

colloquia

639th Meeting, Manchester

colloquium: The Extracellular Matrix in Health and Disease

The extracellular matrix in health and disease: preface	M. E. GRANT & M. J. HUMPHRIES	803
The human collagen X gene: complete primary sequence and re-expression in osteoarthritis	J. T. THOMAS, C. J. CRESSWELL, B. RASH, J. HOYLAND A. J. FREEMONT, M. E. GRANT & R. P. BOOT-HANDFORD	804
On the regulation of collagen-fibril shape and form	D. F. HOLMES, R. B. WATSON & K. E. KADLER	808
Approaches to the design of anti-fibrotic drugs	T. J. FRANKLIN, N. J. HALES, D. JOHNSTONE, W. B. MORRIS, C. J. CUNLIFFE, A. J. MILLEST & G. B. HILL	812
Biology and pathology of the pericellular heparan sulphate proteoglycans	G. DAVID	816
Structure and function of the fibril-associated collagens	M. VAN DER REST, E. AUBERT-FOUCHER, B. DUBLET, D. EICHENBERGER, B. FONT & D. GOLDSCHMIDT	820
Molecular biology and pathology of human elastin	J. UITTO, A. M. CHRISTIANO, V.-M. KAHÄRI M. M. BASHIR & J. ROSENBLUM	824
Fibronectin and integrins in cell adhesion and migration	S. AOTA, T. NAGAI, K. OLDEN, S. K. AKIYAMA & K. M. YAMADA	830
Integrins in thrombosis, wound healing and cancer	D. A. CHERESH	835
Assembly of laminin isoforms by triple- and double-stranded coiled-coil structures	J. ENGEL, I. HUNTER, T. SCHULTHESS, K. BECK, T. W. DIXON & D. A. D. PARRY	839
Cell adhesion to type-VI collagen	M. AUMAILLEY, U. SPECKS & R. TIMPL	843

colloquium: Biochemistry of the Eye

Anion pumps in ocular tissues	S. HODSON, J. GUGGENHEIM, D. KAILA & C. WIGHAM	849
Molecular interactions in the eye lens	C. SLINGSBY, A. SIMPSON, A. FERSZT, O. A. BATEMAN & V. NALINI	853
Signal transduction in photoreceptors	K. LANGMACK & H. SAIBIL	858
Structural and biochemical changes in the sclera of experimentally myopic eyes	N. A. MCBRIEN, H. O. MAGHADDAM, A. P. REEDER & S. MOULES	861
Structure and properties of dermatan sulphate proteoglycans	L. CÖSTER	866
Morphological and biochemical studies of the structure of the vitreous and the zonular fibres	R. MAYNE, R. G. BREWTON D. W. WRIGHT & Z. X. REN	868

Whole-organ enzymology of the creatine kinase system in heart	J. S. INGWALL	1006
Manipulating creatine kinase activity in transgenic mice to study control of energy metabolism	M. J. BROSNAN, J. M. HALOW & A. P. KORETSKY	1010
<hr/>		
colloquium: Cytoskeleton: its Role in Cellular Function		
<hr/>		
Introductory remarks	J. HESKETH & I. PRYME	1015
Role of actin-binding proteins in cytoskeletal dynamics	A. G. WEEDS, J. GOOCH, M. HAWKINS, B. POPE & M. WAY	1016
Aspects of the evolution of the lamin/intermediate filament protein family: a current analysis of invertebrate intermediate filament proteins	K. WEBER, D. RIEMER & H. DODEMONT	1021
Microtubule dynamic instability: some possible physical mechanisms and their implications	P. M. BAYLEY & S. R. MARTIN	1023
Cytoskeletal proteins in adherens-type cell-matrix junctions	D. R. CRITCHLEY, A. GILMORE, L. HEMMINGS, P. JACKSON, A. MCGREGOR, V. OHANIAN, B. PATEL, G. WAITES & C. WOOD	1028
Diversity of ankyrins in the brain	V. BENNETT, E. OTTO, M. KUNIMOTO, E. KORDELI & S. LAMBERT	1034
Red cell membrane cytoskeleton and the control of membrane properties	J. C. PINDER	1039
p103 and A60: novel proteins of the neuronal membrane-associated cytoskeleton	N. V. L. HAYES, D. A. RAYNER, A. WOODS & A. J. BAINES	1042
Dynamic changes in neutrophil cytoskeleton during priming and subsequent surface stimulated functions	N. CRAWFORD & P. EGGLETON	1048
Generation of plasma membrane domains in polarized epithelial cells: role of cell-cell contacts and assembly of the membrane cytoskeleton	W. J. NELSON	1055
Desmosomal glycoproteins I, II and III: novel members of the cadherin superfamily	G. N. WHEELER, R. S. BUXTON, A. E. PARKER, J. ARNEMANN, D. A. REES, I. A. KING & A. I. MAGEE	1060
α-Actinin: a direct link between actin and integrins	F. M. PAVALKO, C. A. OTEY, K. O. SIMON & K. BURRIDGE	1065
Syndecan, a regulator of cell behaviour, is lost in malignant transformation	M. JALKANEN, K. ELENIUS, P. INKI, J. KIRJAVAINEN & S. LEPPA	1069
Developmental changes in expression of adhesion-mediating proteins in human aortic smooth muscle	V. E. KOTELIANSKY, A. M. BELKIN, M. G. FRID & M. A. GLUKHOVA	1072
Cell-cell adhesion molecules	E. BOCK	1076
Microtubule organization in growth cones	P. R. GORDON-WEEKS	1080
Calcium, the cytoskeleton and calpactin (annexin II) in exocytotic secretion from adrenal chromaffin and mammary epithelial cells	R. D. BURGOYNE, S. E. HANDEL, A. MORGAN, M. E. RENNISON, M. D. TURNER & C. J. WILDE	1085

The integration of mass spectrometry into the biochemistry laboratory	K. K. MOCK, M. DAVEY, M. P. STEVENSON & J. S. COTTRELL	948
A comparison of electrospray-ionization m.s. and matrix-assisted laser desorption time-of-flight m.s. for the analysis of protein mixtures	M. H. ALLEN, D. J. GRINDSTAFF, M. L. VESTAL & R. W. NELSON	954
Mass spectrometry software for biochemical analysis in electrospray and fast atom bombardment modes	P. J. F. WATKINS, I. JARDINE & J. X. G. ZHOU	957

colloquium: Regulation of Retroviral Gene Expression

Retroviral RNA packaging	A. M. L. LEVER, J. H. RICHARDSON & G. P. HARRISON	963
---------------------------------	---	------------

colloquium: Bioenergetics — What Should We Teach and How Should We Teach it?

Introducing bioenergetics in the first year	J. M. WRIGGLESWORTH	967
Integration of catabolism and anabolism in microbial systems	D. W. TEMPEST	972
Phototropic bacteria — useful organisms for class experiments	J. B. JACKSON	976
Using the bacterium, <i>Paracoccus denitrificans</i> and other 'runaway mitochondria' as classroom models for respiratory electron transport studies	B. BOLGIANO, H. C. DAVIES & R. K. POOLE	976
The protonmotive force and the problem of the P/O ratio; some teaching considerations	S. J. FERGUSON	982

colloquium: Enzymology *in vivo*

Enzymology <i>in vivo</i>	K. M. BRINDLE	985
Metabolic organization and the ultrastructure of animal cells	J. S. CLEGG	986
N.m.r. studies of muscle glycogen synthesis in normal and non-insulin-dependent diabetic subjects	D. L. ROTHMAN, R. G. SHULMAN & G. I. SHULMAN	992
N.m.r. studies of phospholipid metabolism and cell proliferation	G. K. RADDA, R. M. DIXON & C. A. WOOD	995
A combined n.m.r. and molecular biological approach to studying enzymes <i>in vivo</i>	K. M. BRINDLE, S. E. C. DAVIES & S.-P. WILLIAMS	997
Is there tight channelling in the tricarboxylic acid cycle metabolon?	B. SUMEGI, A. D. SHERRY, C. R. MALLOY, C. EVANS & P. A. SRERE	1002

Physical and biological properties of keratan sulphate proteoglycan	J. L. FUNDERBURGH, M. L. FUNDERBURGH, M. M. MANN & G. W. CONRAD	871
Proteoglycan: collagen interactions and corneal ultrastructure	J. E. SCOTT	877

colloquium: Autocoid and Hormone Receptors: Rational Drug Design

Rational methods for site-directed drug design: novel approaches for the discovery of potential ligands	R. A. LEWIS	883
Intracellular recognition sites for inositol 1,4,5-triphosphate and inositol 1,3,4,5-tetrakis-phosphate	R. A. J. CHALLISS, S. T. SAFRANY, B. V. L. POTTER & S. R. NAHORSKI	888
Nuclear hormone receptors and rational drug discovery	S. GREEN	894
Role of ligand in oestrogen-receptor function	M. G. PARKER, S.E. FAWELL, P. DANIELIAN & N. ARBUCKLE	897
Development of novel oestrogen-receptor antagonists	A. E. WAKELING & J. BOWLER	899
Design of ligands for the glucocorticoid and progestin receptors	G. TEUTSCH, M. GAILLARD-MOGUILEWSKY, G. LEMOINE, F. NIQUE & D. PHILIBERT	901
Tachykinin receptor antagonists and potential clinical applications at peripheral level	C. A. MAGGI, R. PATACCHINI, P. ROVERO, S. GUILIANI & A. GIACCHETTI	909
Cholecystokinin receptors: synthetic antagonists with selectivity for receptor subtypes and possible clinical applications	L. L. IVERSEN, C. T. DOURISH & S. D. IVERSEN	913

colloquium: Biological Mass Spectrometry

The structural domains in the E2 component of the pyruvate dehydrogenase multienzyme complex from <i>Bacillus stearothermophilus</i>	L. C. PACKMAN & D. S. HIPPS	917
Laser-desorption-ionization Fourier-transform ion-cyclotron-resonance (LDI-FT-ICR) mass spectrometry (m.s.) of bacterial oligosaccharides	Z. LAM, L. BEYNON, M. B. COMISAROW, G. S. DUTTON & A. BJARNASON	922
The study of intact proteins and glycoproteins by electrospray m.s.	B. N. GREEN & R. W. A. OLIVER	929
Pyrolysis mass spectrometry of polysaccharides	J. A. LOMAX, J. M. COMMANDEUR & J. J. BOON	935
Some biochemical applications of electrospray-magnetic sector mass spectrometry	J. R. CHAPMAN, R. T. GALLAGHER & M. MANN	940
Application of electrospray ionization mass spectrometry and tandem mass spectrometry in combination with capillary electrophoresis for biochemical investigations	C. G. EDMONDS, J. A. LOO, R. R. OGORZALEK LOO, H. R. UDSETH, C. J. BARINAGA & R. D. SMITH	943

Characterization of cytoplasmic proteins essential for exocytosis in chromaffin cells	J.-M. SONTAG, T. SARAFIAN, M.-F. BADER & D. AUNIS	1090
Role of the cytoskeleton in nucleocytoplasmic RNA and protein distributions	P. S. AGUTTER	1094
Cytoskeletal association of mRNAs during growth stimulation	D. E. LARSON, L. C. BERGER, N. SIENNA & B. H. SELLS	1099
Association of ribosomes with myofibrils and microfilaments: a role in the spatial organization of protein synthesis	J. HESKETH	1103
Compartmentalization of polysomes into free, cytoskeletal-bound and membrane-bound populations	A. VEDELER, I. F. PRYME & J. E. HESKETH	1108
Keratin genes, epidermal differentiation and animal models for the study of human skin diseases	E. FUCHS	1112
The cytoskeleton in muscle cells in relation to function	L.-E. THORNELL & M. G. PRICE	1116
Reorganization and turnover of actin filament architectures in cells	P. SHERERLINE, S. H. HANDEL & K. A. K. HENDRY	1120

communications

Cytochalasins potently inhibit glycogen synthesis in hepatocyte cultures by an indirect mechanism	M. AL-HABORI, M. PEAK & L. AGIUS	1125
G-proteins and the association of ligand/receptor complexes with the cytoskeleton in human neutrophils	E. SÄRNDAHL, G. M. BOKOCH, K. SPICHER, O. STENDAHL & T. ANDERSSON	1127
Differences in basal and formyl-Met-Leu-Phe-stimulated F-actin content of human blood neutrophil subpopulations separated by continuous-flow electrophoresis	P. EGGLETON, J. PENHALLOW & N. CRAWFORD	1129
Microinjection of the <i>Yersinia</i> YopE cytotoxin in mammalian cells induces actin microfilament disruption	R. ROSQVIST, Å. FORSBERG & H. WOLF-WATZ	1131
Glycoprotein Ib- and actin-binding regions in human platelet actin-binding protein	A. M. AAKHUS, J. M. WILKINSON & N. O. SOLUM	1133
Differences in the content of actin-binding proteins in subcellular fractions prepared from Krebs II ascites cells	B. ALMÁS, I. F. PRYME, A. VEDELER & J. E. HESKETH	1135
Changes in amounts of polysomes in free, cytoskeleton-bound and membrane-bound populations in Krebs II ascites cells subjected to different growth conditions	E.-K. KIRKEIDE, I. F. PRYME & A. VEDELER	1136

Difference in patterns of proteins isolated from polysomes in free, cytoskeleton-bound and membrane-bound fractions in MPC-11 cells incubated with insulin	R. MOSS, I. F. PRYME & A. VEDELER	1138
Inhibition by <i>p</i>-bromophenacyl bromide of microtubule assembly <i>in vitro</i>	A. J. HARGREAVES, J. FLASKOS, A. P. GLAZIER & W. G. MCLEAN	1140
Tubulin: tyrosine ligase activity in regenerating peripheral nerve	F. H. MULLINS, A. J. HARGREAVES & W. G. MCLEAN	1143
The largest neurofilament component assembles in non-neuronal cells (fibroblasts), but is not phosphorylated	J. A. B. NASH & M. J. CARDEN	1147
Calcium-induced degradation of the lens cytoskeleton	J. M. MARCANTONIO & G. DUNCAN	1148
Association of pp60^{c-src} with the cytoskeleton upon platelet activation	A. R. HORVATH, Z. KISS, R. ANAND & S. KELLIE	1150
Morphological changes in adherent cells induced by <i>Clostridium difficile</i> toxins	C. v. EICHEL-STREIBER, I. WARFOLOMEOW, D. KNAUTZ, M. SAUERBORN & U. HADDING	1154
Restricted efflux of the type II isoform of cyclic AMP-dependent protein kinase in permeabilized rat hepatocytes	O. K. VINTERMYR, K. K. DAO & S. O. DØSKELAND	1161
High-molecular-mass complexes of the regulatory subunits of cyclic AMP-dependent protein kinase	J. HAAVIK, B. FAUSKE, T. FLATMARK & S. O. DØSKELAND	1163

Biochemistry of the eye

- Collagen and ageing in Bruch's membrane W. S. S. KARWATOWSKI, T. E. JEFFRIES, V. C. DUANCE, J. ALBON, A. J. BAILEY & D. L. EASTY **349S**
- Ultrastructural characterization of normal and pathological human scleral proteoglycans R. D. YOUNG, W. KARWATOWSKI, E. SMITH, R. H. GREY & D. WONG **350S**
- Extraction of the intact form of type IX collagen from mammalian vitreous P. N. BISHOP, D. MCLEOD & S. AYAD **351S**
- Mucins synthesized in organ culture of human conjunctival tissue A. P. CORFIELD, N. MYERSCOUGH, M. BERRY, J. R. CLAMP & D. L. EASTY **352S**
- Proteoglycan-collagen interactions in chronic superficial keratitis in the dog D. L. WILLIAMS, A. CRIBB & J. E. SCOTT **353S**
- Differential effect of oxygen supply and lactate concentration on keratan sulphate and glycosaminoglycuronan production in bovine cornea C. BALDUINI, G. DE LUCA, A. PASSI, S. RINDI, R. SALVINI & J. E. SCOTT **354S**

Autocoid and hormone receptors: rational drug design

- Kinetic analysis of halothane-induced Ca^{2+} release from isolated heavy sarcoplasmic reticulum J. FRENCH & J. J. A. HEFFRON **355S**
- Relaxin and cAMP in rat uterus *in vivo* A. MCLWRATH, S. J. DOWNING & M. HOLLINGSWORTH **356S**
- An alternative interpretation of multiple-affinity agonist binding to β -adrenoceptors A. J. NIMMO, J. R. CARSTAIRS, E. M. WHITAKER & J. F. B. MORRISON **357S**
- Stimulation of prostaglandin E_2 binding to a murine macrophage cell line (P388D₁) by insulin A. K. DUTTA-ROY, M. G. RAE, A. S. MILTON & D. ROTONDO **358S**

Control of starch and sucrose metabolism in leaf and storage tissues

- Binding saturation analysis of inositol-1,4,5-trisphosphate in suspension cultures of lucerne cells C. J. COOKE, C. J. SMITH, R. P. NEWTON & T. J. WALTON **359S**
- Alpha-amylase isoenzymes in aged wheat aleurone layers M. A. LIVESLEY & C. M. BRAY **360S**

The extracellular matrix in health and disease

- An assessment of the efficacy of anti-integrin α subunit monoclonal antibody production using affinity purified $\beta 1$ -integrin dimers as immunogen A. P. MOULD, J. A. ASKARI, S. K. AKIYAMA, K. M. YAMADA & M. J. HUMPHRIES **361S**
- Relationship between the secretion of cysteine proteinases and their inhibitors and malignant potential J. W. J. VAN DER STAPPEN, C. PARASKEVA, A. C. WILLIAMS, A. HAGUE & R. A. MACIEWICZ **362S**
- Iodoacetate action on articular cartilage chondrocytes R. M. MASON & D. C. L. GOH **363S**
- Effect of oxygen tension on ^{35}S -glycosaminoglycan synthesis and UDP-sugar pool size in articular cartilage G. E. HENDERSON & R. M. MASON **364S**
- The aromatic zipper: a model for the initial trimerization event in collagen folding A. BRASS, K. E. KADLER, J. T. THOMAS, M. E. GRANT & R. P. BOOT-HANDFORD **365S**
- Use of the polymerase chain reaction to amplify and clone α -chains of bovine collagen IV H. C. BUTTERWORTH, A. D. MURDOCH & R. P. BOOT-HANDFORD **366S**

Kidney levels of mRNA encoding S and B2 laminin and $\alpha 1(IV)$ collagen in diabetic rats fed an aldose reductase inhibitor	B. N. PATEL & R. P. BOOT-HANDFORD	367S
Maintenance of collagen IV expression by bovine retinal pericytes isolated directly onto Matrigel film	A. D. MURDOCH, A. E. CANFIELD, M. E. GRANT & R. P. BOOT-HANDFORD	368S
Effects of hyperglycaemic conditions on basement-membrane gene expression in cultured cells	A. D. MURDOCH, M. E. GRANT & R. P. BOOT-HANDFORD	369S
Novel methods for the study of cell-collagen interactions	D. S. TUCKWELL, M. D. ALLEN, M. TAKIGAWA & M. J. HUMPHRIES	370S
Recombinant human and dog procollagenases. Purification and characterization	P. A. KOKLITIS, R. CHOPRA, J. O'CONNELL & S. ANGAL	371S
Purification of recombinant dog tissue inhibitor of metalloproteinases	R. CHOPRA, P. A. KOKLITIS, S. BERGIN, J. ROWE & S. ANGAL	372S
Primary amino-acid sequence of rabbit osteocalcin	A. S. VIRDI, A. C. WILLIS, P. V. HAUSCHKA & J. T. TRIFFITT	373S
Partial characterization of rat bone lysozyme	A. S. VIRDI, A. C. WILLIS & J. T. TRIFFITT	374S
Type IX collagen in synovial fluids	S. F. WOTTON & V. C. DUANCE	375S
Changes in the distribution of mammalian cartilage collagens with age	V. C. DUANCE & S. F. WOTTON	376S
Physical studies on the protein core of skin dermatan sulphate proteoglycan II (decorin)	P. G. SCOTT	377S
T-cell responses to human cartilage antigens in patients with inflammatory joint disease	C. E. JONES, R. N. HOBBS & B. A. ASHTON	378S
Types II, VI and IX collagens in normal and osteoarthrotic human articular cartilage	V. H. BRIERLEY, S. AYAD & M. E. GRANT	379S
LDV: a novel cell adhesion motif recognized by the integrin $\alpha 4\beta 1$	R. MAKAREM & M. J. HUMPHRIES	380S
The role of integrin $\alpha 6\beta 4$ in hemidesmosomes of human amnion	F. BEHZAD, C. J. P. JONES & J. D. APLIN	381S
Severe Osteogenesis Imperfecta: Type I collagen abnormalities in 17 skin fibroblast cell lines	A. E. POCOCK, M. J. O. FRANCIS & R. SMITH	382S
Studies on microfibrils of developing bovine elastic tissues	C. M. KIELTY, C. A. SHUTTLEWORTH & M. E. GRANT	383S
Type VI collagen forms a structural association with hyaluronan <i>in vivo</i>	C. M. KIELTY, S. P. WHITTAKER, M. E. GRANT & C. A. SHUTTLEWORTH	384S
A collagenase-sensitive glycoprotein identified in foetal bovine cell cultures	C. M. KIELTY, C. A. SHUTTLEWORTH & M. E. GRANT	385S
Deglycosylation of cartilage proteoglycans and their T-cell responses	S. LYNN, P. GULAB, J. A. GOODACRE, S. MIDDLETON & J. P. PEARSON	386S
Isolation of calcium-binding proteins by immobilized metal affinity chromatography	J. A. CAMPBELL, J. D. BIGGART & R. J. ELLIOTT	387S
A dye-binding assay for soluble elastin	S. M. L. ANDERSON & R. J. ELLIOTT	388S
Evaluation of a new, rapid collagen assay	S. M. L. ANDERSON & R. J. ELLIOTT	389S

N.m.r. spectroscopy of Ca ²⁺ -heparin suggests delocalized binding of the cation	D. GRANT, W. F. LONG & F. B. WILLIAMSON	390S
Ca ²⁺ -heparin interaction investigated polarimetrically	D. GRANT, C. F. MOFFAT, W. F. LONG & F. B. WILLIAMSON	391S
A relationship between cation-induced changes in heparin optical rotation and heparin-cation association constants	D. GRANT, C. F. MOFFAT, W. F. LONG & F. B. WILLIAMSON	392S
Optical rotation changes in chemically modified heparins as a guide to anionic groups involved in Ca ²⁺ binding	D. GRANT, C. F. MOFFAT, W. F. LONG & F. B. WILLIAMSON	393S
Carboxylate symmetric stretching frequencies and optical rotation shifts of heparin-cation complexes	D. GRANT, C. F. MOFFAT, W. F. LONG & F. B. WILLIAMSON	394S
I.r. spectroscopic analysis of heparin-polypeptide interaction	D. GRANT, W. F. LONG & F. B. WILLIAMSON	395S
Effect of physiological pressure on the secretion of cysteine proteinases and their inhibitors from articular cartilage	R. A. MACIEWICZ, A. C. HALL & J. P. G. URBAN	396S

Biological mass spectrometry

Analysis of kinetic parameters of cyclic nucleotide phosphodiesterase systems by fast atom bombardment tandem mass spectrometry	T. J. WALTON, J. I. LANGRIDGE, J. A. KHAN, A. M. EVANS, A. G. BRENTON, D. GHOSH, F. M. HARRIS & R. P. NEWTON	397S
---	--	-------------

Regulation of retroviral gene expression

Differential effect of Coxsackie B4 virus on murine pancreatic islet preproinsulin mRNA and glyceraldehyde-3-phosphate dehydrogenase mRNA	N. D. PORTWOOD, M. J. CLEMENS & K. W. TAYLOR	398S
---	--	-------------

Bioenergetics — what should we teach and how should we teach it?

The place of bioenergetics in the modular biochemistry course in the School of Biological Sciences at Manchester	R. P. F. GREGORY	399S
Brighter bioenergetics!	B. S. BROWN	400S
Redox enzymes: a model coupled system	M. T. HEYDEMAN	401S

Enzymology *in vivo*

Indirect measurement of betaine-homocysteine methyltransferase activity using ¹ H n.m.r. spectroscopy	S. BURNS, A. JOHNSON & R. A. ILES	402S
Evidence for a protein X-like domain at the N-terminus of the E1 component of the mammalian 2-oxoglutarate dehydrogenase complex	J. E. RICE & J. G. LINDSAY	403S

General topics

Lactobacillus cell walls and their arthritis-inducing effects in rats	B. U. ARCHER, J. S. THOMPSON & P. J. WARNE	404S
---	--	-------------

Computer simulations of the effect of glycosylation on the conformational freedom of peptides	P. G. BAKER, J. S. THOMPSON & A. BRASS	405S
Solid phase synthesis of monosaccharide-containing N-glycopeptides	R. J. CHADWICK, J. S. THOMPSON & G. TOMALIN	406S
Erythrocyte 2,3 DPG in normal volunteers, asthmatics and cigarette smokers	H.J. RYDER & J. D. PHILLIPS	407S
Species differences in lithium-sodium countertransport rate	S. KAUSAR, J. D. PHILLIPS & N. J. BIRCH	408S
Proton gradient-dependent active transport of L-lactate in basal plasma membrane vesicles isolated from syncytiotrophoblast human placenta	S. T. ALONSO DE LA TORRE, M. A. SERRANO, T. CARO-PATON & J. M. MEDINA	409S
Ubiquitination of smooth muscle calpain II catalytic subunit	P. JOHNSON & J. L. HAMMER	410S
Comparison of inhibitory effects of lithium and magnesium on longitudinal smooth muscle contraction	S. M. EDBURY, F. J. HEMMINGS, R. J. DAVIE & N. J. BIRCH	411S
Binding of zona pellucida glycoproteins to sperm proacrosin	R. M. WILLIAMS & R. JONES	412S
Purification of food grade pectinase from <i>K. marxianus</i>	S. H. HARSA, D. L. PYLE & C. A. ZAROR	413S
Application of approach to equilibrium analytical ultracentrifugation (Archibald method) to the determination of molecular weights of humic substances	A. E. WILKINSON, J. J. W. HIGGO & M. N. JONES	414S
The preparation and characteristics of immunoliposomes for targeting to tumour cells (A 431)	M. J. HUDSON & M. N. JONES	415S
The preparation and characterization of proteoliposomes for targeting to oral bacteria	M. KASZUBA, M. FRANKLIN, K. J. HILL & M. N. JONES	416S
Single half-turnovers of the glucose transporter of the human erythrocyte	A. J. CRITCHLEY & A.G. LOWE	417S
Inactivation of the nucleoside transporter of the human erythrocyte by dimethyl (2-hydroxy-5-nitrobenzyl) sulphonium bromide	S. D. THORNE & A. G. LOWE	418S
The use of nested PCR and Southern blotting to confirm the presence of actin in <i>Plasmodium yoelli</i>	I. D. GOODYER, P. TOWNER & D. J. HAYES	419S
Differential responsiveness of receptor tyrosylkinases to inhibitors: Analysis of insulin and epidermal growth factor receptor sensitivity in cultured rat hepatocytes	A. J. WHATMORE & A. J. DICKSON	420S
Renal pH regulation in hypertension	J. F. DUNN & G. J. WALLEY	421S
The effects of essential fatty acid supplementation on lithium absorption kinetics in guinea pig jejunum	M. S. FREEMAN, R. J. DAVIE & N.J. BIRCH	422S
Effects of pancuronium and vecuronium on plasma levels of lactate dehydrogenase and creatine kinase in patients undergoing gynaecological surgery	F. A. WALI, V. MAKINDE, A. MAHONEY & H. F. SEELEY	423S

Generation and metabolism of $\text{Ins}(1,4,5)\text{P}_3$ in SH-SY5Y human neuroblastoma cells: The regulatory role of Ca^{2+}	D. G. LAMBERT, R. J. H. WOJCIKIEWICZ & S. R. NAHORSKI	424S
Isolation of microperoxisomes from human colonic mucosa	A. J. WOOD, Z. A. MALIK, P. S. TAPPIA, V. POXON, R. GRACE, J. NEOPTOLEMOS, K. BURDETT & M. J. CONNOCK	425S
Menaquinone-mediated free radical generation: a possible mutagenic mechanism	A. COOK, R. STOVICEK, A. D'ODORICO, A. TKAC & R. F. BILTON	426S
Exchange of inhibitors and proteases at tumour cell surfaces	F. S. STEVEN, M. M. GRIFFIN, N. J. BULLEID & B. S. BROWN	427S
Studies on a toxin produced by the cyanobacterium <i>Phormidium persicinum</i>	R. A. LINCOLN, K. STRUPINSKI & J. M. WALKER	428S
Enzyme inhibitors from algae	R. A. LINCOLN, K. STRUPINSKI & J. M. WALKER	429S
Preparation of phenylalanine-deuterated, and totally ^{15}N -enriched, calmodulins from <i>Trypanosoma brucei</i> , and its application in drug binding studies	P. J. SWEENEY, J. M. WALKER, D. G. REID, L. K. MACLACHLAN & J. P. WALTHO	430S
Effects of methylazoxymethanol treatment on the GABAergic synaptosomes in the P2 fraction from developing mouse cerebellum	E. BACON, C. GIRARD, J. DE BARRY & G. GOMBOS	431S
The application of mass spectrometry in the study of labile natural products	K. J. VAN DER MERWE, S. S. DE KOCK, P. SWART & L. FOURIE	432S
Daily energy expenditure in human subjects	J. HASLAM & M. BANNER	433S
Assessment of phosphatidylcholine (PC12) liposomes	D. J. DOHERTY & J. A. HOUGHTON	434S
Effects of different de-endothelializing injuries to the rabbit carotid artery on glycosaminoglycan content and sulphonation during early wound healing	M. W. C. HATTON & M. RICHARDSON	435S
Biochemical analysis of <i>Papaver somniferum</i> (opium poppy)	R. YASMIN & A. M. NARU	436S
Replication of the human immunodeficiency virus type I is inhibited in human cells with antisense RNA expression	G. SCZAKIEL, K. RITTNER, M. HOMANN & M. PAWLITA	437S
Replication of the human immunodeficiency virus type I is inhibited by the adeno-associated virus <i>rep</i> gene	K. RITTNER, R. HEILBRONN, J. A. KLEINSCHMIDT, I. OELZE & G. SCZAKIEL	438S
Integrin-dependent platelet recognition sites in collagen: Identification of a short platelet-reactive sequence in the type III-derived fragment $\alpha 1(\text{III})\text{CB3}$	L. F. MORTON, L. S. ZIJENAH, I. Y. MCCULLOCH, C. G. KNIGHT, M. J. HUMPHRIES & M. J. BARNES	439S
Characterization and regulation of angiotensin receptors in a rat intestinal epithelial cell line	R. D. SMITH & K. D. BROWN	440S
Biochemical changes in liver function due to prolonged administration of Co-protoporphyrin	R. BERI & R. CHANDRA	441S
Monitoring of the <i>in situ</i> thymine photo-adduct using u.v. irradiated DNA antibody $\text{f}(\text{ab})_2$ fragment	G. U. GURUDUTTA, U. P. S. CHAUHAN, V. K. JAIN & R. CHANDRA	442S
Catalase activity in cultured human retinal pigment epithelial cells	W. G. UNGER, M. E. BOULTON, S. PETAL & J. P. GOLDSMITH	443S
