### ABSTRACTS OF COMMUNICATIONS

540th Meeting, Oxford	PAGE
Recent studies on the deoxyribonucleic acid-dependent ribonucleic acid polymerase from vegetative cells and spores of <i>Bacillus subtilis</i> . By J. Szulmajster	1021
Relationship between chromosome replication and induction of spore formation in <i>Bacillus subtilis</i> . By J. Mandelstam & S. A. Higgs	1022
Germination of bacterial endospores and the development of new vegetative forms. By G. W. Gould	1023
Control of development in the cellular slime mould <i>Dictyostelium</i> . By P. C. Newell	1025
Role of polyisoprenyl alcohols in the biosynthesis of complex polysaccharides. By J. L. Strominger	1026
Lipid intermediates in the biosynthesis of bacterial cell-wall components. By J. Baddiley	1026
Identification and distribution of prenol intermediates of wall biosynthesis in growing cells of <i>Lactobacillus</i> spp. By K. J. I. Thorne	1028
The formation of sugar derivatives of dolichyl phosphate in mammalian systems. By F. W. Hemming	1029
Tactics of immunosuppression. By J. R. Batchelor	1033
The measurement of immunosuppression in man. By A. C. Campbell, P. Hersey, J. Skinner & I. C. M. MacLennan	1035
Functional aspects of the selective effects of cyclophosphamide on lymphocyte populations. By J. L. Turk, D. Parker & L. W. Poulter	1038
The usefulness of enzyme measurements for evaluation of pharmacological agents that modify the homograft reaction. By M. K. Jasani	1043
Cytotoxic agents with immunosuppressive activity. By T. A. Connors	1049
The development and production of anti-lymphocytic globulin for clinical trials. By D. C. Edwards	1054
The characteristics of human subacute spongiform virus encephalopathies. By D. C. Gajdusek	1058
Subacute spongiform encephalopathies in domestic and laboratory animals. By R. H. Kimberlin	1058
Nucleic acids and slow virus infections. By D. H. Adams	1061
The chemical nature of the scrapie agent. By G. C. Millson	1064

	PAGE
Lactate dehydrogenase: characterization of intermediates with special regard to fluorescence. <i>By</i> H. Gutfreund & J. J. Holbrook	1067
Trapping of short-lived intermediates in enzymic reactions by rapid freezing: combination of electron paramagnetic resonance with pulse radiolysis. <i>By</i> R. C. Bray, D. J. Lowe, C. Capcillère-Blandin & E. M. Fielden	1067
The use of isotopically labelled substrates to determine the intermediate species in enzyme-catalysed reactions. <i>By</i> H. G. Britton	1072
The application of rapid-scanning stopped-flow spectrophotometry in the determination of the spectra of intermediates in enzyme-catalysed reactions. <i>By</i> M. R. Hollaway & H. A. White	1072
Regulation of deoxyribonucleic acid synthesis. <i>By</i> H. M. Keir & R. K. Craig	1073
Cytoplasmic effects on deoxyribonucleic acid synthesis as studied by cell fusion. <i>By</i> R. T. Johnson	1078
Regulation of the cell cycle in animal cells. <i>By</i> J. A. Smith	1078
A cytokinetic analysis of the proliferative response to androgen in the prostatic complex of the castrated mouse. <i>By</i> A. Morley, N. Wright, D. Appleton & M. Alison	1081
Hormonal effects on deoxyribonucleic acid synthesis in the uterus under physiological conditions. <i>By</i> F. Leroy & C. Bogaert	1084
Effects of adrenocorticotrophin on steroidogenesis and proliferation by adult adrenal cells in monolayer culture. <i>By</i> M. J. O'Hare & A. M. Neville	1088
Triterpenoid carotenoids from a pigmented <i>Streptococcus</i> sp. <i>By</i> R. F. Taylor & B. H. Davies	1091
The partial localization of <i>exo</i> - $\beta$ - <i>N</i> -acetylglucosaminidase in <i>Bacillus subtilis</i> B cell walls: a model based on ultrafiltration studies. <i>By</i> S. J. Brewer, R. C. W. Berkeley & J. Melling	1093
The enzymic activity of <i>Bacillus subtilis</i> competence factor bound to cyanogen bromide-Sepharese. <i>By</i> S. R. Ayad & E. R. A. Shimmin	1095
Further studies on the amyolytic system elaborated by <i>Bacillus polymyxa</i> . <i>By</i> P. J. Griffin & W. M. Fogarty	1097
An improved culture technique for studies on sporulation in <i>Saccharomyces cerevisiae</i> . <i>By</i> D. C. Watson & D. R. Berry	1100
Enzyme changes during growth of <i>Tetrahymena pyriformis</i> . <i>By</i> J. M. Lord, B. A. McFadden & H. L. Kornberg	1101
Biochemistry of amoebic encystment. <i>By</i> C. R. Krishna Murti	1104
Activity of chitin synthetase during the development of fruit bodies of the toadstool <i>Coprinus cinereus</i> . <i>By</i> G. W. Gooday	1105
Comparative studies on the mitochondria of <i>Saccharomyces cerevisiae</i> and the hydrocarbon-utilizing yeast <i>Candida lipolytica</i> : unsaturated fatty acid and cytochrome composition. <i>By</i> M. D. Supton, K. Watson, R. L. Houghton & D. E. Griffiths	1107
Comparative studies on the mitochondria of <i>Saccharomyces cerevisiae</i> and the hydrocarbon-utilizing yeast <i>Candida lipolytica</i> : mitochondrial adenosine triphosphatase. <i>By</i> R. L. Houghton, M. D. Supton, K. Watson & D. E. Griffiths	1110
The dehydrogenation of the steroid nucleus by human-gut bacteria. <i>By</i> P. Goddard & M. J. Hill	1113
Some observations on the use of <sup>125</sup> I-labelled ligands in steroid radioimmunoassay. <i>By</i> E. H. D. Cameron, S. E. Morris, J. J. Scarisbrick & S. G. Hillier	1115
	1973

	PAGE
The stereospecificity of hydrogen transfer from reduced nicotinamide-adenine dinucleotide by a hydrogenase with complex substrate specificity. <i>By</i> W. Gibb & J. Jeffery	1117
The metabolism of 5 $\alpha$ -dihydrotestosterone and androsterone by skin. <i>By</i> J. B. Hay	1119
Steroid metabolism <i>in vitro</i> by whole testis tissue of Japanese quail. <i>By</i> D. E. Bu'Lock	1120
Multiple forms of acetylcholinesterase obtained after ultrasonication of human erythrocytes. <i>By</i> D. L. Wright & D. T. Plummer	1123
Heterogeneity of rat brain and liver mitochondrial monoamine oxidase: sub-cellular fractionation. <i>By</i> M. B. H. Youdim	1126
Isoenzymes of enolase in rat tissues. <i>By</i> C. C. Rider & C. B. Taylor	1127
Ornithine decarboxylase activity in cultured mammary tissue. <i>By</i> R. P. G. Aisbitt & J. M. Barry	1128
The effect of temperature on the activation energies of yeast mitochondrial enzymes. <i>By</i> K. Watson, E. Bertoli & D. E. Griffiths	1129
Crystalline 6-phosphogluconate dehydrogenase from sheep liver. <i>By</i> M. Silverberg, K. Dalziel & M. Adams	1132
The complexity of the high-molecular-weight mammalian deoxyribonucleic acid polymerase fraction. <i>By</i> A. M. Holmes, I. P. Hesselwood & I. R. Johnson	1134
Chromatin interaction with oestradiol-receptor protein complex. <i>By</i> J. Thompson & R. J. B. King	1135
Two serologically distinct double-stranded ribonucleic acid viruses isolated from <i>Aspergillus niger</i> . <i>By</i> K. W. Buck, R. F. Girvan & G. Ratti	1138
Virus particles in yeast. <i>By</i> K. W. Buck, P. Lhoas, D. J. Border & B. K. Street	1141
Membrane-bound ribosomes in yeast mitochondria. <i>By</i> D. T. Plummer, K. Ward & A. W. Linnane	1142
Intergeneric transformation in <i>Bacillus subtilis</i> . <i>By</i> A. A. Berns & S. R. Ayad	1145
Isolation of plasma membrane from cardiac muscle. <i>By</i> A. M. Kidwai	1146
The role of formate in photorespiration. <i>By</i> B. Halliwell	1147
A rapid spectrophotometric method of determination of thiolsulphinate in onion ( <i>Allium cepa</i> ) and its significance in flavour studies. <i>By</i> G. G. Freeman & F. McBreen	1150
Role of the skin in the homeostasis of circulating bilirubin in man. <i>By</i> C. L. Kapoor & C. R. Krishna Murti	1152
The internal secretion of protease by the salivary gland of the larva of the blowfly <i>Calliphora erythrocephala</i> . <i>By</i> G. M. Price	1152
Motility of triose phosphate isomerase: hydrogen-exchange studies performed by a novel dialysis technique. <i>By</i> C. A. Browne & S. G. Waley	1155
Micro gel osmometry by phase separation. <i>By</i> A. G. Ogston & P. Silpananta	1158
The metabolism of hydroxyamphetamines in man and animals: 4'-hydroxyl-[ <sup>14</sup> C]amphetamine (paredrine). <i>By</i> P. S. Sever, L. G. Dring & R. T. Williams	1158
The metabolism of hydroxyamphetamines in man and animals: [ <sup>14</sup> C]nor-ephedrine. <i>By</i> J. E. Sinsheimer, L. G. Dring & R. T. Williams	1160
Metabolism of <i>S</i> -( <i>n</i> -propyl)-L-cysteine in the neonatal rat. <i>By</i> P. J. Baines, H. G. Bray & S. P. James	1161
The metabolism and toxicity of phenols in cats. <i>By</i> J. J. Miller, G. M. Powell, A. H. Olavesen & C. G. Curtis	1163

	PAGE
Studies on the mechanism of biliary excretion of aryl sulphates in the rat. <i>By</i> G. M. Powell, P. A. Gregory, A. H. Olavesen & J. G. Jones	1165
Acid $\alpha$ -glucosidases and glycogen in Pompe's disease (glycogen disease type II). <i>By</i> R. E. Bernstein	1168
Isoenzymes of human <i>N</i> -acetyl- $\beta$ -glucosaminidase: relation to Tay-Sachs disease and other conditions. <i>By</i> R. E. Bernstein	1171
Characterization of manolipids formed in a calf pancreatic microsomal fraction from guanosine diphosphate [ <sup>14</sup> C]mannose and either endogenous lipid or exogenous polyisoprenyl phosphates. <i>By</i> J. S. Tkacz, A. Herscovics, C. D. Warren & R. W. Jeanloz	1174
Glycolipid components of the isolated brush border of rabbit small intestine. <i>By</i> J. R. Cooper & P. W. Kent	1176
Glycosidases in pregnancy and postnatal development in the rabbit. <i>By</i> I. Braidman & D. Robinson	1176
The effect of insulin deficiency on the glutathione-insulin transhydrogenase activity of rat liver. <i>By</i> J. H. Thomas, S. M. Wakefield & R. H. Jones	1179
Pteroylpoly- $\gamma$ -L-glutamates in the liver and kidney of the monkey ( <i>Cynomolgus</i> sp.). <i>By</i> G. E. Davidson, J. P. Brown & J. M. Scott	1182
Steroid-adjuvant interactions with deoxyribonucleic acid-synthetic processes and cellular co-operation in liver. <i>By</i> M. K. Agarwal	1185
 <b>541st Meeting, Alderley Park</b>	
Enzymes and paraenzymes in the sequential reactions in blood coagulation. <i>By</i> H. C. Hemker, J. S. de Graaf & A. D. Muller	1189
The enzymic properties of thrombin and factor Xa. <i>By</i> D. T. Elmore	1191
Structure-function aspects of the fibrinogen-fibrin transition. <i>By</i> B. Blombäck	1194
Human plasma proteins involved in fibrinolysis. <i>By</i> U. Hamberg	1194
Biochemical properties of a newly discovered trypsin inhibitor from the giant African snail ( <i>Achatina fulica</i> ). <i>By</i> H. A. Kareem	1195
Preparation of factor X on a diethylaminoethyl-cellulose column utilizing sodium chloride to exclude protein with a lower affinity. <i>By</i> R. J. Dupe, R. M. Howell & D. S. Turner	1196
Calcium ion-induced enzyme dissociation and the appearance of enzyme activity in human plasma factor XIII. <i>By</i> R. D. Cooke & J. J. Holbrook	1198
Initial stages of the attack of plasmin on fibrinogen. <i>By</i> J. S. Brockbank & R. G. O. Kekwick	1201
Post-mortem fibrinolysis: identification of post-mortem bloodstains in forensic science. <i>By</i> G. B. Divall & P. H. Whitehead	1202
Binding of iodinated proteins to forming and preformed thrombi. <i>By</i> M. F. Scully, C. J. L. Strachan & V. V. Kakkar	1204
Vitamin K requirement and anticoagulant response in the warfarin-resistant rat. <i>By</i> A. D. Martin	1206
A coagulant enzyme from Gaboon-viper venom: some aspects of its mode of action. <i>By</i> P. J. Gaffney, N. A. Marsh & B. C. Whaler	1208
The mode of resistance of a strain of <i>Pseudomonas</i> to chlorhexidine. <i>By</i> A. Davies & W. Roberts	1209
Observations of uridine diphosphate glucuronyltransferase activity towards oestriol and xenobiotics in developing and cultured tissues from mouse and man. <i>By</i> B. Burchell	1212
	1973

## CONTENTS

vii

	PAGE
Effect of phenobarbital and other xenobiotics on the repression <i>in ovo</i> of chick embryo uridine diphosphate glucuronyltransferase activity. <i>By</i> G. J. Wishart & G. J. Dutton	1214
Effect of tissue culture and phenobarbital on development of uridine diphosphate glucose dehydrogenase in chick embryo liver. <i>By</i> J. Fyffe & G. J. Dutton	1215
Collagen biosynthesis in healing wounds of guinea pigs recovering from vitamin C deficiency. <i>By</i> R. Harwood, M. E. Grant & D. S. Jackson	1217
Purification, characterization and active-site studies on human serum complement subcomponent C1s. <i>By</i> T. Barkas, G. K. Scott & J. E. Fothergill	1219
<b>BOOK REVIEWS</b>	<b>1221</b>
