Biochemical Society Transactions. This journal contains reports of the formal presentations of data and comments communicated to the Biochemical Society at Meetings and Colloquia organized either by the Society or by the Groups of the Society. It is not a journal for the direct reporting of biochemical data. However, short reviews that survey important areas of biochemistry will be considered, but authors should consult the Managing Editor of Biochemical Society Transactions before preparing such articles.

Communications to be published in Biochemical Society Transactions should be prepared to the instructions printed in the current copy of the Agenda Papers. The general requirements for presentation will be similar to those of the Biochemical Journal. Should any problems arise concerning the preparation of papers for Biochemical Society Transactions authors are recommended to use the ‘Policy of the Journal and Instructions to Authors’ [Biochem. J. (1975) 145, 1–20] as a general guide. SI symbols for units will be used [see Pure Appl. Chem. (1970) 21, 1–44; Quantities, Units & Symbols (1971) The Royal Society, London].

In 1975 Volume 3 will be published. This will be in six parts published at approximately bi-monthly intervals. The subscription to non-members will be £18.00, except for subscribers in U.S.A., Canada and Mexico, for whom the rate is $40.00 or the sterling equivalent at the time of payment. Despatch will be made by air freight to these countries.

A concessionary joint subscription is available to subscribers to both the Biochemical Journal and Biochemical Society Transactions, at a saving of £10.00 ($25.00). The joint subscription is £113.00 (air freight joint subscription $280.00 or the sterling equivalent).

Volumes 1 and 2 of Biochemical Society Transactions are available at £15.00 ($40.00) complete or £3.00 ($8.00) per part.

Orders, back numbers and lost copies. Orders, enquiries for back numbers and claims regarding issues lost or damaged should be addressed to: Biochemical Society (Publications), P.O. Box 32, Commerce Way, Whitehall Road Industrial Estate, Colchester CO2 8HP.

No claims can be considered if they are received later than three months after the date of posting of Transactions.

Advertisements. Applications for advertising space should be sent to the Advertising Department, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [01-242 1076 (4 lines)]. Copy is required eight weeks before publication date. Rate cards are available on request.
The Biochemical Society exists to advance the science of biochemistry through meetings and publications. Meetings are held at different places; original papers are presented and special topics are discussed at symposia and colloquia.

Persons interested in biochemistry are eligible for election as Members. Details of further facilities accorded to Members, and forms of application for membership, are available from the Executive Secretary, The Biochemical Society, 7 Warwick Court, London WC1R 5DP [Telephone 01-242 1076 (4 lines)].
The Osmotic Pressure of Biological Macromolecules
M. Tombs and A. R. Peacocke

Measurements of osmotic pressure have contributed much to the study of macromolecules in solution, and recent improvements in instrumentation have further enhanced the usefulness of the method. This book provides a comprehensive account of both the practice of osmotic pressure measurement and the theory that underlies it. £7

Monographs in Physical Biochemistry

Biological Membranes
Twelve Essays on their Organization, Properties, and Functions
Edited by D. S. Parsons

Membranes play a central part in the activities of living cells. These essays emphasize the dynamic nature of their structure and of the biochemical processes that control the movement of substances through them. The topics considered include cell fractionation, physical biochemistry, the biochemistry of development, the biochemistry of metal ions, the use of artificial membranes, and physiological aspects of membrane transport. £4.25

Principles and Problems in Physical Chemistry for Biochemists
Nicholas C. Price and Raymond A. Dwek

Student biologists and biochemists are here introduced to physical chemistry by means of worked examples and problems, and brief explanations of the most important theoretical points. The text is developed logically and shows the student how it is possible, by using thermodynamic quantities, to predict whether a process can occur, and from kinetic studies to predict how fast this will happen. £5.50; paper covers £2.35

THE BIOCHEMICAL SOCIETY
SPECIAL PUBLICATIONS SERIES

No. 1  BIOCHEMISTRY AND MENTAL ILLNESS

Edited by L. L. IVERSEN and S. P. R. ROSE
1973  261 pp.  £4.50 ($12.00)

No. 2  BIOCHEMISTS IN INDUSTRY

Edited by K. W. FULLER
1973  68 pp.  £1.25 ($3.50)

No. 3  THE METABOLISM AND FUNCTION OF VITAMIN D

Edited by D. R. FRASER
1974  114 pp.  £4.00 ($10.50)

No. 4  MEMBRANE ADENOSINE TRIPHOSPHATASES AND TRANSPORT PROCESSES

Edited by J. R. BRONK
1974  197 pp.  £5.00 ($12.50)

Available from your bookseller or agent, or direct from
THE BIOCHEMICAL SOCIETY (PUBLICATIONS)
P.O. Box 32, Commerce Way,
Colchester CO2 8HP, Essex

Leaflets giving details of contents of the above publications are available on request
