i> J. P. Ashby & F. W. Heaton	884
Isolation of lipid-soluble compounds that bind ferric ions from <i>Nocardia</i> species. <i>By</i> P. V. Patel & C. Ratledge	886
Anomalous effects of phlorrhizin (phloridzin) on photosynthetic oxygen production. <i>By</i> J. West & D. O. Hall	888
Cell-free extracellular synthesis of a polyribonucleotide fraction after the spontaneous release of nucleic acids by living bacteria and by cells of frogs and mammals. <i>By</i> P. Anker, M. Stroun, J. Deshusses, A. Cattaneo & J. Henri	890

	PAGE
Solubilization of the membrane-bound deoxyribonucleic acid-dependent ribonucleic acid polymerase of pea chloroplasts. <i>By</i> J. Bennett & R. J. Ellis	892
Isolation of the chloroplast membrane proteins. <i>By</i> F. A. McEvoy & W. S. Lynn	894
The induction of chloroplast fluorescence <i>in vivo</i> . <i>By</i> C. R. Fauset & A. P. Brown	897
Fatty acid biosynthesis in the plastids of the avocado pear. <i>By</i> P. J. Weaire & R. G. O. Kekwick	899
The excretion of [⁶⁵ Zn]zinc in the rat. <i>By</i> S. W. Gunasekera, L. J. King & D. V. Parke	900
 539th Meeting, Uxbridge	
Biochemical aspects of fatty liver. <i>By</i> M. U. Dianzani	903
Liver necrosis. <i>By</i> E. A. Smuckler	908
Biochemical aspects of cirrhosis of the liver. <i>By</i> A. E. M. McLean & E. K. McLean	909
Liver cancer: induction and treatment. <i>By</i> T. A. Connors	912
Nitrosamines. <i>By</i> P. N. Magee	917
Mycotoxins: metabolism and livery injury. <i>By</i> D. S. P. Patterson	917
Mechanisms of protection against acute liver injury. <i>By</i> T. F. Slater	922
Stabilization of the free-radical product of phenazine methosulphate in bile and formation of the free-radical product <i>in vitro</i> by reaction with bilirubin. <i>By</i> K. A. K. Lott & T. F. Slater	926
Free-radical chain oxidation by carbon tetrachloride and related compounds: model pulse-radiolysis studies. <i>By</i> R. L. Willson	929
Investigations on the possible relationship between hepatic endoplasmic-reticulum enzymes and bile secretion in the rat. <i>By</i> M. N. Eakins & T. F. Slater	931
The effects of antioxidants on the concentrations of reduced and oxidized nicotinamide-adenine dinucleotide and of triglyceride in rat liver after the administration of ethanol. <i>By</i> P. Rossiter & T. F. Slater	933
A preliminary study on the breakdown of oxidized nicotinamide-adenine dinucleotide by rat liver microsomal fraction. <i>By</i> D. J. van Venrooij & T. F. Slater	936
The effects of starvation on rat liver microsomal inosine concentrations, reduced nicotinamide-adenine dinucleotide-linked lipid-peroxidation systems and other microsomal enzymes. <i>By</i> P. J. Jose, T. F. Slater & B. C. Sawyer	939
Microsomal activity in livers of rats fed with the porphyrogenic agent hexachlorobenzene. <i>By</i> P. Z. Nenov & M. D. Stonard	941
The pattern and distribution of porphyrins in livers and rats fed with hexachlorobenzene. <i>By</i> M. D. Stonard & P. Z. Nenov	941
Effects of the porphyrogenic agent 2-allyl-2-isopropylacetamide on the hydroxylation of testosterone in rat liver microsomal fraction. <i>By</i> M. B. Hodgins, M. Steyer & W. Staib	942
The effect of aflatoxin B ₁ on the hepatic structure and ribonucleic acid synthesis in rats fed on a marginally choline-deficient diet. <i>By</i> W. H. Butler & G. E. Neal	944
The binding of ribosomes to rat liver endoplasmic-reticulum membranes <i>in vitro</i> : effects of ischaemia. <i>By</i> F. Cajone, L. Schiaffonati & A. Bernelli-Zazzera	945
Changes in some enzyme activities associated with fatty acid synthesis in ethanol-induced fatty liver in the rat. <i>By</i> T. J. Baines & A. K. Campbell	947

	PAGE
The mode of action and possible biological roles of bacterial hyaluronate lyase. <i>By</i> D. H. Leaback & P. G. Walker	949
The effect of methylglyoxal on deoxyribonucleic acid synthesis in <i>Escherichia coli</i> . <i>By</i> H. N. Fraval & D. C. H. McBrien	952
Acid-soluble ribonucleotides in the brine shrimp (<i>Artemia salina</i>). <i>By</i> P. J. Conroy & J. T. Nodes	954
Quantitative measurement of transplantation (HL-A) antigen sites on peripheral human lymphocytes. <i>By</i> A. R. Sanderson & K. I. Welsh	956
Primary characterization of a non-collagenous reticulin component. <i>By</i> M. Pras	959
An automated assay system for endo- and exo-hexosaminidases. <i>By</i> H. K. Robinson	960
Fatty acid synthesis by intact parenchymal cells from rat liver. <i>By</i> M. N. Berry, S. Abraham & H. V. Werner	963
Effect of carbenoxolone on some aspects of the rat gastrointestinal mucosa. <i>By</i> J. Shillingford, W. E. Lindup & D. V. Parke	966
Hepatotoxicity and lethality of halogenoalkanes. <i>By</i> G. Ugazio, E. Burdino, O. Danni & P. A. Milillo	968
Lipid composition of subcellular particles isolated from rat liver and from hepatomas. <i>By</i> P. Pani, R. A. Canuto, R. Garcea & F. Feo	972
Interference by 3-methylcholanthrene and phenobarbital on the development of liver damage caused by carbon tetrachloride and white phosphorus poisoning. <i>By</i> P. Pani, L. Gabriel, M. V. Torrielli & E. Gravela	976
Lipid alterations of liver microsomal fraction and plasma lipoproteins after carbon tetrachloride poisoning. <i>By</i> M. Comporti & A. Benedetti	979
The effect of zinc deficiency and food restriction on hepatic zinc proteins in the rat. <i>By</i> I. Bremner, N. T. Davies & C. F. Mills	982
Studies on the induction of a low-molecular-weight zinc-binding protein in rat liver. <i>By</i> N. T. Davies, I. Bremner & C. F. Mills	985
Biliary excretion of zinc in rats. <i>By</i> J. A. Barrowman, R. Bonnett & P. J. Bray	988
Dehydrogenation of <i>trans</i> -acenaphthene-1,2-diol by liver cytosol preparations. <i>By</i> R. P. Hopkins, E. C. Drummond & P. Callaghan	989
The phosphorylation and subsequent metabolism of 1-aminopropan-2-ol by rat liver mitochondria. <i>By</i> C. Bell & A. Willetts	992
Acetylation of ribosomal proteins in regenerating rat liver. <i>By</i> C. C. Liew & A. G. Gornall	994
Urinary enzymes and the detection of kidney damage in the dog. <i>By</i> B. G. Ellis, R. G. Price & J. C. Topham	995
A comparative study of the excretion of corticosterone and betamethasone in the rat. <i>By</i> J. M. Tredger, J. Chakraborty & D. V. Parke	998
Interactions of corticosteroids with some hepatic microsomal enzymes in the rat. <i>By</i> J. M. Tredger, J. Chakraborty & D. V. Parke	1000
Effect of thyroid hormones on the glucagon-elevated adenosine 3':5'-cyclic monophosphate content of mature rat liver in organ culture. <i>By</i> A. K. Campbell & B. Kane-Maguire	1002
Binding of thyroid stimulators to human thyroid membranes. <i>By</i> S. Q. Medhi, S. S. Nussey, C. P. Gibbons & D. J. El Kabir	1005
The human mouth as a model system for the absorption of substances from the colon. <i>By</i> D. F. Evered	1006
	1973
