

BIOCHEMICAL SOCIETY TRANSACTIONS

London: The Biochemical Society © 1982

Managing Editor D. C. WATTS

Book Reviews Editor B. MORELAND

Contents Volume 10, Part 2, April 1982

597th MEETING, LONDON

Colloquium: Oxygen Toxicity

- | | | |
|--|---------------------------------|----|
| Superoxide dismutases: exploration of apparent anomalies: a gene transfer and a functional replacement | I. FRIDOVICH | 67 |
| Chemical reactivity of oxygen-derived radicals with reference to biological systems | J. V. BANNISTER & H. A. O. HILL | 68 |
| Lipid peroxidation | T. F. SLATER | 70 |
| Fate of oxygen free radicals in extracellular fluids | J. M. C. GUTTERIDGE | 72 |
| Oxygen radicals and herbicide action | A. D. DODGE | 73 |
| Regulation of manganese superoxide dismutase by oxygen in <i>Saccharomyces cerevisiae</i> | A. P. AUTOR | 75 |

Colloquium: Roles and Functions of Glutathione

- | | | |
|--|---|----|
| Metabolism and function of glutathione: an overview | A. MEISTER | 78 |
| The role of glutathione in hepatic hydroperoxide metabolism | H. SIES, T. P. M. AKERBOOM & E. CADENAS | 79 |
| Glutathione <i>S</i> -transferases in detoxification | P. L. GROVER | 80 |
| The structure and multiple functions of glutathione transferases | B. KETTERER, D. BEALE & D. MEYER | 82 |
| Glutathione: A protective mechanism against hepatotoxicity | L. F. PRESCOTT | 84 |

COMMUNICATIONS

Initiation-complex formation by messenger RNA-dependent reticulocyte lysates	J. E. KAY, C. R. BENZIE & Y. M. BERAN	87
Inhibition of nucleotide exchange on initiation factor eIF-2: a mechanism for the regulation of protein synthesis by phosphorylation of eIF-2 by the haem-controlled repressor	M. J. CLEMENS & V. M. PAIN	88
Differences in ribosome-bound and ribosome-free initiation-factor eIF-2 activities from haemin-deficient and haemin-supplemented reticulocyte lysates	C. G. PROUD & V. M. PAIN	89
[³ H]Puromycin binding allows rapid estimation of polyribosome content in mammalian cells	B. R. UNSWORTH, A. J. ASHFORD & V. M. PAIN	90
The structure of elongation factor 1 from wheat germ	J. PULIKOWSKA & T. TWARDOWSKI	90
The characterization and translation <i>in vitro</i> of rabbit globin messenger RNA and messenger ribonucleoprotein labelled with bacteriophage-T4 RNA ligase and 5'-[³² P]phosphocytidine 3'-phosphate	N. S. B. THOMAS, P. D. BUTCHER, J. M. KELLY, R. A. COX & H. R. V. ARNSTEIN	91
Temperature-sensitive mutants of <i>Saccharomyces cerevisiae</i> with an abnormal distribution of ribosomal subunits	J. A. MITLIN, M. CANNON & L. GRITZ	92
Inhibition of protein synthesis in pseudorabies-virus-infected cells	W. S. STEVELY, M. R. CHOWDHURY, B. M. MCGRATH & J. K. VASS	93
Phosphorylation of ribosomal proteins during infection with herpes viruses	I. M. KENNEDY, D. P. LEADER & W. S. STEVELY	94
Changes in deoxynucleoside metabolism and DNA synthesis in interferon-treated human lymphoblastoid cells	G. MOORE, D. R. GEWERT & M. J. CLEMENS	95
Liver-specific acid-soluble proteins that accompany nucleosomal-core histones but which have higher molecular weights and a lower content of basic amino acids	Z. A. MEDVEDEV, M. M. MEDVEDEVA & H. M. CROWNE	95
ATP-stimulated breakdown of polylysine in rabbit reticulocyte cell-free extracts: differential effects according to substrate molecular weight	V. C. WORTHINGTON & A. R. HIPKISS	96
Activity and heat-stability of peptidase activity in cell-free extracts of rabbit reticulocytes and erythrocytes: effects of bivalent metal ions	A. CROWTHER, E. M. ATKINSON & A. R. HIPKISS	97
Monoclonal antibodies to idiotypic determinants of a human immunoglobulin paraprotein evidence for the complexity of idiotype	N. R. LING, J. LOWE & R. JEFFERIS	98
Structure of the cytoplasmic face of the lymphocyte surface membrane	L. CARRUTHERS & M. J. CRUMPTON	99
Coated vesicle preparations contain lymphocyte glycoproteins	C. KINNON & M. J. OWEN	100
Characterization of the antigen recognized by the mitogenic human T-lymphocyte monoclonal antibody UCH-T1	J. M. KANELLOPOULOS, P. C. L. BEVERLEY, E. ZANDERS & M. J. CRUMPTON	101
Lymphocyte plasma-membrane kinase activities catalysing formation of phosphorylated proteins, phosphatidic acids and phosphoinositides	A. MOSHTAGHFARD & A. D. SMITH	102
The antigenicity of thyroxyl residues in human thyroglobulin	P. G. H. BYFIELD & A. BOND	103
Fractionation of human immunoglobulin G by chromatography on Remazol Yellow GGL-Sepharose	P. G. H. BYFIELD, S. COPPING & W. A. BARTLETT	104
Pre-albumin: extraction from serum by Remazol yellow GGL-Sepharose	S. COPPING & P. G. H. BYFIELD	104
Reaction of rat liver acid phosphatase with <i>p</i> -chloromercuribenzoate	N. NAVARATNAM, P. J. BUTTERWORTH & M. BANNER	105
Prediction of antigenic determinants of aspartate aminotransferase isoenzymes from amino acid sequences	S. DOONAN, H. J. DOONAN, D. BARRA & F. BOSSA	106
Thiol oxidation and the heterogeneity of mammalian skeletal-muscle creatine kinase	E. J. MILNER-WHITE	107
Studies on enolase isoenzymes in normal and pathological human tissues	J. A. ROYDS, C. B. TAYLOR, W. R. TIMPERLEY & M. A. PARSONS	108
Carbonic anhydrase III and other cytoplasmic enzymes in dystrophic mouse tissues	S. MOYLE, S. JEFFERY & N. CARTER	108
Radioimmunoassay of carbonic anhydrase III levels in plasma as an index of tissue damage	R. HEATH, I. BROWN, S. JEFFERY & N. CARTER	109
An enzyme-kinetics program for desk-top computers	M. J. C. CRABBE	110

The enterohepatic circulation of a glutathione conjugate of naphthalene in the rat	M. A. PUE, G. S. FROST & P. C. HIROM	112
Role of γ -glutamyl transferase and glutathione in amino acid uptake by isolated hepatocytes in culture	J. VIÑA, J. J. BOIX, M. IZQUIERDO & A. IRADI	112
Glutathione S-transferases AA and B possess a common antigenic determinant	D. SHEEHAN & T. J. MANTLE	113
Modified procedure for rapid purification of protein disulphide-isomerase from bovine liver	N. LAMBERT & R. B. FREEDMAN	113
Protein disulphide-isomerase is distinct from the liver microsomal protein capable of inactivating cytosol enzymes by thiol:disulphide interchange	R. B. FREEDMAN & P. GARDEN	114
The distribution of protein disulphide-isomerase activity in mammalian tissue	B. E. BROCKWAY, S. J. FOSTER, R. B. FREEDMAN & D. A. HILLSON	115
Possible role of mixed disulphide formation by paraquat in rat lung in the mechanism of control of intermediary metabolism	P. L. KEELING & L. L. SMITH	116
Decreased biliary excretion of drugs in streptozotocin-diabetic rats	S. M. ANDREWS & L. A. GRIFFITHS	117
Possible opposing effects of parathyrin and cyclic AMP on kidney tubule cell phosphate transport	P. J. BUTTERWORTH & M. F. GRAHN	118
Hydrolysis of 2-substituted benzanilides <i>in vitro</i>	S. C. MITCHELL, A. WARRANDER, P. B. WOOD & R. H. WARING	119
Amino acid transport in human erythrocytes: effect of cell age on System Gly transport activity	S. M. JONES, J. C. ELLORY, J. D. YOUNG & E. M. TUCKER	121
Selective direction of ricin to hepatic parenchymal cells	D. N. SKILLETER, A. J. PAINE & P. E. THORPE	122
Nature of the polar urinary metabolites of metiamide and cimetidine in man	S. C. MITCHELL, J. C. RITCHIE, J. R. IDLE & R. L. SMITH	123
Photoaffinity labels for glutathione- and glutathione disulphide-utilizing systems	K. T. DOUGLAS, A. P. SEDDON, C. D'SILVA & M. BUNNI	124
Biosynthesis of glycine-rich components of human epidermal prekeratin	P. T. BLADON, P. E. BOWDEN, E. J. WOOD & W. J. CUNLIFFE	125
Non-disruptive gel filtration of human bile	A. R. TAMMAR, R. W. EVANS, B. H. MORELAND & G. M. MURPHY	126
The effect of exercise on purine transport in man	R. A. HARKNESS, R. J. SIMMONDS & S. B. COADE	126
Selective inhibition of thymus cyclic nucleotide phosphodiesterase by a peptide extract of calf thymus	S. A. SAEED, N. M. BUTT & H. O. J. COLLIER	127
An apparent stimulation of cyclic AMP phosphodiesterase by arachidonic acid in intact lymphocytes	S. A. SAEED, N. M. BUTT & D. J. EDWARDS	128
Catabolism of L-threonine in rat and human liver: Importance of threonine dehydrogenase	M. I. BIRD, L. A. J. LORD & P. B. NUNN	130
Antibiotic-sensitivity linked to a mutation affecting glutamine synthetase in a strain of <i>Pseudomonas aeruginosa</i>	P. R. BROWN & R. TATA	131
Purification and activation properties of pyruvate carboxylase from the fungus <i>Aspergillus nidulans</i>	F. A. O. MARSTON, S. A. OSMANI & M. C. SCRUTTON	132
Effect of diethyl pyrocarbonate on normal human gastric-mucosa and stomach-carcinoma acid proteinases	E. T. RAKITZIS & T. B. MALLIOPOULOU	132
Studies on the procedure to measure accurately the binding properties of benzo[a]pyrene to cytochrome P-450/P-448	M. R. AZARI & A. WISEMAN	133
Spectral comparisons of benzo[a]pyrene binding to cytochrome P-450/P-448 in microsomal fractions and in highly purified form	M. R. AZARI & A. WISEMAN	134
A study of benzo[a]pyrene binding to microsomal and highly purified cytochrome P-450/P-448 by equilibrium gel filtration	A. WISEMAN & M. R. AZARI	135
Poly(hexamethylenebiguanide hydrochloride), a novel cationic complexing agent for the assay of acidic polysaccharides	J. F. KENNEDY, S. A. BARKER & I. J. BRADSHAW	136
Relative effectiveness of free and liposomally-entrapped asparaginase on the growth of the Gardner lymphosarcoma 6C3 HED	R. WILSON & R. D. MARSHALL	137
