619th MEETING, CAMBRIDGE
Colloquium: Advances in the Regulation of Amino Acid Metabolism

Cellular transport in the regulation of amino acid metabolism
D. L. Oxender, E. J. Collarini, M. A. Shotwell, C. D. Lobaton, A. Moreno, G. S. Campbell & M. R. El-Geweley

Regulation of amino acid transport in rat hepatocytes
J. D. McGivan

Regulation of hepatic aromatic amino acid metabolism
C. I. Pogson, M. Salter & R. G. Knowles

Regulation of hepatic glutamine metabolism
A. J. Meijer & A. J. Verhoeven

Regulation of the hepatic glycine-cleavage system
M. S. Olson, R. K. Hampson & F. Craig

Regulation of branched-chain amino acid metabolism
R. A. Harris, R. Paxton, G. W. Goodwin, M. J. Kuntz, Y. Shimomura & A. Han

COMMUNICATIONS

Molecular cloning of the human T-lymphocyte surface CD2(T11) antigen
W. A. Sewell, M. H. Brown, M. J. Owen & M. J. Crumpston

Evidence for disturbance of the enkephalin system in cerebrospinal fluid with schizophrenia and with organic psychosis
T. O. Kleine & K. Klempel

Temperature effects on adenylate cyclase activity and fluidity of bovine adrenal cortex plasma membranes
B. de Foresta, M. Rogard & J. Gallay

Intracellular Na+ and prolactin stimulation of the mammary gland
I. R. Falconer & T. H. Buckley

Effects of human growth hormone on hypophysectomized rat skeletal muscles: increase in weight and creatine kinase activity
C. Ayling, B. Moreland & D. Schulster

The insulin receptor tyrosyl kinase fails to phosphorylate the guanine nucleotide regulatory proteins N1, N2, and p21
R. M. O'Brien, M. D. Houlsay, G. Milligan, A. Hall & K. Siddle

A novel method for the purification of the insulin-activated peripheral plasma membrane, high-affinity cyclic AMP phosphodiesterase
N. J. Pyne, M. E. Cooper, H. G. Nimmo & M. D. Houlsay

A G protein couples receptors to phospholipase C in exocrine pancreas and parotid glands

Effects of protein kinase C and calcium on receptor-regulated formation of isomers of inositol trisphosphate

The kinetics and thermodynamics of the carrier systems for glucose and leucine in the human erythrocyte membrane
A. G. Lowe & A. R. Walsmsley

Mechanisms involved in the α2-adrenergic inhibition of insulin secretion
N. G. Morgan & W. Montague

Acid-secretory properties of oxyntic cells isolated from human gastric biopsies
H. M. O'Sullivan, P. A. Mooney & C. F. McCarthy

Monoclonal antibodies for the human insulin receptor stimulate intrinsic receptor-kinase activity
R. M. O'Brien, M. A. Soos & K. Siddle

Internalized insulin-receptor complexes may continue signal transduction in rat adipocytes
A. G. Douen & M. N. Jones

Desensitization of α2-adrenergic responses in rat submandibular acini in vitro
N. A. Bradbury & M. A. McPherson

Adrenergic regulation of formation of inositol phosphates in rat submandibular acini
C. Doughney, R. L. Dormer & M. A. McPherson

Properties and solubilization of the Ca2+-activated, Mg2+-dependent ATPase of rough endoplasmic reticulum from rat pancreatic acini
G. R. Brown & R. L. Dormer

Detection of preproepidermal growth factor transcripts in mouse tissues by hybridization in situ using an asymmetric RNA probe
E. J. March & M. R. Green

Characterization of an antibody to phosphotyrosine and its use on proliferating epithelial tissues
M. White & M. R. Green

Effect of interactions between forskolin, phorbol ester and ionomycin on amylase secretion in guinea-pig pancreatic acini
S. Dho, T-A Ansaah & R. M. Case

Inhibition by drugs and steroids of radiolabelled polar steroid metabolism formation in vitro; visualization by rapid radial thin-layer chromatography-radioautography
C. Lyne & D. G. Gower

Changes in epidermal growth factor receptor distribution and function during epidermal maturation
M. R. Green & C. G. Smith

Properties of 3α- and 3β-hydroxysteroid dehydrogenases of porcine nasal epithelium: some effects of steroid hormones
M. R. Hancock & D. B. Gower

Trifluoperazine as an anthelmintic
J. B. Hipkiss, C. J. Branford White, T. J. Peters & A. Skinner

Mechanism-based inhibitors of GABA-transferase increase the GABA concentration in a nematode parasite
S. D. Watts & A. M. Atkins

Liposomes as immunological adjuvants in vaccines: studies with entrapped and surface-linked antigen
D. Davis, A. Davies & G. Gregoriadis

Coupling of ligands to liposomes before entrapment of agents sensitive to coupling procedures
N. Garcon, J. Senior & G. Gregoriadis

Comparison of the lymphopenic and biochemical effects of feeding 'ammonia caramel' to rats with a vitamin B6-deficient diet and a B6 antagonist
Effects of pyridoxine administered by different routes on the lymphopenia produced by feeding 'ammonia caramel' to rats
Studies on constituents of 'ammonia caramel': the lymphopenic effects of substituted pyridines and 2-acetyl-4-tetrahydroxybutylimidazole in the rat
Substrate dependence of the relationship between membrane potential and respiration rate in mitochondria
Effect of aerobic and anaerobic storage on mitochondrial anion uniporter
Anion transport in sub-mitochondrial particles prepared from rat liver mitochondria
Use of transmittance to record mitochondrial swelling
Tripeptidyl carboxypeptidase activity of angiotensin I-converting enzyme in human muscle and fluids
Carboxypeptidase N activity in human tissues and fluids
Stimulation of cultured endothelial cells by endothelial cell growth factor and heparin
Ca2+ requirements in the pathway of leukotriene B4 biosynthesis
Role of Ca2+ and calmodulin in the inhibition of lymphocyte activation by cyclosporine
Increased specificity of omeprazole against the (H+ + K+)-ATPase in intact pumping vesicles
Blood amino acid compartmentation and activities of the enzymes of amino acid metabolism in mice
Studies on the toxic effects of some nitrogen-containing secondary plant compounds on rat hepatoma cells
Effects of low-protein diet and starvation on the activity of branched-chain 2-oxoacid dehydrogenase kinase
Role of oxoproline in amino acid transfer in placenta and lactating mammary gland
Degradation of immunoreactive tyrosine aminotransferase in cultures of hepatic parenchymal cells: control by insulin
Glutamine metabolism in rat small intestine: response to lactation
Alanine: glyoxylate and serine:pyruvate aminotransferases in primary hyperoxaluria type I
Homogentisate oxidation in isolated liver cells
3-Hydroxyisobutyrate dehydrogenase: an impurity in commercial 3-hydroxyisobutyrate dehydrogenase
Control of proteolysis in isolated rat hepatocytes
Haem is not a regulator of tryptophan metabolism in rat liver
Serine metabolism is wrong in textbooks
Enzymic reprogramming of serine metabolism in rat tumours
Effects of hepatotoxins on hepatic glycogen deposition on glucose refeeding
The effect of muscle activity on the expansion of collagen fibrils in developing tendon
Differential effects of live bacteria and lipopolysaccharide on amino acid and 2-deoxy-d-glucose transport in rat muscle
To what extent do kinetic properties of amino acid transporters in liver dictate the net exchange of amino acids in vivo?
Amino acid transport in perfused rat skeletal muscle
Studies of [U-\(^{14}\)C]-ketosioleucine metabolism by rat liver mitochondria: identification of labelled acyl-carnitines by reverse-phase high-performance thin-layer chromatography

Reconstitution of a Na\(^+\)-dependent alanine transporter into liposomes

Essential amino acid splanchnic bed exchanges in the rat: effects of pregnancy and food deprivation

Insulin activation of acetyl-CoA carboxylase in isolated mammary acini from lactating rats fed a high-fat diet

Isolation of a cyclic-AMP-independent protein kinase from rat liver and its effect on the enzymic activity of acetyl-CoA carboxylase

Phosphorylation affects the mobility of the El \(\alpha\)-subunit of cardiac substrate utilization after glucose refeeding of the lactating rat mammary gland

Identification of a succinyl-CoA:3-oxoacid CoA-transferase defect using human fibroblasts

Clostridium perfringens enterotoxin: physiological response and neutralization by monoclonal antibody

Age-related changes in lung collagen metabolism

Macrophages contain neutral protease activity toward low-density lipoproteins

Biologically reactive sites in collagen involved in its haemostatic function

Platelet-reactive sites in collagens I and III

Mitogenic activity of foetal calf serum is completely removed by affinity chromatography using Blue Sepharose

Cardiac substrate utilization after glucose refeeding of starved rats

Carnitine acetyltransferase activity in African trypanosomes

Sleeping sickness alters sleeping times in mice

Lactate metabolism in 24 h-starved rats after partial hepatectomy

The trypanocidal activity of bromoacetyl-L-carnitine and 3-difluoromethylornithine in Trypanosoma brucei brucei infected rats

Changes in plasma lecithin:cholesterol acyltransferase activity during aerobic exercise

Effect of lignocaine and other local anaesthetics on rat intestinal smooth muscle

Verapamil reduces calcium uptake in isolated liver, kidney, thymus and spleen of the rat

Variations in soluble tuber proteins in tetraploid, dihaploid and doubled dihaploid potato (Solanum tuberosum)

Ultraviolet-inducible proteins in Chlamydomonas reinhardtii

Subfamily organization in the \(\alpha\)-Amy2 genes of wheat

Cloning of isocitrate lyase mRNA from Chlorella fusca

\(\text{Ca}^{2+}\) uptake by intracellular compartments in isolated enterocytes: effect of inositol 1,4,5-trisphosphate

Action of protein kinase C on gastric acid secretion

Human insulin receptor contains covalently bound palmitic acid

A. I. Magee & K. Siddle
The mechanism of synergistic actions of adrenaline and thrombin on human platelets

Energy consumption in platelets during activation of platelets by adenosine diphosphate

Phosphorylation changes of a 34 kDa membrane protein of melanoma cells by α-melanocyte-stimulating hormone and structural analogues

Is muscarinic regulation of bovine adrenal chromaffin cells inhibitory?

Changes in free cytosolic Ca^{2+} and accumulation of inositol phosphates in isolated hepatocytes by [Leu]enkephalin

Activation of polyphosphoinositide metabolism by the C-terminal octapeptide of cholecystokinin in a human embryonic pituitary cell line

Inhibition of endothelium-mediated vasodilatation and cyclic GMP accumulation by a haem-containing peptide

The mechanism of adenosine formation in the heart

Is the phosphatidylinositol cycle involved in receptor-mediated endocytosis of transferrin and asialoglycoproteins in rat hepatocytes?

Measurement of cytoplasmic free Ca^{2+} and cyclic purine nucleoside monophosphates in rat hepatocytes during receptor-mediated endocytosis of transferrin and asialoglycoproteins

Characterization of growth hormone-binding sites in sheep liver

Catspin B in the rat thyroid FRTL5 cell line

The insulin transduction system of rat white adipocytes is impaired during lactation

Luteinizing hormone and human chorionic gonadotropin stimulate leukotriene B_{4} production in rat Leydig cells

Effects of detergents on the assay and activity of the cyclic AMP-dependent protein kinase

Computer simulations of the dynamic state of phospholipid membranes

The electrophoretic properties and aggregation behaviour of dipalmitoylphosphatidylcholine vesicles incorporating glycophorin A at the gel to liquid-crystalline phase transition temperature

The dynamic relationships between the cytoskeleton, Ca^{2+}, the plasma membrane, and the cell wall: a viscoelastic model of morphogenesis

Purification of a nucleoside-transporter using monoclonal antibody

The interaction of ubiquinone-10 with phospholipid bilayers studied by difference infrared spectroscopy

Mg^{2+} requirement for the ATP-ADP exchange of the plasma membrane Ca_{i}Mg-ATPase

Release of phosphatidylinositol phosphodiesterase by electrical stimulation of the rat phrenic nerve

Fourier transform infrared spectroscopic studies of gastrin H^{+}/K^{+}-ATPase

The effects of sodium periodate on cation transport in sheep erythrocytes

Inhibition of phosphatidylethanolamine methyltransferase by two local anaesthetic drugs in chick liver microsomes and surface membranes

Osmotic pressure and the electrofusion of myeloma cells

Iron-induced oxidative damage and red cell metabolism

Signal sequence peptides at an air-water interface

A method to discriminate transport or consumption of orosomucoid and prealbumin in human cerebrospinal fluid
Evidence for a nicotinic acetylcholine receptor on lymphocytes
Effects of guanine nucleotides on phosphoinositide turnover in saponin-permeabilized pituitary tumour cells
Dihydropyridine Ca²⁺ agonists are potent stimulators of Ca²⁺ uptake and transmitter release in cultured cerebellar granule cells
Monoclonal antibodies against the drug haloperidol

A comparison of species of phospholipase C isolated from porcine lymphocytes
CONTENTS

Plasma phosphoglycerate mutase muscle (M) isoenzyme is strikingly raised in Duchenne muscular dystrophy

Cu²⁺-dependent changes in metaphase chromosome structure assayed by antibody labelling and flow cytometry

Addition of a short poly(dA)-tail to a β-globin oligonucleotide does not significantly alter its hybridization properties

DNA-protein interactions and DNA packaging in filamentous bacteriophages

Conformational studies on human tRNA genes

Glucose and pyruvate metabolism in rat soleus strips

Screening for neonatal homocystinuria by enzymic determination of homocysteine

Studies on the biosynthesis of N-acetylneuraminic acid in cultured arterial wall cells

Subcellular localization of copper in foetal deer liver

The analysis of C2–C10 acyl-CoA esters by high-performance liquid chromatography

Rheological studies on glycoprotein gels constituted from salivary mucus

Corticosterone selectively decreases collagen synthesis but does not affect the proportion of newly synthesized collagen degraded

Cell growth determined by a dye-binding protein assay

The relationship between lipophilicity of hydroxypyrid-4-one iron chelators and their aggregation state

Evaluation in vivo of hydroxypyrid-4-one iron chelators intended for the treatment of iron overload by the oral route

Some properties of rat liver mitochondria with low Ca²⁺ content

High-performance liquid chromatography analysis of recombinant interferon-α and interferon-β analogue proteins purified by immunoabsorption chromatography

Uncoupling protein content of brown adipose tissue mitochondria in fasted and refed mice

Developmental changes in lipogenesis in interscapular brown adipose tissue of diabetic (db/db) mice

δ-Aminolaevulinic acid and γ-aminobutyric acid: actions on isolated rabbit jejunum preparations

Protocol for purification of pea storage proteins and characterization of their aggregation state

Cyclic AMP in islets: its relationship to (pro)insulin biosynthesis

Production and release of pregnancy-associated proteins by the human placenta perfused in vitro

Transport of L-lactate into isolated rat hepatocytes and erythrocytes at low temperatures

Magnetically responsive erythrocyte 'ghosts'

Analysis of the transport of glycy-L-proline into brush-border membrane vesicles from rabbit small intestine

Orthophosphate fluxes in human red cells in response to pH change

Anomalous 32P orthophosphate labelling in human red cells implies two cellular orthophosphate pools

Self-organization in biological membranes

Use of liposome-entrapped diethylenetriaminepenta-acetic acid in the treatment of mice loaded with cadmium

Inhibition of cholesterol and fatty acid synthesis in rats by an oestrogen antagonist both in isolated hepatocytes and in vivo
Gel-permeation high-performance liquid chromatography in the study of binding between soluble F$_1$-ATPase and its naturally occurring inhibitor protein

Mechanism of the stimulation of respiration by added substrate in hepatocytes

Are there one or two high-affinity binding sites for GDP in brown adipose tissue mitochondria?

Cloning of cDNA encoding the uncoupling protein of brown adipose tissue mitochondria: lack of a mitochondrial targeting sequence

Binding of aurovertins and citravin to mitochondrial ATPase

The nitrate reductase of Paracoccus denitrificans

NADH dehydrogenase of Paracoccus denitrificans

Specific chemical modification of a $\beta$-chain tyrosine residue as a probe for ligand binding to mitochondrial ATP synthase

Dual-pathway models of electron transfer in succinate dehydrogenase and fumarate reductase

A new metabolic myopathy: a malate-aspartate-shuttle defect

Diphenyleneiodonium-induced cardiomyopathy

Identification of the nicotinamide nucleotide transhydrogenase of rat liver mitochondria

Direct electrochemical studies of ligand-binding reactions to cytochrome $c$ oxidase

Adenine nucleotides, oxygenation and mitochondrial reduction in renal ischaemia

Effects of low environmental copper and manganese concentrations on the respiratory chain of Paracoccus denitrificans

Low-temperature spectrophotometric studies of cytochromes $a$, and $d$ in Acetobacter pasteurianus (N.C.I.B. 6428)

Effect of oxidation of the dithiol groups of the F$_0$ sector of mitochondrial ATPase

The spin state of haem $a$, affects the rate of reduction of haem $a$ in cytochrome oxidase

Proton permeability of large unilamellar vesicles

Catalytic dissection of an enzyme active site

Site-directed mutagenesis as a means of studying the enzyme T4 RNA ligase

The dihydrolipoyl acyltransferase components of the 2-oxo acid dehydrogenase complexes from Escherichia coli: identification of a region of polypeptide chain involved in binding the E3 subunit

Pepsin treatment of reduced wool gives two merokeratins with different gel filtration elution volumes

Expression and mutagenesis of genes for ribulose-1,5-biphosphate carboxylase

Site-directed mutagenesis of Escherichia coli citrate synthase

Structural studies of chloramphenicol acetyltransferase

Characterization of binding site-catalytic site signalling in cysteine proteinases by using substrate-derived two-protonic-state reactivity probes

Identification and characterization of chymopapains A and B from dried and fresh latex of Carica papaya

Catalytic mechanism of chloramphenicol acetyltransferase investigated by site-directed mutagenesis

Crystal structures of two factitious mutants of tyrosyl-tRNA synthetase

Protein engineering of glutathione reductase: over-expression of the gene from Escherichia coli
Cloning and sequence analysis of the genes for glycolytic enzymes from *Escherichia coli*

Nuclear-magnetic-resonance spectroscopy studies of the flexible linkages between lipoyl domains in the pyruvate dehydrogenase multienzyme complex from *Escherichia coli*

High-performance gel-permeation liquid chromatography of polypeptides on TSK-G2000-SW gels in dilute trifluoroacetic acid solutions

Pathogenicity of myasthenic serum on cultured human myotubes

Isolation and partial characterization of the secretory form of human brain acetylcholinesterase

Culture of human spinal cord neurons and neuron-muscle cells in chemically defined media

Motor neuron disease: binding of sera immunoglobulins to human motor cortex synaptic membranes

Appearance of capillary-associated collagen proteins in the optic lobe of the chick embryo is retarded by light stimulation

Similarity of neuropeptide-degrading aminopeptidases in human cerebral cortex and skeletal muscle

Degradation of neuropeptides by basic aminopeptidases purified from human cerebral cortex

Subpopulations of microtubules from rat brain which differ in stability to cold, in polypeptide composition and in microtubule-associated protein 2 phosphorylation

High-affinity somatostatin-binding sites on neuroblastoma x glioma hybrid cells

Active form of Ca\(^{2+}\)-dependent phosphatidylinositol phospholipase C from rat lymphocytes at physiological Ca\(^{2+}\) concentrations

Visualization of preprocholecystokinin mRNA in rat brain by hybridization *in situ* using complementary DNA probes

Release of neurokinin A-like immunoreactivity from rat substantia nigra slices *in vitro*

Thyrotrophin-releasing hormone analogue binding to central thyrotrophin-releasing hormone receptors

\(^{125}\text{I}\)-Bolton Hunter-labelled substance P-binding sites in human brain

Association of \(^{[3}\text{H}\)nicotinic acid binding with the high-affinity \(\gamma\)-aminobutyric acid uptake system in human brain

Anti-oestrogens effect oestradiol and thyrotropin-releasing hormone-induced prolactin mRNA levels in GH\(_3\) cells

Characterization of angiotensin-converting enzyme from pig brain

ATP and adenosine release from the cholinergic nerve terminal

ATP and adenosine modulation of the cholinergic nerve terminal

Isolation of nerve terminals from crustacean muscle

Labelling of presynaptic membranes with the triplet probe, eosin, and its application in the study of protein rotational mobility

Induction of rat muscle carbonic anhydrase III by denervation, measured by radioimmunoassay and a cDNA probe

Localization of vasopressin mRNA in the rat hypothalamus using an oligonucleotide cDNA probe specific for the 3' sequence

Postnatal development of gp 50, a major glycoprotein of isolated rat brain synaptic membranes, studied with a monoclonal antibody

C. A. WHITFORD & C. R. SNELL
Influence of nerve growth factor and thyroid hormone on the development of subcortical cholinergic cells in vitro
Conformational study of neurotensin and some of its analogues
Modification of the muscarinic phosphatidylinositol response by K+ and N-methyl-D-aspartate
The M1-muscarinic acetylcholine receptor subtype is linked to the inositol cycle in rat brain synaptosomes
Reconstruction of phase-sensitive two-dimensional nuclear-magnetic-resonance spectra with maximum entropy
One- and two-dimensional 31P nuclear-magnetic-resonance spectroscopy studies of body fluids: practical methods for water suppression
31P nuclear-magnetic resonance saturation transfer measurements of flux between inorganic phosphate and ATP in yeast cells over-producing phosphoglycerate kinase
31P nuclear magnetic resonance studies of hypothermically flush-preserved rat liver ex vivo for transplantation studies
Buffering capacity of muscle determined by 1H and 31P nuclear magnetic resonance spectroscopy
13C nuclear magnetic resonance studies in vivo on the metabolism of [1-13C]benzoate by mutants of Pseudomonas putida
Comparison of human erythrocyte ADP assayed by 31P nuclear-magnetic-resonance spectroscopy and high-performance liquid chromatography
13C nuclear magnetic resonance studies of glucose metabolism in guinea-pig brain slices
A new method for the optimization of nuclear magnetic resonance selective excitation pulses
31P nuclear-magnetic-resonance saturation transfer studies of hypoxia and hypoglycaemia in guinea-pig brain slices
Pyruvate metabolism by trichomonads
Nuclear-magnetic-resonance spectroscopy of flavodoxins from diazotrophs
Kinetics of a soluble L-leucine-β-naphthylamide-hydrolysing activity from rat brain
Cerebrospinal fluid gradients of somatostatin and substance P in neurological patients
The purification of multiple forms of glutathione S-transferase from pig liver and their reaction with individual methyl linoleate hydroperoxides
Dye-affinity chromatography of CTP:cholinephosphate cytidylyltransferase
Early detection of cadmium nephrotoxicity
Oxygen uptake and glutamate dehydrogenase release in isolated renal tubules from rat kidney
Urinary enzyme excretion in humans
Inhibition by nitrite of the phosphoroclastic system of Pseudomonas putida
The role of carboxyl groups in the activity and subunit interactions of bacterial luciferase
Qualitative analysis in peptide synthesis: an improved method for proline residues
Kinetic solvent isotope effects in the reactions of papain with pyridyl disulfide probes: evidence for association–activation
Thyroidectomy increases the carbonic anhydrase III expression in rat muscle: an immunohistochemical study
