

673rd Bristol Meeting

Molecular Communications

ABSTRACTS

Abstract no.

Page no.

JUBILEE MEDAL LECTURE

Time: Tuesday 10 April, 11.30–12.30

- M1 Src family tyrosine kinases in signal transduction and growth control
S.A. Courtneidge 45

NOVARTIS MEDAL LECTURE

Time: Thursday 12 April, 11.00–12.00

- M2 Hopping, jumping and looping by restriction enzymes
S.E. Halford 45

SPEAKER ABSTRACTS

HOST COLLOQUIUM

Molecular Communications

*Speaker Session Times: Tuesday 10 April, 09.00–16.00
Thursday 12 April, 09.00–16.10*

- A1 Regulation and mechanism of clathrin-coated vesicle formation
E. Smythe 45
- A2 Role of COPI in vesicular transport
T. Nilsson 45
- A3 AP-1 and GGAs: two adaptors for *trans*-Golgi network (TGN)-to-endosome trafficking
M.S. Robinson 46
- A4 Pathway of neuronal soluble *N*-ethylmaleimide-sensitive fusion protein attachment
protein receptor (SNARE) complex assembly
D. Fasshauer 46
- A5 Role and regulation of phospholipase D in cellular stimulation
M.J.O. Wakelam 46
- A6 Phosphoinositide 3-kinase γ signalling: a structural perspective
R.L. Williams 46
- A7 Identification of phosphoinositide-binding proteins by using phosphoinositide-coupled
affinity matrices
P.T. Hawkins 47

Subscribing institutions are encouraged to copy and distribute this table of contents
for non-commercial purposes

Abstract no.	Page no.
A8 Molecular determinants within pleckstrin homology (PH) domains that allow for specific recognition of phosphoinositides M.A. Lemmon	47
A9 Biochemical properties of interactions between membrane proteins of leucocytes A.N. Barclay	47
A10 Structural biology of gamma-herpesvirus cyclins and how they subvert cyclin-dependent kinase inhibitor function N.Q. McDonald	47
A11 Mechanism of protein kinase inactivation by protein phosphatases D. Barford	48
A12 Insights from the structure of the 30 S ribosomal subunit and its complex with antibiotics V. Ramakrishnan	48
A13 Suicidal proteins in <i>Escherichia coli</i> C. Kleanthous	48
A14 Mechanism and regulation of transcription in Archaea S.D. Bell	48
A15 HMG-1 and -2: 'architectural' DNA-binding proteins J.O. Thomas	49
A16 Coupled transcription and translation in discrete 'factories' within mammalian nuclei P.R. Cook	49

BIOENERGETICS GROUP COLLOQUIUM

Assembly and Repair of Membrane-Bound Electron Transport Complexes: Impact on Plant Physiology and Medicine

*Speaker Session Times: Tuesday 10 April, 09.00–16.00
 Wednesday 11 April, 09.00–15.30*

B1 Redox signalling in chloroplasts and mitochondria: genomic and biochemical evidence for two-component regulatory systems in bioenergetic organelles J.F. Allen	49
B2 Protein–RNA interaction in light-regulated translation in the chloroplast S.P. Mayfield	49
B3 Can we identify the forces that drive the folding of integral membrane proteins? P.J. Booth	50
B4 The first green: assembly of quantum traps in higher-plant plastids L.A. Eichacker	50
B5 A role for molecular chaperones in assembly and repair of photosystem II? C.F. Beck	50
B6 Identification of a protease involved in the repair of photosystem II in <i>Synechocystis</i> 6803 P. Silva	50
B7 Var2 mutation in <i>Arabidopsis</i> affects D1 degradation E.P. Thompson	51

Abstract no.	Page no.
B8 Incorporation of iron–sulphur clusters into membrane-bound proteins A. Seidler	51
B9 Assembly-controlled regulation of chloroplast gene translation Y. Choquet	51
B10 Degradation of unassembled and damaged thylakoid proteins Z. Adam	51
B11 Study of a point mutation in the mitochondrially encoded subunit III of cytochrome oxidase affecting the complex assembly in yeast B. Meunier	52
B12 Mitochondrial AAA proteases (Δ TPases associated with a variety of cellular activities): control of biogenesis and maintenance of respiratory-chain complexes T. Langer	52
B13 Assembly of cytochrome <i>c</i> oxidase: implications for aging and disease R.O. Poyton	52
B14 Abnormal gene expression and assembly of the multimeric complex I in the <i>dum24</i> deletion mitochondrial mutant of <i>Chlamydomonas reinhardtii</i> C. Remacle	52
B15 Assembly of cytochrome <i>c</i> oxidase: what can we learn from patients with cytochrome <i>c</i> oxidase deficiency? J.-W. Taanman	53
B16 <i>Chlamydomonas</i> nuclear mutants that fail to assemble photosynthetic or respiratory electron-transfer complexes S. Purton	53

PROTEIN AND PEPTIDE SCIENCE GROUP COLLOQUIUM

Membrane Active Peptides

Speaker Session Times: *Wednesday 11 April, 09.00–16.00*
Thursday 12 April, 09.00–15.40

C1 <i>De novo</i> design, synthesis and characterization of membrane active peptides J.D. Lear	53
C2 Simulation studies of peptide–bilayer interactions M.S.P. Sansom	53
C3 Peptaibols: models for ion channels B.A. Wallace	54
C4 Structural implications for the transformation of the <i>Bacillus thuringiensis</i> δ -endotoxins from the water-soluble to the membrane-inserted form J. Li	54
C5 Developing structural models of K ⁺ channels and their relatives based on analyses of distantly related sequences H.R. Guy	54
C6 Insertion of transmembrane helices into the endoplasmic reticulum (ER) membrane G. von Heijne	54

Abstract no.	Page no.
C7 Self-assembly of membrane protein monolayers on gold J.H. Lakey	55
C8 Application of electron spin resonance for investigating peptide–lipid interactions D. Marsh	55
C9 Conformational analysis of synthetic potassium ion-channel peptides P.I. Haris	55
C10 Binding of a signal-sequence peptide: role of bilayer properties T.J. McIntosh	55
C11 Why and how are peptide–lipid interactions utilized for self-defence? K. Matsuzaki	56
C12 Membrane properties and amyloid fibril formation of lung surfactant protein C J. Johansson	56
C13 Connexin-mimetic peptides; specific inhibitors of gap-junctional communication W.H. Evans	56
C14 Tethered bilayer lipid membranes as a support for membrane active peptides B.A. Cornell	56
C15 Membrane-disordering effects of β -amyloid peptides W.E. Muller	57
C16 Influenza fusion peptides J. Skehel	57

REGULATION IN METABOLISM GROUP COLLOQUIUM

Insulin Action

Speaker Session Times:
Tuesday 10 April, 09.00–11.00
Wednesday 11 April, 09.00–16.00
Thursday 12 April, 09.00–13.00

D1 Specificity in ligand binding and intracellular signalling by insulin and insulin growth factor receptors K. Siddle	57
D2 Insulin receptor substrate proteins and neuroendocrine function D.J. Withers	57
D3 Insulin receptor substrate-2 protein failure causes multisystem pathophysiology M.F. White	58
D4 Functional effects of APS (adaptor protein containing pleckstrin homology and SH2 domains) and SH2-B on insulin receptor signalling T.S. Pillay	58
D5 Role of atypical protein kinase C in insulin action M. Kasuga	58
D6 Class-II phosphoinositide (PI) 3-kinases: a new mechanism for participation of PI 3-kinase in growth-factor signalling P.R. Shepherd	58

Abstract no.	Page no.
D7 Signal transduction downstream of phosphoinositide 3-kinase D.R. Alessi	59
D8 Akt signalling R. Roth	59
D9 Glycogen synthase kinase-3 (GSK3) makes a comeback P. Cohen	59
D10 Regulation of glycogen synthesis in human muscle cells S.J. Yeaman	59
D11 Role of phosphoinositide 3-kinases and protein kinases in GLUT4 trafficking M. Birnbaum	60
D12 Insulin regulation of GLUT4 translocation: a tale of two signals J.E. Pessin	60
D13 Biogenesis and trafficking of GLUT4 storage vesicles (GSVs) G.W. Gould	60
D14 Insulin-stimulated phosphorylation of the translational regulator, 4E-BP1 K.J. Heesom	60
D15 Interplay between insulin and nutrients in the regulation of protein synthesis C.G. Proud	61
D16 Sterol regulatory element binding protein-1c (SREBP-1c), a mediator of insulin action on hepatic gene expression P. Ferré	61
D17 Insulin-regulated gene expression R.M. O'Brien	61

MEMBRANE GROUP AND NEUROSCIENCE GROUP COLLOQUIUM

The Interface of Receptor Signalling and Trafficking

*Speaker Session Times: Wednesday 11 April, 09.00–15.40
 Thursday 12 April, 09.00–16.10*

E1 New insights into Golgi function from three-dimensional structure and proteomics K.E. Howell	61
E2 Molecular dissection of secretory granule biogenesis S. Tooze	62
E3 Control of membrane fusion dynamics during regulated exocytosis R.D. Burgoyne	62
E4 Dissecting the functions of proteins in clathrin-coated vesicle formation H.T. McMahon	62
E5 Regulation of receptor trafficking and signalling by phosphatidylinositol 3-phosphate H. Stenmark	62
E6 The relationship between endosomes and lysosomes J.P. Luzio	63
E7 Internalization of the epidermal growth factor receptor: role in signalling A. Sorkin	63

Abstract no.	Page no.
E8 Lipids and trafficking in neurons C. Dotti	63
E9 Proteins involved in the synaptic organization of α -amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid (AMPA) receptors J.M. Henley	63
E10 β -Arrestin and G-protein-coupled receptor desensitization, internalization and signalling S.A. Laporte	64
E11 Lysosomal degradation of the growth hormone receptor is regulated by the ubiquitin-proteasome pathway P. van Kerkhof	64
E12 Caveolins in signalling, oncogenic transformation and muscular dystrophy M.P. Lisanti	64
E13 Signalling and non-caveolar rafts J.J. Hsuan	64
E14 Role of endocytosis in signalling and regulation of G-protein-coupled receptors M. von Zastrow	65
E15 Multiple pathways of dynamin-regulated G-protein-coupled receptor internalization C.J. van Koppen	65

POSTER ABSTRACTS

MISCELLANEOUS

Poster Session Times:
 Tuesday 10 April, 16.00–18.00
 Wednesday 11 April, 16.00–18.00
 Thursday 12 April, 13.00–14.40

1 Interactive tutorials in bioenergetics P.A.C. Paul and P.M. Wood	65
--	----

BIOENERGETICS GROUP COLLOQUIUM

Assembly and Repair of Membrane-Bound Electron Transport Complexes: Impact on Plant Physiology and Medicine

Poster Session Times:
 Tuesday 10 April, 16.00–18.00
 Wednesday 11 April, 16.00–18.00
 Thursday 12 April, 13.00–14.40

2 Abnormal gene expression and assembly of the multimeric complex I in the <i>dum24</i> deletion mitochondrial mutant of <i>Chlamydomonas reinhardtii</i> C. Remacle, F. Duby, P. Cardol and R.F. Matagne	65
3 <i>Chlamydomonas reinhardtii</i> mitochondrial mutants lacking complex I activity: characterization of the mutations and assembly of the multimeric complex I P. Cardol, R.F. Matagne and C. Remacle	66

Abstract no.	Page no.
18 Hepatic glucose handling is programmed in fetal life H.C. Murphy, R.A. Iles, R.D. Cohen and S.P. Burns	69
19 Microtubule integrity is not required for insulin-stimulated GLUT4 translocation in 3T3-L1 adipocytes J.C. Molero, J.P. Whitehead and D.E. James	70
20 Skeletal muscle of the stroke-prone spontaneously hypertensive rat (SHRSP) is insulin-insensitive F. Cairns, D.J. James, D. Graham, I.P. Salt, G.J. Murphy, A.F. Dominiczak, J.M.C. Connell and G.W. Gould	70
21 Insulin-stimulated nitric oxide production in human aortic endothelial cells V.A. Nicolson, I.P. Salt, J.M.C. Connell, J.R. Petrie and G.W. Gould	70
22 Investigation into the association of insulin receptor substrate-1 with the cytoskeleton J. Whitehead, J.C. Molero, S. Clark, S. Martin, G. Ramm and D.E. James	70
23 Regulation of protein kinase B activity by β -adrenergic agonists in rat epididymal fat cells C.J. Bell and S.K. Moule	71
24 Characterization of a PTEN homologue from <i>Drosophila</i> G. McConnachie, I. Pass, N. Leslie and C.P. Downes	71
25 Sterol regulatory element binding protein-1c (SREBP-1c) is strongly expressed in MIN6 β cells C. Andreolas, C. Zhao, G. da Silva Xavier, A. Varadi, F. Diraison, F. Fougelle, P. Ferré and G.A. Rutter	71

PROTEIN AND PEPTIDE SCIENCE GROUP COLLOQUIUM

Membrane Active Peptides

Poster Session Times:
 Tuesday 10 April, 16.00–18.00
 Wednesday 11 April, 16.00–18.00
 Thursday 12 April, 13.00–14.40

26 Nanoscale behaviour of ions in narrow channels W.L. Duax, B.M. Burkhardt and V. Pletnev	71
27 Pro-matrix metalloproteinase-3 (pro-MMP-3) and atherosclerotic carotid artery plaques A.D. Khattab, I.S. Ali, R.R. Dils, D. Kerr, D. Jenkinson, S. Allen and M.Z. Rana	72
28 Membrane active peptides as gene-delivery agents R.O. Phillips, J.H. Welsh, R. Husain, D. Williams, J. Charlesworth and A.M.R. Haines	72
29 Effect of peptide main-chain length on the membrane-modifying properties of short analogues of the lipopeptaibol antibiotic trichogin GA IV F. Formaggio, C. Peggion, M. Crisma and C. Toniolos	72
30 Structure and function of equinatoxin, a novel cytolyisin from sea anemone G. Anderluh, A. Barlic, P. Malovrh, Z. Podlesek, A. Athanasiadis, D. Turk, G. Viero, M. Dalla Serra, G. Menestrina and P. Macek	72
31 Conformation and membrane activity of analogues of the peptaibol antibiotic trichogin GA IV with a lipophilic amino acid at different positions F. Formaggio, C. Peggion, M. Crisma, Q.B. Broxterman, B. Kaptein and C. Toniolo	73

Abstract no.	Page no.
32 Incorporation of a membrane-active peptide in S-layer ultrafiltration membrane-supported lipid membranes B. Schuster, P.C. Gufler, D. Pum and U.B. Sleytr	73
33 Studies on the membrane anchoring of <i>Escherichia coli</i> penicillin-binding protein 5 D.A. Phoenix and F. Harris	73
34 A neutron diffraction study of lipid sensing by the membrane-binding domain of phosphocholine cytidyltransferase S.M.A. Davies, T.A. Harroun, M.J.M. Darkes, T. Hauss, R.B. Cornell and J.P. Bradshaw	73
35 Disulphide-dimerized analogues of melittin and magainin: pore kinetics and molecular dynamics simulations in membranes C.E. Dempsey, R.B. Sessions, K. Hristova and S.H. White	74
36 TMA α : a software tool for analysis of transmembrane region α -helices K.S. Sarakinou, J.F. Antoniw, R.C. Togawa and J.G.L. Mullins	74
37 Oblique orientated α -helix formation in the C-terminal regions of the <i>Escherichia coli</i> low-molecular-mass penicillin-binding proteins F. Harris, J. Wallace and D.A. Phoenix	74
38 Interaction of viscotoxin A3 with model membranes of acidic phospholipids A. Coulon, A.M. Sautereau, K. Urech, P. Rouge and A. Lopez	74
39 Can the loss of an exon reverse the membrane topology of a glutamate transporter? J. Huggett and D. Mason	75

HOST COLLOQUIUM

Molecular Communications

Poster Session Times:
 Tuesday 10 April, 16.00–18.00
 Wednesday 11 April, 16.00–18.00
 Thursday 12 April, 13.00–14.40

40 Transcription of variant surface glycoprotein (VSG) genes during the metacyclic development of African trypanosomes in the tsetse fly M.L. Ginger, P. Blundell, A.M. Lewis and J.D. Barry	75
41 Association of small G-protein ADP ribosylation factor (ARF1) with the third intracellular loop of the M ₃ muscarinic receptor D.N. Robertson, M.S. Johnson, P.J. Holland and R. Mitchell	75
42 Co-ordination of actin-based membrane rearrangements by a novel Rho GTPase, Rif S. Ellis and H. Mellor	75
43 Study of mitogenic/cytotoxic effects of venom proteins from Scorpion fish <i>S. verrucosa</i> and <i>H. rubripinnis</i> , on normal and tumour cell lines using flow cytometry A. Siddiq, H. Nakagawa, Al-Sofyani, K. Kanemaru, F. Satoh and Z.H. Zaidi	76
44 Inhibition of the phosphoinositide 3-kinase pathway sensitizes carcinoma cells to CD40-mediated apoptosis C.C. Davies, L.S. Young and A.G. Eliopoulos	76
45 Interactions between phospholipase D ₁ and its effectors and substrate detected by fluorescence lifetime imaging microscopy (FLIM) B. Larijani, W.H. Hughes, T. Ng and P.J. Parker	76

Abstract no.		Page no.
46	Specificity determinants in high-affinity complexes A.H. Keeble, W. Li, A.M. Hemmings, G.R. Moore, R. James and C. Kleanthous	76
47	High-affinity binding of extracellular-signal-regulated kinase (ERK)2 to docking regions within the C-terminus of cAMP-specific phosphodiesterase family PDE4D3 is required for phosphorylation and regulation G.S. Baillie, S.J. Mackenzie, I. McPhee, G. Bolger and M.D. Houslay	77
48	Molecular communication across a membrane: spatial and temporal regulation of endoplasmic reticulum (ER)-to-Golgi transport D.J. Stephens and R. Pepperkok	77
49	Cloning and characterization of novel phosphoinositide effector proteins S. Dowler, R.A. Currie, D.G. Campbell, M. Deak, G. Kular, C.P. Downes and D.R. Alessi	77
50	The cAMP phosphodiesterase PDE4A5 is cleaved by caspase-3 downstream of its SH3-binding domain E. Huston, M. Beard, G. Scotland and M.D. Houslay	77
51	Tethered bilayers for study in membrane biochemistry M.J. Spencelayh, P.F. Knowles and S.D. Evans	78
52	Confirmation of the interaction between the monocarboxylate transporter MCT1 and its ancillary protein CD147 using fluorescence resonance energy transfer M.C. Wilson, D. Meredith and A.P. Halestrap	78
53	The genomic structure of the human lactate transporters MCT1 and MCT2 and evidence for alternative promoters A.J. Davies, M.C. Wilson and A.P. Halestrap	78
54	Identification of critical cysteine residues whose oxidative cross-linking regulates the mitochondrial permeability transition pore G.P. McStay, S.J. Clarke and A.P. Halestrap	78
55	Mitogen-activated-protein-kinase-selective regulation of pro-inflammatory cytokines in the alveolar epithelium J.J. Haddad and S.C. Land	79
56	Interactions of the novel PtdIns(3,4) P_2 -binding proteins TAPP1 (tandem PH-domain-containing protein 1) and TAPP2 with PDZ-domain-containing proteins W.A. Kimber, M. Deak and D.R. Alessi	79
57	Comparison of the efficiency of different techniques for viroid detection from citrus culture A. Elleuch, H. Fakhfakh, L. Jendoubi, N. Bessais and M. Marrkchi	79
58	Cross-talk between tyrosine kinase Btk and serine/threonine kinase protein kinase C θ in platelets: functional role of reciprocal phosphorylation D. Crosby and A.W. Poole	79
59	Possible role a tetrose- PO_4 cycle in the origin of homochirality J.M. Bailey, C.M. Fedo and G.A. Walker	80
60	Phospholipase D localization and substrate specificity M. McDermott, T.R. Pettitt and M.J.O. Wakelam	80
61	Expression of wild-type and truncated Hermansky-Pudlak syndrome protein J.E. Pople and B.J. Reaves	80

Abstract no.	Page no.
62 14-3-3 ζ docking to the M ₃ muscarinic receptor D.N. Robertson, J.K. Beggs, D.M. Collins, M.S. Johnson, P.J. Holland, E.M. Lutz, T. Dubois, A. Aitken and R. Mitchell	80
63 New epitope-tagged constructs of the human 5-hydroxytryptamine (HT) _{2A} receptor M.S. Johnson, E.M. Lutz, P.J. Holland and R. Mitchell	81
64 Analysis of the importance of two pleckstrin homology (PH) domains of centaurin- α 1 for PTDIns (3,4,5) P ₃ binding K.G. Brandom and K. Venkateswarlu	81.

MEMBRANE GROUP AND NEUROSCIENCE GROUP COLLOQUIUM

The Interface of Receptor Signalling and Trafficking

Poster Session Times:
 Tuesday 10 April, 16.00–18.00
 Wednesday 11 April, 16.00–18.00
 Thursday 12 April, 13.00–14.40

65 Intracellular distribution of angiotensin II type-1 receptors S.L.R. Ball, G.F. Wilkinson and J.A. Koenig	81
66 The Sec1p-like/Munc18 (SM) protein Vps45p acts as a t-SNARE (soluble <i>N</i> -ethylmaleimide-sensitive fusion protein attachment protein receptor) chaperone and positively regulates SNARE complex formation N.J. Bryant and D.E. James	81
67 Use of a 2×FYVE–EGFP fusion protein to localize phosphatidylinositol 3-phosphate in living cells during <i>Salmonella</i> infection K. Pattni, M. Jepson, H. Stenmark and G. Banting	82
68 Phospholipase D _{1b} is activated by Rac1, ADP-ribosylation factor (ARF)6 and protein kinase C α in RBL-2H3 cells D.J. Powner, M. Hodgkin and M.J.O. Wakelam	82
69 Regulation of epidermal growth factor receptor traffic by RhoB A. Gampel, M. Wherlock and H. Mellor	82
70 Casein kinase II is associated with clathrin-coated vesicles V.I. Korolchuk and G. Banting	82
71 Tyrphostins: inhibitors of membrane traffic pathways? D. Banbury, J. Oakley, C. Crump, R. Sessions and G. Banting	83
72 Agonist-induced internalization of the mGlu _{1a} receptor is arrestin- and dynamin-dependent S.J. Mundell, A.L. Matharu, G. Pula, P.J. Roberts and E. Kelly	83
73 Effect of pertussis toxin on the internalization of the somatostatin ₂ receptor L.A. Frawley and J.A. Koenig	83
74 Dual regulation of endothelial differentiation gene (EDG)1 receptor phosphorylation and internalization by sphingosine-1-phosphate and protein kinase C is controlled by its C-terminus K.R. Watterson and T.M. Palmer	83

Abstract no.		Page no.
75	Internalization of mammalian and non-mammalian GnRH receptors: uncoupling of dynamin-dependent internalization from mitogen-activated protein (MAP) kinase signalling J.N. Hislop, H.M. Everest, A. Flynn and C.A. McArdle	84
76	Purification of a novel 50 kDa protein that regulates Ca ²⁺ -dependent exocytosis in mast cells G.A. Way and A.J. O'Sullivan	84
77	Hepatocyte growth factor-regulated tyrosine kinase substrate (HRS) regulates endosomal trafficking and tyrosine kinase receptor signalling T.E. Lloyd, R.A. Atkinson, M.N. Wu and H.J. Bellen	84
78	Study of a novel protein CHC22, a muscle-specific form of clathrin M.C. Towler, S.-H. Lui, E. Chen, C.-Y. Chen, W. Song, G. Apodoca and F.M. Brodsky	84
79	Regulation of endogenous secretin-receptor responsiveness by protein kinase C R. Ghadessy and E. Kelly	85
80	Localization of presynaptic metabotropic glutamate receptors at the Calyces of Held B. Pilkington, M. Cuttle, J. Chad and V. O'Connor	85
81	A role for receptor internalization in M ₃ muscarinic receptor association with ADP-ribosylation factor (ARF) and activation of phospholipase D D.N. Robertson, M.S. Johnson, E.M. Lutz, P.J. Holland and R. Mitchell	85
82	<i>In vivo</i> imaging of ryanodine-receptor-mediated release of Ca ²⁺ from dense core secretory vesicles K. Mitchell, A. Varadi, P. Pinton, T. Pozzan, R. Rizzuto and G.A. Rutter	85
83	Desensitization and trafficking of the rat A _{2B} adenosine receptor A. Matharu, S. Mundell and E. Kelly	86
84	An investigation of the role of TGN38 in secretion and characterization of its luminal domain S.S. Lee and G. Banting	86
85	Azithromycin (AZ), a lysosomotropic antibiotic, differently impairs various types of endocytosis in cultured macrophages D. Tyteca, F. Van Bambeke, P.M. Tulkens, P.J. Courtoy and M.P. Mingeot-Leclercq	86
86	Investigation of surface expression of a GluR2 α -amino-3-hydroxy-5-methyl-4-isoxazolepropionic acid (AMPA) receptor subunit tagged with a pH-sensitive green fluorescent protein S.A. De La Rue, C.J. Matthews, G.S. Ralph, J.B. Uney, G.L. Collingridge and J.M. Henley	86
87	Role of phosphatidylinositol 3-kinases in sorting of epidermal growth factor receptors within multivesicular endosomes C.E. Futter, L.M. Collinson, J.M. Backer and C.R. Hopkins	87
88	Mutations in the band 3 (<i>AE1</i>) gene associated with distal renal tubular acidosis A.M. Toye, L.J. Bruce, O. Wrong, M.T. Young, R.J. Unwin and M.J.A. Tanner	87
89	Activation of γ -aminobutyric acid (GABA)-B receptors causes a translocation of activating transcription factor 4 (ATF4) from the nucleus in cultured hippocampal neurons L.A. Pickard, G. Meyer, E. Molnar and J.M. Henley	87

Abstract no.	Page no.
90 Modulation of recombinant NR1a/NR2A receptors by mGluR _{5a} activation in HEK-293 cells may involve tyrosine phosphorylation V.J. Collett and G.L. Collingridge	87
91 Characterization of the interaction between the kainate receptor subunit GluR5-2b and PICK1 (protein interacting with C-kinase) J.C. Francis, H. Hirbec, S.P. Braithwaite, K. Dev and J.M. Henley	88
92 Developmental profile of γ -aminobutyric acid (GABA)-B receptor subunit expression in hippocampal cultures R.J. Sutch, L. Pickard and J. Henley	88
93 Tethering proteins in endoplasmic reticulum (ER)–Golgi trafficking C.I. Alvarez and E.S. Sztul	88
94 Syntenin interacts with kainate receptors: <i>in vitro</i> and <i>in vivo</i> evidence H. Hirbec, S.E. Lauri, J.C. Francis, S.P. Braithwaite, J.T. Isaac, G.L. Collingridge and J.M. Henley	88
95 Use of glutathione S-transferase pull-down assays to identify new interactions between the PICK1 (protein interacting with protein C-kinase) and GRIP proteins and the glutamate receptors O. Perestenko, H. Hirbec, K. Dev, A. Nishimune, G. Meyer, J.C. Francis and J.M. Henley	89
96 γ -Aminobutyric acid (GABA)-B receptor binds a novel scaffolding protein that forms a multiple signal transduction protein complex A. Nishimune, S. Kantamneni, N. Vinh, G. Meyer and J.M. Henley	89
