

colloquia

642nd Meeting, Southampton

colloquium: Membrane Transport

Probing the structure and function of the human erythrocyte glucose transporter	S. A. BALDWIN	533
Tissue-specific expression of facilitative glucose transporters: a rationale	H. M. THOMAS, A. M. BRANT, C. A. COLVILLE, M. J. SEATTER & G. W. GOULD	538
The defective red cell anion transporter (band 3) in hereditary South East Asian ovalocytosis and the role of glycophorin A in the expression of band 3 anion transport activity in <i>Xenopus</i> oocytes	M. J. A. TANNER, L. BRUCE, J. D. GROVES, P. G. MARTIN & A. E. SCHOFIELD	542
Structure-function of the ADP/ATP carrier	M. KLINGENBERG	547
Studies of the structure and function of sarcoplasmic reticulum (Ca²⁺-Mg²⁺)-ATPase using immunological approaches	J. M. EAST, I. MATTHEWS, R. E. A. TUNWELL, A. M. MATA & A. G. LEE	550
Coupling of hydrolysis of ATP and the transport of Ca²⁺ by the calcium ATPase of sarcoplasmic reticulum	W. P. JENCKS	555
Structure-function relationships in the Ca²⁺ pump of the sarcoplasmic reticulum	D. H. MACLENNAN & T. TOYOFUKU	559
Studies of the plasma membrane H⁺-ATPase of yeast and plants	R. SERRANO, J. M. VILLALBA, M. G. PALMGREN, F. PORTILLO, A. PARETS-SOLER, M. ROLDAN, C. FERGUSON & C. MONTESINOS	562
Reversible inhibitors of the gastric (H⁺/K⁺)-ATPase as both potential therapeutic agents and probes of pump function	A. J. POPE & G. SACHS	566
The Na⁺-translocating ATPase of <i>Propionigenium modestum</i>	C. KLUGE, W. LAUBINGER & P. DIMROTH	572
Characterization of a sodiummotive NADH: ubiquinone oxidoreductase	R. M. BOURNE & P. R. RICH	577
Water, ions and membrane proteins: how would Darwin look at cytochromes and channels?	P. NICHOLLS, R. P. RAND, N. FULLER & P. BUTKO	583

colloquium: Crystallographic and Non-crystallographic Approaches to Membrane Protein Structure

Structural investigations of membrane proteins: the versatility of electron microscopy	A. HÖLZENBURG, F. H. WILSON, M. E. FINBOW, & R. C. FORD	591
---	---	------------

β -Lactamase fusion analysis of membrane protein assembly

M. TADAYYON, Y. ZHANG, S. GNANESHAN, L. HUNT, F. MEHRAEIN-GHOMI & J. K. BROOME-SMITH **598**

colloquium: The Molecular Biology of Nervous System-Specific Proteins

Protein kinase C-δ and -ϵ: a functional appraisal	A. R. OLIVIER, S. C. KILEY, C. PEARS, D. SCHAAP, S. JAKEN & P. J. PARKER	603
The role of specific isoforms of I4-3-3 protein in regulating protein kinase activity in the brain	A. AITKEN, B. AMESS, S. HOWELL, D. JONES, H. MARTIN, Y. PATEL, K. ROBINSON & A. TOKER	607
n-Chimaerin and neuronal signal transduction mechanisms	L. LIM	611
Intermediate filament protein expression in differentiating Schwann cells	P. J. BROPHY, B. M. KELLY & C. S. GILLESPIE	614
An evolutionary approach to myelin proteins and myelin-forming cells in the vertebrate brain	G. JESERICH & T. V. B. WAEHNELDT-KREYSING	617
2',3'-Cyclic nucleotide-3'-phosphohydrolase and signal transduction in central nervous system myelin	R. J. THOMPSON	621
POU family transcription factors in sensory neurons	D. S. LATCHMAN, C. L. DENT, K. A. LILLYCROP & J. N. WOOD	627
Comparisons of neuronal (PGP 9.5) and non-neuronal ubiquitin C-terminal hydrolases	K. D. WILKINSON, S. DESHPANDE & C. N. LARSEN	631
Enolases and PGP9.5 as tissue-specific markers	I. N. M. DAY	637
Molecular pathology of Alzheimer's disease in sporadic and familial Alzheimer's disease with mutations in the amyloid precursor protein	D. P. HANGER, D. M. A. MANN, D. NEARY & B. H. ANDERTON	642
Ubiquitin, lysosomes and neurodegenerative diseases	R. J. MAYER, L. LASZLO, A. MIDDLETON, M. LANDON, J. HOPE & J. LOWE	645
The axonal membrane cytoskeletal protein A60 and the development of the spectrin/ankyrin-based neuronal membrane skeleton	N. V. L. HAYES & A. J. BAINES	649
Endocytosis in the brain: the role of clathrin light-chains	A. P. JACKSON	653
Structure of the genes encoding the neural cell adhesion molecules N-CAM and N-cadherin	J. WALLIS & F. S. WALSH	656

colloquium: Kinase Cascades and Gene Expression Control in Insulin Action

Insulin-activated protein kinases in fat and other cells	R. M. DENTON, J. M. TAVARÉ, A. BORTHWICK, M. DICKENS, T. A. DIGGLE, N. J. EDGELL, K. J. HEESOM, T. ISAAD, D. F. LYNCH, S. K. MOULE, C. SCHMITZ-PEIFFER & G. I. WELSH	659
---	--	------------

Serine/threonine kinases and tyrosine phosphatases that act on the insulin receptor	G. J. SALE	664
Dissection of the protein kinase cascades involved in insulin and nerve growth factor action	P. COHEN, D. G. CAMPBELL, P. DENT, N. GOMEZ, A. LAVOINNE, S. NAKIELNY, D. STOKOE, C. SUTHERLAND & S. TRAVERSE	671
Apparent sufficiency of a dual-specificity tyrosine/threonine kinase for activation of MAP kinase poses new questions for the dual-phosphorylation mechanism	J. WU, A. J. ROSSOMANDO, J.-H. HER, M.J. WEBER & T. W. STURGILL	675
The mitogen-activated p70^{s6k}	G. THOMAS	678
Early protein kinase and biosynthetic responses to insulin	P. J. BLACKSHEAR	682
Insulin and phorbol esters act through the same DNA element to inhibit phosphoenolpyruvate carboxykinase gene transcription	R. M. O'BRIEN, P. C. LUCAS, T. YAMASAKI, M. T. BONOVICH, C. D. FOREST & D. K. GRANNER	686
Growth factor-activated kinases phosphorylate IRE-ABP	M. ALEXANDER-BRIDGES, N. K. MUKHOPADHYAY, U. JHALA, M. DENARO, X. F. KONG, J. AVRUCH & J. MALLER	691

colloquium: Activators and Inhibitors of Glycosidases and Glycosyltransferases

Metabolism of glycolipids: the role of glycolipid-binding proteins in the function and pathobiochemistry of lysosomes	K. SANDHOFF, G. VAN ECHTEN, M. SCHRÖDER, D. SCHNABEL & K. SUZUKI	695
Natural and synthetic inhibitors of glycosidases	B. WINCHESTER	699
Endogenous inhibition of glycosyltransferases of gangliosides: possible biochemical and morphogenetic functions	R. CAPUTTO	705
Activators and inhibitors of the plant plasma membrane 1,3-β-glucan synthase	K. FREDRIKSON & C. LARSSON	710
Cation activation and stabilization of Golgi β1,4-galactosyltransferase (lactose synthetase)	N. J. KUHN, M. STANKIEWICZ & S. WARD	714

Membrane transport		
Examination of the glycosidation state of five members of the human facilitative glucose transporter family	A. M. BRANT, E. M. GIBBS & G. W. GOULD	235S
Immunological identification of five members of the human facilitative glucose transporter family	A. M. BRANT, E. M. GIBBS, G. W. GOULD & H. M. THOMAS	236S
Inhibitors of quinone-mediated electron transport	T. E. WIGGINS	237S
Regulation of hepatic microsomal glucose transport	M. W. VOICE, I. D. WADDELL, A. G. ZOMERSCHOE & A. BURCHELL	238S
The effect of low pH preincubation on ATP synthesis and hydrolysis activities of isolated thylakoids	J. C. L. PACKER & J. D. MILLS	239S
Ligand binding properties of bacterial oxidases in relation to cytochrome-c oxidase	A. J. MOODY, R. B. GENNIS, D. B. HICKS, W. J. INGLEDEW, T. A. KRULWICH, J. C. RUMBLEY & P. R. RICH	240S
Soret and visible band circular dichroism measurements on the cytochrome <i>bc₁</i> and <i>bf</i> complexes	P. R. RICH & T. E. WIGGINS	241S
Sodium-dependent and -independent nucleobase transport in cultured LLC-PK ₁ epithelia	D. G. GRIFFITH & S. M. JARVIS	242S
Ionic requirements of [³ H]GBR-12935 binding to the dopamine transporter in canine striatal membranes	H. E. MILNER & S. M. JARVIS	243S
Nucleoside transporters in human placenta	L. F. BARROS, N. BEAUMONT, S. M. JARVIS, J. D. YOUNG, P. J. F. HENDERSON, D. L. YUDILEVICH, C. THRASIVOULOU & S. A. BALDWIN	244S
Reconstitution and kinetics of vacuolar H ⁺ -translocating ATPases from plants and animals	D. K. APPS, J. R. PEREZ-CASTINEIRA, M. WARREN & G. L. ATKINS	245S
F ₀ -F ₁ -type ATPase is not light-regulated <i>in vivo</i> in the cyanobacterium <i>Synechocystis</i> PCC 6803	P. A. AUSTIN, I. S. ROSS & J. D. MILLS	246S
The nature of betaine efflux from rat liver mitochondria	R. K. PORTER, J. M. SCOTT & M. D. BRAND	247S
Choline transport into rat liver mitochondria	R. K. PORTER, J. M. SCOTT, & M. D. BRAND	248S
Mechanism of action of Ca ²⁺ -ATPase inhibitors	M. P. WICTOME, A. G. LEE & J. M. EAST	249S
Inhibition of endothelial cell polyamine uptake by aliphatic diamines is dependent on chain length	O. RAJANAYAGAM, K. MANNAN & D. M. L. MORGAN	250S
Purification of the galactose/H ⁺ symport protein of <i>Escherichia coli</i>	H. C. DENT, P. J. F. HENDERSON & V. A. LUCAS	251S
Activators and inhibitors of the motility of <i>Fucus serratus</i>	C. O'TOOLE & C. BROWNSON	252S
Crystallographic and non-crystallographic approaches to membrane protein structure		
Characterization of the post-translational release from membranes of angiotensin converting enzyme	S. Y. OPPONG & N. M. HOOPER	253S
Sidechain-ion interactions in ion channels: a molecular modelling study	M. S. P. SANSOM	254S
Protein-peptide recognition in proteinases		
Chemical modification of tissue inhibitor of metalloproteinases-1 (TIMP-1)	R. A. WILLIAMSON & R. B. FREEDMAN	255S

The characterization of peptidyl prolyl <i>cis-trans</i> isomerase (PPI) activity associated with the endoplasmic reticulum	S. BOSE & R. B. FREEDMAN	256S
Stability and unfolding studies on papain	G. S. BRIGGS, R. B. FREEDMAN, P. W. GOODENOUGH & J. G. SUMNER	257S
The synthesis and expression of a gene coding for the HIV-1 protease	K. N. WALKER, A. F. WORRALL & M. G. GORE	258S
Mutagenesis of the glycerol dehydrogenase from <i>Bacillus stearothermophilus</i>	L. J. PAINE, A. G. POPPLEWELL, P. CHARLTON, M. G. GORE, R. BURTON & T. ATKINSON	259S
The kininogenase activity of human mast cell tryptase	A. F. WALLS, A. R. BENNETT, J. SUEIRAS-DIAZ & H. OLSSON	260S

The molecular biology of nervous system-specific proteins

The isolation and characterization of P-element insertions into G protein genes	K. LINERUTH & T. DAVIS	261S
GTP-binding proteins and protein phosphorylation substrates in central nervous system myelin	M. S. DE LANGE, J. WILLIAMSON, B. LLOYD & R. J. THOMPSON	262S
DNA sequence comparison between human and marsupial genes encoding PGP9.5 — a neurone-specific ubiquitin C-terminal hydrolase	F. L. LAVENDER, I. N. M. DAY & R. J. THOMPSON	263S
Identification of a neuronal specific DNA-binding protein within the rat preprotachykinin promoter	S. C. MENDELSON & J. P. QUINN	264S
A role for lysosomes in scrapie pathogenesis	N. KENWARD, L. LASZLO, M. LANDON, J. FERGUSSON, J. LOWE, H. McDERMOTT, J. HOPE, J. BROWN & R. J. MAYER	265S
Neuronal expression of the tissue-specific splicing protein SmN and its possible role in pre-mRNA splicing	D. A. HORN & D. S. LATCHMAN	266S
Molecular studies on the peripheral-type benzodiazepine acceptor	P. N. MOYNAGH & D. C. WILLIAMS	267S

Kinase cascades and gene expression control in insulin action

Studies on the mechanism of the inhibition of lipogenesis by growth hormone in sheep adipose tissue	C. A. BORLAND, M.T. TRAVERS, M. C. BARBER & R. G. VERNON	268S
Structural characterization of substrate binding to the human insulin receptor tyrosine kinase domain	Y. GAO, N. KEANE, B. A. LEVINE, R. ALEJOS & L. ELLIS	269S
Rapid activation of MAP kinase and S6 kinase by growth hormone in 3T3-F442A preadipocytes	N. G. ANDERSON	270S
Regulation of the hepatic microsomal glucose-6-phosphatase enzyme	H. LYALL, A. GRANT, H. M. SCOTT & A. BURCHELL	271S
The regulation of microsomal glucose-6-phosphatase differs between liver and kidney	M. W. VOICE, H. M. SCOTT, R. FONTES & A. BURCHELL	272S

Cell adhesion molecules		
Temperature-dependent specific heat capacity (C_p) of G-actin and talin or talin-vinculin bound to G-actin	W. H. GOLDMANN & G. ISENBERG	273S
Activators and inhibitors of glycosidases and glycosyltransferases		
Hydrolysis of xylo-oligosaccharides by a β -xylosidase from the rumen anaerobic fungus <i>Neocallimastix frontalis</i>	V. GARCIA-CAMPAYO & T. M. WOOD	274S
Purification and characterization of a feruloyl/ <i>p</i> -coumaroyl esterase from solid-state cultures of the aerobic fungus <i>Penicillium pinophilum</i>	A. CASTANARES & T. M. WOOD	275S
General topics		
Bradykinin stimulates PGE ₂ release in cell fractions isolated from the rat gastric mucosa via a B1 receptor	J. F. BROWN, B. J. R. WHITTLE & P. J. HANSON	276S
Alpha-tocopherol status in patients with rheumatoid arthritis: relationship to antioxidant activity	M. WASIL, D. C. S. HUTCHISON, P. CHEESEMAN & H. BAUM	277S
Influx of phosphate (Pi) and methylglucose in MG-63 osteoblasts	D. GUILLAND-CUMMING, A. BEVINGTON & R. G. G. RUSSELL	278S
Benzopyrene metabolism and transport by cells in culture	S. BROWN & C. T. Y. CHEE	279S
Analysis of the receptor complement for insulin and insulin-like growth factor I (IGF-I) in the rat visceral yolk sac	E. COWLEY & M. PRATTEN	280S
Immunological studies on the endothelial and testicular forms of angiotensin converting enzyme	T. A. WILLIAMS, N. M. HOOPER, K. BARNES, A. J. KENNY & A. J. TURNER	281S
The regulation of endopeptidase-24.11 expression on human osteoblast-like cells in culture	S. HOWELL, A. M. CASWELL, A. J. KENNY & A. J. TURNER	282S
Inhibition of chymotrypsin by phenyl <i>N</i> -phenylphosphoramidochloridate	J. PARKIN, N. P. TOMKINSON, & R. VIRDEN	283S
Bromoperoxidase of the macroalga <i>Corallino officinalis</i>	D. J. SHEFFIELD, A. J. MORT, T. HARRY, A. J. SMITH & L. J. ROGERS	284S
<i>Synechococcus</i> PCC6301 mutants possessing resistance to the tetrapyrrole biosynthesis inhibitor gabaculine	D. L. CHAPPELL, L. J. ROGERS & A. J. SMITH	285S
Proteins of photosystem I during chloroplast assembly and senescence in <i>Festuca pratensis</i>	A. J. MORT, H. THOMAS & L. J. ROGERS	286S
A study of the 14 kDa phospholipase A ₂ from rat liver using a continuous fluorescent displacement assay for the enzyme	A. R. KINKAID & D. C. WILTON	287S
The use of tryptophan fluorescence to determine the stability of IgG binding proteins based upon the B domain of protein A from <i>Staphylococcus aureus</i>	M. G. GORE, S. BOTTOMLEY, A. G. POPPLEWELL & T. ATKINSON	288S
Novel immunoglobulin binding proteins	M. G. GORE, A. G. POPPLEWELL, W. F. FERRIS, M. SCAWEN & T. ATKINSON	289S

Bovine inositol monophosphatase; observation of the modification of a cysteine residue using protein fluorescence	P. J. GREASLEY, M. G. GORE, C. I. RAGAN, M. R. KNOWLES, N. S. GEE & G. McALLISTER	290S
The effect of an active site mutation of <i>E. coli</i> citrate synthase on NADH inhibition and KCl activation	W.-J. MAN, C. D. O'CONNOR & D. C. WILTON	291S
PROBE: a computer program to scan DNA sequence databases for the existence of potential probe sequences in DNA	I. G. GILES	292S
FINDPROBE: a computer program to locate potential probe sequences in DNA	M. BLOOMFIELD & I. G. GILES	293S
Microsomes isolated from oviductal tissue contain low levels of the specific glucose-6-phosphatase system	J. M. STEPHENSON, D. H. EDGAR, J. A. MILLS, R. HUME, & I. D. WADDELL	294S
Lipoprotein lipase activity in tissues of the developing chick embryo	B. K. SPEAKE, R. C. NOBLE & R. McCARTNEY	295S
Identification and characterization of glycosyl-inositolphospholipids in <i>Toxoplasma gondii</i>	B. STRIPEN, S. TOMAVO, J.-F. DUBREMETZ & R. T. SCHWARZ	296S
Synthesis of glycosyl-phosphatidyl-inositol lipids by a cell-free system prepared from asexual erythrocytic stages of the malaria parasite <i>Plasmodium falciparum</i>	P. GEROLD, A. DIECKMANN-SCHUPPERT & R. T. SCHWARZ	297S
Phospholipase A2 specificities determined in mixed substrate vesicles using a combination of continuous fluorescence displacement and quantitative HPLC analyses	A. N. HUNT, A. R. KINKAID, D. C. WILTON & A. D. POSTLE	298S
Mechanisms of synthesis of polyunsaturated phosphatidylcholine molecular species by guinea pig liver	G. C. BURDGE, F. J. KELLY & A. D. POSTLE	299S
Calmodulin from the Eucestoda and its use as a probe for calmodulin binding proteins	J. L. BROOK, C. BRANFORD-WHITE & W. J. WHISH	300S
The U7 small nuclear RNA genes of <i>Xenopus borealis</i>	N. J. WATKINS, S. C. PHILLIPS & P. C. TURNER	301S
Ribozymes acting against the transcription factor Pit-1	H. A. JAMES & P. C. TURNER	302S
Regulation of glutamate decarboxylase and enkephalin mRNA levels in rat striatum by chronic benzodiazepine treatment	M. RATTRAY, S. SINGHVI, N. ANDREWS, S. E. FILE & P.-Y. WU	303S
Amplification of members of the neurotransmitter transporter superfamily using PCR	C. JOMARY, S. E. JONES, & M. RATTRAY	304S
A preliminary analysis of the hybridization kinetics of an oligonucleotide to mRNA in tissue sections	D. SAVERY, J. V. PRIESTLEY & M. RATTRAY	305S
The role of insulin in the regulation of AMP-activated protein kinase in lactating rat mammary gland	M. R. MILIC, K. A. OTTEY, S. TAKHAR & M. R. MUNDAY	306S
Evidence for different isozymic forms of catalytic subunit of cyclic AMP-dependent protein kinase in heart and lactating mammary gland of the rat	S. TAKHAR & M. R. MUNDAY	307S
An examination of the transmembranous organization of the sarcoplasmic reticulum (Ca ²⁺ -Mg ²⁺)-ATPase using antipeptide antibodies	A. M. MATA, I. MATTHEWS, A. G. LEE & J. M. EAST	308S

Localization of *n*-chimaerin in rat brain, using antibodies raised against bacterially expressed *trpE* fusion proteins

C. A. L. MONFRIES & L. LIM

309S

The *N*-terminal region of *n*-chimaerin allows lipid modulation of the *C*-terminal p21^{rac}-GTPase activating domain

J. LEE, S. AHMED, R. KOZMA, M. TEO, C. MONFRIES & L. LIM

310S
