

# 668th Glasgow Meeting

## Complex Protein Assemblies as Molecular Machines

### ABSTRACTS

---

Abstract no.

Page no.

#### 30th NOVARTIS MEDAL LECTURE

- L1 Small GTPases and cell proliferation  
C. Marshall 61

#### KEILIN MEMORIAL LECTURE

- M1 Crystal structure and reaction mechanism of bovine heart cytochrome c oxidase  
S. Yoshikawa 61

#### SPEAKER ABSTRACTS

##### LIPID GROUP COLLOQUIUM

##### Lipid Modulation of P450

*Speaker Session Time: Wednesday 7 April, 09.00 – 16.40*

- A1 The role of the membrane for proper function of hepatic microsomal P450s  
M. Ingelman-Sundberg 61
- A2 Phospholipase-induced modulation of rat liver mixed function oxidase activity  
C.E. Rolph 61
- A3 Fatty acid metabolism and P450 activity  
C. Palmer 62
- A4 Lipid regulation of gene expression  
S.E.H. Alexson 62
- A5 Sphingomyelin metabolism and regulation of cytochrome P450 gene expression  
A.H. Merrill, Jr 62
- A6 Induction of CYP3A expression by metyrapone is mediated through the pregnane X  
receptor  
M.C. Wright 62

<b>Abstract no.</b>		<b>Page no.</b>
<b>HOST COLLOQUIUM</b>		
<b>Protein Assemblies in Cell Cycle Control and Transcription</b>		
	<i>Speaker Session Times:</i>	<i>Wednesday 7 April, 09.20 – 16.40</i> <i>Thursday 8 April, 09.20 – 16.40</i>
B1	A novel activity of cyclin D1 in breast cancer <b>R. Bernards</b>	<b>63</b>
B2	Control of cell proliferation by the <i>myc</i> proto-oncogene <b>M. Eilers</b>	<b>63</b>
B3	CDF-mediated transcriptional repression in cell cycle regulation and oncogenesis <b>R. Muller</b>	<b>63</b>
B4	Regulation of the retinoblastoma tumour suppressor protein (pRB) <b>S. Mittnacht</b>	<b>63</b>
B5	Regulation of cell proliferation by the E2F transcription factors <b>K. Helin</b>	<b>64</b>
B6	Regulation of p53 stability: role of Mdm2 and nuclear export <b>D.P. Lane</b>	<b>64</b>
B7	Selective killing of cancer cells based on derepression of E2F transcription factors <b>W.G. Kaelin</b>	<b>64</b>
B8	p300 and cAMP-response-element-binding-protein binding protein (CBP) in mouse development and growth control <b>R. Eckner</b>	<b>64</b>
B9	Chromatin, co-activators and co-repressors: molecular mechanisms to establish and maintain states of gene activity <b>A.P. Wolffe</b>	<b>65</b>
B10	Regulation of transcription by chromatin remodelling machines <b>C.L. Peterson</b>	<b>65</b>
B11	Molecular models for regulation of transcription by RNA polymerase III <b>M. Meisterernst</b>	<b>65</b>
B12	The PCAF histone acetylase complex <b>Y. Nakatani</b>	<b>65</b>
B13	The herpes simplex virus VP16-induced complex: selective assembly of a transcriptional regulatory complex <b>W. Herr</b>	<b>66</b>
B14	RNA polymerase III transcription: its control by tumour suppressors and its deregulation in cancers <b>R. White</b>	<b>66</b>
B15	The structural basis of small G-protein deactivation by GTPase-activating proteins (GAPs) <b>S. Gamblin</b>	<b>66</b>
B16	The end of mitosis in budding yeast <b>L.H. Johnston</b>	<b>66</b>

**TECHNIQUES GROUP/PROTEIN AND PEPTIDE SCIENCE GROUP/BRITISH ELECTROPHORESIS SOCIETY COLLOQUIUM****Proteomics**

*Speaker Session Times:*      *Wednesday 7 April, 09.00 – 16.30*  
*Thursday 8 April, 09.10 – 12.50*

C1	Present status of proteomics <b>D.F. Hochstrasser</b>	67
C2	Two-dimensional electrophoretic methods for proteome analysis: an update <b>M.J. Dunn</b>	67
C3	Difference gel electrophoresis of proteins <b>M. Ünlü</b>	67
C4	Laser capture microdissection and proteomic analysis: preliminary findings <b>R.E. Banks</b>	67
C5	A strategy for characterization of protein interaction networks by a combination of gene tagging, immunoprecipitation and MS sequencing <b>A. Shevchenko</b>	68
C6	Automated post-source decay (PSD) analysis on complex peptide mixtures <b>C. Sutton</b>	68
C7	Liquid chromatography and capillary electrophoresis coupled to electrospray ionization-MS for the analysis of 2D-separated proteins <b>G.A. Ross</b>	68
C8	Proteome analysis without gels: current status of capillary isoelectric focusing–electrospray ionization (CIEF–ESI)-MS <b>P. Skipp</b>	68
C9	Proteomics in pharmaceutical research and development <b>P. Cutler</b>	69
C10	Nanotechnology approaches to proteomics <b>J. Roeraade</b>	69

**NEUROSCIENCE GROUP COLLOQUIUM****Membrane Signalling Complexes**

*Speaker Session Times:*      *Wednesday 7 April, 09.00 – 16.30*  
*Thursday 8 April, 09.00 – 16.55*

D1	Organization of synaptic structure in the brain <b>R. Huganir</b>	69
D2	The molecular organization of the post-synaptic membrane in excitatory synapses <b>M. Sheng</b>	69
D3	Enhanced long-term potentiation and impaired learning in post-synaptic density 95 mutant mice <b>S.G.N. Grant</b>	70

<b>Abstract no.</b>	<b>Page no.</b>
D4 Gephyrin and its partners: multifunctional organizer proteins of post-synaptic membrane specializations <b>H. Betz</b>	70
D5 Synaptic targeting and regulation of ionotropic $\gamma$ -aminobutyric acid (GABA) receptors <b>S.J. Moss</b>	70
D6 Heterodimerization of $\gamma$ -aminobutyric acid B (GABA <sub>B</sub> ) receptors <b>F.H. Marshall</b>	70
D7 Interaction of pre-synaptic calcium channels with soluble <i>N</i> -ethylmaleimide-sensitive fusion protein attachment protein receptor (SNARE) proteins in neurotransmitter release <b>W.A. Catterall</b>	71
D8 Building K-channels <b>O. Dolly</b>	71
D9 Immediate-early gene modulation of synaptic function, homer and metabotropic signalling <b>P. Worley</b>	71
D10 The N-terminus of receptor activity modifying proteins (RAMPs) is a critical determinant of the glycosylation state and ligand binding of calcitonin receptor-like receptor (CRLR) <b>S.M. Foord</b>	71
D11 The molecular architecture of neuronal kinase/phosphatase-signalling complexes <b>J.D. Scott</b>	72
D12 Control of protein phosphatase 1 in the dendrite <b>P.B. Allen</b>	72
D13 Mitogen-activated protein (MAP) kinase tight binding to dual-specificity phosphatases: a mechanism for enzymic specificity <b>S. Arkininstall</b>	72

## **REGULATION IN METABOLISM/MEMBRANE GROUP COLLOQUIUM**

### **Phospholipids: Regulators of Membrane Traffic and Signalling**

*Speaker Session Times:*  
 Wednesday 7 April, 09.00 – 16.55  
 Thursday 8 April, 09.00 – 17.20  
 Friday 9 April, 09.00 – 15.30

E1 Pleckstrin homology (PH) domains in signal transduction <b>B.A. Hemmings</b>	72
E2 Protein kinase C as a molecular machine that decodes calcium and diacylglycerol signals <b>T. Meyer</b>	73
E3 Structural bases for specific phosphoinositide binding by pleckstrin homology (PH) domains <b>M.A. Lemmon</b>	73
E4 A possible mechanism by which protein kinase B is phosphorylated at Ser-473 <b>D. Alessi</b>	73

<b>Abstract no.</b>		<b>Page no.</b>
E5	Phosphoinositide 3-kinase knock-out mice: role of p85 $\alpha$ in B cell development and proliferation <b>A. Fruman</b>	73
E6	The role of phosphoinositide 3-kinase in the regulation of cell survival and apoptosis <b>J. Downward</b>	74
E7	Phosphoinositide 3-kinase signalling: no lipids <b>M.P. Wymann</b>	74
E8	Mechanisms of COPI-vesicle biogenesis <b>F. Wieland</b>	74
E9	Lipid-protein interactions in the biogenesis of neurosecretory vesicles <b>W.B. Huttner</b>	74
E10	Intracellular transport and organelle morphology in cell lines with inducible overexpression of phospholipase D1 (PLD1) or of a PLD1-derived antisense fragment <b>N. Ktistakis</b>	75
E11	The small GTPase ADP-ribosylation factor (ARF) regulates phosphoinositide 4-kinase $\beta$ in the Golgi complex <b>M.A. De Matteis</b>	75
E12	ADP-ribosylation factor (ARF), a multi-functional GTPase as a co-ordinator of membrane traffic: is ARF-regulated phospholipase D the answer to everything? <b>S. Cockcroft</b>	75
E13	Phosphoinositides and neurotransmitter release <b>G. Schiavo</b>	75
E14	Phospholipase C- $\delta$ and related molecules <b>H. Yagisawa</b>	76
E15	Localization and regulation of type II PIPkins (PtdIns5P 4-kinases) <b>R.F. Irvine</b>	76
E16	Regulation of early endosome dynamics by early endosomal antigen-1 (EEA1): a phosphatidylinositol 3-phosphate-binding protein <b>M.J. Clague</b>	76
E17	Regulation of endocytic membrane traffic by phosphatidylinositol 3-phosphate <b>H. Stenmark</b>	76
E18	Lipid kinases and <i>trans</i> -Golgi network membrane dynamics <b>S. Ponnambalam</b>	77
E19	Phosphatidylinositol 3,5-bisphosphate: a novel inositol lipid linking stress responses to membrane trafficking in yeast <b>S.K. Dove</b>	77
E20	Analysis of protein and vesicle trafficking using green fluorescent protein <b>J.M. Tavaré</b>	77
E21	Role for ADP-ribosylation factors and phosphoinositides in insulin-regulated membrane trafficking in 3T3-L1 adipocytes <b>G.W. Gould</b>	77
E22	Phosphoinositide 3-kinase effector molecules <b>P.J. Cullen</b>	78

Abstract no.	Page no.
E23 Searching for novel targets of PtdIns(3,4,5) $P_3$ and PtdIns(3,4) $P_2$ P.T. Hawkins	78

### LIPID GROUP COLLOQUIUM

#### Sphingolipids

*Speaker Session Time: Thursday 8 April, 09.00 – 16.30*

F1 Sphingomyelinases in cell signalling S. Schütze	78
F2 Ceramide and apoptosis D.K. Perry	78
F3 Sphingosine 1-phosphate signalling S. Pyne	79
F4 Recent advances in the biochemistry of glycosphingolipid metabolism T. Kolter	79
F5 Gangliosides and growth factor receptor regulation A.A. Rampersaud	79
F6 Membrane flow, lipid sorting and cell polarity: role of a subapical compartment D. Hoekstra	79
F7 Short-chain ceramides kill cells by inhibition of lipid biosynthesis D. Allan	80
F8 The roles of sphingolipids in regulating neuronal growth and development A.H. Futerman	80

### BIOENERGETICS GROUP COLLOQUIUM

#### Quinone-Binding Sites in Membrane Proteins: Structure, Functions and Applied Aspects

*Speaker Session Times: Thursday 8 April, 09.00 – 16.30  
Friday 9 April, 09.00 – 17.00*

G1 Do Q sites have common features? P. Rich	80
G2 Structure of Q sites in mitochondrial cytochrome $bc_1$ complexes E.A. Berry	80
G3 Structure of the cytochrome $bc_1$ complex from the yeast <i>Saccharomyces cerevisiae</i> C. Hunte	81
G4 Structure, function and dysfunction of the cytochrome $bc_1$ complex $Q_O$ site: X-ray crystallography versus EPR spectroscopy P.L. Dutton	81
G5 Famoxadone and oxazolidinones: potent inhibitors of cytochrome $bc_1$ D.B. Jordan	81

Abstract no.	Page no.
G6 Quinol-binding sites and ubisemiquinone stabilization in the <i>Escherichia coli</i> quinol oxidase, cytochrome <i>bo</i> <sub>3</sub> : a discussion of models for structure and function <b>W.J. Ingledeu</b>	81
G7 Quinone-binding sites in the cytochrome <i>bc</i> <sub>1</sub> complex from bovine heart <b>S. Iwata</b>	82
G8 The coupling of electron and proton transfer in the photosynthetic reaction centre from <i>Rhodospseudomonas viridis</i> <b>C.R.D. Lancaster</b>	82
G9 The quinone-binding site in type I (ferredoxin-reducing) reaction centres <b>P. Heathcote</b>	82
G10 Properties of the common inhibitor binding domain in mitochondrial NADH-dehydrogenase (complex I) <b>U. Brandt</b>	82
G11 Biochemical aspects of <i>N</i> -heterocyclic complex I inhibitors with insecticidal activity <b>P. Luemmen</b>	83
G12 Ubiquinone and inhibitor sites in complex I: one, two or three? <b>M. Degli Esposti</b>	83
G13 Mammalian quinone reductases: enzymes involved in chemoprotection and chemoactivation <b>L. Amzel</b>	83

## GLYCOBIOLOGY GROUP COLLOQUIUM

### Glycobiology of Pathogen–Host Interactions

*Speaker Session Times:*      *Thursday 8 April, 09.10 – 16.30*  
*Friday 9 April, 09.15 – 16.00*

H1 Bacterial–host protein–carbohydrate interactions and pathogenicity <b>K.A. Karlsson</b>	83
H2 Role of <i>Helicobacter pylori</i> lipopolysaccharide in interaction with the host <b>B.J. Appelmelk</b>	84
H3 The molecular basis of mucin– <i>Pseudomonas</i> interaction <b>R. Ramphal</b>	84
H4 Malaria during pregnancy: parasites, antibodies and chondroitin sulphate A <b>P.E. Duffy</b>	84
H5 Cell surface and intracellular binding sites for the malaria CS protein <b>U. Frevert</b>	84
H6 Cell-to-cell interactions of importance for the development of severe <i>Plasmodium falciparum</i> malaria <b>M. Wahlgren</b>	85
H7 <i>Haemophilus influenzae</i> lipopolysaccharide <b>D.W. Hood</b>	85
H8 Glycans in meningococcal pathogenesis: an overview <b>M. Virji</b>	85

<b>Abstract no.</b>	<b>Page no.</b>
H9 Studies on the biosynthesis of the <i>Escherichia coli</i> K5 capsular polysaccharide <b>I.S. Roberts</b>	85
H10 <i>Candida</i> cell wall mannosylation: importance in host–fungus interactions and potential as a target for the development of anti-fungal drugs <b>N.A.R. Gow</b>	86
H11 The biological role of <i>Trypanosoma cruzi</i> trans-sialidase <b>S. Schenkman</b>	86
H12 Structural requirements for macrophage activation by glycosylphosphatidylinositols from <i>Trypanosoma cruzi</i> mucins <b>I.C. Almeida</b>	86
H13 Proteophosphoglycans from <i>Leishmania</i> promastigotes and amastigotes <b>T. Ilg</b>	86

### **NUCLEIC ACIDS AND MOLECULAR BIOLOGY GROUP/BRITISH BIOPHYSICAL SOCIETY COLLOQUIUM**

#### **Molecular Interactions in Complex Proteins and Nucleic Acids**

*Speaker Session Times:*      *Thursday 8 April, 13.30 – 17.30*  
*Friday 9 April, 09.20 – 15.20*

I1 Structural analysis of the Ruv AB Holliday junction branch-migration complex <b>L. Pearl</b>	87
I2 The assembly of the <i>Eco</i> KI type I DNA restriction/modification enzyme and its interaction with DNA <b>D.T.F. Dryden</b>	87
I3 Macromolecular complexes involving nuclease toxins, immunity proteins and DNA <b>C. Kleanthous</b>	87
I4 DNA gyrase and the mechanism of DNA supercoiling <b>A. Maxwell</b>	87
I5 Restriction enzymes that act simultaneously at two DNA sites <b>S.E. Halford</b>	88
I6 Protein–DNA interactions <b>J.M. Thornton</b>	88
I7 X-Ray crystallographic studies of eukaryotic gene expression <b>S. Burley</b>	88
I8 Molecular interactions in complex assemblies of proteins and nucleic acids <b>G. Varani</b>	88
I9 The three-dimensional structure of bacterial rRNA at 13 Å resolution <b>R. Brimacombe</b>	89
I10 RNA crystallography without RNA crystals: translational operators, aptamers and other motifs <b>P. Stockley</b>	89
I11 Molecular interactions in assembly of <i>trp</i> RNA-binding attenuation protein with RNA <b>A.A. Antson</b>	89

<b>Abstract no.</b>	<b>Page no.</b>
I12 RNA–protein interactions in nuclear pre-mRNA splicing L. Verdone	89

### **EDUCATION GROUP COLLOQUIUM**

#### **Biochemistry by Numbers**

*Speaker Session Time: Friday 9 April, 09.15 – 16.30*

J1 Protein–ligand interactions: teaching the concepts <b>To be announced</b>	90
J2 Protein–ligand interactions: the gap between experiment and theory <b>C. Lowe</b>	90
J3 Moving from chance discovery to rational drug design: do we still need chemistry? <b>J. Coggins</b>	90
J4 Computers in drug design <b>K.A. Watson</b>	90
J5 The return of chance discovery: generation of large numbers of compounds by combinatorial methods <b>D. Rees</b>	91
J6 Increasing the chances of discovery: how do we screen large numbers of compounds? <b>M.G.P. Page</b>	91
J7 Chance discovery versus rational design: implications for biochemistry degree courses <b>C.W. Wharton</b>	91

### **LIPID GROUP COLLOQUIUM**

#### **Lipoprotein(a): the Really Bad Cholesterol?**

*Speaker Session Time: Friday 9 April, 09.00 – 15.30*

K1 Lipoprotein(a) in health and disease <b>H. Dieplinger</b>	91
K2 Gene structure of apolipoprotein(a) and the regulation of its expression <b>B.L. Knight</b>	92
K3 Synthesis, secretion and assembly of lipoprotein(a) in hepatocyte cultures <b>A.L. White</b>	92
K4 New insights into the control of plasma lipoprotein(a) concentrations <b>A. Gaw</b>	92
K5 Lipoprotein(a) and transforming growth factor $\beta$ in atherosclerosis <b>J. Metcalfe</b>	92
K6 Genetic polymorphisms of the apo(a) gene and their association with lipoprotein(a) levels and myocardial infarction <b>J. Thillet</b>	93
K7 Pharmacological modification of lipoprotein(a) <b>K.E. Suckling</b>	93

**POSTER ABSTRACTS****HOST COLLOQUIUM****Protein Assemblies in Cell Cycle Control and Transcription***Poster Session Time: Wednesday 7 April, 16.30 – 18.00*

- |    |  |    |
|----|--|----|
| 1  | Control of recruitment and activation of cAMP-response-element-binding-protein binding protein (CBP) determines gene regulation by <i>N</i> -methyl-D-aspartate (NMDA) receptors and L-type calcium channels<br><b>G.E. Hardingham, S. Chawla, F.H. Cruzalegui and H. Bading</b> | 93 |
| 2  | Analysis of the role of human transcription factor TFIIB in transcription-start-site selection<br><b>N.A. Hawkes and S.G.E. Roberts</b>  | 93 |
| 3  | Preferential degradation of I $\kappa$ B $\alpha$ associated with nuclear factor (NF)- $\kappa$ B, but re-association of NF- $\kappa$ B with free I $\kappa$ B $\alpha$ before nuclear translocation<br><b>L. Yang, F. Carlotti and E.E. Qwarnstrom</b>                          | 94 |
| 4  | Nuclear factor (NF)- $\kappa$ B activation in single living cells: analysis of anti-apoptosis and kinetics of activation by interleukin-1 $\beta$<br><b>F. Carlotti, L. Yang, S.K. Dower and E.E. Qwarnstrom</b>   | 94 |
| 5  | Transcriptional regulation of the serotonin transporter gene<br><b>C.E. Fiskerstrand, E. Lovejoy and J.P. Quinn</b>  | 94 |
| 6  | Neuronal specific and nerve-growth-factor-inducible expression directed by the preprotachykinin-A promoter delivered by an adeno-associated viral vector<br><b>L. Gerrard, P.T. Harrison, R.G. Dalziel and J.P. Quinn</b>  | 94 |
| 7  | Neuron restrictive silencer factor regulates the substance-P-encoding preprotachykinin-A gene<br><b>A. Mackenzie, C.E. Fiskerstrand and J.P. Quinn</b>   | 95 |
| 8  | Transcriptional regulation of macrophage lipoprotein lipase by interferon- $\gamma$<br><b>T.R. Hughes, A. Cryer and D.P. Ramji</b>   | 95 |
| 9  | Regulation of macrophage lipoprotein lipase by cytokines<br><b>T.S. Tengku-Muhammad, T.R. Hughes, A. Cryer and D.P. Ramji</b>  | 95 |
| 10 | Structural basis of oestrogen receptor-co-activator interaction<br><b>A.C.W. Pike, A.M. Brzozowski, J. Walton and M. Carlquist</b>   | 95 |
| 11 | Catalytic nucleosome mobilization mediated by the SWI/SNF complex<br><b>I. Whithouse, A. Flaus and T. Owen-Hughes</b>  | 96 |
| 12 | Mediation of proteinase activity by <i>n</i> -3 fatty acids in chondrocytes<br><b>C.L. Curtis, B. Caterson and J.L. Harwood</b>  | 96 |
| 13 | Characterization of the cell division cycle-related gene <i>Bvcrk1</i> : gene structure and expression in <i>Beta vulgaris</i><br><b>M.R. Fowler, A.I. Atanassova, N.W. Scott, A. Slater and M.C. Elliott</b>  | 96 |
| 14 | Both mitogen-activated protein kinase (MAPK) and phosphoinositide 3-kinase are required for cell cycle re-entry in quiescent CC139 cells, but MAPK is not required for asynchronous growth<br><b>T. Millar, K. Balmanno and S. Cook</b>  | 96 |

<b>Abstract no.</b>	<b>Page no.</b>
15 Biochemical characterization of ATR protein kinase <b>C.A. Hall-Jackson, D.A.E. Cross, D.M. Jenkins and C. Smythe</b>	97
16 Core histone acetylation of CpG island-associated genes in 15-day-old chicken embryo erythrocytes <b>F.A. Myers, D. Evans, A.W. Thorne and C. Crane-Robinson</b>	97
17 Induction of apoptotic cell death by the human papillomavirus type 16 E2 protein <b>K. Webster, J. Parish and K. Gaston</b>	97
18 Activation of transcription factors by mitogen-activated protein kinases: the role of kinase docking domains <b>S. Yang, A. Galanis and A.D. Sharrocks</b>	97
19 Role of mammalian selectivity factor (SL1) in promoter-selective transcriptional regulation of RNA polymerase I <b>J.K. Friedrich, K.I. Panov, P. Cabart and J.C.B.M. Zomerdijsk</b>	98
20 Retinoblastoma protein represses the activity of multiple factors in the RNA polymerase I transcription machinery <b>P. Cabart, J.K. Friedrich, K.I. Panov and J.C.B.M. Zomerdijsk</b>	98
21 Role of ORF50 in alcelaphine herpes virus-1 gene expression <b>F.M. Frame and R.G. Dalziel</b>	98
22 Molecular interactions between Id proteins and other transcriptional regulators in cell cycle control <b>R. Deed, G. Atherton and J. Norton</b>	98
23 Contribution of intragenic sequences to calcium regulation of <i>c-fos</i> transcription <b>C. Lange and H. Bading</b>	99
24 Regulation of the p300/cAMP-response-element-binding-protein binding protein (CBP) co-activators by the cyclin-dependent kinase inhibitor p21 <sup>WAF1/CIP1</sup> <b>A.W. Snowden, L.A. Anderson, G.W. Webster and N.D. Perkins</b>	99
25 Regulation of nuclear factor- $\kappa$ B transcription activity by early-growth response factor-1 (EGR-1) <b>N.R. Chapman and N.D. Perkins</b>	99
26 Activity of the transcription factor FOG-1 is potentiated by its ability to contact GATA-1 through multiple zinc fingers <b>A.H. Fox, M. Holmes, J. Mackay and M. Crossley</b>	99

## **REGULATION IN METABOLISM GROUP/MEMBRANE GROUP COLLOQUIUM**

### **Phospholipids: Regulators of Membrane Traffic and Signalling**

*Poster Session Time: Wednesday 7 April, 16.30 – 18.00*

27 Regulation of milk protein secretion: phospholipase D-dependent and -independent mechanisms <b>R. Boisgard and E. Chanut</b>	100
28 Association of the adaptor complexes AP1 and AP3 with GLUT4 vesicles: implications for GLUT4 compartmentalization <b>A.K. Gillingham, F. Koumanov, P.R. Pryor, B.J. Reaves and G.D. Holman</b>	100

Abstract no.		Page no.
29	Fatty acids induce morphological differentiation of IMR-32 cells <b>H.A. Rodway, A.N. Hunt, A. Postle, J.A. Kohler and K.A. Lillycrop</b>	100
30	Function of oxysterol-binding protein homologues in budding yeast <b>T. Levine and S. Munro</b>	100
31	FcyRI differentially activates several protein kinase C isoforms and different phospholipases depending on monocyte differentiation <b>A.J. Melendez, M.M. Harnett and J.M. Allen</b>	101
32	Differential localization of isoforms of Type II PtdIns5P 4-kinases <b>A. Ciruela, K.A. Hinchliffe, N. Divecha and R.F. Irvine</b>	101
33	Phosphorylation of Type II PtdIns5P 4-kinase II $\alpha$ by casein kinase II <b>K.A. Hinchliffe, A. Ciruela, A.J. Letcher and R.F. Irvine</b>	101
34	Development of a mass assay for PtdIns5P <b>J.B. Morris, K.A. Hinchliffe and R.F. Irvine</b>	101
35	Mammalian PtdInsP kinases: analysis of their PtdInsP <sub>2</sub> specificity <i>in vivo</i> by expression in <i>FAB1</i> -deleted yeast <b>R.K. McEwen, R.H. Michell and S.K. Dove</b>	102
36	Phosphorylation and the regulation of phosphatidylinositol-transfer protein $\alpha$ function <b>C.P. Morgan, D. Jones, P. Swigart and S. Cockcroft</b>	102
37	Identification of phosphatidylinositol-transfer proteins from <i>Dictyostelium</i> <b>P. Swigart, R. Insall and S. Cockcroft</b>	102
38	Phosphatidylinositol-transfer protein $\alpha$ availability limits Ins(1,4,5)P <sub>3</sub> -mediated Ca <sup>2+</sup> signalling <b>O.H. Ibrahim, S. Bolsover and S. Cockcroft</b>	102
39	Localization of phosphatidylinositol-transfer proteins in granulocytes <b>C. Wiedemann, G. Way and S. Cockcroft</b>	103
40	Role of ADP-ribosylation factor and phospholipase D in regulated exocytosis <b>N. O'Lunaigh and S. Cockcroft</b>	103
41	Role of ADP-ribosylation factor and phospholipase D in coat recruitment and regulated exocytic secretion <b>D. Jones and S. Cockcroft</b>	103
42	Centaurin $\gamma$ – a novel G-protein? <b>A.G. Hendrick, E.P.S. Grossman and T.R. Jackson</b>	103
43	Centaurin proteins as potential targets of phosphoinositide signalling in <i>Caenorhabditis elegans</i> <b>L.S. Harrington, H.A. Baylis and T.R. Jackson</b>	104
44	Identification of the Ras GTPase-activating protein GAP1 <sup>m</sup> as an <i>in vivo</i> phosphatidylinositol 3,4,5-trisphosphate-binding protein <b>P.J. Lockyer, S. Wennström, S. Kupzig, K. Venkateswarlu, J. Downward and P.J. Cullen</b>	104
45	Molecular modelling of the inositol 1,3,4,5-tetrakisphosphate-binding GAP1 <sup>IP4BP</sup> and GAP1 <sup>m</sup> pleckstrin homology (PH) domains <b>G.E. Cozier, P.J. Lockyer and P.J. Cullen</b>	104
46	Structural and functional analysis of the putative inositol 1,3,4,5-tetrakisphosphate receptors GAP1 <sup>IP4BP</sup> and GAP1 <sup>m</sup> <b>J.S. Reynolds, J.R. Bottomley and P.J. Cullen</b>	104

<b>Abstract no.</b>	<b>Page no.</b>
47 Protein kinase B stimulates translocation of GLUT4, but not GLUT1 or transferrin receptors: the involvement of 23 kDa synaptosome-associated protein (SNAP-23) and cellubrevin <b>L.M. Fletcher, P.G.P. Foran, P.B. Oatey, N. Mohammed, J.O. Dolly and J.M. Tavaré</b>	105
48 Identification of phosphatidylinositol 3,5-bisphosphate in T-lymphocytes and its regulation by interleukin-2 <b>D.R. Jones, A. González-García, C. Martínez-A., A.C. Carrera and I. Mérida</b>	105
49 Casein kinase I (CKI) associates with Centaurin- $\alpha$ <b>T. Dubois, P. Kerai, S. Howell, T.R. Jackson, A.B. Theibert and A. Aitken</b>	105
50 Role of mitogen-activated protein kinases in the response of osteoblasts to prostaglandins <b>K.B. Doorty, M. Avella, A.A. Pitsillides and N.T. Goode</b>	105
51 Protein kinase C modulates the endocytic rate in murine neuroblastoma cells <b>W.G.C. Horsnell, S. Fletcher and N.T. Goode</b>	106
52 Expression and localization of protein kinase C isotypes in equine eosinophils <b>E.C. Greenaway, F.M. Cunningham and N.T. Goode</b>	106
53 A possible mechanism by which protein kinase B is phosphorylated at Ser-473 <b>A. Balendran, A. Casamayor and D. Alessi</b>	106
54 Suppression of cAMP/dexamethasone-induced glucose-6-phosphate gene transcription by insulin <b>D. Schmoll, K.S. Walker, D.R. Alessi, R. Walther and A. Burchell</b>	106
55 Measuring the lipid-binding properties of proteins: the examples of 3-phosphoinositide-dependent protein kinase-1 (PDK1), protein kinase B (PKB) and early endosomal antigen-1 (EEA1) <b>R.A. Currie and C.P. Downes</b>	107
56 Mammalian Vps34p controls lysosomal enzyme delivery and the morphology of a late endosomal compartment <b>P.E. Row, B.J. Reaves, N.A. Bright, J. Domin, J.P. Luzio and H.W. Davidson</b>	107
57 Visualization of dynamic translocation of phospholipase C- $\delta$ 1 in living cells <b>M. Fujii, M. Ohtsubo, T. Ogawa, H. Kamata, H. Hirata and H. Yagisawa</b>	107
58 Adhesion of Jurkat T cells to endothelial cells under conditions of laminar flow <b>G.V.W. Stevenson and J.A. Lucy</b>	107
59 Phosphatidylserine-mediated adhesion of T cells to endothelial cells <b>J. Qu, D.M. Bloxham, C. Sampson and J.A. Lucy</b>	108

## **LIPID GROUP COLLOQUIUM**

### **Lipid Modulation of P450**

*Poster Session Time: Wednesday 7 April, 16.30 – 18.00*

60 Expression and characterization of <i>Bacillus subtilis</i> P450 BioI <b>A.J. Green, S.L. Rivers, M.A. Noble, G.A. Reid, S.K. Chapman and A.W. Munro</b>	108
61 Electron transfer in a P450 BM3/cytochrome $b_5$ complex <b>M.A. Noble, T.W.B. Ost, C.S. Miles, L. Robledo, S.K. Chapman and A.W. Munro</b>	108

Abstract no.	Page no.
62 Re-designing the active site of flavocytochrome BM3 <b>T.W.B. Ost, M.A. Noble, C.S. Miles, L. Robledo, G.A. Reid, S.K. Chapman and A.W. Munro</b>	108
63 Selective hydrogenation of microsomal membranes and its effect on cytochrome P450 activity <b>S. Taylor, C.E. Rolph, V. May, J. McGuire and P. Roberts</b>	109
64 Effect of the phosphatidylcholine biosynthetic pathway on mouse hepatic mixed-function oxidase activity <b>S. Taylor, P. Roberts and C.E. Rolph</b>	109
65 Gall-stones and acute pancreatitis: more than a mechanistic connection? <b>N. Zaman, B. Rameh, H.V. Worthington, F. Rieley, D. Schofield and J.M. Braganza</b>	109
66 Pancreatic acinar cell injury after clot-dissolution therapy in myocardial infarction (MI) <b>C. Chaloner, A. Zaidi, L. Cotter, W. Dollery, K. Mackway-Jones, A. Borgström and J.M. Braganza</b>	109
67 Relationship between trypsinogen burden, activation and fibrinolysis in acute pancreatitis <b>C. Chaloner, J. Douglas, S. Appelros, A. Borgström, I. Segal and J.M. Braganza</b>	110

## GLYCOBIOLOGY GROUP COLLOQUIUM

### Glycobiology of Pathogen/Host Interactions

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

68 Use of an ileal explant model to study the contribution of <i>Salmonella enteritidis</i> fimbrial lectins to infection in the rat gut <b>J.M. Robertson, G. Grant, M.J. Woodward, E. Allen-Vercoe and H.J. Flint</b>	110
69 Role of lipopolysaccharide in adhesion of <i>Helicobacter pylori</i> to gastric epithelium cells <b>N. Edwards, I. Roberts and N. High</b>	110
70 Distribution of MUC1 in normal oral mucosa <b>A. Sengupta, D. Valdramidou, S. Huntley, S.J. Hicks, S.D. Carrington and A.P. Corfield</b>	110
71 Expression of fimbrial lectins on the surface of <i>Salmonella</i> <b>P.J. Naughton, G. Grant, S. Bardocz, C.J. Thorns and A. Pusztai</b>	111

## GLYCOBIOLOGY GROUP

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

72 Structure of novel phosphosaccharide glycans of <i>Trypanosoma cruzi</i> <b>S. Allen, A. Mehlert and M.A.J. Ferguson</b>	111
73 Major surface glycoprotein of the procyclic form of <i>Trypanosoma brucei</i> is phosphorylated: a matrix-associated laser desorption ionization–time of flight (MALDI-TOF) study <b>A. Mehlert, A. Treumann and M.A.J. Ferguson</b>	111
74 Rapid lectin methods for investigating the carbohydrate profile of therapeutic recombinant plasminogen: differences in culturing conditions result in different glycosylation patterns <b>A. Fotinopoulou, A. Cook and G.A. Turner</b>	111

**LIPID GROUP COLLOQUIUM****Sphingolipids**

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

- |    |   |     |
|----|---|-----|
| 75 | Selective activation by tumour necrosis factor- $\alpha$ receptor subtypes of cytosolic phospholipase A <sub>2</sub> in CrmA-expressing cells<br><b>O.J. Jupp, H.M. Anderson, S.M. McFarlane, P. Vandenabeele and D.J. MacEwan</b>                              | 112 |
| 76 | Modulation of the effects of cholinergic agents on rat brain adenylyl cyclase by ganglioside GM1<br><b>S.A. Plesneva, I.A. Zhuravin, N.N. Nalivaeva and N.M. Dubrovskaya</b>  | 112 |
| 77 | Lysophosphatidic acid-induced Ca <sup>2+</sup> mobilization in SH-SY5Y cells is independent of phosphoinositide turnover, but dependent on sphingosine kinase stimulation<br><b>K.W. Young, J.J. Mackrill, D.R. Channing, R.A.J. Challiss and S.R. Nahorski</b> | 112 |
| 78 | Mobilization of Ca <sup>2+</sup> from intracellular stores in neonatal rat cultured dorsal root ganglion neurones by intracellular application of sphingolipids<br><b>R. Scott, A. Ayar, N. Thatcher and U. Zehavi</b>  | 112 |
| 79 | Brain glyco- and lyso-sphingolipids in Gal-T1 knock-out mice<br><b>S. Dasgupta and E.L. Hogan</b>   | 113 |

**NEUROSCIENCE GROUP COLLOQUIUM****Membrane Signalling Complexes**

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

- |    |  |     |
|----|--|-----|
| 80 | Immunological identification of a new Homer-related protein in rat brain and in HEK-293 cells<br><b>F. Ciruela, M.M. Soloviev and R.A.J. McIlhinney</b>  | 113 |
| 81 | Effect of Homer-1a in the cell-surface targeting of metabotropic glutamate receptor type 1 $\alpha$<br><b>F. Ciruela, M.M. Soloviev and R.A.J. McIlhinney</b>  | 113 |
| 82 | Molecular characterization of a family of Homer proteins which are expressed constitutively in mammalian brain and mammalian cell lines<br><b>M.M. Soloviev, F. Ciruela, W.Y. Chan and R.A.J. McIlhinney</b> | 113 |
| 83 | Internalization of wild-type and mutant $\alpha_{1B}$ -adrenergic receptors<br><b>P.A. Stevens and G. Milligan</b>   | 114 |
| 84 | Receptor-green fluorescent protein (GFP) fusion proteins: a study of drug effects on receptor internalization, trafficking and expression<br><b>A.J. McLean and G. Milligan</b>                              | 114 |
| 85 | G-protein activation and effector regulation by the human 5-HT <sub>1A</sub> receptor and the $\alpha$ subunit of G <sub>11</sub> fusion proteins<br><b>E. Kellett, I.C. Carr and G. Milligan</b>            | 114 |
| 86 | Cell cycle regulation in rat 1 fibroblasts expressing a murine $\delta$ opioid G <sub>i</sub> -linked receptor<br><b>M.A. Wilson, N.G. Anderson and G. Milligan</b>  | 114 |
| 87 | Construction and analysis of $\alpha_{2a}$ -adrenoceptor G <sub>i</sub> /G <sub>o</sub> $\alpha$ -subunit fusion proteins<br><b>R. Ward and G. Milligan</b>  | 115 |

Abstract no.		Page no.
88	Regulation of A <sub>3</sub> adenosine receptor internalization by receptor phosphorylation <b>G. Ferguson and T.M. Palmer</b>	115
89	Characterization of three subtypes of rat thyrotropin-releasing hormone receptor <b>T. Drmota and G. Milligan</b>	115
90	Co-transfection of post-synaptic density-95 (PSD-95) with cloned <i>N</i> -methyl-D-aspartate (NMDA) receptor subtypes results in a selective increase in NR2 subunit immunoreactivities <b>A.R. Rutter, P.L. Chazot and F.A. Stephenson</b>	115
91	Chronic hypoxia modulates metabotropic glutamate receptor signalling in rat brain cortex <b>I. Mullaney</b>	116
92	Identification of a casein kinase I $\alpha$ -binding site in the third intracellular loop of the human muscarinic M <sub>3</sub> receptor <b>D.C. Budd and A.B. Tobin</b>	116
93	Effects of Pertussis toxin on group 1 metabotropic glutamate receptors expressed in a Syrian hamster tumour cell line <b>N. Evans and A. Kingston</b>	116
94	Poster withdrawn	116
95	The catalytic subunit of cAMP-dependent protein kinase: re-engineering the N-terminal extension and C-terminal 'tail' to investigate structure–function relationships <b>R. Sumathipala and R. Clegg</b>	117
96	Ionotropic glutamate receptor localization in cultured CA3-CA1 hippocampal neurons <b>L. Pickard, J. Noel, E. Molnar, G.L. Collingridge and J.M. Henley</b>	117
97	Regulation of AMPA receptor surface expression by a NSF-dependent mechanism in hippocampal neurons in culture <b>J. Noel, G. Scott Ralph, L. Pickard, E. Molnar, J.B. Uney, G.L. Collingridge and J.M. Henley</b>	117
98	Divergent pathways of phospholipase D activation in the human 5-HT <sub>2A</sub> receptor and its Asn-376→Asp mutant <b>D.N. Robertson, M.S. Johnson, D.A. McCulloch, E.M. Lutz, P. Holland and R. Mitchell</b>	117
99	Expression of the human serotonin transporter in HEK 293 cells; interaction with an endogenous 5-HT <sub>7</sub> receptor <b>M.S. Johnson, E.M. Lutz, S. Firbank, C.J. MacKenzie and R. Mitchell</b>	118
100	Role of receptor intracellular loop 3 in the differential activation of phospholipase D by VPAC and PAC <sub>1</sub> receptors <b>D.A. McCulloch, E.M. Lutz, M.S. Johnson, C.J. MacKenzie and R. Mitchell</b>	118
101	Juxtaposition of VIP <sub>2</sub> (VPAC <sub>2</sub> ) receptor extracellular domains is necessary for VIP, but not PACAP, activation of the receptor <b>E.M. Lutz, C.J. MacKenzie, M.S. Johnson, K. West, A.J. Harmar and R. Mitchell</b>	118
102	Activation and desensitization of the thyrotropin-releasing hormone receptor visualized by monitoring cellular redistribution of a $\beta$ -arrestin-1–green fluorescent protein fusion protein <b>A. Groarke and G. Milligan</b>	118

<b>Abstract no.</b>		<b>Page no.</b>
103	Involvement of adenylate cyclase in the action of insulin superfamily peptides and its interaction with protein kinase C <b>S.A. Plesneva, L.A. Kuznetsova, A.O. Shpakov and M.N. Pertseva</b>	119
104	Identification of determinants important for the assembly of the <i>N</i> -methyl-D-aspartate (NMDA) receptor <b>E. Meddows, B. Le Bourdellès, P.J. Whiting and R.A.J. McIlhinney</b>	119

## **NEUROSCIENCE GROUP**

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

105	Construction and expression of human metabotropic glutamate receptor 5a-green fluorescent protein fusion protein (hmGluR5-GFP) <b>V. Coutinho, A. Doherty and J.M. Henley</b>	119
106	The calcium-signalling M <sub>1</sub> muscarinic receptor regulates gene expression under cAMP-response element control <b>K.A. Goan and F.J. Thomson</b>	119
107	Identification of $\gamma$ -aminobutyric acid (GABA) <sub>B</sub> -R1-interacting proteins using the yeast two-hybrid system <b>E. Vernon, G. Meyer, N. Vinh, C. Workman and J.M. Henley</b>	120

## **TECHNIQUES GROUP/PROTEIN AND PEPTIDE GROUP/BRITISH ELECTROPHORESIS SOCIETY COLLOQUIUM**

### **Proteomics**

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

108	Investigation of the effect of interleukin-1 on articular cartilage by tandem electrospray mass spectrometry <b>M. Hermansson, M. Bolton, R. Wait and J. Saklatvala</b>	120
-----	--	-----

## **REGULATION IN METABOLISM GROUP**

*Poster Session Time: Thursday 8 April, 16.30 – 18.30*

109	Activation of glycoprotein GP Ib-V-IX, a receptor for von Willebrand factor, initiates a cascade of tyrosine-phosphorylation-signalling events in human platelets <b>S. Falati, C. Edmead and A. Poole</b>	120
110	Characterizing the interaction between the human androgen receptor and the actin-binding protein filamin (ABP 280) <b>D.M. Ozanne, M.E. Brady, S. Cook, D.E. Neal and C.N. Robson</b>	120
111	Differential activation of mitogen-activated protein kinases by members of the fibroblast growth factor family <b>P.B. Mehta, C.N. Robson, D.E. Neal and H.Y. Leung</b>	121
112	The histone acetyltransferase Tip60 is a co-activator protein of the human androgen receptor protein <b>L. Gaughan, M.E. Brady, S. Cook, D.E. Neal and C.N. Robson</b>	121

<b>Abstract no.</b>	<b>Page no.</b>
113 Clenbuterol and denervation up-regulate insulin-like growth factor-II and H19 mRNA expression in rat skeletal muscle <b>A.A. Sneddon, M.I. Delday, J. Steven and C.A. Maltin</b>	121
114 Diurnal variation in S-oxidation of S-carboxymethyl-L-cysteine metabolism in humans <b>G.B. Steventon</b>	121

**LIPID GROUP COLLOQUIUM****Lipoprotein(a): the Really Bad Cholesterol?**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

115 Domain structure of lipoprotein(a) by joint neutron and X-ray scattering <b>M. Aslam, M. Seed, B. Knight and S.J. Perkins</b>	122
116 Mechanism of regulation of microsomal triglyceride-transfer protein gene expression by dietary cholesterol <b>H.M. Sims, A.J. Bennett, K. Lawler, M.A. Billett, D.A. White and A.M. Salter</b>	122
117 Lipoprotein(a) levels in men with coronary artery occlusion and healthy male controls <b>G. Hergenc, T. Ozsullu, P. Cetinalp, S. Besoluk and B. Sonmez</b>	122
118 Sequence change in putative enhancer regions upstream of the apolipoprotein(a) gene <b>L.H. Puckey and B.L. Knight</b>	122

**LIPID GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

119 Acyl-CoA:glycerol-3-phosphate acyltransferase from oil palm ( <i>Elaeis guineensis</i> ) tissues <b>A.M. Manaf and J.L. Harwood</b>	123
120 Substrate specificity of rat heart phosphatidate phosphohydrolase <b>R. Venkatesan and D. Saggerson</b>	123
121 Inhibition of very-long-chain fatty acid synthesis in barley and wild oats by thiocarbamate herbicides <b>A. Baldwin, H. Rogers, D. Francis and J. Harwood</b>	123
122 Analysis by electrospray ionization mass spectrometry of phosphatidylcholine synthesis from [ <sup>13</sup> C]choline by cultured cells <b>A.D. Postle, S.M. Wright and A.N. Hunt</b>	123
123 Capacity for phosphatidylcholine synthesis in the nuclear matrix of IMR-32 neuroblastoma cells <b>A.N. Hunt, S.M. Wright and A.D. Postle</b>	124
124 Expression of cytochrome P4501B1 in ovarian cancer <b>M.C.E. McFadyen, S. Breeman, I.D. Miller, W.T. Melvin and G.I. Murray</b>	124
125 Diacylglycerol acyltransferase: cloning and functional expression of a cDNA from <i>Arabidopsis thaliana</i> <b>M.J. Hills and D.H. Hobbs</b>	124

Abstract no.	Page no.
126 Identification and cloning of novel yeast <i>Saccharomyces cerevisiae</i> lysophosphatidic acid acyltransferase homologues <b>E.A. McKenzie, R.J. Rowe, M.S. Burfoot, M.A. Elmore, M.E. Hill, A.A. Makda, E.J.R. Maughfling, A.C. Stamps and M.J. Finnen</b>	124
127 Differential regulation of eicosanoids in prophylaxis of cardiovascular versus Alzheimer's disease <b>J.M. Bailey, A.N. Makheja, S.J. Feinmark, J.Y. Vanderhoek and T. Simon</b>	125
128 Conserved His and Asp residues are critical for enzyme activity in human homologues of lysophosphatidic acid acyltransferases <b>M.A. Elmore, E.A. McKenzie, A.C. Stamps, M.E. Hill, A.A. Makda, E.J.R. Maughfling and M.J. Finnen</b>	125

### NUCLEIC ACIDS AND MOLECULAR BIOLOGY GROUP/BRITISH BIOPHYSICAL SOCIETY COLLOQUIUM

#### Molecular Interactions in Complex Assemblies of Proteins and Nucleic Acids

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

129 Role of the transcription factor REST/NRSF in regulating endogenous gene expression <b>I.C. Wood, M. Mistry, A. Roopra and N.J. Buckley</b>	125
130 Secondary structure of the C-terminal DNA-binding domain of the transcriptional activator NifA from <i>Klebsiella pneumoniae</i> <b>P. Ray, K.J. Smith, S. Missaillidis, M. Jaseja, R. Chittock, M. Buck and E.I. Hyde</b>	125
131 Characterization of structural domains of the HsdS subunit of M.EcoR124I <b>M.A. Smith and G. Kneale</b>	126
132 Characterization of the domain structure of the gene regulatory protein AreaA from <i>Aspergillus nidulans</i> <b>A. Chant, I. Manfield and G. Kneale</b>	126
133 <i>AhdI</i> , a new class of restriction-modification system? <b>D. Mernagh, P. Marks and G. Kneale</b>	126
134 Energetics of high-mobility-group (HMG) box interactions with the minor groove of DNA <b>C. Crane-Robinson, C.M. Read, I. Jelesarov and P.L. Privalov</b>	126

### NUCLEIC ACIDS AND MOLECULAR BIOLOGY GROUP

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

135 A helix–loop–helix region of T5 5'-3' exonuclease contains residues important for substrate and cofactor binding <b>J.J. Dervan and J.R. Sayers</b>	127
136 Effect of quercetin on genetic damage and proliferation of human colon tumour cells <b>G.O. Latunde-Data, T. Becker and B.L. Pool-Zobel</b>	127

**BIOENERGETICS GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

- 137 Carboxymethyl cytochrome *c* as artificial haem enzyme  
**P. Nicholls, P. Pelekoü, G. Silkstone and M.T. Wilson** 127
- 138 Yeast as a eukaryotic model for inhibitor resistance and dysfunction of the *bc<sub>1</sub>* complex  
**B. Meunier** 127
- 139 Fourier-transform infrared (FTIR) studies on the ferrous cyanide compound of bovine heart cytochrome oxidase  
**S. Jünemann, J. Breton and P.R. Rich** 128

**BIOCHEMICAL IMMUNOLOGY GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

- 140 The human high-affinity IgG receptor (Fc<sub>γ</sub>RI) induces the association of the 5'-inositol phosphatase, SHIP, with Shc in U937 cells  
**A.J.M. Cameron and J.M. Allen** 128

**MOLECULAR AND CELLULAR PHARMACOLOGY GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

- 141 Chromium VI toxicity in osteoblasts: involvement of glutathione reductase  
**J. Ning and M.H. Grant** 128
- 142 Effects of mitogen-activated protein kinase [extracellular signal-regulated kinase-2 (ERK2)], and protein kinase A phosphorylation upon the cAMP-specific phosphodiesterase  
**R. Hoffmann, G.S. Baillie, S.J. MacKenzie, S.J. Yarwood and M.D. Houslay** 128
- 143 Lyn tyrosyl kinase binds to the human cAMP-specific phosphodiesterase PDE64 (HSPDE4A4B) and causes a conformational change in its catalytic unit  
**I. McPhee, S.J. Yarwood, E. Huston, G. Scotland, M. Beard, A.H. Ross and M.D. Houslay** 129
- 144 PTEN, a tumour suppressor, is a 3-phosphorylated phosphoinositide 3-phosphatase  
**I. Pass, I.H. Batty and C.P. Downes** 129

**MOLECULAR ENZYMOLOGY GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

- 145 Kinetics of vitamin K 2,3-epoxide reductase  
**L.A. Begent, S.T. Chan and G.B. Steventon** 129
- 146 Purification of vitamin K 2,3-epoxide reductase  
**A. Hill, C. Pallister, D. Cowell and G. Steventon** 129
- 147 Structural studies of *Escherichia coli* aminopeptidase P  
**C.S. Bond, M.C.J. Wilce, J.M. Guss and H.C. Freeman** 130

**Abstract no.**

**Page no.**

**PROTEIN AND PEPTIDE SCIENCE GROUP**

*Poster Session Time: Friday 9 April, 10.00 – 11.00*

- 148 Interphotoreceptor retinoid-binding protein (IRBP): photosensitized light-induced damage and binding properties  
**I.B. Fedorovich, C.A. Converse and M.A. Ostrovsky**

**130**

---

Speakers' papers will be published in *Biochemical Society Transactions*  
volume 27, part 4 (August 1999)
