

BIOCHEMICAL SOCIETY TRANSACTIONS

London: The Biochemical Society © 1982

Managing Editor D. C. WATTS

Book Reviews Editor B. MORELAND

Contents Volume 10, Part 4, August 1982

599th MEETING, BIRMINGHAM

Colloquium: Microbial Bioenergetics

Chairmen's introduction	S. J. FERGUSON & J. B. JACKSON	197
Aspects of the control and organization of bacterial electron transport	S. J. FERGUSON	198
A Q-cycle mechanism for the cyclic electron-transfer chain of <i>Rhodopseudomonas sphaeroides</i>	A. R. CROFTS & S. W. MEINHARDT	201
Conservation of structure in proton-translocating ATPases of <i>Escherichia coli</i> and mitochondria	J. E. WALKER, A. EBERLE, N. J. GAY, M. J. RUNSWICK & M. SARASTE	203
Transcellular ion currents	F. M. HAROLD	206

Colloquium: Intracellular free Ca²⁺

Cytoplasmic free [Ca ²⁺] in very small intact cells	T. J. RINK & R. Y. TSIEN	209
Free Ca ²⁺ inside cell ghosts and fused cell hybrids	A. K. CAMPBELL, M. B. HALLETT & M. E. T. RYALL	210
Localization of free calcium using image intensification	G. T. REYNOLDS	211
Intracellular free-Ca ²⁺ changes associated with motility	C. C. ASHLEY	212

COMMUNICATIONS

213

598th MEETING, DUBLIN

Colloquium: Proteolysis in Food Technology

Proteolysis—a degrading business but food for thought	J. KAY	277
Muscle proteinases and their possible roles in muscle growth and meat texture	D. E. GOLL, Y. OTSUKA, P. D. NAGAINIS, S. K. SATHE, J. D. SHANNON & M. MUGURUMA	280
Proteolysis in milk and dairy products	P. F. FOX	282
Proteolysis in brewing	F. R. SHARPE	284
Controlled proteolysis of food protein ingredients	S. ERIKSEN	285
Proteinase enzymes relevant to the baking industry	T. P. LYONS	287
Nutrition and protein turnover	P. J. GARLICK, G. A. CLUGSTON, M. A. McNURLAN, V. R. PREEDY & E. B. FERN	290

BOOK REVIEWS

293

COMMUNICATIONS

A comparative study of the metabolism of cytosine arabinoside in transformed lymphoblast cell lines and the protozoan <i>Tetrahymena pyriformis</i>	S. P. FRICKER & B. E. P. SWOBODA	213
Time course of enzyme-catalysed reactions	E. A. BOEKER	214
Evidence that the catalytic activity of papain depends on at least four ionizations	D. M. JARVIS & K. BROCKLEHURST	215
Synthesis and kinetic evaluation of 2-(<i>N'</i> -acetyl-L-phenylalanyl-amino)ethyl 2'-pyridyl disulphide as a two-protonic-state reactivity probe with S ₂ -subsite specificity for papain: evidence that the alignment of the active-centre imidazolium ion of papain with the leaving group of a substrate depends on the interaction in the S ₂ -subsite	G. PATEL & K. BROCKLEHURST	216
Benzofuroxan as a reactivity probe for the study of dispositions of nucleophilic and acid-base groups in enzyme active centres	E. SALIH, S. J. F. WILLENBROCK, B. S. BAINES & K. BROCKLEHURST	217
A survey of hyaluronidase activity in the livers of certain vertebrates	M. B. JOY, P. GACESA, K. S. DODGSON & A. H. OLAVESSEN	218
Electrophoretic separation of myosin heavy chains from fast and slow muscle	W. T. PERRIE, S. J. BUMFORD and K. J. ROCHELLE	219
The binding and degradation of insulin by brush-border membranes from rat kidney	J. H. THOMAS, P. G. DAVEY, C. D. G. JENKINS & D. K. PAPACHRISTODOULOU	220
Isolation of glycylglutamine, the C-terminal dipeptide of the β -endorphin corticotropin prohormone	D. C. PARISH & D. G. SMYTH	221
The ontogeny of pituitary [arginine]vasopressin and oxytocin in the human foetus	A. SMITH, N. MCINTOSH & N. CARTER	222
Output of proteins in bile by isolated perfused rat livers	P. P. GODFREY, S. G. BARNWELL, P. J. LOWE & R. COLEMAN	222
Oestrogen-induced cholestasis may be due to increased permeability of tight junctions	R. COLEMAN, E. ELIAS, S. IQBAL & A. HICKEY	222
Subcellular processing of prolactin by rat liver	M. BASSET, G. D. SMITH, K. MASHITER & T. J. PETERS	223
A new chemiluminescent label for use in immunoassay	A. PATEL, M. S. MORTON, J. S. WOODHEAD, M. E. T. RYALL, F. MCCAPRA & A. K. CAMPBELL	224
Immunogenic and antigenic epitopes of immunoglobulins: studies using monoclonal antibodies to the C γ 3 domain of human immunoglobulin G	M. I. N. JAAFAR & R. JEFFERIS	225
Immunogenic and antigenic epitopes of immunoglobulins: evidence for related variable-region epitopes in a panel of Bence-Jones proteins	S. W. EVANS, R. JEFFERIS & N. R. LING	226
Acid hydrolase secretion by human monocytes and its possible regulation by products of lymphocytes and neutrophils	P. LEONI & R. T. DEAN	228
Secretion of lysosomal enzymes by normal and cystic-fibrosis fibroblasts	W. JESSUP	228
Effects of temperature on fluid-phase, adsorptive, and receptor-mediated pinocytosis	M. F. SHIRAZI & R. T. DEAN	229
Endogenous protein turnover during lysosomal storage in normal, Tay-Sachs' and Sandhoff's fibroblasts	S. M. COCKLE & R. T. DEAN	230
Monoacylglycerol acyltransferase in brain and other tissues	F. J. DOHERTY, K. F. DAISH, P. A. HUNT & C. E. ROWE	232
Nuclear-magnetic-resonance and Fourier-transform infrared spectroscopic studies of the hydrogen-deuterium exchange of thiol groups: determination of the fractionation factor	R. J. SZAWELSKI, C. W. WHARTON & S. WHITE	232
Real-time analysis of progress curves of enzyme-catalysed reactions	C. W. WHARTON & R. J. SZAWELSKI	233
Cytosol-dependent control of lipid peroxidation	S. FAIRHURST & A. A. HORTON	235
Polymorphism and phosphorylation of tropomyosin	D. HEELEY, G. K. DHOOT, N. FREARSON, A. J. G. MOIR & S. V. PERRY	236
Factors affecting the ATPase activity of chicken gizzard actomyosin	H. A. COLE, R. J. A. GRAND, V. B. PATCHELL & S. V. PERRY	237
Comparative utilization of prostaglandin precursors by human platelet prostaglandin synthetase complex and lipoxygenase	D. BOUKCACHE & M. LAGARDE	237

Peripheral venous prostacyclin: measurement of immunoreactive 6-oxoprostaglandin $F_{1\alpha}$ and metabolites in human plasma	F. A. FORDER & F. CAREY	238
Inverse coupling of lipoxygenase and cyclo-oxygenase in human platelet microsomal fractions	D. HAWORTH, R. W. FISHER & F. CAREY	239
Radioimmunoassay at alkaline pH: A method for the quantitative determination of prostacyclin	M. A. ORCHARD, I. A. BLAIR, J. M. RITTER, L. MYATT, M. JOGEE & P. J. LEWIS	241
Fatty acid specificity of human platelet-membrane phospholipase A_2 and diacylglycerol lipase	M. LARGARDE, K. AUTHI & N. CRAWFORD	241
Changes in rat and dog bile proteins after treatment with a drug with detergent activity	C. T. EASON, R. H. HINTON, B. M. MULLOCK, B. CLARK & D. V. PARKE	243
Accumulation of lipid-rich lysosomes in the livers and kidneys of animals treated with hypolipidaemic agents	S. C. PRICE, R. H. HINTON, D. E. HALL, P. GRASSO & J. W. BRIDGES	244
The metabolic effects of sodium DL-2-chloropropionate in the starved rat	P. P. KOUNDAKJIAN, H. DATTA & K. G. M. M. ALBERTI	245
Isolation and fractionation of plasma lipoprotein classes by two-phase countercurrent partition in poly(ethylene glycol)/dextran solutions	J. M. WILKES, D. S. LEAKE, W. B. MORRIS, I. A. SUTHERLAND & T. J. PETERS	246
Studies on the function of chloroplast acyl lipids	A. A. FOLEY & J. L. HARWOOD	247
Effects of indole-3-acetic acid on phosphatidylcholine metabolism in pea (<i>Pisum sativum</i> L.) stems	M. J. PRICE-JONES, T. S. MOORE, JR. & J. L. HARWOOD	248
Investigation of the transmembrane distribution of thylakoid lipids	M. D. UNITT & J. L. HARWOOD	249
Measurement of the metabolic turnover of the 4- and 5-phosphates of phosphatidylinositol 4,5-bisphosphate in erythrocytes	C. P. DOWNES, P. T. HAWKINS & R. H. MICHELL	250
Stimulation of prostaglandin biosynthesis by cytoplasmic factors in human intra-uterine tissues	S. A. SAEED & M. D. MITCHELL	251
Endogenous inhibitors of prostaglandin biosynthesis in human amniotic fluid and pregnancy plasma	S. A. SAEED & M. D. MITCHELL	252
Interactions of human lipoproteins with bovine seminal-vesicle prostaglandin synthase	S. A. SAEED & M. D. MITCHELL	253
Inhibition of prostaglandin and thromboxane synthesis in blood platelets: evaluation of its effect in platelets from healthy individuals and from diabetics	S. C. FOX, S. P. HANLEY, S. HEPTINSTALL & I. PEACOCK	254
Selection of electron-transfer pathways in <i>Paracoccus denitrificans</i>	P. R. ALEFOUNDER, A. J. GREENFIELD, J. E. G. MCCARTHY & S. J. FERGUSON	255
A comparative study of the proton-translocating activities of cytochrome <i>c</i> oxidase from <i>Rhodopseudomonas spheroides</i> and from bovine heart	R. P. CASEY, R. B. GENNIS & A. AZZI	256
Titration of ATP synthase with an inhibitor as a function of the rate of generation of protonmotive force in <i>Paracoccus denitrificans</i> vesicles: implications for the mechanism of ATP synthases	D. PARSONAGE & S. J. FERGUSON	257
Possible involvement of nitrate transporter during the assimilation of nitrate by the photosynthetic bacterium <i>Rhodopseudomonas capsulata</i>	A. H. MCEWAN, S. J. FERGUSON & J. B. JACKSON	258
Interaction between respiration and photosynthesis mediated by the protonmotive force in intact cells of <i>Rhodopseudomonas capsulata</i>	A. J. CLARK, N. P. J. COTTON & J. B. JACKSON	259
Effect of temperature on the kinetics of β -galactoside transport by <i>Escherichia coli</i>	M. G. P. PAGE & I. C. WEST	259
Respiration-driven proton translocation in <i>Paracoccus denitrificans</i> : role of the 'permeant' ion	D. HITCHENS & D. B. KELL	261
Characterization of succinate dehydrogenase from <i>Micrococcus lysodeikticus</i>	R. CAMMACK, B. CROWE & P. OWEN	261
Ca^{2+} -dependent ATPase of rat mammary-gland Golgi vesicles: influence of Ca^{2+} and Mg^{2+} on the formation and breakdown of a phospho-enzyme intermediate	D. W. WEST & R. A. CLEGG	262
Calmodulin-like activity in rat pancreatic acini and its role in regulating microsomal Ca^{2+} transport	R. L. DORMER & A. E. RICHARDSON	263
Heterologous desensitization of phosphorylase activation and phosphatidylinositol 4,5-bisphosphate breakdown provoked by Ca^{2+} -mobilizing hormones in hepatocytes	C. J. KIRK & J. A. CREBA	264

The stimulation, by angiotensin, of phosphatidylinositol 4,5-bisphosphate breakdown and glycogen phosphorylase activity in isolated hepatocytes	J. A. CREBA & C. J. KIRK	265
Identification of Ca ²⁺ -calmodulin dependent enzyme activities in an insulin-secreting tumour	E. J. PENN, J. C. HUTTON & C. N. HALES	266
Effect of Ca ²⁺ , calmodulin and trifluoperazine on protein phosphorylation in adrenal chromaffin-granule membranes	R. D. BURGOYNE & M. J. GEISOW	267
Membrane-bound calmodulin in nervous tissue	C. J. B. WHITE & A. FRAZER	268
Stimulation of fatty acid synthesis by extracellular Ca ²⁺ and Mn ²⁺ in isolated rat hepatocytes	L. AGIUS & W. J. VAARTJES	269
Age effects on cortisone-induced insulin antagonism in mice	C. J. BAILEY & P. R. FLATT	270
Folic acid absorption in the proximal jejunum of streptozotocin-diabetic and cortisone-treated rats	S. K. SWANSTON-FLATT, P. R. FLATT & J. A. BLAIR	271
Plasma glucose and insulin concentrations after implantation and surgical resection of a transplantable rat insulinoma	P. R. FLATT, K. TAN, C. J. BAILEY, S. K. SWANSTON-FLATT, V. MARKS & J. D. WEBSTER	273
Effects of catecholamines on ketogenesis in isolated hepatocytes from fed or 48 h-starved rats	J. M. BURRIN, M. FARRER & K. G. M. M. ALBERTI	274
Tissue concentrations of free hexosamines and <i>N</i> -acetylhexosamines in rat liver	J. R. VOISEY & P. J. WINTERBURN	275
The regulation of substrate oxidation in locust flight muscle by a factor from the corpus cardiacum	M. W. GOOSEY & D. J. CANDY	276
