

Ciba Medal Lecture

- Eukaryotic Cell-Cycle Control** P. NURSE 239

Colworth Medal Lecture

- Glycosyl-phosphatidylinositol Membrane Anchors: The Tale of a Tail** M. A. J. FERGUSON 243

colloquia

641st Meeting, London

colloquium: Structure and Function of Glycosylation in Cell Regulation and Differentiation

- | | | |
|---|--|------------|
| A tribute to Elvin A. Kabat | T. FEIZI | 257 |
| V-region glycosylation and antigen binding in monoclonal anti-$\alpha(1 \rightarrow 6)$dextrans | A. WRIGHT, S. WALLICK, M. H. TAO, E. A. KABAT & S. L. MORRISON | 259 |
| Studies of oligosaccharide and glycoprotein conformation | E. F. HOUNSELL, M. J. DAVIES & D. V. RENOUF | 259 |
| Glycosylation of nuclear and cytoplasmic proteins is ubiquitous and dynamic | R. S. HALTIWANGER, W. G. KELLY, E. P. ROQUEMORE, M. A. BLOMBERG, L.-Y. D. DONG, L. KREPPPEL, T.-Y. CHOU & G. W. HART | 264 |
| Nuclear and cytoplasmic localization of a lectin-ribonucleoprotein complex | J. L. WANG, E. A. WERNER, J. G. LAING & R. J. PATTERSON | 269 |
| Blood group-related oligosaccharides are ligands in cell-adhesion events | T. FEIZI | 274 |
| Role of glycosylation in cell interactions with extracellular matrix | R. C. HUGHES | 279 |
| Changes in cell-surface carbohydrate during terminal differentiation of human epidermal keratinocytes | F. M. WATT & P. H. JONES | 285 |
| The lipo-oligosaccharidic symbiotic signals of <i>Rhizobium meliloti</i> | P. ROCHE, F. DEBELLÉ, P. LEROUGE, J. VASSE, G. TRUCHET, J.-C. PROMÉ & J. DÉNARIÉ | 288 |
| Sulphated glycoconjugates in the immune system | C. C. RIDER | 291 |
| Carbohydrate recognition molecules on lymphocytes | C. R. PARISH, M. G. BRADBURY, S. A. WESTON & H. S. WARREN | 295 |

colloquium: Control of *N*-Acetyltransferase

Regulation of pineal serotonin <i>N</i>-acetyltransferase activity	D. C. KLEIN, N. L. SCHAAD, M. A. A. NAMBOODIRI, L. YU & J. L. WELLER	299
Arylamine <i>N</i>-acetyltransferase	E. SIM, D. HICKMAN, E. CORONEOS & S. L. KELLY	304
Breast cancer: a model system for studying the neuroendocrine role of pineal melatonin in oncology	D. E. BLASK, A. M. LEMUS-WILSON & S. T. WILSON	309
<i>N</i>-Acetyltransferase and melatonin in the retina: regulation, function and mode of action	D. J. SKENE	312
Melatonin: the clinical perspective in man	R. SILMAN	315

colloquium: Credit Accumulation and Transfer

An overview of CATS development across the U.K.	G. DAVIDSON	319
Credit accumulation and transfer schemes	D. CLARKE	322
Credit accumulation and transfer: a view from the chalkface	R. R. DILS	324
An institutional view of credit accumulation and transfer	P. HEALY	326
Credit accumulation and transfer schemes — the European and company dimensions	B. CURRELL	330

colloquium: Plant Oxygenases, Peroxidases and Oxidases

Plant peroxidase gene expression and function	P. E. KOLATTUKUDY, R. MOHAN, M. A. BAJAR & B. A. SHERF	333
Structure of plant and fungal peroxidases	K. G. WELINDER, J. M. MAURO & L. NØRSKOV-LAURITSEN	337
Probing the mechanism of horseradish peroxidase by site-directed mutagenesis	A. T. SMITH, S. A. SANDERS, H. GRESCHIK, R. N. F. THORNELEY, J. F. BURKE & R. C. BRAY	340
Catalytic mechanisms and regulation of lignin peroxidase	P. J. HARVEY, R. FLORIS, T. LUNDELL, J. M. PALMER, H. E. SCHOEMAKER & R. WEVER	345
A comparison of peroxidase and cytochrome <i>P</i>-450	P. M. WOOD	349
Function, mechanism and regulation of cytochrome <i>P</i>-450 enzymes in plants	F. DURST, I. BENVENISTE, J.-P. SALAÜN & D. WERCK-REICHHART	353
Endogenous and engineered cytochrome <i>P</i>-450 mono-oxygenases in plants	D. P. O'KEEFE, K. R. BOZAK, R. E. CHRISTOFFERSEN, J. A. TEPPERMAN, C. DEAN & P. A. HARDER	357
The nature and regulation of the alternative oxidase of plant mitochondria	A. L. MOORE & J. N. SIEDOW	361

Structural studies on copper-containing plant oxidases	A. MESSERSCHMIDT	364
Copper-containing plant oxidases	A. FINAZZI-AGRÒ & A. ROSSI	369
2-Oxoglutarate-dependent dioxygenases in plants: mechanism and function	P. HEDDEN	373

colloquium: Molecular and Immunological Approaches to the Study of Synaptic and Axonal Glycoproteins

Glycoproteins of the post-synaptic density: biochemical and immunochemical characterization of PSD-GPI80	J. W. GURD, I. R. BROWN, N. BISSOON, S. CUDMORE, B. NI & J. SOULLIERE	379
Molecular cloning of neuronal calmodulin mRNA species	I. R. BROWN, J. W. GURD & B. NI	382
Comparative glycosylation in neural adhesion molecules	D. R. WING, T. W. RADEMACHER, B. SCHMITZ, M. SCHACHNER & R. A. DWEK	386
Antigenic markers of cerebellar modules in the adult mouse	R. HAWKES	391
Glycoproteins of the growth-cone membrane skeleton	P. R. GORDON-WEEKS & T. L. WILLIAMSON	396
Contact inhibition of growth-cone motility during peripheral nerve segmentation	R. J. KEYNES & G. M. W. COOK	399
The relation of the expression and function of the neuronal glycoprotein Thy-1 to axonal growth	R. J. MORRIS, M. C. TIVERON & G. P. XUE	401
Glycoproteins implicated in neural cell adhesion and axonal growth	F. G. RATHJEN, U. NÖRENBERG & H. VOLKMER	405
The changing role of NCAM as a neurite outgrowth-promoting molecule during development	J. L. SAFFELL, S. V. ASHTON, F. S. WALSH & P. DOHERTY	410
Glycoproteins modulate changes in synaptic connectivity in memory formation	S. BULLOCK & S. P. R. ROSE	412

colloquium: Second Messenger Systems as Pharmacological Targets

Protein kinase C	P. J. PARKER, P. P. COOK, A. R. OLIVIER, C. PEARS, D. K. WAYS & C. WEBSTER	415
The design and biological properties of potent and selective inhibitors of protein kinase C	J. S. NIXON, J. BISHOP, D. BRADSHAW, P. D. DAVIS, C. H. HILL, L. H. ELLIOTT, H. KUMAR, G. LAWTON, E. J. LEWIS, M. MULQUEEN, D. WESTMACOTT, J. WADSWORTH & S. E. WILKINSON	419
Suppression of malignancy targeting cyclic AMP signal transducing proteins	Y. S. CHO-CHUNG	425

Disruption of phosphoinositide signalling by lithium	S. R. NAHORSKI, S. JENKINSON & R. A. J. CHALLISS	430
Synthesis and biology of inositol polyphosphate analogues	B. V. L. POTTER & S. R. NAHORSKI	434
Modulation of neuronal Ca²⁺-dependent currents by neurotransmitters, G-proteins and toxins	R. H. SCOTT, K. P. M. CURRIE, K. G. SUTTON & A. C. DOLPHIN	443
Regulation of brain neurotransmitter release and of adenylate cyclase activity by opioid receptors	A. N. M. SCHOFFELMEER, B. J. VAN VLIET, T. J. DE VRIES, M. H. HEIJNA & A. R. MULDER	449
Cyclic AMP and the regulation of cholesterol metabolism	K. M. BOTHAM	454
Inhibitors of cyclic nucleotide phosphodiesterases as therapeutic agents	K. J. MURRAY & P. J. ENGLAND	460
Haem-dependent activation of cytosolic guanylate cyclase by nitric oxide: a widespread signal transduction mechanism	L. J. IGNARRO	465
Cytidine 3',5'-cyclic monophosphate: a third cyclic nucleotide intracellular mediator?	R. P. NEWTON	469

colloquium: Isoprenoids — Biosynthesis and Role in the Regulation of Protein Function

Polyisoprenoid synthesis and metabolism	P. A. EDWARDS, M. N. ASHBY, D. H. SPEAR, P. F. MARRERO, A. JOLY & G. POPIJAK	475
Geranylgeranylated proteins	J. A. GLOMSET, M. H. GELB & C. C. FARNSWORTH	479
Expression of polyisoprenylated Ras proteins in the insect/baculovirus system	P. N. LOWE, R. H. SKINNER, D. J. COOPER, S. BRADLEY, M. SYDENHAM & M. J. PAGE	484
p21^{ras} Farnesyltransferase: purification and properties of the enzyme	Y. REISS, M. C. SEABRA, M. S. BROWN & J. L. GOLDSTEIN	487
Protein prenyltransferases	K. YOKOYAMA, G. W. GOODWIN, F. GHOMASHCHI, J. GLOMSET & M. H. GELB	489
Partial characterization of p21^{ras} farnesyltransferase present in human placental tissue	K. P. RAY & J. LOPEZ-BELMONTE	494
Lipid modifications and function of the ras superfamily of proteins	A. I. MAGEE, C. M. H. NEWMAN, T. GIANNAKOUIROS, J. F. HANCOCK, E. FAWELL & J. ARMSTRONG	497
Targeting lamin proteins to the nuclear envelope: the role of CaaX box modifications	E. A. NIGG, G. T. KITTEN & K. VORBURGER	500

colloquium: Novel Approaches in HIV Chemotherapy

Reverse transcriptase of HIV as a target for anti-viral drugs	G. DARBY	505
--	----------	------------

TIBO derivatives: a new class of highly potent and specific inhibitors of HIV-1 replication	R. PAUWELS, K. ANDRIES, Z. DEBYSER, M. KUKLA, D. SCHOLS, J. DESMYTER, E. DE CLERCQ & P. A. J. JANSSEN	509
HIV proteinase inhibitors	N. A. ROBERTS, J. C. CRAIG & I. B. DUNCAN	513
The HIV-1 <i>nef</i> gene product	M. HARRIS, S. TALBOT, P. PATSILINACOS & J. C. NEIL	517
CD4 antagonists	J. A. MCKEATING	521
Discovery and characterization of an HIV-1 Tat antagonist	M.-C. HSU, A. D. SCHUTT, M. HOLLY, L. W. SLICE, M. I. SHERMAN, D. D. RICHMAN, M. J. POTASH & D. J. VOLSKY	525

Structure and function of glycosylation in cell regulation and differentiation		
Thermodynamics of filamin-actin interaction	W. H. GOLDMANN	89S
Characterisation of formic acid-derived cell membrane complex proteins from wool	G. P. P. MITCHELL, J. MIFSUD, D. E. RIVETT & A. K. ALLEN	90S
Automated simultaneous release of intact and unreduced N- and O-linked glycans from glycoproteins	A. H. MERRY, J. BRUCE, C. BIGGE & A. IOANNIDES	91S
Glycosylation of recombinant chimeric and human serum IgA1	A. H. MERRY, C. MORTON, J. BRUCE, M. KERR & J. M. WOOF	92S
Changes in concentrations of ATP and other nucleotides in erythrocytes during erythropoietin treatment in haemodialysis patients	C. ADAIR, T. R. J. LAPPIN & P. M. COTES	93S
Loss of sialic acid O-acetylation in human colorectal cancer cells	A. P. CORFIELD, S. A. WAGNER, C. PARASKEVA, J. R. CLAMP, P. DURDEY, G. REUTER & R. SCHAUER	94S
Loss of sulphate in human colonic mucins during ulcerative colitis	A. P. CORFIELD, C. DO AMARAL CORFIELD, S. A. WAGNER, B. F. WARREN, R. A. MOUNTFORD, D. C. C. BARTOLO & J. R. CLAMP	95S
Proteoglycan synthesis by human mesangial cells is depressed by hyperglycaemic glucose concentrations	R. M. MASON, G. THOMAS & M. DAVIES	96S
Steady state measurements of glomerular proteoglycan synthesis in streptozotocin-induced diabetes	J. WARREN & R. M. MASON	97S
Secretion of multiple forms of tissue kallikrein in rat submandibular gland is influenced by the animal's sex and type of autonomic nerve impulse	D. K. SHORI, G. B. PROCTOR, J. R. GARRETT & K.-M. CHAN	98S
Isoprenoids biosynthesis and role in the regulation of protein function		
Isolation of triacylglycerol synthase activity from <i>Streptomyces lividans</i>	E. R. OLUKOSHI & N. M. PACKTER	99S
Cholesterol metabolism in cultured hamster hepatocytes	V.-Q. HOANG, R. P. FRY, K. E. SUCKLING & K. M. BOTHAM	100S
Direct measurement of apo B-100 production rate in fed and fasted normolipidaemic adult male volunteers	P. J. PACY, S. VENKATESAN, A. COLLINS & D. HALLIDAY	101S
Very low density lipoprotein apolipoproteins B-100 and E turnover in control subjects using L-[1- ¹³ C]leucine	A. COLLINS, S. VENKATESAN, P. GARCIA, P. J. PACY & D. HALLIDAY	102S
Fractional and absolute synthetic rate of very low density lipoprotein apo B-100 in lipoprotein lipase deficient patients	S. VENKATESAN, P. J. PACY, K. A. MITROPOULOS, G. F. WATTS & D. HALLIDAY	103S
Metabolic comparison of small chylomicrons (intestinal VLDL) and large chylomicrons	T. GULDUR & P. A. MAYES	104S
Removal of cholesterol from the rat spleen by phospholipid-apolipoprotein mixtures	M. A. MINDHAM & P. A. MAYES	105S
Control of N-acetyltransferase		
Arylamine N-acetyltransferase in mice	S. L. KELLY & E. SIM	106S
Measurement of human brain aspartate N-acetyltransferase flux <i>in vivo</i>	S. P. BURNS, R. A. CHALMERS, R. J. WEST & R. A. ILES	107S

Plant oxygenases, peroxidases and oxidases		
EPR differences between human myeloperoxidase isoenzymes	C. E. COOPER & E. ODELL	108S
Homology between cellobiose oxidase from <i>Phanerochaete chrysosporium</i> and other proteins	J. D. WOOD & P. M. WOOD	109S
Cellobiose oxidase from <i>Phanerochaete chrysosporium</i> as a source of Fenton's reagent	S. M. KREMER & P. M. WOOD	110S
Expression of active horseradish peroxidase in <i>Saccharomyces cerevisiae</i>	A. VLAMIS-GARDIKAS, A. T. SMITH, J. M. CLEMENTS & J. F. BURKE	111S
Properties of the oxygenase responsible for plant ethylene production	P. VERVERIDIS, J. J. SMITH & P. JOHN	112S
N-Glycosylation of horseradish peroxidase from cell culture	J. E. HARTHILL & D. A. ASHFORD	113S
Investigation of native and mutant plant peroxidases by NMR spectroscopy	N. C. VEITCH, R. J. P. WILLIAMS, A. T. SMITH, S. A. SANDERS, R. N. F. THORNELEY, R. C. BRAY & J. F. BURKE	114S
Structural studies of lipids and membranes		
Probe and protein orientations in proteoliposomes: electron microscopy and topobiochemistry	P. NICHOLLS, B. TATTRIE, P. BUTKO & T. TIHOVA	115S
Mechanism of pyrimidine nucleoside uptake in intestinal brush border membrane vesicles	S. TANNA, C. WOOD & M. J. LAWRENCE	116S
Identification of a fatty acid-binding protein in human prostatic tissue	A. A. CHAUDRY & A. K. DUTTA-ROY	117S
Purification and characterisation of antibodies to the glycosyl-phosphatidylinositol anchor of human membrane dipeptidase	S. J. BROOMFIELD & N. M. HOOPER	118S
High-dielectric media for cell electro-manipulation and for electro-kinetic methods	W. M. ARNOLD	119S
Membrane accommodation in hypo-osmotically treated, and in giant electrofused cells	W. M. ARNOLD, B. G. KLARMANN, V. L. SUKHORUKOV & U. ZIMMERMANN	120S
Talin-lipid interaction	W. H. GOLDMANN	121S
FT-IR study of the hydrogen bonding interaction between cholesterol and DPPC	J. VILLALAIN & J. C. GOMEZ-FERNANDEZ	122S
Definition of an epitope at the nucleotide binding site of the (Ca ²⁺ -Mg ²⁺)-ATPase of sarcoplasmic reticulum by fluorescein labelling	A. M. MATA, R. E. A. TUNWELL, A. G. LEE & J. M. EAST	123S
Regulated membrane vesicle trafficking: a defect in cystic fibrosis corrected by gene transfer	N. A. BRADBURY & R. J. BRIDGES	124S
Characterisation of diffusion and flow of receptors on cell membranes by digital fluorescence microscopy	C. M. ANDERSON, G. N. GEORGIU, I. E. G. MORRISON, G. V. W. STEVENSON & R. J. CHERRY	125S
Production of HETEs in human neutrophils: dependence of arachidonic acid	M. JOHANSSON, G. HANSSON & B. EK	126S

Second messenger systems as pharmacological targets

ATP and glutathione-mediated inhibition of lipid peroxidation in rat liver systems	P. J. SAVILL, T. HALLINAN, J. GOR & C. RICE-EVANS	127S
Protein kinase C inhibits histamine H ₂ receptor-mediated stimulation of cyclic AMP content in the human gastric cancer cell line HGT-1	P. MCKENNA, J. M. WILLIAMS, C. GESPACH & P. J. HANSON	128S
Myofibrillar-bound cyclic nucleotide phosphodiesterase in heart and skeletal muscle	A. WORBY, L. M. MENSAH & K. J. MURRAY	129S
Evidence for a novel mechanism of activation of phospholipase D by endothelin-1 in neuroblastoma cells	L. C. WILKES & M. R. BOARDER	130S
Activation by anserine and inhibition by carnosine of Ca ²⁺ -uptake by mammalian mitochondria	R. L. DANIEL, N. J. OSBALDESTON & J. G. MCCORMACK	131S
Diabetes alters the cyclic AMP response of isolated renal glomeruli	J. H. THOMAS, D. C. W. MURRAY & P. A. SHARP	132S
Properties and [³² P] phosphorylation targets of a novel form of protein kinase C in pituitary	D. J. MACEWAN, J. SIMPSON, R. MITCHELL, M. S. JOHNSON, F. J. THOMSON & G. FINK	133S
Effect of polyanions on α ₁ -adrenoceptor G protein interactions	L. L. T. DASSO & C. W. TAYLOR	134S
Purification of the inositol 1,4,5-trisphosphate receptor by heparin affinity chromatography using decavandate	A. RICHARDSON & C. TAYLOR	135S
Comparison of methods to assess cyclic AMP turnover under conditions of agonist stimulation in 1321NI astrocytoma cells	A. J. MORGAN, K. J. MURRAY & R. A. J. CHALLISS	136S
Quantitation of the lithium-sensitive component of the muscarinic receptor-stimulated inositol 1,3,4,5-tetrakisphosphate response in rat cerebral cortex	S. JENKINSON, N. PATEL, S. R. NAHORSKI & R. A. J. CHALLISS	137S
IL-6 and soluble IL-2 receptor in rheumatoid arthritis patients treated with second line drugs	J. WATSON, A. CRILLY, R. MADHOK, H. CAPELL & R. STURROCK	138S
Blackcurrant seed oil as a source of polyunsaturated fatty acids in the treatment of inflammatory disease	M. L. BYARS, J. WATSON & P. E. MCGILL	139S
Stimulation of phosphatidylinositol-3-kinase by insulin-like growth factor I and other agonists	D. R. POYNER, T. R. JACKSON & P. T. HAWKINS	140S
Purinergic stimulation of phosphatidic acid accumulation is via two pathways in bovine aorta endothelial cells	J. R. PURKISS & M. R. BOARDER	141S
Effect of staurosporine derivatives on IL-1-stimulated prostaglandin E production	D. J. TAYLOR	142S
Expression of recombinant firefly luciferase in prokaryotic and eukaryotic cells	G. B. SALA-NEWBY & A. K. CAMPBELL	143S
Engineering aequorin to measure Ca ²⁺ in defined compartments of living cells	J. M. KENDALL, G. SALA-NEWBY, V. GHALAUT, R. L. DORMER & A. K. CAMPBELL	144S
Pharmacological characterisation of the 5-HT _{1A} serotonin receptor using the agonist [³ H]8-OH-DPAT, and the antagonist [³ H]spiperone	H. SUNDARAM, A. NEWMAN-TANCREDI & P. G. STRANGE	145S

Structural analysis of the D ₂ -dopamine receptor	U. M. D'SOUZA & P. G. STRANGE	146S
Receptor-specific antisera as probes for the D ₂ -dopamine receptor	A. J. DOHERTY & P. G. STRANGE	147S
Three-dimensional models of the rat D ₂ , D ₃ , and D ₄ dopamine receptors	C. D. LIVINGSTONE, P. G. STRANGE & L. H. NAYLOR	148S
Metabolism of <i>myo</i> -inositol pentakisphosphates in mammalian brain	A. F. STANLEY, P. T. HAWKINS, D. R. POYNER & M. R. HANLEY	149S
Phosphatidylinositol 4,5-bisphosphate (PIP ₂) translocation in human erythrocyte membrane is a fast and active process	J. C. Sulpice, P. GASCARD & F. GIRAUD	150S
Molecular biology of calmodulin in the Eucestoda	J. L. BROOK, C. BRANFORD-WHITE & W. J. WHISH	151S
Determination of cyclic nucleotide-responsive protein kinase activity by quantitative fast atom bombardment mass spectroscopy	A. M. EVANS, F. M. HARRIS, T. J. WALTON, A. G. BRENTON, J. I. LANGRIDGE, J. A. KHAN & R. P. NEWTON	152S
Fast atom bombardment mass spectrometric analysis of cyclic nucleotides	J. I. LANGRIDGE, T. J. WALTON, A. G. BRENTON, F. M. HARRIS, D. GHOSH, A. M. EVANS & R. P. NEWTON	153S

Molecular and immunological approaches to the study of synaptic and axonal glycoproteins

Characterisation of two novel glycoproteins in the membrane skeleton of the growth cone	T. L. WILLIAMSON, P. R. GORDON-WEEKS & P. W. BEESLEY	154S
Ubiquitin immunoreactivity of multiple polypeptides in rat brain synaptic membranes	A. P. CHAPMAN, S. C. COURTNEY, S. J. SMITH, C. C. RIDER & P. W. BEESLEY	155S
The structural relationship between the two synapse enriched glycoproteins, GP65 and GP55	I. SKITSA, T. WILLMOTT, A. K. ALLEN & P. W. BEESLEY	156S
Benzodiazepine-induced changes in biomembrane fluidity	H. KURISHINGAL, P. F. BRAIN & C. J. RESTALL	157S
Anchorage of asymmetric acetylcholinesterase by isodipeptide crosslinking in muscle cells	D. HAND & L. W. HAYNES	158S
A retinoid-inducible protein is present in developing cerebellar neurones	L. W. HAYNES, M. J. M. PERRY & D. HAND	159S

Novel approaches in HIV chemotherapy

Cloning, expression, and mutagenesis of SIV _{mac} proteinase in <i>E. coli</i>	B. R. CORR, M. RICHARDSON & A. F. WILDERSPIN	160S
Expression of Simian immunodeficiency virus (SIV _{mac}) proteinase in <i>E. coli</i>	R. J. SUGRUE & A. F. WILDERSPIN	161S
Use of chemical cleavage to release active HIV-1 proteinase from a fusion protein produced in the form of insoluble inclusion bodies	D. J. H. GASKIN & A. F. WILDERSPIN	162S
Sulphated polysaccharides exert anti-HIV activity at differing sites	H. A. HARROP, C. C. RIDER & D.R. COOMBE	163S
A drug-sensitizing RNA interaction of HIV-1 reverse transcriptase	J. M. BAILEY & M. LIGHTFOOTE	164S

General topics		
A specific antibody to apolipoprotein B-48: a novel approach	A. S. PEEL, P. KOMANDURI, C. M. WILLIAMS, L. M. MORGAN & B. J. GOULD	165S
Cell-free synthesis of glycolipid candidate precursor(s) for glycosyl-phosphatidylinositol anchors of <i>Toxoplasma gondii</i> surface proteins	S. TOMAVO, J.-F. DUBREMETZ & R. T. SCHWARZ	166S
Purification of human foetal hepatic bile acid sulphotransferase (BAST)	M. MAGHSOUDLOO, M. J. P. HIGGINS & G. M. MURPHY	167S
Sodium-dependent uptake of orthophosphate (Pi) into skeletal muscle plasma membrane vesicles	K. E. POLGREEN, G. J. KEMP & G. K. RADDA	168S
Glycerol 3-phosphate acylation by microsomal fractions from avocado mesocarp	V. S. ECCLESTON & J. L. HARWOOD	169S
Induction of $\Delta 12$ -desaturase activity during temperature adaptation in <i>Acanthamoeba castellanii</i>	A. L. JONES, J. L. HARWOOD & D. LLOYD	170S
Triacylglycerol synthesis by microsomal fractions from olive cultures	A. J. RUTTER, J. SANCHEZ & J. L. HARWOOD	171S
Changes in the myocardial creatine kinase isozyme profile with progression and regression of volume overload eccentric hypertrophy	M. L. FIELD, C. THOMPSON, C. HENDERSON, A.-M. L. SEYMOUR & G. K. RADDA	172S
The effect of coronary artery ligation on the energy status of the rat heart	L. K. RIX, C. H. THOMPSON, F. BRUNOTTE, A.-M. L. SEYMOUR & G. K. RADDA	173S
Phosphatidylserine decarboxylase activity during the early stages of regeneration in the rat liver	P. PHILLIPS, R. M. DIXON & G. K. RADDA	174S
The use of an intestinal epithelial cell line as a biological assay system of growth factor activity	F. L. COVE & G. S. EVANS	175S
Immunomodulatory action of amino acids on lymphocyte blastogenesis	M. H. SOMMER, M. H. XAVIER, M. B. FIALHO, C. M. D. WANNMACHER, A. M. MEDEIROS & M. WAJNER	176S
Partial characterisation of brushborder membrane-bound iron binding protein of guinea pig enterocytes	T. K. BALA, E. DEBNAM & S. K. S. SRAI	177S
Detection of the <i>Msp</i> I restriction fragment length polymorphism within the COLIA2 collagen gene	V. F. HAMPSON, D. HUTCHINGS & S. H. KIRK	178S
Determination of the presence of low levels of male DNA against high-level female DNA background	H. TIVNANN & S. H. KIRK	179S
Reaction of some β -amino acids with ninhydrin and with two related triketones	E. NEUZIL, M. MALGAT & A.-M. LACOSTE	180S
A study of the phospholipid composition of vegetables by using ^{31}P -NMR	M. A. MURCIA & J. VILLALAIN	181S
The mutation in the normal F variant of alpha-1-antitrypsin (Arg ²²³ → Cys) determined by DNA amplification and direct sequencing	K. HAYES, A. GRAHAM & N. KALSHEKER	182S
Activation of intracellular signalling pathways induces secretion of mucin by isolated rat gastric mucosal cells	A. C. KEATES, J. M. WILLIAMS & P. J. HANSON	183S
Studies on the effect of Tunicamycin on erythrocytic stages of <i>Plasmodium falciparum</i>	A. DIECKMANN-SCHUPPERT, J. HENSEL & R. T. SCHWARTZ	184S

Interaction of ruthenium red with the calcium binding sites of sarcoplasmic reticulum Ca^{2+} -ATPase	S. CORBALAN-GARCIA, J. A. TERUEL & J. C. GOMEZ-FERNANDEZ	185S
The expression of the Na^+ /glucose cotransporter in the lamb small intestine	T. C. FREEMAN, R. P. HEAVENS, J. DYER, D. J. S. SIRINATHSINGHI & S. P. SHIRAZI-BEECHEY	186S
Fractionation of rat urinary proteins by sequential ultrafiltration	T. MARSHALL, K. M. WILLIAMS, C. BAYARD & O. VESTERBERG	187S
High resolution two-dimensional electrophoresis of the rat urinary α_{2u} -globulin fraction indicates further purification by ultrafiltration	T. MARSHALL, K. M. WILLIAMS, C. BAYARD & O. VESTERBERG	188S
Urinary protein patterns in autism as revealed by high resolution two-dimensional electrophoresis	K. M. WILLIAMS & T. MARSHALL	189S
Isolation and biochemical characterization of protein kinase C from rat mammary gland	S. LAVANDERO, E. MONCADA & M. SAPAG-HAGAR	190S
Clenbuterol induces a propranolol-sensitive accumulation of actin message in rat skeletal muscle	P. A. MACLENNAN & R. H. T. EDWARDS	191S
Developmental effects on the concentration of actin message in mdx and wild-type mouse muscle	P. A. MACLENNAN & R. H. T. EDWARDS	192S
A modified method for the isolation of β B2-crystallin from the bovine lens: removal of glutathione	S. J. TARGETT & J. J. HARDING	192S
Iron chelate affinity chromatography of brush border membrane proteins	R. J. SIMPSON, K. B. RAJA & T. SHAH	194S
Cardiac glucose metabolism during pregnancy	M. C. SUGDEN, K. K. CHANGANI, J. BENTLEY & M. J. HOLNESS	195S
Skeletal muscle glucose utilization in response to a decreased meal frequency	M. J. HOLNESS, R. M. HOWARD, J. BENTLEY & M. C. SUGDEN	196S
Glucose utilization by skeletal muscle during pregnancy	M. J. HOLNESS & J. BENTLEY	197S
Measurement of skeletal muscle pH using ^1H and ^{31}P NMR spectroscopy <i>in vivo</i>	J. S. BEECH, S. C. R. WILLIAMS, R. D. COHEN & R. A. ILES	198S
Studies on the role of ascorbic acid in olfactory tissue	R. BLAND, S. LOVETT & G. H. DODD	199S
Conformational studies on human transferrin	J. M. HADDEN, P. I. HARIS, K. S. SRAI & D. CHAPMAN	200S
Binding of 5α -adrost-16-en-3-one to pig olfactory tissue	M. A. KRAEVSKAYA, M. J. P. HIGGINS & D. B. GOWER	201S
Proteoglycans: a regulatory role in the proliferation of intestinal epithelia	N. FLINT, G. S. EVANS & F. L. COVE	202S
Expression of cytokeratins in epithelial cells isolated from the crypt and villus of the small intestine	N. FLINT & G. S. EVANS	203S
Heparin modulation of cellular proliferation responses: kinetic and concentration dependency	A. G. POCKLEY & P. C. MONTGOMERY	204S
The effects of thimerosal and cyclopiazonic acid on the Ca^{2+} -pumps from rat cerebellum microsomes	F. MICHELANGELI, A. DASILVA, L. SAYERS & G. BROWN	205S
Identification of a human brain peptidase with the specificity to generate the N-terminus of A4/ β -amyloid protein from its precursor	J. R. McDERMOTT, J. A. BIGGINS & A. M. GIBSON	206S

Effect of dexamethasone on collagen synthesis in fibroblasts cultured in collagen lattice	A. A. SIDDIQUI, T. JAFFAR, N. KHAN, R. AZAMI & M. A. WAQAR	207S
Heat-stabilizing factor of lactate dehydrogenase in the skeletal muscle of <i>Uromastix</i>	M. H. JAVED, A. N. HUSSAIN & M. A. WAQAR	208S
Low molecular weight proteoglycans from renal stones	A. A. SIDDIQUI, N. KHAN, M. A. WAQAR & J. TALATI	209S
Attempts to provide an insight into the anti-cataract effect of ibuprofen	A. Z. SHYADEHI & J. J. HARDING	210S
Toxicity of dipropyl sulphoxide	R. M. NICKSON & S. C. MITCHELL	211S
Protein DNA interactions and a putative Papillomavirus binding factor	I. M. KHAN, A. D. B. MALCOLM, T. KAMALATI & L. BULUWELA	212S
Antisense oligonucleotides as antiviral agents	J. COULSON & A. D. B. MALCOLM	213S
¹³ C-n.m.r. spectroscopy of Cu ²⁺ -heparin suggests phase separation of the complex from Cu ²⁺ in aqueous solution	D. GRANT, W. F. LONG & F. B. WILLIAMSON	214S
Examination of cation-heparin interaction by potentiometric titration	D. GRANT, W. F. LONG & F. B. WILLIAMSON	215S
Effect of chemically modified heparins, and of heparin fragments, on Fe(II)-catalyzed peroxidation of linolenic acid	M. A. ROSS, W. F. LONG, F. B. WILLIAMSON & C. F. MOFFATT	216S
Purification and characterisation of 5-HT ₃ receptors from NG108-15 neuroblastoma × glioma cells	F. G. BOESS & I. L. MARTIN	217S
Purification of <i>ent</i> -kaurene oxidase from <i>Gibberella fujikuroi</i> and <i>Cucurbita maxima</i>	C. ARCHER, P. J. ASHMAN, P. HEDDEN, J. R. BOWYER & P. M. BRAMLEY	218S
Opposing effects of cyclic AMP and cyclic GMP on ion channels of leech salivary gland cells	W. A. WUTTKE & M. S., BERRY	219S
2-aminomethylphosphonic acid is the main phosphorus compound in locust haemolymph	P. M. KILBY, G. WEGENER & G. K. RADDA	220S
Microbial-dependent $\gamma\delta$ receptor-bearing T-cell localization?	C. G. H. BELL & A. J. EDWARDS	221S
The leukocyte common antigen T200 glycoprotein in T-cell triggering	C. G. H. BELL	222S
Properties of plant peroxygenase	E. BLEE & F. SCHUBER	223S
CATS and biochemistry at Wolverhampton Polytechnic	R. SUTTON, J. BENNETT & K. NORTON	224S
Ligninolytic enzymes produced by two white-rot fungi	L. R. DURRANT & A. B. MELLO	225S
Production of cellulases by an isolated fungus and its mutant strain	V. REGINATTO & L. R. DURRANT	226S
Cellulase production by thermophilic fungi	L. R. DURRANT, A. B. MELLO & V. REGINATTO	227S
Does an antibody molecule act as a template directing (determining) its glycosylation?	R. JEFFERIS, N. TAKAHASHI, J. LUND, R. TYLER & S. HINDLEY	228S
Evidence for coniferyl-alcohol oxidase promotion of lignification in developing xylem of conifers	R. A. SAVIDGE & P. V. RANDENIYA	229S
The use of specific antivasopressin antisera to detect immunoreactive vasopressin in human skeletal muscle	N. MCINTOSH, R. I. STEPHEN & A. SMITH	230S

Kinetics of the electron transfer reactions of cellobiose oxidase	M. S. ROGERS, G. D. JONES & M. T. WILSON	231S
Effect of aspirin, flurbiprofen and indomethacin on porcine testicular steroidogenesis	T. K. KWAN, Y. T. LIM & D. B. GOWER	232S
Antioxidants protect against reoxygenation-induced cell damage in ventricular myocytes	K.-G. SJÖGREN, Å. HJALMARSON & B. EK	233S
