Postgraduate Study in the Biological Sciences

A Researcher's Companion

R J Beynon

Thinking of a career in research? About to start - or finish - your PhD? About to start post-doctoral research? Then this guide is essential for you. It provides some of the basic advice and information that will be needed during a research training.

"... sound advice on every aspect of doing a higher degree"

"I have encountered no other book quite like this one for brevity, readability and practical down-to earth good sense"

Mitochondria: DNA, Proteins and Disease

Edited by V M Darley-Usmar
and A H V Schapira

Whilst the basic principles underlying the bioenergetics of mitochondria have been understood for some time it has only recently become clear that defects in the mitochondrial genome, such as major deletions and point mutations, cause a number of human diseases e.g. mitochondrial myopathies, encephalopathies and Leber's hereditary optic neuropathy. This book aims to bridge the gap between basic research and clinical practice by bringing together the genetic and bioenergetics aspects of mitochondrial metabolism.

Membrane Protein Expression

Systems A User's Guide

Edited by G W Gould

This book is a simple-to-read laboratory manual describing the principles behind the commonly used expression systems, e.g. *Escherichia coli*, cell culture systems, *Xenopus* oocytes, baculovirus, vaccinia and yeast. Detailed experimental protocols for each system are provided in an easy-to-use, step-by-step format. The benefits and the likely pitfalls that newcomers might encounter, are discussed in each case.

Neuropeptide Gene Expression

Edited by A J Turner

Neuropeptides are a rapidly growing class of biological signal molecules. Study of their molecular biology is providing insights into important mechanisms of gene expression. In this book, leading scientists survey the recent progress made in the identification of neuropeptides and the factors regulating their expression including transcription factors, enzymes involved in post-translational processing as well as agents modulating peptide hormone release at synaptic terminals. This book will be of interest to both neuroscientists and those studying gene expression in general.

Biochemical Society Symposia and Essays in Biochemistry

Two Popular Series from Portland Press

Molecular Botany

New

Signals and the Environment

Edited by **D J Bowles**, *University of Leeds, UK*,
Biochemical Society Symposium No. 60

Molecular Botany provides a thorough overview of the ways in which environmental stimuli lead to changes within plants. A range of topics are addressed encompassing the role of the cell wall and glycans in signalling events, through to the molecular events regulating defence gene activation and developmental programming.

200 pages £60.00/US\$96.00

Neurochemistry of Drug Dependence

Edited by **S Wonnacott** and **G G Lunt**
Biochemical Society Symposium No. 59

This book brings together neurochemical information about drug targets and their mechanisms on the one hand, with psychopharmacological and behavioural studies of drug dependence on the other. This multidisciplinary book will be useful to biochemists, pharmacologists and behavioural scientists.

I 85578 034 8 Hard 1994
223 pages £45.00/US\$81.00

The Archaeobacteria

Biochemistry and Biotechnology
M J Danson, D W Hough and G G Lunt
Biochemical Society Symposium No. 58

Archaeobacteria explores the biochemistry and molecular biology of these unusual organisms, and then examines the biotechnology potential of them. The 5 main sections of the book cover: • The archaeobacteria • Biochemical features of archaeobacteria • Molecular biological features of archaeobacteria • Proteins in extreme environments • Biotechnological potential of the archaeobacteria

222 pages £45.00/US\$90.00

Protein Structure: Prediction and Design

Edited by **J Kay, G Lunt** and **D Osguthorpe**
Biochemical Society Symposium No. 57

I 85578 002 X Hard 1991
158 pages £45.00/US\$70.00

G Proteins and Signal Transduction

Edited by **G Milligan, M J O Wakelam** and **J Kay**

Biochemical Society Symposium No. 56

I 85578 001 I Hard 1990
172 pages £45.00/US\$70.00

Essays in Biochemistry

Volume 28

Edited by **K F Tipton** *Trinity College, Dublin*

Provides students and their lecturers with ten self-contained summaries of rapidly moving areas of biochemistry and molecular biology which are poorly covered in standard student textbooks. It is published in a new format which makes extensive use of illustrations diagrams and tables to enhance its accessibility.

Contents: Metabolic control, C I Pogson et al; The role of mitochondrial HMG-CoA synthase in regulation of ketogenesis, P A Quant; PIG-tailed membrane proteins, A J Turner; Motor neurone disease, R J Guiloff et al; Carnitine and its role in acyl group metabolism, R R Ramsay; Folate/vitamin B12 inter-relationships, J Scott and D Weir; Protein kinase inhibitors, H Hidaka and R Kobayashi; The renin—angiotensin system, T Inagami; Mitochondrial DNA and disease, S R Hammans; Horseradish peroxidase: the analyst's friend, C Ó Fágáin
I 85578 016 X Paper May 1994
185 pages £15.00/US\$30.00

Essays in Biochemistry

New

Volume 29

Edited by **K F Tipton**, *Trinity College, Dublin* and **D Apps**, *University of Edinburgh*

Contents include: The mechanism of bacterial DD-transpeptidases and penicillin mode of action, J-M Frère et al; Sphingolipid activator proteins, K Suzuki; Opsin genes, E H Maden; The in vivo roles of molecular chaperones, P A Lund; Molecular chaperones: physical and mechanistic properties, S G Burston and A R Clarke; Molecular pathology of prion diseases, C Smith and J Collinge.

I 85578 017 8 Paper Dec 1994
130 pages £15.00/US\$30.00
