OBITUARY NOTICE	
Professor John Pryde	589
547TH MEETING, LONDON	
Communications	
Perid assay of yeast invertase. <i>By</i> J. Woodward, M. J. Sookias & A. Wiseman	591
Comparison of inactivation studies on yeast invertase by using mushroom tyrosinase and potassium nitrosyldisulphonate (Fremy's salt) <i>By</i> A. Wiseman & J. Woodward	594
Conversion of 5-androstene-3 β ,17 β -diol into testosterone and 5 α -dihydrotestosterone in androgen-sensitive organs of the rat and in human skin. <i>By</i> M. B. Hodgins & J. B. Hay	596
Microsomal acyl-coenzyme A hydrolase and acyl-lysophosphatidylcholine transferase activity of rat, hen and sheep liver and of sheep jejunal mucosa. <i>By</i> K. W. J. Wahle, J. J. Morris & G. A. Garton	598
Hepatic mixed-function oxidase activity in microsomal fractions prepared by isoelectric precipitation. <i>By</i> J. R. Fry & J. W. Bridges	600
Effect of carboxyl group esterification of methotrexate on its properties as an inhibitor of dihydrofolate reductase and a substrate for aldehyde oxidase. <i>By</i> D. G. Johns, D. Farquhar, B. A. Chabner & J. J. McCormack	602
Induction of microsomal benzo[a]pyrene hydroxylation in liver cell culture by a superoxide-generating system. <i>By</i> A. J. Paine & A. E. M. McLean	605
Some aspects of the metabolism of dimethylnitrosamine in the rat. <i>By</i> C. E. Heading, J. C. Phillips, B. G. Lake, S. D. Gangolli & A. G. Lloyd	607
Some studies in the metabolism <i>in vitro</i> of dimethylnitrosamine by rat liver. <i>By</i> B. G. Lake, C. E. Heading, J. C. Phillips, S. D. Gangolli & A. G. Lloyd	610
The absorption, distribution and excretion of linalool in the rat. <i>By</i> D. V. Parke, Kh. M. Q. Rahman & R. Walker	612
Effect of linalool on hepatic drug-metabolizing enzymes in the rat. <i>By</i> D. V. Parke, Kh. M. Q. Rahman & R. Walker	615
The enhancement of biphenyl 2-hydroxylation by carcinogens <i>in vitro</i> . <i>By</i> F. J. McPherson, J. W. Bridges & D. V. Parke	618
Inorganic sulphate and tyramine metabolism in man. <i>By</i> I. Smith & P. D. Mitchell	620
Heterogeneity of bovine α -lactalbumin. <i>By</i> S. D. Proctor, J. V. Wheelock & D. T. Davies	621
The use of concanavalin A in the fractionation of tendon proteins. <i>By</i> J. C. Anderson & V. Lee-Own	623

	PAGE
The biosynthesis of glomerular basement membrane collagen. <i>By</i> M. E. Grant & R. Harwood	624
Association of procollagen proline hydroxylase and procollagen lysine hydroxylase with subcellular fractions of matrix-free cells derived from embryonic chick tendons. <i>By</i> R. Harwood, M. E. Grant & D. S. Jackson	626
Affinity chromatography of brain membrane glycoproteins. <i>By</i> G. Gombos, J. P. Zanetta, A. Reeber, I. G. Morgan & G. Vincendon	627
The action of proteolytic enzymes and mercaptoethanol on the mucoprotein from pig gastric mucus. <i>By</i> A. Allen & B. Starkey	630
The binding of gastric mucoprotein to cells in tissue culture and the inhibition of cell adhesion. <i>By</i> A. Allen & S. M. Minnikin	633
Properties of solubilized ceramide dihexoside-uridine 5'-pyrophosphate galactosyltransferase. <i>By</i> M. A. Grant, D. Ellis & S. Shall	636
The inhibitory action of glycosaminoglycans on brain sialidase. <i>By</i> J. Heijlman	638
Collagen and glycoprotein components derived from bovine tubular basement membrane: chemical and immunological properties. <i>By</i> W. Ferwerda, T. M. Feltkamp-Vroom & J. W. Smit	640
Cytidine 5'-phosphate <i>N</i> -acetylneuraminic acid hydrolase in calf kidney: properties and subcellular distribution. <i>By</i> W. van Dijk & D. H. van den Eijnden	642
Stabilization and labilization of lysosomes in rat retina. <i>By</i> A. J. Dewar & H. W. Reading	645
The effect of chemical treatment of [¹²⁵ I]iodinated bovine serum albumin on its rate of pinocytosis by 17.5-day rat yolk-sac cultured <i>in vitro</i> . <i>By</i> A. T. Moore, K. E. Williams & J. B. Lloyd	648
Isolation of embryonic antigens from chemically induced rat hepatomas. <i>By</i> M. R. Price	650
Isolation of a tumour specific antigen from a rat hepatoma by limited β -glucosidase digestion of tumour cell membrane. <i>By</i> J. G. Bowen	652
Studies on the appearance of a zinc-binding protein in rat pancreas. <i>By</i> N. T. Davies & I. Bremner	654
Iron-binding compounds formed by <i>Micrococcus denitrificans</i> . <i>By</i> G. H. Tait	657
Effect of growth conditions and dibutyl adenosine 3':5'-cyclic monophosphate treatment on L-glutamate and L-alanine transport in BHK21-C13 cells. <i>By</i> D. M. Scott & J. A. Pateman	658
Hydrated electrons interacting with charged polymers are subject to Donnan equilibria. <i>By</i> J. E. Scott, J. V. Davies & M. Ebert	660
The protein composition of axoplasm from the giant nerve fibres of <i>Myxicola infundibulum</i> and <i>Loligo forbesi</i> . <i>By</i> B. H. Anderton, W. A. Day, D. S. Gilbert & B. J. Newby	660
Loss of a specific protein from brain in dementia. <i>By</i> C. B. Smith, D. M. Bowen & A. N. Davison	661
Measurement of the intra-synaptosomal volume by means of the chloride uptake. <i>By</i> R. M. Marchbanks	664
Colloquium: Special Preparations from Nervous Tissue as Tools in Neurobiology	
Differentiated neural cells in surface culture: biochemical markers for clonal lines or normal brain. <i>By</i> E. J. Thompson	666
Regulation of tyrosine hydroxylase synthesis in organ-cultured sympathetic ganglia. <i>By</i> A. V. P. Mackay & L. L. Iversen	669

	PAGE
Organotypic cultures of nerve tissue and their use as models for neurobiological and neuropathological processes. <i>By</i> M. B. Bornstein	674
Isolated neurons as a preparation for the study of functional biochemistry in the brain. <i>By</i> S. P. R. Rose	676
Synaptic preparations for studying neurotransmission at the biochemical level. <i>By</i> H. F. Bradford	680
Biochemical dissection of the cerebellum. <i>By</i> R. Balázs, F. Hajós, A. L. Johnson, R. Tapia & G. Wilkin	682
Colloquium: Transplant Toxicity	
Physiology and pathology of the human placenta in relation to its vascular structure. <i>By</i> J. S. Wigglesworth	688
Epidemiology of drug-induced malformations. <i>By</i> J. O. Forfar	690
Experimental teratology in primates. <i>By</i> R. E. Lister	695
Selective effects of colchicine on foetal nucleotide synthesis. <i>By</i> J. P. G. Williams	699
Placental function, a target for teratogens. <i>By</i> J. B. Lloyd, K. E. Williams & F. Beck	702
The role of prenatal events in determining cancer risks in progeny. <i>By</i> L. Tomatis	703
Specificity of effects of various 'indirect' teratogens and carcinogens dependent on the development of hydroxylases in rat foetus. <i>By</i> H. Druckrey	705
Differential sensitivity of the developing mouse embryo to mortality, malformation and neoplasm induced by urethane. <i>By</i> T. Nomura	710
Effect of furylfuramide, a potent mutagen, on reproduction and malformation. <i>By</i> T. Miyaji	713
548TH MEETING, BELFAST	
Colloquium: Interrelationships of Viruses and Membranes	
The structure of cell membranes. <i>By</i> M. S. Bretscher	715
Structure of influenza virus. <i>By</i> N. G. Wrigley & J. J. Skehel	716
Assembly and functions of viral membranes. <i>By</i> P. W. Choppin	717
Persistent virus infections. <i>By</i> E. Norrby	720
Communications	
Increased deoxyribonucleic acid polymerase and adenosine triphosphate-dependent deoxyribonuclease activity in <i>Mycobacterium smegmatis</i> after treatment with alkylating agents. <i>By</i> A. W. MacNaughton & F. G. Winder	724
Involvement of multi-stranded and double-stranded ribonucleic acid in rhinovirus replication. <i>By</i> S. I. Koliais & N. J. Dimmock	726
A direct and accurate method for the determination of the molecular weight of the ribonucleic acid of a bovine enterovirus. <i>By</i> D. Todd & S. J. Martin	727
The oncolytic effect of bovine enterovirus (serotype VG-5-27) on cells from human tumours grown <i>in vitro</i> . <i>By</i> M. Noble & S. J. Martin	728
Ribonucleic acid synthesis in mouse L cells infected with encephalomyocarditis virus. <i>By</i> F. Hallinan & N. MacLean	729
The consequences of altered galactose metabolism in oncornavirus-transformed cells. <i>By</i> C. D. Blair, P. J. Brennan, S. Steiner & M. Benyesh-Melnick	731
Polypeptide multiplicity and a structural model for poliovirus. <i>By</i> A. Boeyé	733
Proteins of the Newcastle disease virus membrane. <i>By</i> I. M. Cheyne & D. C. Burke	735
A radioimmunoassay of bovine Factor X. <i>By</i> A. D. Davis, R. F. Murphy & D. T. Elmore	738

	PAGE
The site of substitution in the imidazole nucleus after the lactoperoxidase-catalysed iodination of histidine residues in polypeptides. <i>By</i> K. N. Holohan, R. F. Murphy & D. T. Elmore	739
A comparison of acid-ninhydrin and isatin methods for the measurement of proline in collagen hydrolysates. <i>By</i> R. J. Elliott & D. L. Gardner	741
Properties of a sulphotransferase from bovine kidney. <i>By</i> L. M. Armstrong & J. Carroll	743
The toxic effect of methylmercury chloride on brain-cell cultures from chick embryo. <i>By</i> T. Ammitzbøll & J. Clausen	745
Lysosomal changes during anoxia in guinea-pig heart. <i>By</i> E. Welman	746
The composition of microsomal fractions from rabbit skeletal muscle. <i>By</i> E. J. Barrett & D. R. Headon	749
Proton movements and adenosine triphosphate synthesis in rat liver mitochondria. <i>By</i> G. P. R. Archbold, C. L. Farrington, D. J. O. Gill & F. H. Malpress	751
BOOK REVIEWS	755
