Volume 2, Part 5, 1974

THE SEVENTH JUBILEE LECTURE

	PAGE
Amino acids and the brain. <i>By</i> J. H. Quastel	765

549TH MEETING, CAMBRIDGE

Colloquium: Biochemistry of Glycoprotein Hormones of the Pituitary Gland

Properties of pituitary luteinizing hormone. <i>By</i> A. Stockell Hartree	781
Properties of pituitary thyroid-stimulating hormone in comparison with those of the gonadotropins. <i>By</i> J. G. Pierce	783
Techniques for the purification of human pituitary follicle-stimulating hormone. <i>By</i> W. R. Butt & S. S. Lynch	785
Immunological techniques and the assay of human pituitary glycoprotein hormones. <i>By</i> C. N. Hales & J. S. Woodhead	787

Colloquium: Energy Coupling in Microbial Transport

The bacterial phosphoenolpyruvate-sugar phosphotransferase system. <i>By</i> S. Roseman	1023
Respiration-linked transport in bacterial membrane vesicles. <i>By</i> W. N. Konings	791
Energy-coupled sugar transport in <i>Chlorella</i> . <i>By</i> W. Tanner	793
Transport driven by transmembrane gradients of chemical and electrical potential. <i>By</i> W. A. Hamilton & D. F. Niven	797
Proton-coupled transport mechanisms in bacteria. <i>By</i> I. C. West	800

Colloquium: Automated Sequencing Techniques for Peptides and Proteins

The use of the automatic Edman sequenator in the structural analysis of polypeptides. <i>By</i> M. D. Waterfield	803
Automatic solid-phase sequencing of peptides and proteins. <i>By</i> E. Schiltz	805
Peptide-sequence determination by mass spectrometry. <i>By</i> H. R. Morris	806
Improvements to the automated sequence analysis of short peptides. <i>By</i> P. G. H. Byfield, E. W. Matthews & I. MacIntyre	808
Comparative aspects of automated sequencing techniques. <i>By</i> J. Bridgen	811

	PAGE
Colloquium: Lipid-Protein Interactions in Membrane Structure and Function	
Solubilization of membrane components. <i>By</i> R. Coleman	813
Lipid effects of enzyme activities: phospholipid dependence and phospholipid constraint. <i>By</i> T. Hallinan	817
The use of pure phospholipases in the study of membrane structure and function. <i>By</i> R. F. A. Zwaal	821
Colloquium: Genetics and Molecular Enzymology	
Genetic approaches to probing enzyme structure and improving enzyme yield. <i>By</i> W. J. Brammar	825
Variants of <i>Escherichia coli</i> alkaline phosphatase: an example of the role of genetics in a study of protein structure and function. <i>By</i> M. J. Schlesinger	827
Amidases of <i>Pseudomonas</i> species. <i>By</i> P. H. Clarke	831
Genetics and enzymology of chloramphenicol resistance. <i>By</i> W. V. Shaw	834
Organization and possible origin by gene fusion of <i>Escherichia coli</i> aspartate kinase I-homoserine dehydrogenase I: its evolutionary relationship with homoserine kinase. <i>By</i> B. Burr, C. Hirth, P. Truffa-Bachi, M. Veron, C. Villar-Palasi & G. N. Cohen	838
Evolution and the structure of proteins. <i>By</i> J. Williams	840
Colloquium: Studies on Isolated Adrenocortical Cells	
Application of tissue-culture techniques to the study of corticoidogenesis in the mammalian adrenal. <i>By</i> J. Torday, C. Goodyer, B. Smith, J. Arato & C. J. P. Giroud	844
Properties of enzymically dispersed adrenal cells after purification by sedimentation at 1g. <i>By</i> S. A. S. Tait, J. F. Tait, R. P. Gould, J. D. M. Albano & B. L. Brown	847
The use of adrenal cell suspensions for studies on the biochemical action of adrenocorticotrophic hormone. <i>By</i> M. C. Richardson, J. McIlhinney & D. Schulster	851
Isolated adrenal cells as a tool for investigating the mode of action of adrenocorticotrophin analogues. <i>By</i> H. P. J. Bennett, G. R. Bullock, A. M. Hudson, P. J. Lowry, C. McMartin & J. Peters	856
Communications	
The assembly of immunoglobulins. <i>By</i> K. C. Chan, B. R. Smith & A. L. Latner	860
Conservation of primary structure in bacterial ribosomal protein. <i>By</i> A. T. Matheson, M. Yaguchi & L. P. Visentin	861
The effect of alkylammonium ions on the activity of ribonucleic acid polymerase. <i>By</i> A. D. B. Malcolm, G. J. Mitchell & B. Wasyluk	863
Preferential accumulation of cytoplasmic protein species during inhibition of deoxyribonucleic acid synthesis in temperature-sensitive Chinese-hamster cells in culture. <i>By</i> M. Rieber, J. Bacalao & B. J. Smith	864
Further studies on the mammalian high-molecular-weight deoxyribonucleic acid polymerase fraction. <i>By</i> A. M. Holmes, I. P. Hesselwood, W. F. Wakeling & I. R. Johnson	864
	1974

	PAGE
Interaction of platinum(II) compounds with circular deoxyribonucleic acid. <i>By</i> L. P. G. Wakelin	866
Prolonged survival of tumour-bearing mice treated with liposome-entrapped actinomycin D. <i>By</i> D. E. Neerunjun & G. Gregoriadis	868
Intracellular fate and effect of liposome-entrapped actinomycin D injected into rats. <i>By</i> C. D. V. Black & G. Gregoriadis	869
A model for a lysosomal storage disease and a possible method of therapy. <i>By</i> C. M. Colley & B. E. Ryman	871
Evidence for two populations of disulphide bonds on blood platelets. <i>By</i> D. E. MacIntyre & J. L. Gordon	873
Route of administration and the conjugation of phenol in hens. <i>By</i> I. D. Capel, P. Millburn & R. T. Williams	875
The metabolism of phenmetrazine in man and laboratory animals. <i>By</i> R. B. Franklin, L. G. Dring & R. T. Williams	877
The conjugation of α -naphthylacetic acid <i>in vivo</i> . <i>By</i> P. A. F. Dixon, A. O. Uwaifo, J. Caldwell & R. L. Smith	879
Species variation in the <i>N</i> -oxidation of chlorphentermine. <i>By</i> U. Köster, J. Caldwell & R. L. Smith	881
Studies on the effect of phenobarbitone and 20-methylcholanthrene pretreatments on the metabolism and toxicity of dimethylnitrosamine in the rat. <i>By</i> B. G. Lake, C. E. Heading, J. C. Phillips, S. D. Gangolli & A. G. Lloyd	882
Studies <i>in vivo</i> on the inhibition of dimethylnitrosamine metabolism in the rat. <i>By</i> J. C. Phillips, C. E. Heading, B. G. Lake, S. D. Gangolli & A. G. Lloyd	885
The presence in liver mitochondria of oxidant-labile non-haem iron. <i>By</i> C. P. J. Caygill, S. C. Silver & A. T. Diplock	889
Simultaneous hepatic microsomal oxidation of <i>p</i> -nitroanisole and glucuronide conjugation of <i>p</i> -nitrophenol. <i>By</i> M. R. Ranklin	891
Aggregation of cartilage proteoglycans extracted with lanthanum chloride. <i>By</i> R. M. Mason & P. J. Roughley	894
The subcellular distribution of aurothiomalate in rat liver <i>in vivo</i> . <i>By</i> K. J. Lawson, C. J. Danpure, D. A. Fyfe & R. W. E. Watts	896
The binding of aurothiomalate to serum proteins <i>in vitro</i> . <i>By</i> C. J. Danpure	899
The effects of cephaloridine on enzyme excretion into the urine. <i>By</i> P. J. Wright, E. O. Ngaha & D. T. Plummer	901
Adult brain nerve-ending content and acetylcholinesterase activity in rats growth-retarded for different periods in early life. <i>By</i> B. P. F. Adlard, J. Dobbing & J. L. Smart	904
Regional brain 5-hydroxytryptamine turnover in adult rats growth-retarded in early life. <i>By</i> M. D. Tricklebank & B. P. F. Adlard	907
The release of ¹⁴ C-labelled lipids from <i>Escherichia coli</i> strains by a human serum fraction. <i>By</i> B. M. Wilson & A. A. Glynn	909
Molecular evolution of pituitary growth hormone. <i>By</i> M. Wallis & R. V. Davies	911

	PAGE
The amino acid sequence of porcine thyrotropin with reference to the molecular evolution of glycoprotein hormones. <i>By</i> J. Closset, G. Maghuin-Rogister & G. Hennen	912
Affinity chromatography for exhaustive purification of the α and β subunits of human luteinizing hormone. <i>By</i> J. Closset, J.-L. Vandalem & G. Hennen	913
The disulphide bridges of porcine luteinizing hormone α subunit. <i>By</i> Y. Combarous & G. Hennen	915
Restoration of glucogen synthesis in the perfused liver of the streptozotocin-diabetic rat. <i>By</i> P. D. Whitton & D. A. Hems	917
Insulin-induced adenosine 3':5'-cyclic monophosphate-independent phosphorylation of a fat-cell protein: effect of starving and re-feeding. <i>By</i> W. B. Benjamin, I. Singer & S. T. Fish	920
High intake of vitamin C in relation to adenosine 3':5'-cyclic monophosphate and guanosine 3':5'-cyclic monophosphate concentrations and to blood sugar concentrations. <i>By</i> S. Lewin	922
Repression of the enzymes converting benzyl alcohol into benzoate in <i>Acinetobacter calcoaceticus</i> N.C.I.B.8250. <i>By</i> J. D. Beggs & C. A. Fewson	924
Selective inhibition of cholesterol synthesis by alkylating inhibitors of hepatic cytoplasmic thiolase. <i>By</i> D. P. Bloxham	925
The isolation and properties of glutathione reductase from human erythrocytes. <i>By</i> D. J. Worthington & M. A. Rosemeyer	927
Regulation of pyruvate kinase in <i>Micrococcus denitrificans</i> . <i>By</i> A. R. Slabas & F. R. Whatley	929
Demonstration of the control of rabbit skeletal-muscle phosphorylase kinase activity <i>in vivo</i> by adenosine 3':5'-cyclic monophosphate-dependent protein kinase. <i>By</i> S. J. Yeaman & P. Cohen	931
Removal of glucose repression of α -glucosidase synthesis in yeast protoplasts by adenosine 3':5'-cyclic monophosphate addition and its prevention by chloramphenicol. <i>By</i> A. Wiseman & T.-K. Lim	932
Yeast α -glucosidase destruction-protection by maltose and by adenosine 3':5'-cyclic monophosphate. <i>By</i> A. Wiseman & T.-K. Lim	935
Activation of uridine diphosphate glucuronyltransferase in guinea-pig liver microsomal fractions by phospholipase C or mechanical fragmentation. <i>By</i> C. Berry, A. Stellan & T. Hallinan	937
The effect of oxamate on D-lactate accumulation by whole cells and membrane vesicles of <i>Escherichia coli</i> (<i>by title only</i>). <i>By</i> W. W. Nichols & W. A. Hamilton	940
Proton-coupled lactate transport in <i>Escherichia coli</i> (<i>by title only</i>). <i>By</i> S. M. Collins & W. A. Hamilton	940
Measurement of the pH gradient in <i>Staphylococcus aureus</i> and its relationship to amino acid uptake (<i>by title only</i>). <i>By</i> T. R. Horne & W. A. Hamilton	941
Effects of sulphate-limited growth in continuous culture on the efficiency of energy conservation in <i>Escherichia coli</i> . <i>By</i> R. K. Poole & B. A. Haddock	941
The accumulation of waxes of <i>Acinetobacter calcoaceticus</i> N.C.I.B. 8250. <i>By</i> L. M. Fixter & C. A. Fewson	944
	1974

	PAGE
Electron-transport systems obtained from vegetative organisms and spores of <i>Bacillus megaterium</i> KM. By B. J. Wilkinson & D. J. Ellar	945
Calcium release and germination of bacterial spores. By D. J. Ellar, M. W. Eaton & J. Posgate	947
Possible model for the origin of spore protein in bacterial sporulation. By M. W. Eaton & D. J. Ellar	948
An electron-spin-resonance characterization of <i>Rhodopseudomonas capsulata</i> . By R. C. Prince, J. S. Leigh, Jr. & P. L. Dutton	950
A change in the type of interaction of isatogens with mitochondrial energy-transfer systems brought about by chemical modification of 2-phenylisatogen. By A. P. Green, A. J. Sweetman & M. T. Khatib	953
Control of prolactin biosynthesis <i>in vitro</i> by insulin. By R. Shenai & M. Wallis	955
Control of growth-hormone biosynthesis <i>in vitro</i> by glucose. By A. Betteridge & M. Wallis	956
The role of adenosine triphosphate in the reconstitution of functional cytochromes in membranes derived from a 5-aminolaevulinic acid-requiring mutant of <i>Escherichia coli</i> . By A. E. Rockey & B. A. Haddock	957
Triplet probes: novel and powerful tools for elucidating the structure of biological membranes. By J.-P. Behr, D. Chapman & K. Razi Naqvi	960
Nuclear-magnetic-resonance studies of phospholipid-steroid relationships in lipid bilayers. By R. J. M. Smith & C. Green	962
Studies on trypsin-membrane interactions in both aqueous and hydrocarbon solvents. By P. Austin, G. Dodd, M. Davis & R. Leslie	963
Organization of yeast mitochondrial membranes: fluidity and phase transition studied by calorimetry and spin-label methods. By E. Bertoli, D. Chapman, D. E. Griffiths & S. J. Strach	964
Binding of lactate dehydrogenase to mixed monolayers of stearic acid and phosphatidylcholine. By M. S. Wooster & J. M. Wrigglesworth	967
Interaction of glutamate dehydrogenase with detergents and phospholipid membranes. By M. Nemat-Gorgani & G. Dodd	969
The effect of drug molecules on the phase transition of lipids. By B. R. Cater, D. Chapman, S. M. Hawes & J. Saville	971
Properties of ribonuclease-sensitive macromolecules associated with the external surface of the mammalian cell. By M. Rieber & J. Bacalao	974
Spontaneous vesiculation of chromaffin granules <i>in vitro</i> . By S. J. Morris, J. H. Phillips & W. Edwards	975
Phospholipid metabolism in the peripheral nervous system: radioautography of the incorporation of newly synthesized phosphatidylcholine into myelin. By R. M. Gould	978
Attachment of a regularly arranged protein to the outer membrane of <i>Acinetobacter</i> . By K. J. I. Thorne, A. M. Glauert & M. J. Thornley	979
Inhibition of mitochondrial pyruvate transport by phenylpyruvate and α -oxo-4-methylpentanoate. By A. P. Halestrap, M. D. Brand & R. M. Denton	980

	PAGE
The effect of ICI 46474 (tamoxifen) on hormone concentrations during early pregnancy in the rat. <i>By</i> J. Watson, M. Alam, F. B. Anderson & P. J. Heald	982
Influence of the structure of the D ring of various 20-oxosteroids on their behaviour as substrates for cortisone reductase. <i>By</i> I. H. White & J. Jeffery	984
Adrenal cell column perfusion: adenosine 3':5'-cyclic monophosphate and the steroidogenic response. <i>By</i> A. M. Hudson & C. McMartin	985
Cholera toxin and the steroidogenic response of isolated rat adrenocortical cells. <i>By</i> J. W. Palfreyman & D. Schulster	987
Quantitative determination of fluorescent labelled proteins by using dansyl chloride or fluorescamine with application to polyacrylamide gels. <i>By</i> E. J. Thompson, B. M. Daroga, J. M. S. Quick, R. C. Shortman, B. P. Hughes & A. N. Davison	989
Preparation and some properties of mammalian cytochrome <i>c</i> modified with 2-hydroxy-5-nitrobenzyl bromide. <i>By</i> T. Brittain & C. Greenwood	990
Lipid peroxides and the induction of hepatic microsomal cytochrome <i>P</i> -450 in the rat. <i>By</i> W. J. Marshall & C. Naughton	992
Stereospecificity of the microsomal oxidation of ethanol. <i>By</i> R. J. M. Corral, H. M. Rodman, L. C. Yu, J. M. Margolis, B. A. Rosner & B. R. Landau	994
Studies on obelin, the calcium-activated luminescent protein from the hydroid <i>Obelia geniculata</i> . <i>By</i> A. K. Campbell	995
Regulation of the production of 1,25-dihydroxycholecalciferol <i>in vitro</i> and <i>in vivo</i> . <i>By</i> H. L. Henry, R. J. Midgett & A. W. Norman	997
Adenosine 3':5'-cyclic monophosphate stimulation of calcium efflux from mitochondria. <i>By</i> A. Matlib & P. J. O'Brien	997
Calcium uptake and lipid composition of sarcoplasmic reticulum from rapidly glycolysing muscle. <i>By</i> M. C. Berman, D. B. McIntosh & J. E. Kench	1000
The metabolic basis of the post-anoxic failure and recovery of the diabetic rat heart. <i>By</i> D. J. Hearse & D. A. Stewart	1004
The distribution and excretion of [¹⁴ C]streptozotocin in the rat. <i>By</i> E. H. Karunanayake, D. J. Hearse & G. Mellows	1006
Cellular preservation or damage during myocardial anoxia: a biochemical and electron-microscopic investigation. <i>By</i> D. J. Hearse, S. M. Humphrey & W. G. Nayler	1009
The control of fatty acid synthesis by substrate supply in the perfused mouse liver. <i>By</i> D. M. W. Salmon & D. A. Hems	1011
α -Mannosidase in zinc-deficient rats: possibility of liposomal therapy in mannosidosis. <i>By</i> H. M. Patel & B. E. Ryman	1014
The pattern of [⁹⁹ Mo]molybdenum incorporation and distribution in various animal systems in relation to possible cytosolic enzyme regulation. <i>By</i> J. P. Ryan, M. J. Smyth, D. P. O'Callaghan & E. J. Duke	1017
Mixed monolayers of phospholipids and fusogenic lipids. <i>By</i> B. Maggio & J. A. Lucy	1020
Mechanisms of chemically induced cell fusion. <i>By</i> Q. F. Ahkong, W. Tampion & J. A. Lucy	1021
	1974

	PAGE
550TH MEETING, ENGLEFIELD GREEN	
Colloquium: Insect Chemistry and Biochemistry	
Insect juvenile hormones and insect growth regulators (<i>by title only</i>). <i>By</i> J. B. Siddall, K. J. Judy, D. A. Schooley, R. C. Jennings, B. J. Bergot & M. S. Hall	1027
Moulting hormones. <i>By</i> H. H. Rees & T. W. Goodwin	1027
Problems of biological activity of natural and synthetic pheromones especially sex attractants. <i>By</i> K. Eiter	1033
The defence chemistry of some water beetles (<i>by title only</i>). <i>By</i> H. Schildknecht	1034
Synthetic insecticides: a current appraisal. <i>By</i> G. T. Brooks	1034
Colloquium: Carbohydrates in Disease	
Dietary carbohydrates in disease. <i>By</i> I. MacDonald	1038
Absorption of intact oligosaccharide in health and disease. <i>By</i> I. S. Menzies	1042
Glycosidase deficiencies. <i>By</i> D. Robinson	1047
Glycogen storage diseases. <i>By</i> H.-G. Hers, T. de Barsey, B. Lederer, L. Hue & F. van Hoof	1051
Colloquium: Physical and Chromatographic Techniques in Lipid Analysis	
Analysis of lipid conformation and biosynthesis by nuclear-resonance spectroscopy (<i>by title only</i>). <i>By</i> N. M. J. Birdsall, D. J. Ellar, A. G. Lee, G. B. Warren & J. C. Metcalfe	1055
Nuclear-magnetic-resonance studies of serum lipoproteins. <i>By</i> E. G. Finer, R. Henry, R. B. Leslie & R. N. Robertson	1056
Mass spectrometry as a microanalytical tool in lipid analysis. <i>By</i> R. Klein	1057
Lipid analysis by high-performance liquid chromatography. <i>By</i> J. G. Lawrence	1059
Communications	
The relationship between carotenoids of certain Lepidoptera and Coleoptera and of their food plants. <i>By</i> L. R. G. Valadon, R. S. Mummery, M. Rothschild & J. S. E. Feltwell	1061
The conversion of cholest-5-en-3 β -ol into cholesta-5,7-dien-3 β -ol by <i>Calliphora erythrocephala</i> under aseptic conditions. <i>By</i> P. Johnson, H. H. Rees & T. W. Goodwin	1062
Biosynthesis of the insect moulting hormone cyasterone in the plant <i>Cyathula capitata</i> . <i>By</i> R. Boid, H. H. Rees & T. W. Goodwin	1066
Multimolecular forms of phenylalanine ammonia lyase in <i>Alternaria</i> . <i>By</i> J. B. Pridham & S. Woodhead	1070
Factors effecting the intracellular activity of secondary alkylsulphatase in a <i>Pseudomonas</i> isolate. <i>By</i> J. W. Fitzgerald & W. W. Laslie	1072
Lowering of the interfacial tension and increased exposure of the genetic template. <i>By</i> S. Lewin	1073
Studies on the synthesis of protamine in herring testis (<i>Clupea harengus</i>). <i>By</i> C. E. Holmes & A. MacKenzie	1076
Regulation of protein biosynthesis during early plaice (<i>Pleuronectes platessa</i>) embryogenesis. <i>By</i> A. MacKenzie & K. Scanlon	1078
Ascorbate requirement and depressed mental states. <i>By</i> S. Lewin	1080

	PAGE
Electron-transfer reactions studied by pulse radiolysis. <i>By</i> R. L. Willson	1082
The fate of [¹⁴ C]saccharin in rats chronically fed on saccharin. <i>By</i> L. M. Ball, A. G. Renwick & R. T. Williams	1084
Occlusion of acetylcholinesterase activity in nerve tissue homogenates from the American cockroach (<i>Periplaneta americana</i>), and its release by detergents. <i>By</i> P. W. Beesley & G. A. Kerkut	1086
t-3-Hexadecenoic acid in broad bean. <i>By</i> J. L. Harwood	1089
Field-desorption mass spectrometry of triglycerides and phosphoglycerides. <i>By</i> N. Evans, D. E. Games, J. L. Harwood & A. H. Jackson	1091
The effect of flight on the concentrations and composition of haemolymph diacylglycerols in the desert locust. <i>By</i> I. M. Spencer & D. J. Candy	1093
Pinocytosis and intracellular proteolysis in experimentally induced lysosomal storage. <i>By</i> A. V. S. Roberts, S. E. Nicholls, K. E. Williams & J. B. Lloyd	1096
Analytical subcellular fractionation of guinea-pig myocardium with special reference to the localization of the adenosine triphosphatases. <i>By</i> F. J. Bloomfield & T. J. Peters	1098
Analytical subcellular fractionation studies on human liver biopsies. <i>By</i> C. A. Seymour, G. Neale & T. J. Peters	1101
The effects of carbenoxolone on the biosynthesis of gastric glycoproteins in the rat and ferret. <i>By</i> J. S. Shillingford, W. E. Lindup & D. V. Parke	1104
The control of muscle trehalase activity during locust flight. <i>By</i> D. J. Candy	1107
Accumulation of sugars accompanying an inhibition of the light reaction in photosynthesis <i>in vivo</i> . <i>By</i> W. J. Owen, M. E. Delaney & L. J. Rogers	1109
Control of starch synthesis in potato tuber (<i>Solanum tuberosum</i>). <i>By</i> D. R. Davies, J. B. Pridham & J. Rintoul	1112
Some properties of an endo-1,3- β -glucanase from papain. <i>By</i> G. Wilson	1115
Control of glycerokinase activity by sex hormones. <i>By</i> A. Fathipour & J. B. Pridham	1116
Liver biopsy data on a child with fructose 1,6-diphosphatase deficiency that closely resembled many aspects of glucose 6-phosphatase deficiency (von Gierke's type I glycogen-storage disease). <i>By</i> R. B. Eagle, A. J. MacNab, B. E. Ryman & L. B. Strang	1118
Animal models for GM ₁ gangliosidosis. <i>By</i> P. S. J. Cheetham, D. Robinson & W. F. Blakemore	1121
Further studies on fucose metabolism in scrapie-affected mouse brain. <i>By</i> A. J. Suckling & G. D. Hunter	1124
Isoenzymes of human skeletal-muscle hexokinase in muscular dystrophy. <i>By</i> J. M. Strickland & D. A. Ellis	1125
The singular and combined effects of acute fructose loading and adaptation to a high sucrose diet on hepatic very-low-density lipoprotein secretion. <i>By</i> R. S. Gardner & P. A. Mayes	1127
Association and dissociation of α -galactosidase of coconut (<i>Cocos nucifera typica</i>). <i>By</i> K. Balasubramaniam, P. M. Dey & J. B. Pridham	1128
The nature of α - and β -galactosidases from <i>Cajanus indicus</i> . <i>By</i> P. M. Dey & M. Dixon	1130
Multimolecular forms of α -galactosidases in <i>Vicia faba</i> shoots. <i>By</i> N. N. Desai, P. M. Dey & J. B. Pridham	1132
BOOK REVIEWS	1135
	1974
