

Royal Irish Academy Medal Lecture

The Gram-Negative Outer Membrane Structure, Biochemistry and Vaccine Potential

P. OWEN

colloquia

640th Meeting, Heriot-Watt

colloquium: Biochemistry of Plant Polysaccharides

Starch granules large and small	J. R. STARK & A. LYNN	7
Control of starch biosynthesis in developing cereal grains	C. M. DUFFUS	13
Probing the molecular architecture of (1,3)-β-glucan (callose) synthase: polypeptide depletion studies	B. P. WASSERMAN, A. WU & R. W. HARRIMAN	18
Mechanism and regulation of galactomannan biosynthesis in developing leguminous seeds	J. S. G. REID, M. E. EDWARDS, M. J. GIDLEY & A. H. CLARK	23
Alginates: biosyntheses and some structure-function relationships relevant to biomedical and biotechnological applications	G. SKJÅK-BRÆK	27
Protein engineering of amylases	B. SVENSSON & M. SØGAARD	34
Bacterial cellulases	P. BÉGUIN, J. MILLET, S. CHAUVAUX, S. SALAMITOU, K. TOKATLIDIS, J. NAVAS, T. FUJINO, M. LEMAIRE, O. RAYNAUD, M.-K. DANIEL & J.-P. AUBERT	42
Fungal cellulases	T. M. WOOD	46

colloquium: Molecular Biology of Plant Hormones and their Receptors

Plant hormone receptors: past, present and future	M. A. VENIS & R. M. NAPIER	55
Perception of the auxin signal at the plasma membrane of tobacco mesophyll protoplasts	H. BARBIER-BRYGOO, G. EPHRITIKHINE, C. MAUREL & J. GUERN	59
Specific auxin-binding proteins in the plasma membrane: receptors or transporters?	T. L. LOMAX & G. R. HICKS	64
Auxin-binding proteins of <i>Zea mays</i> identified by photoaffinity labelling	I. MOORE, J. FELDWISCH, N. CAMPOS, R. ZETTL, B. BRZOBHATY, L. BAKÓ, J. SCHELL & K. PALME	70

Molecular cloning approach for a putative ethylene receptor gene in <i>Arabidopsis</i>	C. CHANG, A. B. BLEECKER, S. F. KWOK & E. M. MEYEROWITZ	73
Identification of genes for the ethylene-forming enzyme and inhibition of ethylene synthesis in transgenic plants using antisense genes	M. BOUZAYEN, A. HAMILTON, S. PICTON, S. BARTON & D. GRIERSON	76
Control of cell division in plants	D. INZÉ, P. FERREIRA, A. HEMERLY & M. VAN MONTAGU	80
Gibberellin perception and the <i>Avena fatua</i> aleurone: do our molecular keys fit the correct locks?	R. HOOLEY, M. H. BEALE, S. J. SMITH, R. P. WALKER, P. J. RUSHTON, P. N. WHITFORD & C. M. LAZARUS	85
The role of VPI in regulation of seed maturation in maize	D. R. MCCARTY	89
ABA-regulated gene expression: cis-acting sequences and trans-acting factors	W. R. MARCOTTE, JR, M. J. GUILTINAN & R. S. QUATRANO	93
Expression of auxin-responsive genes in soybean and transgenic tobacco	T. J. GUILFOYLE, G. HAGEN, Y. LI, M. A. GEE, T. N. ULMASOV & G. MARTIN	97
Growth substances in context: a decade of sensitivity	A. J. TREWAVAS	102

colloquium: Heterogeneity within Receptors and Ion Channels

Biochemical correlates of α-adrenoceptor activation	D. A. KENDALL	109
Non-α_2-adrenoceptor idazoxan binding sites: a new target for drug development	A. T. KILPATRICK, C. C. BROWN & A. C. MACKINNON	113
Inter-species variants of the 5-HT₃ receptor	G. J. KILPATRICK & M. B. TYERS	118
Multiple histamine receptors: properties and functional characteristics	S. J. HILL	122
Studies on the structure and function of D₂-dopamine receptors	P. G. STRANGE	126
Muscarinic receptor subtypes: inositol phosphates and intracellular calcium	D. G. LAMBERT, N. T. BURFORD & S. R. NAHORSKI	130
Multiple heterotrimeric guanine nucleotide binding proteins: roles in the determination of cellular signalling specificity	G. MILLIGAN	135
Regulation of intracellular cyclic AMP concentrations in hepatocytes involves the integrated activation and desensitization of adenylyl cyclase coupled with the action and activation of specific isoforms of cyclic AMP phosphodiesterase	M. D. HOUSLAY, S. L. GRIFFITHS, Y. M. HORTON, C. LIVINGSTONE, M. LOBBAN, F. MACDONALD, N. MORRIS, J. PRYDE, G. SCOTLAND, Y. SHAKUR, G. SWEENEY & E. K. Y. TANG	140
Voltage-dependent calcium channels: structures and drug-binding sites	M. SPEDDING & B. KENNY	147
Mitochondrial Ca²⁺ transport and the role of matrix Ca²⁺ in mammalian tissues	J. G. McCORMACK, R. L. DANIEL, N. J. OSBALDESTON, G. A. RUTTER & R. M. DENTON	153

**colloquium: Structure and Function of the Leucocyte Common Antigen
CD45**

CD45: from alloantigen to mapping of restricted epitopes using recombinant soluble CD45 isoforms	A. N. BARCLAY & M. N. MCCALL	161
CD45 and a family of receptor-linked protein tyrosine phosphatases	H. SAITO, M. STREULI, N. X. KRUEGER, M. ITOH & A. Y. M. TSAI	165
CD45: a transmembrane protein tyrosine phosphatase involved in the transduction of antigenic signals	C. T. WEAVER, J. T. PINGEL, J. O. NELSON & M. L. THOMAS	169
Regulation and structure-function relationship of CD45	I. S. TROWBRIDGE, P. JOHNSON, H. OSTERGAARD & N. HOLE	174
CD45 regulates TCR-induced signalling through tyrosine phosphorylation of phospholipase Cγ1	S. B. KANNER & J. A. LEDBETTER	178
Functional subsets of T cells defined by isoforms of CD45	P. C. L. BEVERLEY, A. DASER, C. A. MICHIE & D. L. WALLACE	184
Subsets of CD4⁺ T cells defined by their expression of different isoforms of the leucocyte-common antigen, CD45	D. MASON	188
Post-thymic T cell development in rats: an update	J. KAMPINGA, H. GROEN, F. KLATTER, B. MEEDENDORP, R. ASPINALL, R. ROSER & P. NIEUWENHUIS	191
The cyclic expression of CD45R isoforms on CD4 T cells	E. B. BELL, C. P. YANG, S. R. SARAWAR & S. M. SPARSHOTT	198

Irish Area Section Meeting, Maynooth

colloquium: Immunological Techniques in Biochemical Research

Antibody engineering	P. T. JONES	203
Flow cytometry in tumour cell receptor analysis. Survey of the literature and recent developments concerning the urokinase-type plasminogen activator (uPA)	N. CHUCHOLOWSKI, M. SCHMITT, L. GORETZKI, E. BUSCH, N. MONIWA, U. WEIDLE, M. KRAMER, B. WAGNER, F. JANICKE & H. GRAEFF	208
Catalytic antibodies — A new window on protein chemistry	C. J. SUCKLING	216
Immunological techniques in biotechnology research	R. G. WERNER, W. BERTHOLD, H. HOFFMANN, J. WALTER & W. WERZ	221
Peptide antigens	G. B. WISDOM	226
Immune-mediated cell separation methods	P. A. DYER	230
Immunochemical tests of potential fertility	W. P. COLLINS	234

Biochemistry of plant polysaccharides		
The effect of Cu(II) ions on the optical rotation of heparin	D. GRANT, W. F. LONG, C. F. MOFFATT & F. B. WILLIAMSON	1S
Polarimetry of mixtures of Cu(II) ions and chemically modified heparins	D. GRANT, W. F. LONG, C. F. MOFFATT & F. B. WILLIAMSON	2S
Decrease in carboxylate absorption during heparin-poly L-lysine interaction	D. GRANT, W. F. LONG & F. B. WILLIAMSON	3S
Multiple-specular-reflectance i.r. spectroscopy of glycosaminoglycan-cetylpyridinium complexes	D. GRANT, W. F. LONG & F. B. WILLIAMSON	4S
Extraction of a calcification inhibitor from <i>Corallina officinalis</i>	J. A. SOMERS, W. F. LONG & F. B. WILLIAMSON	5S
Heparin reduces Fe(II)-catalysed peroxidation of linolenic acid	M. A. ROSS, W. F. LONG & F. B. WILLIAMSON	6S
Molecular biology of plant hormones and their receptors		
Evidence for the presence of GTP-binding proteins in tobacco leaf and maize hypocotyl plasmalemma	A. WISE & P. A. MILLNER	7S
Sensitivity of protein phosphorylation in tobacco thylakoids to protein kinase C inhibitors and synthetic peptides	Z. ISHAK, I. R. WHITE & P. A. MILLNER	8S
Specific immune detection and partial purification of G-proteins from <i>Arabidopsis thaliana</i>	J. CLARKSON, I. R. WHITE & P. A. MILLNER	9S
Identification of nucleoside diphosphate kinase from pea microsomal membranes	P. M. FINAN, I. R. WHITE, J. B. C. FINDLAY & P. A. MILLNER	10S
The Archaeobacteria: biochemistry and biotechnology		
The pyruvate kinase of <i>Thermoplasma acidophilum</i> : purification, kinetic characterization and use as a phylogenetic marker	S. POTTER & L. A. FOTHERGILL-GILMORE	11S
Citrate synthase from <i>Haloferax volcanii</i> : enzyme purification and gene cloning	K. D. JAMES, M. J. BONETE, D. BYROM, M. J. DANSON & D. W. HOUGH	12S
Enzyme activity in organic media	Z. YANG & D. A. ROBB	13S
Heterogeneity within receptors and ion channels		
The generation of free acid SBFI within the matrix of isolated rat heart mitochondria and its use to estimate matrix $[Na^+]$	R. L. DANIEL, N. J. OSBALDESTON & J. G. MCCORMACK	14S
Factors affecting the steady-state distribution of lithium in the sheep-heart Purkinje fibre	I. F. GOW & D. ELLIS	15S
Vasoconstrictor agonists activate G-protein dependent receptor operated calcium channels (ROCs) in pig aortic microsomes	L. M. BLAYNEY, P. W. GAPPER & A. C. NEWBY	16S
Hormonal regulation of the glucose transporter GLUT I in the lactating rat mammary gland	H. A. C. FAWCETT, S. A. BALDWIN & D. J. FLINT	17S

Cloning and expression of a cDNA encoding the human GABA-A receptor $\alpha 5$ subunit	P. WINGROVE, K. HADINGHAM, K. WAFFORD, J. A. KEMP, C. I. RAGAN & P. WHITING	18S
Intracellular calcium measurements in response to histamine stimulation in DDT ₁ MF-2 cells	J. M. DICKENSON & S. J. HILL	19S
Spermine enhances calcium- and GTP analogue-stimulated particulate phosphoinositidase	S. P. H. ALEXANDER, D. A. KENDALL & S. J. HILL	20S
Expression of 5-HT ₂ - and bradykinin B ₂ -receptors coupled to phosphoinositide hydrolysis in cultured guinea-pig aortic smooth muscle cells	J. HAWLEY, P. C. RUBIN & S. J. HILL	21S
<hr/>		
General topics		
Beetroot and red urine	R. M. PEARCY, S. C. MITCHELL & R. L. SMITH	22S
Properties of immobilized bromelain	S. R. DICKSON & G. F. BICKERSTAFF	23S
Rat liver L-threonine dehydrogenase	R. PAGANI, R. GUERRANTI, S. RIGHI, R. LEONCINI, D. VANNONI & E. MARINELLO	24S
Near infra-red reflection measurements and the applicability of the absorption law	F. FARIS, M. THORNILEY, Y. WICKRAMASINGHE, R. HOUSTON, P. ROLFE, N. LIVERA & A. SPENCER	25S
Cloning and sequence determination of the feline calicivirus strain F9	J. MEANGER, M. J. CARTER, R. M. GASKELL & P. C. TURNER	26S
Gel retardation analysis of ribonucleotide, reductase gene expression in African Swine Fever virus	A. T. CASEY, L. K. DIXON & P. C. TURNER	27S
Copy number of the U7 gene in some mammalian species	B. A. MURRAY & P. C. TURNER	28S
Isolation of a gene from <i>Xenopus borealis</i> containing a paired box	J. M. FEATHERSTONE & P. C. TURNER	29S
A sequence comparison of the VP72 gene of African Swine Fever virus	L. J. PITCHER, L. K. DIXON & P. C. TURNER	30S
Kinetic evidence for the existence of an unstable intermediate in the trinitrophenylation-induced rhodanese inactivation reaction	E. T. RAKITZIS & T. MALLIOPOULOU	31S
Inactivation of glucose-6-phosphate dehydrogenase from various sources by a bifunctional isothiocyanate	E. T. RAKITZIS & P. PAPANDREOU	32S
Thermodynamic considerations of carbon dioxide evolution in respiratory insufficiency	E. T. RAKITZIS & A. POTAMIANOU	33S
General acid-base catalysis of 2,4,6-trinitrobenzene-sulphonate-induced rhodanese inactivation	T. B. MALLIOPOULOU & E. T. RAKITZIS	34S
Restoration of rat liver L-threonine deaminase by pyridoxamine 5'-phosphate	E. MARINELLO, R. LEONCINI, R. GUERRANTI, S. RIGHI & R. PAGANI	35S
18-Hydroxycortisol stimulation in isolated guinea pig adrenocortical cells parallels that of both aldosterone and cortisol	A. M. CREEDY, D. BURT, C. R. W. EDWARDS & B. C. WILLIAMS	36S
Effects of drugs on the hepatic microsomal glucose-6-phosphatase system	H. M. SCOTT & A. BURCHELL	37S

The effect of the pore forming antibiotic, alamethicin, on the hepatic microsomal glucose-6-phosphatase system	M. W. VOICE & A. BURCHELL	38S
Isolation of rat urinary α_2 -euglobulin: A comparison of exhaustive dialysis versus Centriprep ultrafiltration	T. MARSHALL, K. M. WILLIAMS, C. BAYARD & O. VESTERBERG	39S
Drug interference in the 2,2'-bicinchoninic acid protein assay	T. MARSHALL & K. M. WILLIAMS	40S
The Mbol polymorphism at codon 192 of the human tyrosinase gene is present in Asians and Afrocaribbeans	J. D. JOHNSTON, L. H. BREIMER & A. F. WINDER	41S
Problems in the interpretation of ATP concentration in blood fractions	H. A. JENKINS & J. M. BRAGANZA	42S
<i>In vitro</i> modelling of a mechanism of drug-related hypersensitivity	W. R. RUSH, J. H. MULVEY & D. J. M. GRAHAM	43S
Reversible uncoupling of phosphoinositidase C activation and steroidogenesis in cultured bovine adrenocortical zfr cells	C. D. CLYNE, E. R. T. LIGHTLY, M. DOCHRELL, I. M. BIRD, S. W. WALKER & B. C. WILLIAMS	44S
Primer extension analysis of mouse U7 small nuclear RNA gene expression	B. J. KIRBY & P. C. TURNER	45S
Purine metabolism in normal and HIV-1 infected lymphocytes. Purine nucleotide content	R. PAGANI, A. TABUCCHI, F. CARLUCCI, M. C. RE, M. RUBINO, F. CICCOMASCOLO, E. MARINELLO & A. SICCARDI	46S
Purine metabolism in normal and HIV-1 infected lymphocytes. Analysis of nucleotides through h.p.l.c.	R. PAGANI, A. TABUCCHI, F. CARLUCCI, M. C. RE, M. RUBINO, L. LOPALCO, E. MARINELLO & A. SICCARDI	47S
The modification of bovine β -casein using transglutaminase purified from guinea pig liver	P. J. COUSSONS, N. C. PRICE, S. M. KELLY & L. A. FOTHERGILL-GILMORE	48S
Physical map of a 257 kilobase-pairs region from the genome of <i>Halococcus saccharolyticus</i>	A. VENTOSA, J. J. NIETO & C. G. MONTERO	49S
Thermodynamics of talin and talin-vinculin binding to G-actin	W. H. GOLDMANN, S. KAUFMANN & G. ISEBERG	50S
<hr/> Irish Area Section Meeting, Maynooth <hr/>		
Elicitation of peroxidase production in cell suspension cultures	M. PARKINSON, I. DIX, C. R. DEANE, J. MORLEY & P. J. DIX	51S
PCR amplification of specific cDNA sequences using mixed oligonucleotide primers — a cautionary note	J. O'CONNELL & S. DOONAN	52S
The effect of immunophotodynamic therapy using the monoclonal antibody HMFG-1 linked to haematoporphyrin on MCF-7 cell <i>in vitro</i>	E. S. PROSSER, C. GLEESON, K. CARROLL & R. O'KENNEDY	53S
The relationship between ¹¹¹ In-labelled immunoscintigraphy and serum CA-125 levels in ovarian carcinoma patients post-chemotherapy	E. S. PROSSER, M. POMEROY, F. BARKER, K. CARROLL, M. DAVIS, J. DUFFY, G. DUFFY, J. J. FENNELLY & R. O'KENNEDY	54S
Identification of a novel particulate pyroglutamate aminopeptidase from bovine brain	R. O'LEARY & B. O'CONNOR	55S
Identification of a dipeptidyl aminopeptidase Type-II in the cytosolic fraction of bovine brain	P. CUMMINS, P. MULCAHY & B. O'CONNOR	56S

Analysis of the mechanism of resistance of seven novel MDR variants	A. REDMOND, E. MORAN & M. CLYNES	57S
Preliminary studies of a monoclonal antibody raised to the over expressed plasma membrane associated glycoprotein of a multidrug resistant cell line	E. MORAN, A. REDMOND & M. CLYNES	58S
Treatment of hypothyroid rats with T ₂ (3,5-di-iodo-L-thyronine) rapidly stimulates respiration in subsequently isolated mitochondria	I. O'REILLY & M. P. MURPHY	59S
Chemical production of bifunctional antibodies	O. NOLAN & R. O'KENNEDY	60S
Effects on oral bacteria of a peptide derived from human cathepsin G	S. BOOMER, W. A. COULTER & D. J. S. GUTHRIE	61S
NMR structural studies on an analogue of neurokinin A	R. HUSAIN, A. A. ABU SHANAB, D. J. S. GUTHRIE, G. B. IRVINE, P. J. STEVENSON & J. M. ALLEN	62S
Respiration deficiency in the pathogenic yeast <i>Candida albicans</i>	M. A. ABUHATAB & P. A. WHITTAKER	63S
Inhibition of superoxide dismutase is associated with reduced gap junctional intercellular communication in an <i>in vitro</i> system	P. T. TOMKINS, S. M. MOLLOY & M. T. FINNEGAN	64S
Pathogenicity of <i>Xenorhabdus luminescens</i>	D. J. CLARKE & B. C. A. DOWDS	65S
Stress responses of <i>Bacillus subtilis</i>	O. HARTFORD & B. C. A. DOWDS	66S
Enzymatic incision of UV-irradiated DNA at sites of purine photoproducts	P. H. CLINGEN, P. J. MCCARTHY & R. J. H. DAVIES	67S
Molecular cloning and characterization of the <i>lux</i> genes from the secondary form of <i>Xenorhabdus luminescens</i> , K122	H. WANG & B. C. A. DOWDS	68S
Increased calpain activity in skeletal muscle of rats maintained on caloric restricted and fasting dietary regimes	B. A. MURRAY, W. J. REVILLE & M. G. ZEECE	69S
Purification and conjugation of anti-insulin IgG from guinea pig serum for use in proinsulin immunoassay	B. O'FARRELL & R. DEVERY	70S
The concanavalin A-glycoprotein interaction as a convenient method for the assay of endoglycosidases	G. A. WILLIAMS, U. MACÉVILLY, R. RYAN & M. G. HARRINGTON	71S
Streptavidin production by <i>Streptomyces avidinii</i> in a laboratory fermenter	L. A. HENDY, S. MCGONIGLE, U. MACÉVILLY, R. RYAN & M. G. HARRINGTON	72S
Shake flask studies of streptavidin production in synthetic and complex media	S. MCGONIGLE, L. HENDY, U. MACÉVILLY, R. RYAN & M. G. HARRINGTON	73S
X-irradiation- and carcinogen-induced proteins in cultured CHO cells	J. F. O'ROURKE, C. E. MOTHERSILL, C. B. SEYMOUR & K. F. TIPTON	74S
Uncoupler-induced ATPase activity of plant mitochondria	J. F. O'ROURKE & S. B. WILSON	75S
Dye-mediated photodynamic inactivation of <i>Bacillus subtilis</i>	J. F. O'ROURKE & B. C. DOWDS	76S
The role of calcium in the induction of apoptosis in human tumour cell lines	S. V. LENNON, S. A. KILFEATHER & T. G. COTTER	77S

The regulatory role of zinc in apoptosis in human tumour cell lines	S. V. LENNON & T. G. COTTER	78S
Bronchoalveolar lavage collagenase and collagenase inhibitory capacity in interstitial lung disease	D. MOLONEY, C. M. O'CONNOR & M. X. FITZGERALD	79S
TNF-induced, cytotoxicity-linked IL6 gene expression in L929 cells may require factors other than NF- κ B	N. P. PATESTOS, G. HAEGEMAN & W. FIERS	80S
Maltogenic α -amylase of <i>Saccharomonospora viridis</i>	B. S. COLLINS, C. T. KELLY & W. M. FOGARTY	81S
Measurement of erbB-2 oncoprotein in human breast cancers by ELISA	A. NUGENT, E. McDERMOTT, N. O'HIGGINS, J. J. FENNELLY & M. J. DUFFY	82S
Effects of phosphate on the binding of FMN and riboflavin by apoflavoquin from <i>Desulfovibrio vulgaris</i> (Hildenborough)	J. J. PUEYO, S. G. MAYHEW & G. VOORDOUW	83S
Apoptosis induced by actinomycin D, camptothecin or aphidicolin can occur in all phases of the cell cycle	J. M. GLYNN, T. G. COTTER & D. R. GREEN	84S
A <i>Fasciola hepatica</i> cathepsin L proteinase prevents the adherence of eosinophils to newly excysted juveniles	C. CARMONA, A. SMITH, A. DOWD & J. P. DALTON	85S
Purification and characterization of a cysteine proteinase secreted by <i>Fasciola hepatica</i>	A. J. DOWD, A. M. SMITH, C. CARMONA, C. ROBERTSON & J. P. DALTON	86S
Patterns of exoprotein production in isolates of <i>Staphylococcus schleiferi</i> and <i>Staphylococcus lugdunensis</i>	D. LINEHAN, J. LAWTON, J. ETIENNE, M. J. STORRS & D. SHEEHAN	87S
Plasminogen activator inhibitor type 1 and 2 in human breast cancer	D. M. REILLY, P. A. ANDREASEN, M. DUCH, N. NOLAN, I. LECANDER & M. J. DUFFY	88S
