

Thudichum Medal Lecture**The Acetylcholine Receptor: A Model for Allosteric Membrane Proteins**

J.-P. CHANGEUX 195

Colworth Medal Lecture**Molecules Mediating Signals**

L. STEVENS 207

Royal Irish Academy Medal Lecture**Ultraviolet Radiation Damage in DNA**

R. J. H. DAVIES 407

colloquia**653rd Meeting Sussex****colloquium: Plant Peroxidases, Structure and Molecular Biology**

Structural determinants of the catalytic activities of peroxidases	P. R. ORTIZ DE MONTELLANO, S.-I. OZAKI, S. L. NEWMYER, V. P. MILLER AND C. HARTMANN	223
The crystal structure of ascorbate and manganese peroxidases: the role of non-haem metal in the catalytic mechanism	T. L. POULOS, W. R. PATTERSON AND M. SUNDARAMOORTHY	228
Aromatic donor molecule binding sites of haem peroxidases	N. C. VEITCH	232
The functional role of the key residues in the active site of peroxidases	G. SMULEVICH	240
Gene structures of peroxidase isoenzymes in horseradish and <i>Arabidopsis thaliana</i> and their expression	K. FUJYAMA, C. INTAPRUK AND A. SHINMYO	245
Expression of horseradish peroxidase in transgenic tobacco	A. PELLEGRINESCHI, M. KIS, I. DIX, T. A. KAVANAGH AND P. J. DIX	247
Homology modelling of horseradish peroxidase coupled to two-dimensional NMR spectral assignments	G. H. LOEW, P. DU AND A. T. SMITH	250

Functions of electrostatic potentials and conserved distal and proximal His-Asp H-bonding networks in haem peroxidases	K. G. WELINDER, B. BJØRNHOLM AND H. B. DUNFORD	257
Radical cation cofactors in lignin peroxidase catalysis	P. J. HARVEY AND L. P. CANDEIAS	262
Vanadium chloroperoxidases occur widely in nature	E. G. M. VOLLENBROEK, L. H. SIMONS, J. W. P. M. VAN SCHIJNDEL, P. BARNETT, M. BALZAR, H. DEKKER, C. VAN DER LINDEN AND R. WEVER	267
Characterization of a novel non-haem-containing extracellular peroxidase from <i>Thermomonospora fusca</i>	A. S. BALL AND C. TRIGO	272

colloquium: Lipids in Immune Function and Inflammatory Disorders

Chairman's Introductory Remarks	K. W. J. WAHLE	277
<i>n</i> – 3 Polyunsaturated fatty acids in the regulation of human cytokine synthesis	S. ENDRES, T. EISENHUT AND B. SINHA	277
Modulatory influence of unsaturated fatty acids on the biology of tumour necrosis factor-α	R. F. GRIMBLE AND P. S. TAPPIA	282
Suppression of autoimmune disease by ω – 3 fatty acids	D. R. ROBINSON, C. T. KNOELL, M. URAKAZE, R. HUANG, H. TAKI, E. SUGIYAMA, L.-L. XU, E. T. H. YEH, W. OLESIAK, M. GUO, R. B. COLVIN AND P. E. AURON	287
Fatty acid modulation of cell responsiveness	D. ROTONDO	291
Arachidonic acid in the reticuloendothelial network	H. A. LEAVER, J. R. WILLIAMS, I. M. DAWSON AND P.-L. YAP	297
Fatty acids, dietary lipids and lymphocyte functions	P. C. CALDER	302

colloquium: Regulation of Carbohydrate Metabolism in Muscle and Liver

Regulation of glucose metabolism in cardiac muscle	L. HUE, C. DEPRE, V. LEFEBVRE, M. H. RIDER AND K. VEITCH	311
Mechanisms underlying suppression of glucose oxidation in insulin-resistant states	M. C. SUGDEN AND M. J. HOLNESS	314
The mitochondrial carnitine palmitoyltransferase system: its broadening role in fuel homeostasis and new insights into its molecular features	J. D. MCGARRY	321
Amylin regulation of carbohydrate metabolism	A. YOUNG, R. PITTMER, B. GEDULIN, W. VINE AND T. RINK	325
Adult glucose and lipid metabolism may be programmed during fetal life	M. DESAI, N. J. CROWTHER, S. E. OZANNE, A. LUCAS AND C. N. HALES	331
Paracrine/autocrine control of the islet and the amylin family	D. M. SMITH AND S. R. BLOOM	336

colloquium: The Control of Flux: 21 Years On

The control of flux	H. KACSER, J. A. BURNS AND D. A. FELL	341
Molecular biology for flux control	P. R. JENSEN, J. L. SNOEP, D. MOLENAAR, W. C. VAN HEESWIJK, B. N. KHOLODENKO, A. A. VAN DER GUGTEN AND H. V. WESTERHOFF	367
Control analysis of energy metabolism in mitochondria	M. D. BRAND AND A. KESSELER	371
Probing the properties of enzymes <i>in vivo</i> using NMR	K. BRINDLE, S. FULTON, J. SHELDON AND S. WILLIAMS	376
Two paradigms of metabolic engineering applied to amino acid biosynthesis	T. W. SIMPSON, G. E. COLÓN AND G. STEPHANOPOULOS	381
Recent developments beyond Metabolic Control Analysis	H. KACSER	387

colloquium: Molecular Liaisons

Alternative splicing of the type-IVA cyclic AMP phosphodiesterase gene provides isoform variants with distinct N-terminal domains fused to a common, soluble catalytic unit: 'designer' changes in V_{max}, stability and membrane association	M. D. HOUSLAY, G. SCOTLAND, L. POOLEY, S. SPENCE, I. WILKINSON, F. MCCALLUM, P. JULIEN, N. G. RENA, A. M. MICHIE, S. ERDOGAN, L. ZENG, J. C. O'CONNELL, E. S. TOBIAS AND I. MACPHEE	393
Models of human disease through gene targeting	R. C. MOORE AND D. W. MELTON	398
Transforming growth factor-β and the protection from cardiovascular injury hypothesis	J. C. METCALFE AND D. J. GRAINGER	403

colloquium: Environmental Biochemistry

Drug metabolizing enzymes of mussels as bioindicators of chemical pollution	D. SHEEHAN, J. MCINTOSH, A. POWER AND P. J. FITZPATRICK	419
The glutathione S-transferase multigene family: a paradigm for xenobiotic interactions	T. J. MANTLE	423
Peroxisome proliferation in response to xenobiotics	J. W. DEPIERRE, A.-K. SOHLENIUS, Y. CAI, A. MESSING ERIKSSON, K. ANDERSSON AND C. SUNDBERG	425
Might environmental factors contribute to neurodegenerative diseases?	K. F. TIPTON	429
Detection of micro-organisms in the environment	R. POWELL, M. MULLARKEY, D. O'BRIEN AND J. O. MCINERNEY	435

Plant peroxidases, structure and molecular biology		
Magnetic circular dichroism studies on <i>Vaccinium myrtillus</i> cationic peroxidases	N. S. MELO, P. S. FEVEREIRO AND E. LARSEN	149S
Ionically-bound and covalently-bound wall peroxidases differ in their substrate specificity	G. J. MCDUGALL AND I. M. MORRISON	150S
A structural model of the alternative oxidase of plant mitochondria	A. L. MOORE, A. L. UMBACH AND J. N. SIEDOW	151S
Progress in the characterization of catalase-peroxidase from <i>Mycobacterium tuberculosis</i>	J. M. NAGY, A. E. G. CASS AND K. A. BROWN	152S
Electron transfer between cytochrome c peroxidase and ferrocene	S. J. SADEGHI AND A. E. G. CASS	153S
Purification and partial characterization of 'extensin peroxidase'	N. AHMED, M. CHAPLIN, M. TREVAN, P. M. DEY AND M. D. BROWNLEADER	154S
Photosynthesis		
The modulation of Protein A-IgG(Fc) binding by the reversible addition of 2-nitrobenzyl groups	S. THOMPSON, M.-C. FAWCETT, J. A. SPOORS AND C. H. SELF	155S
Studies on photocleavable nitrobenzyl-bovine serum albumin conjugates	C. H. SELF, M.-C. FAWCETT, J. A. SPOORS, L. B. PULMAN AND S. THOMPSON	156S
CO flash photolysis of cytochrome <i>bd</i> from <i>Azobacter vinelandii</i>	S. JÜNEMANN, P. R. RICH AND J. M. WRIGGLESWORTH	157S
Glycobiology of inflammation		
Appearance of lymphocytes positive for E-selectin ligands during inflammatory reactions <i>in vivo</i>	S. T. WOOLLEY, A. WHYTE, S. T. LICENCE, M. K. ROBINSON, D. O. HASKARD AND R. M. BINNS	158S
The L-selectin counter-receptor in porcine lymph nodes	A. WHYTE, P. WOODING, N. NAYEEM, S. R. WATSON, S. D. ROSEN AND R. M. BINNS	159S
Endothelial selectin expression and leukocyte trafficking in cutaneous DNFB-induced delayed hypersensitivity	A. WHYTE, S. T. LICENCE, S. T. WOOLLEY, A. A. HARRISON, D. O. HASKARD AND R. M. BINNS	160S
The kinetics of E-selectin expression and leukocyte traffic in BCG/PPD delayed hypersensitivity in the pig	A. A. HARRISON, A. WHYTE, S. T. LICENCE, S. T. WOOLLEY, R. M. BINNS AND D. O. HASKARD	161S
Adhesion of eosinophils to E- & P-selectin	R. PRIEST, S. NAWAZ, P. M. GREEN AND M. I. BIRD	162S
Oligosaccharides of IgG in rheumatoid arthritis	A. J. MACGILLIVRAY, M. IWABI, L. FERNANDES AND G. PAPANAVVAS	163S
The influence of cytokines on the glycosylation pattern of α -1-acid glycoprotein secreted by the HepG2 cell line	H. G. ELLIOTT, M. A. ELLIOTT, J. WATSON AND K. D. SMITH	164S
Tissue specific expression of the human α (1-3) fucosyltransferase gene family	A. WINDER, N. SMITHERS, S. WITHAM, A. SYMONS AND M. EDBROOKE	165S
Chemical modification of α (1-3) fucosyltransferase defines residues of caalytic importance	C. BRITTEN, C. HOOD AND M. BIRD	166S
Activation of complement by DMSO and ethanol and its inhibition by soluble complement receptor type I	A. J. LAVER, M. HIBBS AND R. A. G. SMITH	167S

An improved multiwell immunoassay using digoxigenin-labelled lectins to study the glycosylation of purified glycoproteins	M. T. GOODARZI, M. RAFIQ AND G. TURNER	168S
<hr/>		
Molecular mechanisms of signalling by tyrosine kinases		
Inositol 1,2,3-trisphosphate is a product of InsP_6 dephosphorylation in WRK-1 rat mammary epithelial cells and exhibits transient concentration changes the cell cycle	C. J. BARKER, J. WRIGHT, C. J. KIRK AND R. H. MICHELL	169S
Contrasting mechanisms of intracellular calcium ($[\text{Ca}^{2+}]_i$) elevation by angiotensin II (All) and platelet derived growth factor-BB (PDGF-BB) in human vascular smooth muscle cells (VSMCs)	G. F. CLUNN, M. SCHACHTER AND A. D. HUGHES	170S
AlF_4^- inhibits influx of Ca^{2+} into vascular smooth muscle cells	A. D. HUGHES AND M. SCHACHTER	171S
Correlation of heparin binding with responsiveness in human vascular smooth muscle cells	J. S. REFSON, M. SCHACHTER, M. K. PATEL, P. CHAN, J. H. N. WOLFE AND P. SEVER	172S
Differential mitogenic effects of PDGF isoforms and heparin on human vascular smooth muscle cells	J. S. REFSON, M. SCHACHTER, M. K. PATEL, J. H. N. WOLFE AND P. SEVER	173S
Signalling at the epidermal growth factor receptor: role of glycosyl-phosphatidylinositol hydrolysis	D. R. JONES, R. CLEMENTE AND I. VARELA-NIETO	174S
Cyclic AMP modulates adipogenesis in 3T3-F442A cells	S. J. YARWOOD, N. G. ANDERSON AND E. KILGOUR	175S
Critical role for the phosphorylation of tyrosines 674 and 675 in signalling by the Trk tyrosine kinase	M. GUITON, F. J. GUNN-MOORE AND J. M. TAVARE	176S
Developmental protein expression in thermally stressed <i>Pisum sativum</i> plants	C. K. WOOD, J. R. PRATT AND A. L. MOORE	177S
Immunochemical characterization of mitochondrial proteins isolated from <i>Pisum sativum</i> , subjected to thermal stress and age development	J. R. PRATT, C. K. WOOD AND A. L. MOORE	178S
The role of phosphatidylinositol 3-kinase activity in insulin-stimulated mitogenesis in 3T3-L1 adipocytes	R. J. HAIGH, P. R. SHEPHERD, B. T. NAVÉ AND K. SIDDLÉ	179S
Purification of an insulin-stimulated acetyl-CoA carboxylase kinase from rat epididymal adipose tissue	K. J. HEESOM, S. K. MOULE AND R. M. DENTON	180S
Inhibition of <i>Xenopus laevis</i> poly (ADP-ribose) polymerase in oocytes	S. AOUFOUCHI AND S. SHALL	181S
Cytokine-induced E-selectin expression by human umbilical vein endothelial cells (HUVEC). A role for protein tyrosine kinases?	M. J. MAY, C. P. D. WHEELER-JONES AND J. D. PEARSON	182S
Effect of phorbol esters on phosphatidylinositol 3-kinase activity in adipocytes	B. T. NAVÉ, P. R. SHEPHERD AND K. SIDDLÉ	183S
Differential modulation of apical and basolateral endocytosis in Caco-2 cells	W. SHURETY AND J. P. LUZIO	184S
Intracellular mediators of insulin-like growth factor I during otic vesicle development	Y. LEON, C. SANZ AND I. VARELA-NIETO	185S

Construction and expression of a functional chimeric receptor from PDGFr- β and c-erbB-2	I. J. UINGS, G. D. SPACEY AND R. W. BONSER	186S
Effects of myristoylated pseudosubstrate protein kinase C peptide inhibitors on insulin secretion	T. E. HARRIS, S. J. PERSAUD, T. SAERMARK AND P. M. JONES	187S
Comparative phosphorylation kinetics of the human insulin receptor protein-tyrosine domain and an enzymatically competent deletion construct — the tail could wag the dog	P. G. QUIRK, N. E. KEANE, B. A. LEVINE, L. WEI AND L. ELLIS	188S
Calcium oscillations and waves during IgE receptor crosslinking	B. HAYES, A. CROFTS AND K. RAY	189S
Possible role for PI3 kinase but not p70 ^{S6K} in regulation of lipogenesis by insulin and growth hormone in sheep adipose tissue	R. G. VERNON AND S. LINDSAY-WATT	190S
Micro-injection of p21 ^{ras} into <i>Xenopus</i> oocytes, or incubation of oocyte S-100 with ATP, induces the activation of eIF-4 α kinase(s)	S. J. MORLEY AND V. M. PAIN	191S
A basic residue C-terminal to tyrosine compromises its viability as a tyrosine kinase target	N. E. KEANE, P. G. QUIRK, B. A. LEVINE, A. CHAVANIEU, B. CALAS, Y. GAO, L. WEI AND L. ELLIS	192S
P21-ras is involved in regulation of voltage-dependent calcium channels in cultured rat dorsal root ganglion cells	E. M. FITZGERALD AND A. C. DOLPHIN	193S
Stimulation of platelets with platelet-activating factor induces changes in the subcellular distribution and activity of the tyrosine kinase pp60 ^{c-src}	C. T. MURPHY AND J. WESTWICK	194S
V-Ras activates phosphatidylinositol 3-kinase	T. KODAKI, R. WOSCHOLSKI AND P. J. PARKER	195S
Role of c-lyn in the functional effects of GM-CSF on human neutrophils	N. T. THOMPSON, R. W. RANDALL AND L. G. GARLAND	196S
Differential effects of wortmannin on growth hormone dependent signalling pathways in 3T3-F442A cells	N. G. ANDERSON AND E. KILGOUR	197S
Phosphatidic acid phosphohydrolase in guinea-pig airway smooth muscle	D. G. TOLAN, N. J. PYNE AND S. PYNE	198S
Phospholipase D regulation involves extracellular calcium as a conditional requirement for subsequent stimulation by protein kinase C	S. PYNE AND N. J. PYNE	199S
PKC-dependent activation of the type II adenylate cyclase in airway smooth muscle limits the bradykinin-stimulated ERK-2 pathway	N. J. PYNE, P. STEVENS, N. MOUGHAL AND S. PYNE	200S
Involvement of PI 3-kinase in stimulation of glucose transport and recruitment of transferrin receptors in 3T3-L1 adipocytes	P. R. SHEPHERD, B. T. NAVÉ AND K. SIDDLE	201S
Insulin activates glycogen synthase by a novel PI 3-kinase/p70 ^{S6K} dependent pathway in 3T3-L1 adipocytes	P. R. SHEPHERD, B. T. NAVÉ AND K. SIDDLE	202S
Thrombin and histamine phosphorylate the 42 kDa mitogen-activated protein kinase in HUVEC	C. P. D. WHEELER-JONES AND J. D. PEARSON	203S

Phosphatase inhibitors potentiate the release of vasoactive mediators from human endothelium	C. P. D. WHEELER-JONES, R. A. HOULISTON, A. J. MORGAN AND J. D. PEARSON	204S
Effects of myristoylated pseudosubstrate inhibitor of PKC in intact human platelets	C. P. D. WHEELER-JONES, S. SAYED AND S. J. PERSAUD	205S
Studies with wortmannin indicate that insulin stimulation of lipogenesis involves multiple signalling pathways	S. K. MOULE, N. J. EDGELL, G. I. WELSH, T. A. DIGGLE, C. G. PROUD AND R. M. DENTON	206S
Cloning of a chicken gene homologous to the rabbit mono-ADP-ribosyltransferase gene	T. DAVIS AND S. SHALL	207S
The regulation of phospholipase C (PLC) and phospholipase D (PLD) by G protein receptor-activated tyrosine kinases in α T3-1 cells	R. MITCHELL, W. B. WOLBERS, P. SIM AND M. FENNEL	208S
Characterization of a novel '22kDa' phosphoprotein which may be important in insulin action	T. A. DIGGLE AND R. M. DENTON	209S
The effect of tyrosin kinase inhibition on phorbol 12,13-dibutyrate- and ionomycin-induced LH and GH release	M. S. JOHNSON, J. NOBLE, W. B. WOLBERS AND R. MITCHELL	210S

Biochemical immunology group

Serum levels of neuron-specific enolase, carbohydrate antigen 19-9 and carbohydrate antigen 125 in carcinoma of the lung	G. OKTAY, G. GÜNER, C. KARLIKAYA AND A. AKKOÇLU	211S
Immunoglobulins and α -1-proteinase inhibitor in human intervertebral disc material	A. GÜNER, G. OKTAY, M. KERMAN AND G. GÜNER	212S
Iron, desferrioxamine, and ATP interactions in proliferating lymphocytes and B-cell lines	G. O. LATUNDE-DADA AND S. P. YOUNG	213S
Apoptosis in T and B lymphocyte's life cycles	C. G. H. BELL	214S
Heat shock protein (Hsp)65-70: dominant self-antigen candidate in the selection of $\gamma\delta$ lymphocytes?	C. G. H. BELL	215S
B-cell repertoire selection: fine specificity of antibodies elicited by bacterial polysaccharide dextrans and by V-region reactive ligands	C. G. H. BELL	216S

Hormone group

High concentrations of β -adrenergic agonists inhibit DNA binding of glucocorticoids in human lung <i>in vitro</i>	I. M. ADCOCK, M. J. PETERS, C. R. BROWN, D. A. STEVENS AND P. J. BARNES	217S
Measurement of insulin secretion from single pancreatic β cells using a reverse haemolytic plaque assay	H. RATCLIFF AND P. M. JONES	218S
Characterization of a variant of ovine growth hormone (oGH1158A) produced by site-directed mutagenesis	A. LIOUPIS, O. C. WALLIS AND M. WALLIS	219S
Preparation and characterization of recombinant DNA-derived ovine growth hormone variants in which the C-terminal disulphide bridge is modified	R. E. GILES, O. C. WALLIS AND M. WALLIS	220S
The mitogen-activated protein kinase cascade in rat islets of Langerhans	S. J. PERSAUD, C. P. D. WHEELER-JONES AND P. M. JONES	221S

Membrane group		
Effects of ion concentration gradients on glycine transport and accumulation	L. C. WARREN AND K. P. WHEELER	222S
Molecular and cellular pharmacology group		
The involvement of inositol lipids and phosphates in signalling in the fission yeast <i>Schizosaccharomyces pombe</i>	J. A. STUART, P. J. HUGHES, C. J. KIRK, J. DAVEY AND R. H. MITCHELL	223S
Antioxidant status in hypertension and effects of angiotensin converting enzyme inhibition	H. J. F. WHY, H. ANSELL, V. B. PATEL, W. S. WASSIF, J. REEVES, T. SIDDIQ, P. J. RICHARDSON AND V. R. PREEDY	224S
Naphthoquinone-induced DNA damage in the absence of oxidative stress	W. A. MORGAN	225S
Neurochemical group		
Nerve growth factor regulation of a late response gene — neuropeptide Y	N. HOLLIDAY, D. BALBI, A. PANCE AND J. M. ALLEN	226S
Alanine reverses the inhibitory effect of phenylalanine and its metabolites on Na ² ,K ⁺ -ATPase in synaptic plasma membranes from cerebral cortex of rats	A. T. S. WYSE, M. WAJNER, A. BRUSQUE AND C. M. D. WANNMACHER	227S
2-Hydroxybutyrate and 4-hydroxybutyrate inhibit CO ₂ formation from labeled substrates by rat cerebral cortex	C. S. DUTRA-FILHO, M. WAJNER, C. M. D. WANNMACHER, E. GASSEN, R. H. CANDIAGO, A. M. WILHELMS AND H. F. C. DE MALFUSSI	228S
Inhibition of citrate oxidation <i>in vitro</i> by 2-hydroxybutyrate and 4-hydroxybutyrate in cerebral cortex of young rats	C. S. DUTRA-FILHO, M. WAJNER, C. M. D. WANNMACHER, E. GASSEN, R. H. CANDIAGO, A. M. WILHELMS AND H. F. C. DE MALFUSSI	229S
Free radicals and oxidative stress — environment, drugs and food additives		
Mechanisms of free-radical scavenging by the nutritional antioxidant β-carotene	S. A. EVERETT, S. C. KUNDU, S. MADDIX AND R. L. WILLSON	230S
Effect of superoxide dismutase on nitric oxide production by RAW264 macrophages	S. P. FRICKER, E. SLADE AND N. A. POWELL	231S
E.p.r. studies on reduced rat liver mitochondria incubated with nitric oxide	M. P. LINHARES AND R. CAMMACK	232S
Nitric oxide production, alveolar macrophages and type II alveolar epithelial cells in response to LPS <i>in vivo</i> and <i>in vitro</i>	X. LI, K. DONALDSON AND W. MACNEE	233S
Changes in the catalytic properties of benzylamine oxidase	I. J. SILVA, M. S. AZEVEDO AND C. F. MANSO	234S
Cigarette smoke, glutathione metabolism and epithelial permeability in rat lungs	I. RAHMAN, X. Y. LI, K. DONALDSON AND W. MACNEE	235S
Muscle damage revisited: does tamoxifen protect by membrane stabilization or radical scavenging rather than via the E2-receptor?	P. D. R. BÄR, R. W. KOOT AND G. H. J. AMELINK	236S
Modification of aromatic amino acids by reactive nitrogen species	A. VAN DER VLIET, J. P. EBERICH, B. HALLIWELL AND C. E. CROSS	237S

Interactions of diesel engine emissions with extracellular biological fluids	J. P. EISERICH, A. VAN DER VLIET, B. HALLIWELL AND C. E. CROSS	238S
Role of oxidants in TNF- α -mediated cytotoxicity	V. B. O'DONNELL AND A. AZZI	239S
Fructation induced cross-linking of β -lactoglobulin and lysozyme	J. LIGGINS AND A. J. FURTH	240S
Molecular mechanisms of chromium toxicity: oxidation of hemoglobin	M. C. ALPOIM, C. F. GERALDES, C. R. OLIVEIRA AND M. C. LIMA	241S
The role of thiols in oxidation of low-density lipoprotein by macrophages	J. L. WOOD AND A. GRAHAM	242S
The use of LDL-resembling particle (LDL-r) as a model for the investigation of the effect of oxidation on the behaviour of LDL	K. R. BRUCKDORFER AND C. ETTELAIE	243S
A study of the effects of complexation of heme by hemopexin upon its reactions with organic peroxides	G. S. TIMMINS, M. J. DAVIES AND U. MULLER-EBERHARD	244S
Effect of a very low fat diet on lipid peroxidation indices	C. H. BOLTON, J. F. DWIGHT, T. M. LEVY, V. J. PARFITT AND M. HARTOG	245S
Effect of a high fat meal on lipid peroxidation products	C. H. BOLTON, K. STEER, V. J. PARFITT, M. I. HOPTON AND M. HARTOG	246S
Dietary linoleic acid in alcohol-induced liver cirrhosis	J. M. BAILEY, G. FISKUM, A. N. MAKHEJA AND J. Y. VANDERHOEK	247S
Detection of intermediates formed on reaction of hyaluronic acid and related materials with the hydroxyl radical	C. L. HAWKINS AND M. J. DAVIES	248S
The action of iron on amino acid and protein peroxides	S. GEBICKI, G. BARTOSZ AND J. M. GEBICKI	249S
The pro-oxidant activity of aminoguanidine and protein glycation	J. V. HUNT, A. G. MCKAY AND J. T. SKAMARAUSKAS	250S
Structural modulation of lipid peroxidation by the proteins within membranes: model protein studies with liposomes	A. RIEDL, M. ANDERTON, Z. SHAMSI, P. GOLDFARB AND A. WISEMAN	251S
The interaction of carotenoids with reactive oxy-species	T. G. TRUSCOTT, D. MCGARVEY, C. LAMBERT, T. HILL, J. TINKLER, P. CONN, F. BÖHM, E. J. LAND AND W. SCHALCH	252S
Release of the antioxidant, ferulic acid, from plant material by specific esterases	C. B. FAULDS AND G. WILLIAMSON	253S
Evaluation of the antioxidant properties of food extracts	G. W. PLUMB, S. J. CHAMBERS, N. LAMBERT, S. WANIGATUNGA, G. R. FENWICK AND G. WILLIAMSON	254S
Influence of the SOD-mimetic complex Cu-PuPy on cellular redox systems, adenylates, and cell survival	A. NAGELE	255S
Mechanism of inhibition of microsomal lipid peroxidation by estrogens: possible interactions with the cytochrome P450-dependent monooxygenase system	M. B. RUIZ-LARREA, A. LEAL, R. MARTÍNEZ, C. MARTIN AND M. LACORT	256S
Antioxidants and the prevention of cataract	W. R. McLAUCHLAN, J. SANDERSON AND G. WILLIAMSON	257S

Free-radical mediated toxicity in whole rat brain reaggregate cultures is prevented by α -tocopherol	R. M. FOX, J. DAVENPORT JONES AND C. K. ATTERWILL	258S
Damage to DNA and RNA by tumour promoter-derived alkoxy radicals: an EPR spin trapping study	C. HAZLEWOOD AND M. J. DAVIES	259S
Investigations of a series of novel cationic photosensitisers and their potential use in photodynamic therapy	S. M. BURROW, S. GUINOT, M. WAINWRIGHT, J.J. WARING AND D. A. PHOENIX	260S
Detection of protein radicals formed by the photodynamic action of porphyrin sensitizers	J. A. SILVESTER, G. S. TIMMINS AND M. J. DAVIES	261S
Amplification of oxidative stress by decarboxylation: a new strategy in anti-tumour drug design	L. P. CANDEIAS, L. K. FOLKES AND P. WARDMAN	262S
Oxidative stress in the plant tissue culture environment	L. ROBERTSON, W. J. MAGILL, E. E. BENSON, D. H. BREMNER AND T. E. J. BUULTJENS	263S
ATP: a hitherto unrecognised, iron-specific membrane antioxidant	T. HALLINAN, D. KUNDU AND J. GOR	264S
Differential inhibition of DNA synthesis by paracetamol in the rat testis and GI tract	C. LISTER AND A. MCLEAN	265S
<hr/> Molecular liaisons <hr/>		
Cloning and over-expression of the structural gene encoding isocitrate dehydrogenase from <i>Klebsiella pneumoniae</i>	C. A. INCHE, D. J. PLATT, H. KACSER, S. A. COWAN C. F. A. BRYCE AND E. M. T. EL-MANSI	266S
Functional characterisation of an ovine oxytocin signal transduction pathway in oxytocin receptor cDNA transfected Cos 7 cells	P. R. RILEY, H. J. STEWART, R. E. ABAYASEKARA AND A. P. F. FLINT	267S
Analysis of a novel A-kinase anchoring protein 100, (AKAP 100)	S. MCCARTNEY, B. M. LITTLE AND J. D. SCOTT	268S
Exogenous CD59 incorporated into U937 cells through its glycosyl phosphatidylinositol anchor becomes associated with signalling molecules in a time dependent manner	C. W. VAN DEN BERG, T. CINEK, M. B. HALLETT, V. HOREJSI AND B. P. MORGAN	269S
The human A3 adenosine receptor gene	E. MURRISON, S. J. GOODSON, C. A. HARRIS AND M. R. EDBROOKE	270S
Interferon-tau activates protein kinase C in Madin Darby bovine kidney cells	R. E. ABAYASEKARA, M.-J. SEARLE AND A. P. F. FLINT	271S
<hr/> Lipids in immune function and inflammatory disorders <hr/>		
The effect of dietary lipid manipulation on macrophage cell surface molecule expression	E. J. SHERRINGTON, P. SANDERSON AND P. C. CALDER	272S
Dietary lipid modulation of cell mediated immunity in the rat	P. SANDERSON, P. YAQOOB AND P. C. CALDER	273S
Systemic sclerosis, plasma antioxidants and lipids	T. D. BUNCE, C. M. BLACK AND K. R. BRUCKDORFER	274S
Synthesis of phosphatidyl[³ H]butanol molecular species by phospholipase D in HL60 granulocytes	Y. M. M. HEUNG AND A. D. POSTLE	275S
Substrate selectivity of phospholipase D in HL60 granulocytes: effects of fatty acid supplementation	Y. M. M. HEUNG AND A. D. POSTLE	276S

Effects of high levels of dietary oils on autoimmune responses	H. A. C. ATKINSON AND J. MAISEY	277S
Apo C subclasses from non-insulin-dependent diabetic patients — a quantitative comparison with control subjects	S. VENKATESAN, H. IMRIE, S. READ AND D. HALLIDAY	278S
The effect of dietary lipid manipulation on the production of murine T-cell derived cytokines	P. YAQOOB AND P. C. CALDER	279S
The effects of dietary lipid manipulation upon the production of reactive oxygen species by murine peritoneal macrophages	P. C. CALDER	280S
Spontaneous hyperlipoproteinaemia in the Arabian dromedary	M. P. T. GILLET, M. S. LAKHANI AND G. NATION	281S
The phosphoinositide 3-kinase inhibitor wortmannin inhibits CD28-mediated T cell co-stimulation	A. WILSON, D. SANSOM, R. PARRY, J. WESTWICK AND S. WARD	282S
A role for phosphoinositide 3-kinase in RANTES induced chemotaxis of T lymphocytes	L. TURNER, S. G. WARD AND J. WESTWICK	283S
Comparison of the lipolysis of chylomicron remnants derived from corn oil or olive oil by hepatic lipase <i>in vitro</i>	K. M. BOTHAM, P. A. MAYES, M. AVELLA, A. CANTAFORA AND E. BRAVO	284S
Depolarising levels of KCl inhibit endothelin-1-mediated release of arachidonic acid in rat C6 glioma cells	D. J. DUNICAN, R. GRIFFITHS, L. A. J. O'NEILL AND D. C. WILLIAMS	285S
The effect of cytokines on tissue factor expression in HL-60 and U937 cell lines	J. C. FREEBURN, W. S. GILMORE AND J. J. STRAIN	286S

The control of flux: 21 years on

A series of cases in which metabolic channelling can decrease the pool size at constant net flux in a simple dynamic channel	P. MENDES, D. B. KELL AND H. V. WESTERHOFF	287S
Top-down regulation analyses of palmitoyl-CoA oxidation and ketogenesis in isolated rat liver mitochondria	R. A. MAKINS, L. F. DRYNAN, V. A. ZAMMIT AND P. A. QUANT	288S
A mathematical model to describe quinone pool kinetics and analyse control of respiration in plant mitochondria	K. KRAB, C. W. M. VAN DEN BERGEN AND A. L. MOORE	289S
Isoprenoid synthesis in peppermint (<i>Mentha x piperita</i>): development of a model system for measuring flux of intermediates through the mevalonic acid pathway in plants	D. MCCASKILL AND R. CROTEAU	290S
<i>In situ</i> regulation of methylglyoxal metabolism	C. A. CORDEIRO AND A. P. FREIRE	291S
Regulation of oxidative and glycogenolytic ATP turnover in exercising rat skeletal muscle	A. L. SANDERSON, G. J. KEMP, C. H. THOMPSON AND G. K. RADDA	292S
Trans-sarcolemmal Pi fluxes in perfused rat heart: a quantitative analysis	G. J. KEMP, K. E. POLGREEN, J. A. C. HOPKINS, K. CLARKE AND G. K. RADDA	293S
Error and bias in control coefficients calculated from elasticities	S. THOMAS AND D. A. FELL	294S

Cytochrome <i>c</i> oxidase control by ΔpH and $\Delta\Psi$ gradients: effects of fatty acids	P. NICHOLLS, M. SHARPE AND C. TARBA	295S
Object-oriented metabolic programming	J. H. WOODS	296S
Design of experiments to measure elasticity coefficients	D. A. FELL	297S
Stimulation of free radical reactions: a multi-compartment Monte Carlo approach	J. P. MONIZ-BARRETO AND D. A. FELL	298S
<hr/>		
Lipid group		
Lipid analysis in human intervertebral disc material	G. OKTAY, A. GÜNER, G. GÜNER, M. KERMAN AND U. PABUÇCUOLU	299S
Study of phospholipids in mucilage (Gum) of sunflower, rapeseed and soja: analytical approach	A. ADJABI, N. BELATTAR, H. AMANI AND S. AQUABED	300S
Effect of phospholipid extracts from brain and egg on activated partial prothrombin time	A. ADJABI, S. AMOKRANE, N. BELATTAR AND Y. BOUGUERN	301S
Desaturation and esterification of palmitic and stearic acids in cultured hepatocytes	J. S. BRUCE, S. RICHARDS, G. LEGRAND AND A. M. SALTER	302S
<i>N</i> -3 polyunsaturated fatty acids (PUFA) modulate the expression of functionally associated molecules on human monocytes	D. A. HUGHES, A. C. PINDER, Z. PIPER AND E. K. LUND	303S
<hr/>		
Molecular enzymology group		
Cloning and expression of human intestinal sucrase-isomaltase	C. E. C. MOOLENAAR AND H. Y. NAIM	304S
Analysis of the putative cleavage site in human lactase-phlorizin hydrolase	R. JACOB AND H. Y. NAIM	305S
Peptidase content of the bile canalicular membrane	K. A. ZUZEL, J. G. GRAHAM, J. HRYSZKO, D. BILLINGTON AND A. J. TURNER	306S
Substrate dependence of the mitochondrial energy status in the isolated working rat heart	C. A. KEON, N. TUSCHIYA, Y. KASHIWAYA, K. SATO, K. CLARKE, G. K. RADDA AND R. L. VEECH	307S
Localisation and characterisation of carbonic anhydrase isozymes (CA I, CA II, CA III and CA IV) in an umbilical vein endothelial cell line (EA-hy926)	I. MAHIEU, A. SAGGAR-MALIK, E. HOLLANDE AND N. CARTER	308S
Characterization of a human ductal pancreatic Capan-I clone (IMEH): carbonic anhydrases II and IV (CA II and CA IV) expression and targeting	I. MAHIEU, N. CARTER AND E. HOLLANDE	309S
Evaluation of alkaline phosphatase isoenzymes in sera of hemodialysis and periton dialysis patients by agarose gel electrophoresis	G. OKTAY, M. FADILOLU, B. ÖNVURAL, T. ÇAMSARI AND A. ÇELİK	310S
<hr/>		
Small RNAs in the nucleus and cytoplasm		
Effects of expression of the Epstein-Barr virus small RNA EBER-1 in heterologous cells on protein synthesis and cell growth	K. G. LAING, V. MATYS AND M. J. CLEMENS	311S
Analysis of the double-stranded RNA binding properties of the La antigen	M. C. JAMES, G. J. M. PRUIJN, W. J. VAN VENROOIJ AND M. J. CLEMENS	312S
Interaction of the dsRNA-dependent protein kinase PKR with Epstein-Barr virus W RNAs	E. ELIA, A. SCHOFIELD AND M. J. CLEMENS	313S

Genomic organization of plant U14 snoRNA genes	D. J. LEADER, J. F. SANDERS, A. TURNBULL-ROSS, R. WAUGH AND J. W. S. BROWN	314S
Effect of cleavage of the p220 subunit of eukaryotic translation initiation factor eIF-4F on protein synthesis <i>in vitro</i>	T. OHLMANN, M. RAU, S. MORLEY AND V. M. PAIN	315S
Features of the translational regulation of the mammalian growth-related protein P23	A. V. BOROVJAGIN, P. RUSSELL, M. J. CLEMENS, M. A. GREAGG AND U.-A. BOMMER	316S

Regulation of carbohydrate metabolism in muscle and liver

Profiles of sorbitol dehydrogenase and Na ⁺ /K ⁺ -ATPase activity in a rat brain capillary cell line in various glucose concentrations may suggest an endothelium-protective mechanism	C. N. B. ECHETA AND K. R. F. ELLIOTT	317S
Restoration of hepatic metabolism by cold reperfusion	S. J. MITCHELL, T. A. CHURCHILL AND B. J. FULLER	318S
Glycogen metabolism in G8 mouse muscle cells	Y. S. ANDERSON, C. A. WOOD AND G. K. RADDA	319S
Characterization of membrane bound carbonic anhydrase IV (CA IV) located on the external surface of lung pulmonary endothelial cells	I. MAHIEU, A. BENJAMIN, R. STEPHENS, D. WALTERS AND N. CARTER	320S
Hepatic glucokinase activity in animals fed glucose at birth	H. LYALL, D. TOSH AND A. BURCHELL	321S
Endotoxin causes reciprocal changes in hepatic nitric oxide synthesis and gluconeogenesis	R. A. HORTON, R. G. KNOWLES AND M. A. TITHERADGE	322S
Measurement of glycogenin utilization for glycogen synthesis in type II diabetic cells by use of a specific immunoassay for apo-glycogenin	J. M. BAILEY, E. P. LILLEHOJ, A. N. SIDAWY, B. JONES AND J. L. COHEN	323S
Inhibition of nitric oxide synthase by L-arginine metabolites	I. DAS AND N. S. KHAN	324S

Nucleic acids and molecular biology group

Inhibition of Pax 5 activity by expression of its DNA binding domain	G. Z. HASTINGS AND B. ADAMS	325S
Duodenal expression of NF-E2 in mouse models of altered iron metabolism	K. B. RAJA, B. GERARD, A. MCKIE, C. BEAUMONT, R. J. SIMPSON, B. GRANDCHAMP AND T. J. PETERS	326S
The effect of various stretch and electrical stimulation regimes on proto-oncogene induction in skeletal muscle	N. J. DAWES, D. M. LEE, V. M. COX, H. NGA AND D. F. GOLDSPIK	327S
Growth hormone induction and somatostatin suppression of hepatic proto-oncogenes and IGF-I in the rat	J. PENMAN, S. LIU, P. BELCHETZ AND D. F. GOLDSPIK	328S
Immunolocalization of proto-oncogene expression in mechanically stimulated skeletal muscle	D. M. LEE, N. J. DAWES, V. M. COX, J. E. HESKETH AND D. F. GOLDSPIK	329S
Upregulation of calreticulin expression in HeLa cells by calcium-stress	D. H. LLEWELLYN, F. N. SHEIKH, J. M. KENDALL AND A. K. CAMPBELL	330S
The cytotoxicity of anthramycin to mutants of <i>Schizosaccharomyces pombe</i> deficient in DNA damage responses	F. HAFIZ, D. E. THURSTON, A. M. CARR AND R. W. JONES	331S

The role of zinc in the structure and function of the transcription factor BSAP (PAX-5 gene product)	J. M. GOODING AND B. ADAMS	332S
Protein and peptide science group		
Haem and non-haem iron in pig tissues and vitro availability studies	G. O. LATUNDE-DADA	333S
Production of soluble surface glycoprotein GP70, of the Mason-Pfizer monkey virus in COS cells is dependent on the presence of regions of the transmembrane domain	J. M. ALLEN, M. ALI AND M. O. McCLURE	334S
Regulation in metabolism group		
<i>In vitro</i> phosphorylation of vitamin B ₁₂ dependent methionine synthase by protein kinase A	S. H. KENYON, T. AST AND W. A. GIBBONS	335S
<i>In vivo</i> hepatic energy perturbations during alanine infusion using ³¹ P-NMR spectroscopy	K. K. CHANGANI, M. L. BARNARD, J. D. BELL, S. C. R. WILLIAMS, S. R. BLOOM AND R. A. ILES	336S
Insulin insensitivity in the ischaemic heart	J. C. A. HOPKINS, K. CLARKE AND G. K. RADDA	337S
Inhibition of duodenal mucosal ferricyanide reductase	K. LAZOURAS, D. POUNTNEY AND R. J. SIMPSON	338S
Miscellaneous		
Regulation of lysophosphatidic acid-stimulated tyrosine phosphorylation of pp42 mitogen-activated protein kinase C and protein kinase A in EAhy926 cells	A. McLEES, A. GRAHAM, K. MALARKEY, G. W. GOULD AND R. PLEVIN	339S
Lignin peroxidase catalysis: reaction with veratryl alcohol and a polymeric dye, Poly R	P. J. HARVEY, L. P. CANDEIAS, P. J. KING, J. M. PALMER AND R. WEVER	340S
The permissive effect of serum on the inhibition of mitogen-activated protein kinase by forskolin in vascular smooth muscle cells	D. M. AIDULIS, K. MALARKEY, A. McLEES, G. W. GOULD AND R. PLEVIN	341S
Spectra and reactivity of the radical cations of lignin peroxidase co-factors and model compounds	L. P. CANDEIAS AND P. HARVEY	342S
Irish Area Section Meeting on Environmental Biochemistry, University College Cork		
Ca ²⁺ transport in erythrocytes from a hibernating and non-hibernating species	E. R. HORWITZ AND J. C. ELLORY	345S
Regulated nuclear entry of a yeast transcription factor	D. NEILL, M. McNAMARA AND G. BUTLER	346S
The cloning and expression of the α subunit of equine glycoprotein hormones	M. O'BRIEN AND D. R. HEADON	347S
Rheological and syneretic properties of acid gels fortified with whey proteins	G. CURTIN, R. MEHRA, T. GUINEE, B. O'KENNEDY, B. CONNOLLY AND D. SHEEHAN	348S
Adenomatous polyposis coli gene mutations in Irish pedigrees with familial adenomatous polyposis	M. J. O'SULLIVAN, T. MULCAHY, C. B. O. SUILLEABHAIN, W. O. KIRWAN, C. T. DOYLE AND T. V. MCCARTHY	349S
1-Methyl-4-phenylpyridinium and catechol-O-methyltransferase	J. M. BYRNE AND K. TIPTON	350S
A comparison of the regulation of <i>de novo</i> cholesterol synthesis by LDL and LP(a)	S. M. GILLIGAN AND P. B. COLLINS	351S

Mutation screening of dihydropyridine receptor γ subunit cDNA from malignant hyperthermia susceptible patients	P. J. LYNCH, F. J. COUCH, R. G. GREGG, P. A. POWERS, K. HOGAN AND T. V. MCCARTHY	352S
The complementary actions of proline specific enzymes of guinea-pig brain	L. GILMARTIN	353S
Seasonal variations in the levels of antioxidant enzymes in <i>Mytilus edulis</i>	A. POWER AND D. SHEEHAN	354S
The detection of bovine herpesvirus 1 in routine diagnostic submissions using PCR	S. MOORE, M. GUNN AND D. WALLS	355S
Investigation of glucocorticoid modulation of apolipoprotein mRNA transcription	M. M. MACMAHON AND W. M. C. LOVE	356S
Use of proton NMR spectroscopy in the toxicological evaluation of new anti-mycobacterial agents	R. O'CONNOR, R. O'KENNEDY AND P. JAMES	357S
Regulation of Ca^{2+} release from the ryanodine receptor of sarcoplasmic reticulum	G. H. O'SULLIVAN AND J. J. A. HEFFRON	358S
Gene expression in bovine mammary tissue at different stages of the oestrus cycle	N. A. SEELY, J. SREENAN, D. MORRIS AND D. R. HEADON	359S
Differential reactivity of native and recombinant π GST in various assay systems	F. MANNING, A. CONWAY AND S. DOYLE	360S
Perturbations in the cytosolic free calcium ion concentration in isolated cells exposed to certain organic atmospheric pollutants	J. MCINTOSH AND J. J. A. HEFFRON	361S
Use of HPLC for the determination of serum 7α -hydroxycholesterol in cholestyramine-treated rats	L. DOWLING AND R. DEVERY	362S
Comparative immunoblot analysis of the guanine nucleotide binding protein $Gq\alpha$ in control and Alzheimer's disease brains	C. SHANAHAN, M. DEASY, R. RAVID AND C. O'NEILL	363S
Evidence from affinity precipitation that glutamate analogues are bound in a folded conformation to glutamate dehydrogenase	M. O'DONNELL, M. MAHER AND T. GRIFFIN	364S
Resolution of lactate dehydrogenase isoforms by affinity precipitation	J. A. IRWIN AND K. F. TIPTON	365S
Purification of α -acetolactate synthase from <i>Leuconostoc lactis</i> NCW1	N. M. CARROLL, D. SHEEHAN AND T. M. COGAN	366S
Response of root surface phosphatase activity of <i>Molinia caerulea</i> (L.) Moench, the purple moor grass, to edaphic environments	K. A. SALIM, D. GORDON, S. SHAW AND C. A. SMITH	367S
Effect of probenecid and pyridoxal-5-phosphate on the aggregation of rat blood platelets	N. EL-NAGEH AND M. G. HARRINGTON	368S
Thermal denaturation as a predictor of stability on long-term storage of a protein	C. TWOMEY, S. DOONAN AND A. GIARTOSIO	369S
Soluble protein changes in pollution-adapted <i>Gammarus duebeni</i>	L. JERVIS AND M. B. JONES	370S
Identification of novel ligands for the peripheral-type benzodiazepine receptor	D. M. ZISTERER AND D. C. WILLIAMS	371S

Haplotype analysis of the RYR1 gene in malignant hyperthermia and central core disease	K. A. QUANE, K. E. KEATING, J. M. S. HEALY, J. J. A. HEFFRON, M. LEHANE, R. KRIVOSIC-HORBER, L. HEYTENS AND T. V. MCCARTHY	372S
Aggregation characteristics of platelets in stored concentrates of human blood	M.-L. NOLAN AND M. G. HARRINGTON	373S
Purification of glutathione S-transferases from <i>Yarrowia lipolytica</i>	V. FOLEY AND D. SHEEHAN	374S
Oxidative stress and human ageing	C. M. KING AND Y. A. BARNETT	375S
Relationship between early diet and subsequent cognitive performance during adolescence	L. C. GREENE, A. LUCAS, M. B. E. LIVINGSTONE P. S. E. G. HARLAND AND B. A. BAKER	376S
Studies on the GTP binding ability of the human Rab4p, expressed in <i>E. coli</i>	F. O'BRIEN AND M. W. MCCAFFREY	377S
The significance of adenine phosphoribosyl-transferase for DNA repair processes in Friend cells	A. A. NELSON, K. JOYCE, P. G. MCKENNA AND Y. A. BARNETT	378S
Cloning of electron-transferring flavoprotein from <i>Megasphaera elsdenii</i>	H. M. O'NEILL, G. BUTLER AND S. G. MAYHEW	379S
Construction of a recombinant HRab1A Baculovirus	F. J. DRUMMOND AND M. W. MCCAFFREY	380S
The effects of mutating aspartate-95 and aspartate-127 on the thermodynamic properties of <i>Desulfovibrio vulgaris</i> flavodoxin	D. P. O'CONNELL, G. VOORDOUW AND S. G. MAYHEW	381S
Structural investigation of a glutathione binding site using computational analysis	T. R. BARRY, P. WATERS, S. DOONAN AND D. SHEEHAN	382S
Can PCR be used to normalise a cDNA library?	C. POPE, P. V. NESTOR, C. MORRISON AND F. GANNON	383S
Cloning of the gene for flavodoxin from the anaerobic bacterium <i>Megasphaera elsdenii</i>	S. M. GEOGHEGAN, G. BUTLER AND S. G. MAYHEW	384S
Validation of a HPLC method for measurement of collagen crosslinks in urine — potential biomarkers for osteoporosis	U. M. CASSERLY, B. J. MCGUINNESS, M. J. POWER AND P. F. FOTTRELL	385S
Purification of collagen crosslinks; potential biomarkers for bone disorders	B. J. MCGUINNESS, U. M. CASSERLY, M. J. POWER AND P. F. FOTTRELL	386S
Potassium ferrate as a DNA chemical sequencing reagent and probe of secondary structure	C. STEVENSON AND R. J. H. DAVIES	387S
Cysteine plays a role in catalysis in glutathione S-transferase I-1	R. M. MCCARTNEY AND D. SHEEHAN	388S
Purification and properties of salmon liver biliverdin reductase	G. ELLIOTT AND T. J. MANTLE	389S
Co-purification from human blood plasma of activated factor XII with albumin with dye-ligand and metal-chelate chromatography	B. J. MION AND B. F. MASTERSON	390S
Expression of gelatinolytic activity by oesophageal and colon carcinoma cell lines	P. DELLA PORTA, N. M. RYAN AND J. K. COLLINS	391S
The relationship between volume-sensitive taurine efflux and the anion-exchanger in lactating mammary tissue	D. B. SHENNAN, S. A. MCNEILLIE AND M. J. CLIFF	392S

The dependance of the detection limit of reagent-limited immunoassay on antibody affinity

T. O'CONNOR, M. M. KANE AND J. P. GOSLING

393S

The relative protein disulphide isomerase (PDI) activities of gonadotrophins, thioredoxin and PDI

C. C. CHEW, T. MAGALLON, N. MARTINAT,
F. LECOMPTE, T. COMBARNOUS AND J. P. GOSLING

394S
