Volume 2, Part 2, 1974

544TH MEETING, LONDON

	PAGE
Colloquium: The Role of Biotransformation in Toxic Action	
Reaction producing and reducing toxicity. <i>By</i> R. L. Smith	167
Mechanisms and effects of the formation of reactive metabolites in the endoplasmic reticulum. <i>By</i> E. Arrhenius	167
Detoxication of reactive metabolites. <i>By</i> E. Boyland	167
The interaction of reactive metabolites with components of mammalian cells. <i>By</i> P. D. Lawley	173
Colloquium: Protein Synthesis in Organelles and Assembly of Energy Conservation Systems	
Structural and regulatory genes for the assembly of photosynthetic membranes. <i>By</i> D. von Wettstein	176
The biogenesis of chloroplasts: protein synthesis by isolated chloroplasts. <i>By</i> R. J. Ellis	179
Mitochondrial nucleic acids. <i>By</i> P. Borst	182
Biogenesis of mitochondrial cytochromes. <i>By</i> H. Weiss	185
Colloquium: Neurochemical Correlates of Environmental Change and Learning	
Specific and non-specific brain events associated with learning. <i>By</i> P. P. G. Bateson	189
Possible long-term effects on the human brain of early environmental deprivation. <i>By</i> J. Dobbing	193
Behavioural effects of blocking macromolecular synthesis in brain. <i>By</i> B. W. Agranoff, J. H. Neale & W. M. Schoel	193
After-effects of drugs on behaviour, and the concept of 'state-dependence'. <i>By</i> H. Steinberg & M. Tomkiewicz	194
Neuronal protein synthesis and environmental stimulation: state-dependent and longer-term effects. <i>By</i> S. P. R. Rose	196
Communications	
Configurational changes in isolated turnip (<i>Brassica napus</i> L.) mitochondria. <i>By</i> H. Gunawardena & S. B. Wilson	199
Isolation, purification and characterization of aurovertin B. <i>By</i> M. D. Osselton, H. Baum & R. B. Beechey	200

	PAGE
The isolation and properties of venturicidin A. <i>By</i> P. Langcake, R. B. Beechey, C. R. Lindop, S. G. A. Wickins, D. P. Leworthy, D. E. Wiggins & J. M. Broughall	202
Factors affecting the inhibitor sensitivity of the mitochondrial membrane-bound adenosine triphosphatase activity. <i>By</i> M. Partis, A. D. Mitchell, J. Whitehead, J. F. Donnellan, P. E. Linnett & R. B. Beechey	205
The use of a fatty acid desaturase mutant of <i>Saccharomyces cerevisiae</i> to investigate the role of lipids in mitochondrial membrane functions. <i>By</i> J. M. Haslam, G. S. Cobon & A. W. Linnane	207
A biochemical genetic investigation of oligomycin and related inhibitors. <i>By</i> R. L. Houghton, W. E. Lancashire & D. E. Griffiths	210
Two mitochondrial genes specifying venturicidin resistance in yeast. <i>By</i> W. E. Lancashire, R. L. Houghton & D. E. Griffiths	213
Is the adenosine diphosphate-adenosine triphosphate translocase system influenced by mitochondrial genes? <i>By</i> K. Cain, W. E. Lancashire & D. E. Griffiths	215
Growth of galactose can prevent or delay the induction of petite mutants of <i>Saccharomyces cerevisiae</i> N.C.Y.C. 239 by ethidium bromide. <i>By</i> R. C. Hammond, M. Wright & P. A. Whittaker	218
The effects of prolonged exposure to chloramphenicol on the mitochondrial system of protein synthesis in yeast. <i>By</i> D. T. Plummer, D. R. Murray & A. W. Linnane	221
Stable nuclear pleiotropic respiratory-deficient mutants with modified mitochondrial cytochrome <i>a</i> + <i>a</i> ₃ and adenosine triphosphatase in a 'petite-negative' yeast <i>Schizosaccharomyces pombe</i> . <i>By</i> A. Goffeau, A. M. Colson, Y. Landry, F. Foury & M. Briquet	223
The timing of mitochondrial deoxyribonucleic acid replication during the cell cycle in <i>Saccharomyces cerevisiae</i> . <i>By</i> I. W. Dawes & B. L. A. Carter	224
Replicative intermediates of <i>Tetrahymena pyriformis</i> mitochondrial deoxyribonucleic acid. <i>By</i> R. A. Clegg, P. Borst, P. J. Weijers, A. C. Arnberg & E. F. J. van Bruggen	227
Interaction and recombination between extranuclear genetic elements of <i>Aspergillus nidulans</i> . <i>By</i> R. T. Rowlands & G. Turner	230
A ferredoxin-polynucleotide complex as a membrane transducer element. <i>By</i> B. R. Thomas	232
Inhibition of protein synthesis in reticulocytes by 2-(4-methyl-2,6-dinitroanilino)- <i>N</i> -methylpropionamide. <i>By</i> L. Gedamu, B. L. M. Hogan & J. E. Kay	234
The ultrastructure of turnip (<i>Brassica napus</i> L.) submitochondrial particles. <i>By</i> H. Gunawardena & S. B. Wilson	237
Subcellular localization of proteins labelled in visual cortex on first exposure of dark-reared rats to light. <i>By</i> A. Jones-Lecointe, S. P. R. Rose & A. K. Sinha	238
Factors affecting incorporation of [³ H]lysine into proteins in neurons and neuropil <i>in vivo</i> . <i>By</i> S. P. R. Rose & A. K. Sinha	239
Effects of early visual experience on [¹⁴ C]lysine incorporation into the chick brain. <i>By</i> J. Haywood, J. Hambley, S. P. R. Rose & P. P. G. Bateson	241
Developmental changes in the potassium chloride-induced dissociation of rat cerebral free polyribosomes. <i>By</i> J. O. White, L. Lim & A. N. Davison	243
Nucleic acid metabolism in the developing rat brain. <i>By</i> W. Berthold, L. Lim & A. N. Davison	244
The search for the messenger ribonucleic acid of rat brain myelin basic proteins. <i>By</i> L. Lim, J. O. White, C. Hall, W. Berthold & A. N. Davison	245

	PAGE
Cellular site of synthesis of myelin protein in the rabbit optic pathway. <i>By P. P. Giorgi & E. J. Field</i>	246
Lipid-protein interactions in myelin. <i>By N. L. Banik & A. N. Davison</i>	248
Incorporation of labelled fucose and glucosamine into glycoproteins <i>in vivo</i> from cerebellar neuronal perikarya and nerve endings. <i>By G. R. Dutton, J. Cohen & G. Wilkin</i>	249
Adult rat brain synaptic vesicles: protein and glycoprotein composition. <i>By I. G. Morgan, J. P. Zanetta, W. C. Breckenridge, G. Vincendon & G. Gombos</i>	249
The role of lipid in the structure of central-nervous-system myelin. <i>By D. H. Adams</i>	252
Neurochemical evidence for biphasic myelination in the developing central nervous system of lambs and piglets. <i>By J. A. Foulkes & D. S. P. Patterson</i>	254
Electrophoretic characterization of A and B isoenzymes of arylsulphatase. <i>By G. Dubois, J. C. Turpin & N. Baumann</i>	256
Effect of psychoactive drugs on dopamine(3,4-dihydroxyphenethylamine)-sensitive adenylate cyclase activity in corpus striatum of rat brain. <i>By R. J. Miller & L. L. Iversen</i>	256
Cellular localization of phosphoproteins in guinea-pig cerebral-cortex slices sensitive to noradrenaline, histamine and 5-hydroxytryptamine. <i>By M. Williams, A. Pavlik & R. Rodnight</i>	259
The effect of stimulation on ³² P incorporation <i>in vitro</i> into the phospholipids of subsynaptosomal fractions. <i>By J. E. Bleasdale & J. N. Hawthorne</i>	261
Accumulation of acetylcholine in ligated cholinergic neurons, traced by subcellular fractionation and by immunofluorescence. <i>By E. Heilbronn, H. Pettersson & L. Widlund</i>	262
Effects of lesions and drugs on tryptamine and 5-hydroxytryptamine in rat brain. <i>By C. A. Marsden & G. Curzon</i>	264
γ-Aminobutyric acid in the rat peripheral nervous system, pineal and posterior pituitary. <i>By P. M. Beart, J. S. Kelly & F. Schon</i>	266
A study of γ-[³ H]aminobutyric acid and [³ H]glycine accumulation by the isolated pigeon retina utilizing scintillation radioautography. <i>By J. Marshall & M. Voaden</i>	268
Biochemical properties of synaptosomes from the optic lobe of squid (<i>Loligo pealii</i>). <i>By M. J. Dowdall</i>	270
Superfused 'beds' of neocortical-derived synaptosomal fractions: adenine nucleotide content and the release of [¹⁴ C]adenine derivatives. <i>By I. Pull & H. McIlwain</i>	272
Effects of different potassium ion concentrations and of procaine and pentobarbital on [¹⁴ C]glutamate fluxes in rat brain-cortex slices. <i>By G. B. Weiss & L. Hertz</i>	274
Is there a connexion between brain biogenic amines and amnesia in rats? <i>By H. Rigter, G. van Eys & B. E. Leonard</i>	277
Cytochrome oxidase and monoamine oxidase activities in mitochondrial populations isolated from the developing chick brain. <i>By C. Barberis & J. Gayet</i>	280
Ascorbic acid in developing brain: possible function as an inhibitor of lipid peroxidation. <i>By B. P. F. Adlard</i>	281
Amino acids in subcellular brain particles. <i>By G. Brante</i>	285
Treatment of experimental epilepsy with taurine. <i>By G. H. T. Wheler, R. H. Osborne, H. F. Bradford & A. N. Davison</i>	285

	PAGE
Changes in amino acid and enzyme amounts during the development of cobalt-induced epilepsy in the rat. <i>By</i> M. H. Joseph & P. C. Emson	287
Mechanisms of Addisonian central-nervous-system degeneration: identity and possible role of cerebrospinal folate derivatives. <i>By</i> N. G. L. Harding	287
Fatty acid composition of cholesterol esters in congenital disorders of lambs and piglets. <i>By</i> D. Sweasey & D. S. P. Patterson	290
Comparative biosynthesis of ceramides in brain microsomal fractions of normal and quaking mice. <i>By</i> B. Zalc & N. Baumann	292
Fatty acid biosynthesis in mouse brain microsomal fractions. <i>By</i> S. Pollett, J. M. Bourre & N. Baumann	292
The kinetics of glucose influx into the mouse brain <i>in vivo</i> and the effects of pentobarbitone anaesthesia and hypothermia. <i>By</i> R. W. Horton	293
Sodium-independent uptake of sugars by brain-cortex slices. <i>By</i> H. Lund-Andersen & H. E. Brøndsted	295
The uses of unfixed isolated mammalian nerve cells. <i>By</i> H. Hillman	298
Dietary carbohydrate and intellectual performance. <i>By</i> G. G. Birch	300
New aflatoxins from cultures of <i>Aspergillus flavus</i> . <i>By</i> J. G. Heathcote & J. R. Hibbert	301
Monophenyl phosphate, a new conjugate of phenol in the cat. <i>By</i> I. D. Capel, P. Millburn & R. T. Williams	305
Studies on the conjugation of 4'-hydroxyamphetamine <i>in vitro</i> . <i>By</i> J. V. Dingell, J. Caldwell, J. R. Moffat, R. L. Smith & R. T. Williams	306
Acrolein as a possible metabolite of cyclophosphamide in man. <i>By</i> C. M. Kaye & L. Young	308
Studies on the metabolism and hepatotoxicity of coumarin in the baboon. <i>By</i> S. D. Gangolli, W. H. Shilling, P. Grasso & I. F. Gaunt	310
Effects of prolactin upon C ₁₉ steroid metabolism by rat mammary carcinoma. <i>By</i> W. R. Miller, R. Buchan & A. P. M. Forrest	312
Glutathione metabolism in sheep erythrocytes with high and low concentrations of reduced glutathione. <i>By</i> J. D. Young, I. A. Nimmo & J. G. Hall	314
Increased hepatotoxicity of paracetamol in rats on low-protein diets of phenobarbital, and protection by selenate. <i>By</i> A. E. M. McLean & P. Day	317
The neurotoxicity and conversion of <i>N</i> -hydroxymethylacrylamide <i>in vivo</i> . <i>By</i> P. M. Edwards	319
The use of mega quantities of ascorbic acid or ascorbate for therapeutic and prophylactic purposes in relation to biochemical individuality. <i>By</i> S. Lewin	320
Studies on the effects of the oral administration of di-(2-ethylhexyl)phthalate on some hepatic enzymes in the rat. <i>By</i> B. G. Lake, S. D. Gangolli, M. G. Wright, P. Grasso & A. G. Lloyd	322
The uptake of glucose by human skin fibroblasts. <i>By</i> J. C. Marsden	325
Indirect assessment of the sodium-plus-potassium ion-stimulated adenosine triphosphatase in cystic-fibrosis skin fibroblasts. <i>By</i> J. C. Marsden	326
The physicochemical factor required for the biliary excretion of organic cations and anions. <i>By</i> P. C. Hirom, R. D. Hughes & P. Millburn	327
Growth inhibition of <i>Escherichia coli</i> by Acridine Orange and its dependence on pH. <i>By</i> G. R. Barker & N. Hardman	330
Attempts to obtain small functional subunits of the haemocyanins from <i>Buccinum undatum</i> and <i>Neptunea antiqua</i> . <i>By</i> J. S. Pearson & E. J. Wood	333

	PAGE
The isolation and properties of a lipoprotein fraction possessing tyrosinase activity from the haemolymph of the larva of the fleshfly, <i>Sarcophaga barbata</i> . <i>By</i> L. Hughes & G. M. Price	336
Studies on phosphoglycollate phosphatase isolated from pea leaves. <i>By</i> M. W. Kerr & C. F. Gear	338
Curvilinear kinetics of dihydrofolate reductase. <i>By</i> F. A. M. Fennell & N. G. L. Harding	340
Fluorescence study of the interaction of 3,4-benzopyrene with microsomal membranes. <i>By</i> A. L. Ibbetson & R. B. Freedman	343
Studies on the messenger ribonucleic acid fraction of rat ventral prostate gland. <i>By</i> W. I. P. Mainwaring	345
Absence of ribosomal specificity in livers from fed and starved mice. <i>By</i> P. Drew & N. Maclean	346
BOOK REVIEWS	351
