

# 67<sup>th</sup> Leeds Meeting

## Structural Biology

### ABSTRACTS

---

Abstract no.

Page no.

#### THUDICHUM MEDAL LECTURE

*Time: Tuesday 11 April, 11.30 – 12.30*

- H1 Glutamate: a molecule to remember  
**J.C. Watkins** 49

#### WELLCOME TRUST AWARD LECTURE

*Time: Wednesday 12 April, 11.30 – 12.30*

- I1 The year 2000 integrin model: unleaded petrol, single propeller, traction control, and 0–125 in the shake of a cam's tail  
**M.J. Humphries** 49

#### SPEAKER ABSTRACTS

#### ANNUAL SYMPOSIUM/BRITISH BIOPHYSICAL SOCIETY/MOLECULAR ENZYMOLOGY GROUP COLLOQUIUM

##### From Protein Folding to New Enzymes

*Speaker Session Times: Tuesday 11 April, 9.00 – 17.10  
Wednesday 12 April, 9.00 – 17.10  
Thursday 13 April, 9.00 – 13.10*

- A1 Prediction of protein-folding pathways: experiments and theory  
**L. Serrano** 49
- A2 Action between the sheets: the acquisition of  $\beta$ -structure in a protein-folding reaction  
**A.R. Clarke** 49
- A3 Manipulating the folding of membrane proteins: using the bilayer to our advantage  
**P.J. Booth** 50
- A4 Protein folding, misfolding and disease  
**C. Dobson** 50
- A5 Amyloidosis, protein folding and serum amyloid P (SAP) component  
**M.B. Pepys** 50
- A6 Self-perpetuating changes in Sup35 protein conformation as a mechanism of heredity in yeast  
**T.R. Serio** 50
- A7 Structure-based design, synthesis and evaluation of amyloid fibril inhibitors  
**J.W. Kelly** 51

Abstract no.	Page no.
A8 Molecular chaperones in protein folding in the cell <b>F.U. Hartl</b>	51
A9 Interdomain communication in Hsp70 chaperones <b>L.M. Gierasch</b>	51
A10 Chaperonin structure and function <b>H.R. Saibil</b>	51
A11 Towards characterization of protein folding/unfolding at atomic resolution <b>V. Daggett</b>	52
A12 Protein folding: insights from simulations <b>M. Karplus</b>	52
A13 Structure, stability and folding of the $\alpha$ -helix <b>A.J. Doig</b>	52
A14 <i>De novo</i> protein design: from helical bundles to protein fibres <b>D.N. Woolfson</b>	52
A15 Evolution of enzyme structure and function <b>J. Thornton</b>	53
A16 Directed evolution of enzyme inhibitors <b>M.J. McPherson</b>	53
A17 Designing new enzymes <b>A.R. Fersht</b>	53
A18 New uses for an old enzyme: engineering enzymes to degrade explosives <b>N.C. Bruce</b>	53

## **PROTEIN AND PEPTIDE SCIENCE GROUP/TECHNIQUES GROUP COLLOQUIUM**

### **Biotechnology of Extracellular Matrix**

*Speaker Session Times:      Tuesday 11 April, 9.00 – 16.30  
Wednesday 12 April, 9.00 – 11.00*

B1 Overview of biomaterials used in tissue engineering <b>D. Williams</b>	54
B2 Wound healing and tissue repair <b>M.D. Leek</b>	54
B3 Potential use of stem cells from bone marrow to repair the extracellular matrix and the central nervous system <b>D.J. Prockop</b>	54
B4 Morphogenesis and tissue engineering: message is in the extracellular matrix <b>H. Reddi</b>	54
B5 Design and expression of novel collagens <b>N.J. Bulleid</b>	55
B6 Recombinant collagen production in tobacco plants <b>F. Ruggiero</b>	55

**NEUROSCIENCE GROUP COLLOQUIUM****Neuropeptides: from Gene Regulation to Protein Processing**

*Speaker Session Times:*      *Tuesday 11 April, 9.00 – 16.50*  
*Wednesday 12 April, 9.00 – 11.00*

D1	Mechanism and function of agonist-induced trafficking of G-protein-coupled receptors <b>N.W. Bunnett</b>	59
D2	XCE (ECEL1): a central-nervous-system metallopeptidase related to endothelin-converting enzyme-1 (ECE-1) <b>O. Valdenaire</b>	59
D3	Neuropeptidases regulating gonadal function <b>A.I. Smith</b>	60
D4	Aminopeptidase A, generating one of the main effector peptides of the brain renin-angiotensin system, angiotensin III, plays a key role in the central control of blood pressure <b>C. Llorens-Cortès</b>	60
D5	Protein-processing mechanisms: from angiotensin-converting enzyme (ACE) to Alzheimer's <b>N.M. Hooper</b>	60
D6	Complexity of transcriptional control in neuropeptide gene expression <b>D. von Agoston</b>	60
D7	Protective peptides derived from novel glial proteins <b>D.E. Brenneman</b>	61
D8	Phosphinic peptide chemistry for developing zinc metalloproteinase inhibitors: achievements and perspectives <b>V. Dive</b>	61
D9	Conserved roles for peptidases in the processing of invertebrate neuropeptides <b>R.E. Isaac</b>	61
D10	Exploring the <i>Caenorhabditis elegans</i> and <i>Drosophila</i> genomes to understand neuropeptide and peptidase function <b>D. Coates</b>	61

**HORMONE GROUP COLLOQUIUM****Steroid Receptor Co-Activators and the Remodelling of Chromatin**

*Speaker Session Times:*      *Wednesday 12 April, 9.00 – 16.00*  
*Thursday 13 April, 8.45 – 13.25*

E1	Nucleosome asymmetry and chromatin organization <b>A.A. Travers</b>	62
E2	Mechanisms for ATP-dependent chromatin remodelling <b>T.A. Owen-Hughes</b>	62
E3	A histone acetyltransferase associated with the elongating form of RNA polymerase II <b>J.O. Svejstrup</b>	62

Abstract no.	Page no.
E4 Acetylation as a multi-functional modification <b>T. Kouzarides</b>	62
E5 Co-repressor complexes and remodelling chromatin for repression <b>A.P. Wolffe</b>	63
E6 Mediation and modulation of thyroid-hormone receptor repression <b>R. Renkawitz</b>	63
E7 Nuclear receptor-co-repressor interactions <b>J. Schwabe</b>	63
E8 Structural aspects of agonism and antagonism in the oestrogen receptor <b>R.E. Hubbard</b>	63
E9 Androgen receptor-interacting nuclear proteins <b>O.A. Jänne</b>	64
E10 Dynamics of steroid receptor interaction with chromosomal targets <b>G.L. Hager</b>	64
E11 Recruitment of chromatin remodelling factors during gene activation via the glucocorticoid receptor N-terminal domain <b>A.P.H. Wright</b>	64
E12 Co-operation between protein-acetylating and protein-methylating co-activators in transcriptional activation <b>M.R. Stallcup</b>	64

#### MEMBRANE AND BIOENERGETICS GROUP COLLOQUIUM

##### Efflux Proteins

*Speaker Session Time: Thursday 13 April, 9.00 – 15.50*

F1 Evaluation of the uptake and efflux capabilities of organisms based on whole-genome sequence analysis <b>I.T. Paulsen</b>	65
F2 Expression, purification and properties of multidrug efflux proteins <b>P.J.F. Henderson</b>	65
F3 Recognition of multiple drugs by a single protein: a trivial solution of an old paradox <b>A.A. Neyfakh</b>	65
F4 Three-dimensional structure of an <i>Escherichia coli</i> secondary transporter, NhaA, at 7-Å resolution <b>K.A. Williams</b>	65
F5 Structure-function relationships in a novel anion-translocating ATPase <b>B.P. Rosen</b>	66
F6 ATP-binding cassette (ABC) transporters and multidrug resistance <b>C.F. Higgins</b>	66

**EDUCATION GROUP COLLOQUIUM****Teaching Bioinformatics***Speaker Session Time: Thursday 13 April, 9.00 – 17.10*

G1	Why teach bioinformatics? <b>E.J. Milner-White</b>	66
G2	Bioinformatics in the undergraduate curriculum <b>R. Jenkins</b>	66
G3	Do tomorrow's doctors need to know bioinformatics? <b>S.J. Perkins</b>	67
G4	Graduate skills desired by the pharmaceutical industry <b>T.C. Hodgman</b>	67
G5	Bioinformatics at MSc level: different approaches <b>D.R. Westhead</b>	67
G6	Biocomputing teaching via Internet — the need for an electronic bioinformatics classroom <b>G. Fuellen</b>	67
G7	The Human Genome Mapping Project (HGMP) resource centre, EMBnet and training <b>V.A. Curwen</b>	68
G8	Interactive web sites as bioinformatics teaching aids <b>J.R. McEntyre</b>	68

**POSTER ABSTRACTS****ANNUAL SYMPOSIUM/BRITISH BIOPHYSICAL SOCIETY/MOLECULAR ENZYMOLOGY GROUP COLLOQUIUM****From Protein Folding to New Enzymes**

*Poster Session Times:*  
*Tuesday 11 April, 16.30 – 18.30*  
*Wednesday 12 April, 16.00 – 18.00*  
*Thursday 13 April, 10.20 – 11.50*

1	Ribosome-mediated refolding of partially-unfolded ricin A-chain <b>R. Argent, A. Parrott, P. Day, L. Roberts, P. Stockley, M. Lord and S. Radford</b>	68
2	From native state to amyloid: an investigation into partial unfolding of $\beta$ -2 microglobulin <b>N. Kad, V. McParland, D. Smith, A. Brown, M. Hunter and S. Radford</b>	68
3	Partially folded states in helical protein folding <b>S. Gorski, A. Capaldi, C. Kleanthous, G. Moore and S. Radford</b>	69
4	Towards single molecule unfolding of proteins using atomic force microscopy (AFM) and its observation using fluorescence <b>D. Brockwell, J. Clarkson, A. Smith and S. Radford</b>	69
5	Unfolding of the $\beta$ -sheet protein Y74W apo-pseudoazurin: evidence of an equilibrium intermediate species <b>S. Jones, J.S. Reader, M. Healy, D.A. Smith and S.E. Radford</b>	69

Abstract no.		Page no.
6	<i>De novo</i> protein design: evaluation of an <i>in silico</i> design method <b>S. Pradhananga, W. Rayner and A. Berry</b>	69
7	Engineering the mechanisms of C–C bond-forming enzymes <b>G. Williams, A. Nelson and A. Berry</b>	70
8	Multi-dimensional NMR spectroscopy to study the structure and dynamics of the class II fructose-1,6-bisphosphate adolase <b>C. Hilcenko, A. Berry, A.P. Kalverda and S.W. Homans</b>	70
9	Investigation into the properties of a chaperone domain and analysis of the non-covalently bound complexes with peptide substrates using MS <b>A.E. Ashcroft, S.E. Radford, J.E. Coyle, M. Pitkeathly and U.F. Hartl</b>	70
10	Exploring the folding landscape of $\alpha$ helical proteins <b>A. Capaldi, N. Ferguson, C. Friel, S. Gorski, C. Kleanthous and S. Radford</b>	70
11	The activation of <i>Escherichia coli</i> methionine repressor protein: crystal structures of repressor–co-repressor analogue complexes <b>J. Porter, K. Phillips and S.E.V. Phillips</b>	71
12	Studies of RNA–protein interactions and RNA structure utilizing the bacteriophage MS2 capsid <b>W.T. Horn, M.A. Convery, N.J. Stonehouse, C. Trinh, P.G. Stockley and S.E.V. Phillips</b>	71
13	Heterologous expression hosts for galactose oxidase <b>R.K. Spooner, K.M.A.G. Mahmoud, S. Deacon and M.J. McPherson</b>	71
14	Investigation of substrate binding to galactose oxidase <b>C. Allardyce, R.K. Spooner, M. Rogers, D.M. Dooley, P.F. Knowles and M.J. McPherson</b>	71
15	Domain I of galactose oxidase is not required for catalytic activity <b>K.M.A.G. Mahmoud, R.K. Spooner, S. Deacon and M.J. McPherson</b>	72
16	Role of a conserved tyrosine residue in <i>Escherichia coli</i> copper amine oxidase <b>C. Kurtis, W.S. Tambyrajah, J.M. Murray, C.G. Saysell, C. Wilmot, S.E.V. Phillips, P.F. Knowles and M.J. McPherson</b>	72
17	Inhibition of toxicity in the Alzheimer's disease peptide fragment $\beta(25-35)$ using N-methylated derivatives <b>E. Hughes, R. Burke and A.J. Doig</b>	72
18	Stabilizing non-polar–polar side chain interactions in the $\alpha$ -helix <b>C.D. Andrew, S. Penel, G.R. Jones and A.J. Doig</b>	72
19	Prediction of enzyme class in non-homologous sequences using chemometrics <b>R.G. Morrison, R.J. Mortishire-Smith and A.J. Doig</b>	73
20	Examination of coenzyme specificity in clostridial glutamate dehydrogenase by site-directed mutagenesis <b>J. Griffin and P. Engel</b>	73
21	Medium-chain acyl-CoA dehydrogenase deficiency <b>L. O'Reilly, B. Andresen, N. Gregersen and P. Engel</b>	73
22	Baculovirus expression of recombinant $\beta$ B-crystallin in insect cells confers significant protection from heat-shock <b>A. Lee, D. Goode and L.A. King</b>	73
23	Structure of arylamine- <i>N</i> -acetyl transferases <b>J. Sandy, M.E.M. Noble, J.C. Sinclair, M. Payton, A.M. Upton, A. Kawamura, A. Mushtaq, R. Delgoda and E. Sim</b>	74

Abstract no.	Page no.
24 Sticky-end assembly of a designed peptide fibre provides insight into protein fibrillogenesis <b>M.J. Pandya, G.M. Spooner, J.R. Thorpe, A. Rodger and D.N. Woolfson</b>	74
25 Penicillin amidases from different sources – variety of translocation mechanisms <b>Z. Ignatova, C. Hörnle and V. Kasche</b>	74
26 Analysis of the glycoforms of <i>Trypanosoma brucei</i> variant surface glycoproteins by matrix-assisted laser-desorption ionization–time of flight (MALDI–TOF)-MS <b>A. Mehlert and M.A.J. Ferguson</b>	74
27 Contribution of glycosylation to the stability and function of antibody molecules <b>Y. Mimura, R. Ghirlando, J. Lund, M. Goodall and R. Jefferis</b>	75
28 Characterization of a novel $\gamma$ -lactamase enzyme used in the synthesis of an anti-HIV drug <b>I.S. Gonsalvez, J.A. Littlechild, S. Taylor and R. Brown</b>	75
29 Structure and mechanism of decameric 2-cys peroxiredoxin from human erythrocytes <b>E. Schröder, J.A. Littlechild, A.A. Lebedev and M.N. Isupov</b>	75
30 Modelling and docking the endothelin (ET <sub>A</sub> ) G-protein coupled receptor <b>A.J.W. Orry and B.A. Wallace</b>	75
31 cAMP-specific phosphodiesterase IV <sub>A1</sub> expression in a mammalian system <b>N. Korniotis and A.F. Wilderspin</b>	76
32 Prediction of the structure, function and cellular location of proteins encoded by the GS element, a ‘pathogenicity island’ in MAP, <i>Mycobacterium avium</i> subsp. <i>paratuberculosis</i> <b>J.M. Sheridan, T. Bull, N. Sumar, J. Cheng, M. Stellakis and J. Hermon-Taylor</b>	76
33 Conformational studies of the fibrillogenic ABri peptide in familial British dementia <b>J.M. Sheridan, O.M.A. El-Agnaf, G. Siligardi and B.M. Austen</b>	76
34 Crystal structure of tetradecameric <i>Mycobacterium tuberculosis</i> chaperonin 10 <b>M.M. Roberts, A.R. Coker, A.R.M. Coates and S.P. Wood</b>	76

## MOLECULAR ENZYMOLOGY GROUP

*Poster Session Time: Tuesday 11 April, 16.30 – 18.30*

35 Oxygen activation in the copper-containing quinoprotein amine oxidase <b>C.M. Wilmot, J. Hajdu, M.J. McPherson, P.F. Knowles and S.E.V. Phillips</b>	77
36 Inhibition of oxygen binding in the copper-containing quinoprotein amine oxidase <b>C.M. Wilmot, P.A. Cooke, J. Hajdu, M.J. McPherson, P.F. Knowles and S.E.V. Phillips</b>	77
37 Crystal structure of the precursor of galactose oxidase <b>S.J. Firbank, M.S. Rogers, C.M. Wilmot, D.M. Dooley, M.J. McPherson, P.F. Knowles and S.E.V. Phillips</b>	77
38 Pertussis toxin ‘activation’ and NAD-binding: molecular characterization by modelling and fluorescence <b>S. Fowler, M. Forster and B. Bolgiano</b>	77
39 Cloning, expression and purification of a thermostable aminoacylase from <i>Thermococcus litoralis</i> <b>E.J. Hollingsworth, R. Brown, M.N. Isupov, S. Taylor and J.A. Littlechild</b>	78

**PROTEIN AND PEPTIDE SCIENCE GROUP/TECHNIQUES GROUP  
COLLOQUIUM****Biotechnology of Extracellular Matrix**

*Poster Session Times:*                      *Tuesday 11 April, 16.30 – 18.30*  
*Wednesday 12 April, 16.00 – 18.00*

- |    |  |           |
|----|--|-----------|
| 65 | Platelet-derived growth factor-AB increases the expression of matrix metalloproteinase-1 by human dermal fibroblasts in the dermal equivalent model<br><b>E.J. Wood and K.A. Scott</b>   | <b>84</b> |
| 66 | Effect of chitosan on human dermal fibroblasts <i>in vitro</i> : evidence for two donor-dependent populations of fibroblasts<br><b>G. Howling, P. Dettmar, P.A. Goddard, F.C. Hampson, J.M. Dornish and E.J. Wood</b>              | <b>84</b> |
| 67 | Activation of diacylglycerol (DAG)-independent protein kinase Cs (PKCs) inhibit fibroblast-mediated collagen gel contraction<br><b>P.M. Newton, R.G. Wolowacz and E.J. Wood</b>  | <b>85</b> |
| 68 | Aberrant integrin expression in acne<br><b>A.H.T. Jeremy, O.L. Aldana, S.G. Roberts, D.B. Holland and W.J. Cunliffe</b>  | <b>85</b> |
| 69 | Release of matrix metalloproteinases (MMPs) stimulated by cold preservation of human livers during transplantation<br><b>G. Punshon, P. Butler, B.R. Davidson, K. Rolles and B.J. Fuller</b>                                       | <b>85</b> |
| 70 | Micromolar Ca <sup>2+</sup> concentrations are essential for Mg <sup>2+</sup> -dependent binding of collagen by the integrin $\alpha 2\beta 1$ in human platelets<br><b>D.J. Onley, C.G. Knight, M.J. Barnes and R.W. Farndale</b> | <b>85</b> |
| 71 | Substrata, signals and protein kinase C subspecies regulating chondrocyte differentiation/dedifferentiation<br><b>L. Shann, R. Wolowacz and M. Rumsby</b>  | <b>86</b> |
| 72 | IR analysis of invertebrate mucins<br><b>D.R. Skingsley and A.J. White</b>   | <b>86</b> |
| 73 | Structure of the integrin $\alpha 2\beta 1$ inserted domain in complex with a homotrimeric collagen peptide<br><b>J. Emsley, C.G. Knight, R.W. Farndale, M.J. Barnes and R.C. Liddington</b>                                       | <b>86</b> |
| 74 | Anti-adhesive activity of plasmin: proteolytic specificity of plasmin in relation to adhesive proteins<br><b>T.A. Muranova and I.G. Shvyrkova</b>  | <b>86</b> |

**PROTEIN AND PEPTIDE SCIENCE GROUP**

*Poster Session Times:*                      *Tuesday 11 April, 16.30 – 18.30*  
*Wednesday 12 April, 16.00 – 18.00*

- |    |  |           |
|----|--|-----------|
| 75 | The cysteine-rich domain of the amyloid precursor protein (APP) contains six disulphide bridges in two subdomains<br><b>L. Hesse, T. Ruppert, S. Malcherek, R. Cappai, C.L. Masters, K. Beyreuther and G. Multhaup</b> | <b>87</b> |
| 76 | Energetic effects of residue substitutions at the N1 position of an $\alpha$ -helical peptide<br><b>D.A.E. Cochran, G.R. Jones and A.J. Doig</b>   | <b>87</b> |

Abstract no.	Page no.
88 Characterization of a novel nucleoside/nucleobase transporter from <i>Plasmodium falciparum</i> <b>M.D. Parker, R.J. Hyde, S.Y.M. Yao, L. McRobert, C.E. Cass, J.D. Young, G.A. McConkey and S.A. Baldwin</b>	90
89 Transport study of hydroxamic acid derivatives, novel inhibitors of bacterial peptide deformylase (PDF) <b>T. Hirata, C. Hubschwerlen, W. Pirson, H. Locher and M. Page</b>	90
90 Genetic analysis of 18 putative transport proteins in <i>Streptococcus pneumoniae</i> <b>E. Marrer, P. Caspers and M. Page</b>	90
91 Loop B of the yeast major intrinsic protein (MIP) channel, Fps1p, may play a role in the determination of glycerol transport direction <b>R.M. Bill, K. Hedfalk, S. Karlgren, J. Rydström and S. Hohmann</b>	91
92 Molecular expression of p-glycoprotein (P-gp), multidrug resistance protein (MRP) and c-MOAT in the human gastro-intestinal tract <b>C.A. O'Neill, R. Stephens, J. Penny, M. Rowland and G. Warhurst</b>	91
93 Differential expression of ATP-binding cassette (ABC) transporters in vinblastine-selected intestinal Caco-2 cells <b>C. O'Neill, A. Warhurst, R. Stephens, M. Rowland and G. Warhurst</b>	91
94 The human sodium-dependent vitamin C transporters – molecular cloning and functional characterization <b>W.-J. Liang, D. Johnson and S.M. Jarvis</b>	91
95 Cloning the P <sub>2</sub> adenosine transporter homologue of drug-sensitive and drug-resistant strains of <i>Trypanosoma equiperdum</i> <b>J.E. Leadsham, N. Rolfs and S.M. Jarvis</b>	92
96 A human astrocytoma cell line releases and preserves reduced glutathione <b>R. Stone, V.C. Stewart, R.D. Hurst, J.B. Clark and S.J.R. Heales</b>	92
97 Bioinformatics: a sequence and structure database for peptaibols <b>J. Chugh, L. Whitmore, C.F. Snook and B.A. Wallace</b>	92

**BIOENERGETICS GROUP**

*Poster Session Time: Thursday 13 April, 10.20 – 11.50*

98 Mechanism of the apoptosis-inducing effect of fenretinide: cytochrome <i>c</i> release from mitochondria into the cytosol <b>E. Ulukaya, K.B. Okona-Mensah and E.J. Wood</b>	92
--	----

**MEMBRANE GROUP**

*Poster Session Time: Thursday 13 April, 10.20 – 11.50*

99 Nucleoside transporters in the mammalian heart <b>Z.A. Booth, F. Abidi, J.C. Ingram, H. Musa, M.R. Boyett, C.E. Cass, J.D. Young and S.A. Baldwin</b>	93
---	----

Abstract no.	Page no.
100 Overexpression of the bacterial transporter NupC – a model for mammalian active nucleoside transporters <b>D.A. Hadden, A. Clarke, G.J. Litherland, P.J.F. Henderson, C.E. Cass, J.D. Young, S.A. Baldwin and M.P. Gallagher</b>	93
101 Sensitivity of mammalian equilibrative nucleoside transporters to nitrobenzyl thioinosine (NBMPR): identification of an amino acid residue fundamental in sensitivity <b>R.J. Hyde, F. Abidi, M. Griffiths, S.Y.M. Yao, M. Sundaram, S.E.V. Phillips, C.E. Cass, J.D. Young and S.A. Baldwin</b>	93
102 Probing the biological roles of nucleoside transporters using <i>Caenorhabditis elegans</i> as a model organism <b>P.J. Appleford, M. Griffiths, E.G. Chomey, S.Y.M. Yao, D. MacGregor, R.E. Isaac, I.A. Hope, D. Coates, C.E. Cass, J.D. Young and S.A. Baldwin</b>	93
103 Membrane topology of the Mep/Amt family of ammonium transport proteins <b>G. Thomas, J. Mullins and M. Merrick</b>	94
104 Construction and overexpression of an affinity-tagged NupG, a bacterial nucleoside transporter from <i>Escherichia coli</i> <b>H. Xie, G.J. Litherland, P.J.F. Henderson, A.K.H. Holzenburg, S.E.V. Phillips, S.A. Baldwin and M.P. Gallagher</b>	94

**LIPID GROUP**

*Poster Session Time: Thursday 13 April, 10.20 – 11.50*

105 Enhanced susceptibility to <i>in vitro</i> oxidation of apolipoprotein B containing lipoproteins and antioxidant levels in patients with coronary artery disease <b>A. Tokullugil, Z. Serdar, M. Dirican, E. Sarandöl, D. Yeşilbursa and A. Serdar</b>	94
106 Low-density lipoprotein (LDL) from Type 2 diabetic subjects induces increased cholesterol ester uptake and synthesis by Hep G2 cells: a possible link between lipoprotein modification and cardiovascular disease? <b>P.R. Landham, A.J. McColl, J. Rosanckiewicz, W. Richmond and R.S. Elkeles</b>	94

**NUCLEIC ACIDS AND MOLECULAR BIOLOGY GROUP**

*Poster Session Time: Thursday 13 April, 10.20 – 11.50*

107 Somatostatin receptor subtype expression in human heart <b>W.H.T. Smith, S.G. Ball and A.J. Balmforth</b>	95
108 A rare polymorphism of the somatostatin receptor sst <sub>2</sub> detectable by restriction endonuclease digestion <b>W.H.T. Smith, A. Maqbool, S.G. Ball and A.J. Balmforth</b>	95
109 Relaxation of pC221: protein requirements and plasmid specificity <b>M.C.A. Smith and C.D. Thomas</b>	95
110 X-ray crystal structure of the hexameric arginine repressor/activator protein (AhrC) from <i>Bacillus subtilis</i> <b>C. Dennis, N. Glykos, M. Parsons and S. Phillips</b>	95

Contents (continued)

---

<b>Abstract no.</b>		<b>Page no.</b>
111	Crystal structure of bacteriophage T7 endonuclease I: a Holliday junction resolving enzyme <b>J.M. Hadden, M.A. Convery, A.-C. Declais, D.M.J. Lilley and S.E.V. Phillips</b>	<b>96</b>
112	Structure determination of Ance and Acer- <i>Drosophila melanogaster</i> homologues of human angiotensin-converting enzyme (ACE) <b>R.J. Bingham, C. Trinh and S.E.V. Phillips</b>	<b>96</b>
113	The role of RNA and carbon dioxide fixation in the origin of homochirality <b>J.M. Bailey and C.M. Fedo</b>	<b>96</b>

---

Speakers' papers will be published in *Biochemical Society Transactions*  
volume 28, part 4 (August 2000)
