Volume 2, Part 6, 1974

THE SIXTH KEILIN MEMORIAL LECTURE

	PAGE
From cytochrome to adenosine triphosphate and back. <i>By</i> E. C. Slater	1149

PHARMACOLOGICAL BIOCHEMISTRY GROUP, LONDON

Colloquium: Glucuronidation Mechanisms

Membrane dependence of uridine diphosphate glucuronyltransferase: effect of the membrane on kinetic properties. <i>By</i> D. Zakim & D. A. Vessey	1165
The role of the microsomal membrane in control of uridine diphosphate glucuronyltransferase activity <i>in vitro</i> and <i>in vivo</i> . <i>By</i> A. B. Graham, D. T. Pechey, G. C. Wood & B. G. Woodcock	1167
Heterogeneity of hepatic microsomal uridine diphosphate glucuronyltransferase: a critical evaluation. <i>By</i> G. J. Mulder	1172
Activation and induction of glucuronidating enzymes during development. <i>By</i> G. J. Dutton & B. Burchell	1176
Uridine diphosphate glucuronyltransferase: its relation to hydroxylation system and its possible purification. <i>By</i> O. Hänninen, M. Laitinen & E. Puhakainen	1180
Factors affecting glucuronidation <i>in vivo</i> . <i>By</i> P. Millburn	1182

551ST MEETING, ST. ANDREWS

Colloquium: Aspects of Prostaglandin Biochemistry

Biosynthesis of prostaglandins and inhibition of biosynthesis by aspirin-like drugs. <i>By</i> R. J. Flower	1187
Contribution of prostaglandins to the inflammatory signs and systems. <i>By</i> S. H. Ferreira	1189
Metabolic interconversion of the prostaglandins. <i>By</i> R. L. Jones	1192
Some aspects of prostaglandins in reproduction. <i>By</i> N. L. Poyser	1196

Colloquium: Studies of Fat Metabolism at Different Levels of Biochemical Complexity

Influence of diet and events in the alimentary tract on the fatty acid composition of tissue lipids. <i>By</i> G. A. Garton	1200
Hormonal control of lipogenesis: the induction of milk-fat synthesis in tissue explants of mammary gland. <i>By</i> R. Dils, B. Speake, R. J. Mayer, E. Lynch, C. R. Strong & I. A. Forsyth	1205
Acute hormonal regulation of fatty acid synthesis in rat epididymal fat-pads. <i>By</i> R. M. Denton	1208

	PAGE
Utilization <i>in vitro</i> of [U- ¹⁴ C]glucose, [U- ¹⁴ C]fructose, L-[U- ¹⁴ C]alanine and [³ H]water in adipose-tissue fragments from Bar Harbor obese-hyperglycaemic mice. <i>By</i> J. Christophe, J. Dehaye & J. Winand	1214
The physiological role of fatty acid elongation in particulate fractions of rat liver and relative control factors. <i>By</i> E. Quagliariello & C. Landriscina	1215
The occurrence and role of intermediates in mitochondrial fatty acid oxidation. <i>By</i> K. K. Stanley & P. K. Tubbs	1218
Colloquium: Neurochemical Aspects of Retinal Function	
The biochemistry of the visual cycle. <i>By</i> G. A. J. Pitt	1220
Metabolism and neurotransmission in the retina. <i>By</i> M. J. Voaden	1224
Photoreceptor membrane properties and visual excitation. <i>By</i> S. L. Bonting	1228
Biochemistry of retinal degeneration. <i>By</i> H. W. Reading	1230
Biochemical studies on the dystrophic rat retina and brain. <i>By</i> A. J. Dewar	1233
Communications	
Studies on the exoprotein messenger ribonucleic acid of <i>Bacillus amyloliquefaciens</i> . <i>By</i> S. Brown & G. Coleman	1238
Evidence for synthesis <i>de novo</i> and turnover of leucyl-transfer ribonucleic acid synthetase from cultured cells of <i>Nicotiana tabacum</i> var. xanthi. <i>By</i> N. R. Gore & J. L. Wray	1240
The effects of aluminium, lead and zinc on δ -aminolaevulinic acid dehydratase. <i>By</i> P. A. Meredith, M. R. Moore & A. Goldberg	1243
Isoelectric focusing of the cadmium ion-binding protein of rat liver: interaction of the protein with a glycosaminoglycan. <i>By</i> M. Webb & R. W. Stoddart	1246
The role of disulphide bridges in the structure and immunological activity of the carcinoembryonic antigen. <i>By</i> P. Thomas, J. H. Westwood & A. B. Foster	1248
The treatment of carcinoembryonic antigen with sodium metaperiodate. <i>By</i> J. H. Westwood, P. Thomas & A. B. Foster	1250
A rapid procedure for the isolation and purification of rat liver nuclear envelope. <i>By</i> J. R. Harris & J. F. Milne	1251
Ultrastructural cytochemical and metabolic changes after nodular hyperplasia in experimental hepatomegaly. <i>By</i> N. Robinson, J. G. Nievel & J. Anderson	1253
Plasminogen and fibrinogen synthesis in experimental hepatomegaly. <i>By</i> M. F. Scully, V. V. Kakkar & J. G. Nievel	1254
Role of the stability of ribonucleic acid template during induced liver growth. <i>By</i> J. G. Nievel	1255
Distribution of free amino acids in the frog retina. <i>By</i> A. J. Kennedy & M. J. Voaden	1256
Proteolysis of retinal rod outer-segment membranes. <i>By</i> P. Trayhurn & N. Virmaux	1258
Substance P and retinal neurotransmission. <i>By</i> A. F. Winder & P. N. Patsalos	1260
Stimulation of adenylate cyclase in rat and human brain by substance P. <i>By</i> M. J. Duffy, J. Wong & D. Powell	1262
Characterization of the human thyroid-stimulating hormone receptor. <i>By</i> B. R. Smith, R. Hall & G. A. Pyle	1264
Prostaglandin receptor on blood platelets: effect of thiol reagents on inhibition of platelet aggregation by prostaglandin E ₁ . <i>By</i> D. E. MacIntyre & J. L. Gordon	1265
	1974

	PAGE
Isoelectric focusing of [³ H]oestradiol-17 β receptor in flat beds of Sephadex. <i>By A. I. Coffey & R. J. B. King</i>	1269
Distinction between choline and ethanolamine phosphorylation in <i>Entodinium caudatum</i> . <i>By T. E. Broad & R. M. C. Dawson</i>	1272
Uptake of cholesterol by aqueous dispersions of phospholipids and glycolipids. <i>By P. J. McCabe & C. Green</i>	1275
Cholesterol metabolism in two strains of rabbits differing in their cholesterol-aemic response to dietary cholesterol. <i>By C. E. West & D. C. K. Roberts</i>	1275
Distribution and metabolism of wax esters in putative acoustic tissues of cetaceans. <i>By U. Varanasi & D. C. Malins</i>	1277
Changes in hepatic fatty acid degradation during development of the laboratory rat. <i>By P. C. Foster & E. Bailey</i>	1279
Fatty acid metabolism in developing brain. <i>By R. C. Cantrill & E. M. Carey</i>	1281
Effect of dietary copper deficiency on the desaturation of stearic acid by rat liver microsomal fractions. <i>By K. W. J. Wahle & N. T. Davies</i>	1283
Exchange of the endogenous carnitine of ox heart mitochondria with external carnitine and its possible relevance to the mechanism of fatty-acyl transport into mitochondria. <i>By R. R. Ramsay & P. K. Tubbs</i>	1285
Evidence for a separate isovaleryl-coenzyme A dehydrogenase in liver mitochondria. <i>By H. Osmundsen, D. Billington & H. S. A. Sherratt</i>	1286

552ND MEETING, GALWAY

Colloquium: Affinity Chromatography

Bioaffinity chromatography: theoretical aspects and complicating factors. <i>By P. O'Carra</i>	1289
General-ligand affinity chromatography. <i>By K. Mosbach</i>	1294
Biospecific elution from non-specific adsorbents ('affinity elution'). <i>By F. von der Haar</i>	1297
Immunoaffinity chromatography. <i>By R. F. Murphy</i>	1298
Affinity chromatography of some adenosine phosphate-requiring systems. <i>By I. P. Trayer</i>	1302
The importance of ligand concentration, pH and temperature in affinity-chromatographic separations. <i>By P. D. G. Dean & M. J. Harvey</i>	1306
The determination of dissociation constants by affinity chromatography on an immobilized adenosine monophosphate analogue. <i>By P. Brodelius & K. Mosbach</i>	1308
Affinity chromatography applied to the purification of rat hepatic glucokinase. <i>By M. J. Holroyde & I. P. Trayer</i>	1310
Lactate dehydrogenase: affinity chromatographic studies of the relationship between abortive complex-formation and oxaloacetate inhibition. <i>By M. Delaney & P. O'Carra</i>	1311
Purification and some properties of calf thymus adenosine deaminase. <i>By C. A. Rossi & A. Lucacchini</i>	1313
Purification of a glycogen particle with adhering glycogen synthetase and synthetase phosphatase by chromatography on concanavalin A-Sepharose and the effect of phosphorylase <i>a</i> on this system. <i>By P. Wang & G. Bantle</i>	1315
Isolation of cell surface glycoproteins from normal and transformed cells by affinity chromatography on plant lectin columns. <i>By J. E. Smart, E. Pearlstein & M. D. Waterfield</i>	1316

	PAGE
The synthesis of nicotinamide-adenine dinucleotide phosphate analogues for affinity chromatography. <i>By</i> C. R. Lowe & K. Mosbach	1318
Synthesis of affinity gels: a re-assessment of the advantages and disadvantages of the modular solid-phase approach. <i>By</i> S. Barry, T. Griffin & P. O'Carra	1319
Binding of adrenocorticotrophin and angiotensin II derivatives to activated polyacrylamide beads for use in affinity chromatography. <i>By</i> J.-L. Fauchère, G. M. Pelican, H.-J. Moeschler, G. I. Tesser & R. Schwyzer	1322
Isolation of proteinases and proteinase inhibitors by affinity chromatography on cellulose matrices. <i>By</i> G. Wunderer, H. Fritz, W. Brümmer, N. Hennrich & H.-D. Orth	1324
Biospecific affinity chromatography of sweet-potato β -amylase. <i>By</i> P. Vretblad	1327
pH optima for the coupling of amines of various basicity to cyanogen bromide-activated carriers. <i>By</i> L. Kagedal	1328
Communications	
Studies of the amino acid sequence of plastocyanin from <i>Rumex obtusifolius</i> (broad-leaved dock). <i>By</i> B. Haslett, C. J. Bailey, J. A. M. Ramshaw, M. D. Scawen & D. Boulter	1329
The purification and structure of tryptophan synthetase from <i>Neurospora crassa</i> . <i>By</i> D. Owens & C. J. Bailey	1331
Factors influencing the interaction between radioactive iodine and fibrinogen. <i>By</i> M. F. Scully, V. V. Kakkar & J. G. Nievel	1333
Complexes between deoxyribonucleic acid and the adenosine triphosphate-dependent deoxyribonuclease from <i>Mycobacterium smegmatis</i> . <i>By</i> A. H. Johnson, T. Creedon & F. G. Winder	1334
Preliminary studies on an alkaline phosphatase produced by <i>Bacillus</i> sp. no. RK11. <i>By</i> C. T. Kelly & W. M. Fogarty	1336
Production and some properties of an extracellular invertase from <i>Neurospora sitophila</i> . <i>By</i> M. M. Dixon & W. M. Fogarty	1339
Phosphate-independent glutaminase from rat kidney cortex. <i>By</i> J. T. Brosnan & J. Kalra	1341
Preliminary studies on enzymes of creatinine degradation. <i>By</i> A. Forde & D. B. Johnson	1342
Selective inhibition and the kinetic mechanism of the aliphatic amidase of <i>Pseudomonas aeruginosa</i> . <i>By</i> M. J. Woods & B. A. Orsi	1344
Distribution and function of glucosyloxy fatty acids of fungi. <i>By</i> P. F. S. Byrne & P. J. Brennan	1346
Effect of phospholipase C on androgen catabolism in rat liver microsomal fractions. <i>By</i> M. E. Beary & G. O'Shea	1349
Sex hormones, tryptophan oxygenase activity and cerebral monoamine metabolism in the rat. <i>By</i> B. E. Leonard & A. D. Hamburger	1351
Protein synthesis in a cell-free system from the skate (<i>Raja ocellata</i>). <i>By</i> M. E. Brosnan, D. R. Myron, L. A. W. Feltham & B. H. Sells	1356
Induction of drug-metabolizing enzymes and ribosomal protein synthesis during actinomycin blockage of ribonucleic acid synthesis. <i>By</i> J. G. Nievel	1357
Participation of various hormones in the induction of experimental hepatomegaly. <i>By</i> J. G. Nievel	1358
Histochemical and ultrastructural analysis of the effect of electromagnetic radiation on rat liver and brain. <i>By</i> N. Robinson, J. G. Nievel & J. Anderson	1359
	1974

	PAGE
The immobilization of enzymes on inorganic supports. <i>By D. Thornton, M. J. Byrne, A. Flynn & D. B. Johnson</i>	1360
Characterization of immobilized urate oxidase. <i>By D. B. Johnson & M. P. Coughlan</i>	1362
Purification and properties of a guinea-pig intestinal mucosal peptide hydrolase with activity towards dipeptides containing proline. <i>By G. O'Cuinn & P. F. Fottrell</i>	1364
Multiple forms of peptide hydrolases from guinea-pig intestinal mucosa. <i>By C. O. Piggott & P. F. Fottrell</i>	1366
The nature of gliadin toxicity in coeliac disease. <i>By J. J. Phelan</i>	1368
D-Gluconate transport in <i>Bacillus subtilis</i> . <i>By L. Baxter, S. Torrie & M. McKillen</i>	1370
Purification of a cholinergic receptor isolated from housefly heads. <i>By B. S. Clarke & J. F. Donnellan</i>	1373
The mechanism of interaction of cassaine with sodium-plus-potassium ion-dependent adenosine triphosphatase. <i>By T. Tobin, T. Akera, S. L. Brody & T. M. Brody</i>	1375
The calcium-independent (basal) adenosine triphosphatase of rabbit skeletal-muscle microsomal fraction. <i>By M. Seaver & P. F. Duggan</i>	1378
The role of potassium ions in the calcium-transport system of sarcoplasmic reticulum. <i>By P. F. Duggan</i>	1380
Sarcoplasmic-reticulum vesicles: a model system for membrane anaesthesia studies. <i>By S. Browne & P. F. Duggan</i>	1383
Immunological isolation of rat fat-cell plasma membranes. <i>By J. P. Luzio, A. C. Newby & C. N. Hales</i>	1385
BOOK REVIEWS	1387
INDEX	1399
