THE SECOND THUDICHUM LECTURE

	PAGE
Cerebral isolates and neurochemical discovery. <i>By</i> H. McIlwain	579
A note on the life of J. L. W. Thudichum (1829–1901). <i>By</i> J. N. Hawthorne	591

557TH MEETING, LIVERPOOL

Colloquium: The Size and Disposition of Proteins in Membranes

Size determination of membrane proteins. <i>By</i> A. H. Maddy	593
Topography of membrane proteins. <i>By</i> M. J. A. Tanner	596
Topography of mitochondrial membrane proteins. <i>By</i> H. Baum & J. M. Wrigglesworth	598
The influence of lipids on the conformation of the adenosine triphosphatase of sarcoplasmic reticulum and of other membrane proteins. <i>By</i> N. M. Green	604

Colloquium: Interaction between Cells, Liposomes and Micelles

The interaction of phospholipid vesicles with mammalian cells <i>in vitro</i> . <i>By</i> D. Papahadjopoulos, G. Poste & E. Mayhew	606
Protein-mediated transfer of phosphatidylcholine between membranes and liposomes. <i>By</i> K. W. A. Wirtz, H. H. Kamp & L. L. M. van Deenen	608
Lipids and cell fusion. <i>By</i> J. A. Lucy	611
Homing of liposomes to target cells. <i>By</i> G. Gregoriadis	613
Lipid–sterol interactions in liposomes and membranes. <i>By</i> B. de Kruyff	618

Colloquium: Drug–Protein Binding

The role of hydrophobic binding in drug–protein interactions (<i>by title only</i>). <i>By</i> A. Rosen	622
Covalent binding: Useful index of the formation of chemically reactive drug metabolites. <i>By</i> J. R. Mitchell	622
Ligandin. <i>By</i> B. Ketterer, E. Tipping, J. Meuwissen & D. Beale	626
The binding of substrates and inhibitors to dihydrofolate reductase. <i>By</i> G. C. K. Roberts	630
The metallothioneins. <i>By</i> M. Webb	632
Drug–albumin binding. <i>By</i> W. E. Lindup	635

Colloquium: Tertiary Structure of Transfer Ribonucleic Acid

Stereochemical and functional aspects of transfer ribonucleic acids. <i>By</i> F. Cramer	640
The three-dimensional structure of yeast phenylalanine transfer ribonucleic acid and its interaction with aminoacyl synthetases. <i>By</i> A. Rich	641
The relation of structure and function of transfer ribonucleic acid, with special reference to phenylalanine and methionine transfer ribonucleic acids. <i>By</i> B. F. C. Clark	645

	PAGE
Communications	
The binding of [³ H]chlorambucil to isolated nuclear proteins of the Yoshida ascites sarcoma. <i>By</i> S. M. Sellwood, P. G. Riches & K. R. Harrap	649
<i>Euglena gracilis</i> deoxyribonucleic acid polymerases: Subcellular locations and variations during the cell cycle. <i>By</i> A. G. McLennan & H. M. Keir	652
The renaturation of subunits and subunit fragments of <i>Escherichia coli</i> ribonucleic acid polymerase. <i>By</i> P. A. Lowe & A. D. B. Malcolm	652
Chemical modification of ribonucleic acid polymerase with <i>N</i> -bromosuccinimide. <i>By</i> B. Wasylyk & A. D. B. Malcolm	654
Monomer complexes of polyadenylic acid. <i>By</i> R. J. H. Davies	655
5-Carbamoylmethyluridine: A new minor nucleoside of transfer ribonucleic acid. <i>By</i> D. B. Dunn & M. D. M. Trigg	656
The recognition of methionine analogues by <i>Escherichia coli</i> methionyl-transfer ribonucleic acid synthetase. <i>By</i> J. M. Old & D. S. Jones	659
Transfer ribonucleic acid from <i>Scenedesmus obliquus</i> D3. <i>By</i> D. S. Jones & F. T. Jay	660
The identification of sulphated glycoproteins in rat whole saliva. <i>By</i> G. Embery & E. Whitehead	661
The influence of the intrapolymer environment on periodate oxidation of uronic acids in polyuronides and glycosaminoglycuronans. <i>By</i> J. E. Scott & M. J. Tigwell	662
Dolichol monophosphate and the transfer of <i>N</i> -acetylglucosamine in pig liver microsomal preparations. <i>By</i> G. Palamarczyk, J. Harrison & F. W. Hemming	665
The mannosylation of dolichol diphosphate oligosaccharides and the formation of oligosaccharides and glycoproteins in pig liver microsomal preparations. <i>By</i> G. J. A. Oliver, J. Harrison & F. W. Hemming	666
Effect of environmental changes on the lipid composition and (Na ⁺ + K ⁺)-dependent adenosine triphosphatase in the gills of the eel, <i>Anguilla anguilla</i> . <i>By</i> A. J. Thomson, J. R. Sargent & J. M. Owen	668
Biochemical changes in crustaceans and other species associated with alterations in environmental salinity. <i>By</i> A. K. Huggins, D. Amrit & C. Haworth	669
Problem of the reactive species from enzymic and chemical oxidations of <i>o</i> -diphenols: Anomalies in the trapping of <i>o</i> -quinonoids with benzenesulphinic acid. <i>By</i> R. Davies & W. S. Pierpoint	671
The functioning of a nicotinamide-adenine dinucleotide-dependent dehydrogenase and the structure adjacent to the reacting carbon atom of the substrate. <i>By</i> I. H. White & J. Jeffery	674
Studies of the substrate specificity of cholesterol oxidase from <i>Nocardia erythropolis</i> in the oxidation of 3-hydroxy steroids. <i>By</i> A. G. Smith & C. J. W. Brooks	675
Testosterone metabolism in superfused human hyperplastic prostate. <i>By</i> G. H. Beastall	677
Interactions of steroid sulphates, long-chain fatty acids and related compounds with a low-molecular-weight carcinogen-binding protein from rat liver. <i>By</i> E. Tipping, B. Ketterer, L. Christodoulides & G. Enderby	680
The effect of increasing phenylalanine concentration on phenylalanine metabolism in perfused rat liver. <i>By</i> M. B. H. Youdim, B. Mitchell & H. F. Woods	683
The metabolism of some [1- ¹⁴ C]glycyl dipeptides in mice. <i>By</i> B. Sampson, B. Barlow & A. Wilkinson	684
Metabolism of ¹⁴ C-ring-labelled paracetamol in humans. <i>By</i> B. H. Thomas, L. T. Wong, I. Hynie & W. Zeitz	687

	PAGE
Effects of quaternary ammonium compounds on brain sodium-plus-potassium-ion-stimulated adenosine triphosphatase (<i>by title only</i>). <i>By</i> Z. Abdul-Cader, M. M. de Souza, J. Parry & P. T. Nowell	688
The distribution of lysergic acid diethylamide ($[^3\text{H}]$ LSD) in the rat (<i>by title only</i>). <i>By</i> J. K. G. Singh & D. J. Back	688
The accessibility of cytidine residues in native and partially denatured <i>Escherichia coli</i> phenylalanine transfer ribonucleic acid (<i>by title only</i>). <i>By</i> M. Lowdon & J. P. Goddard	688
The nitrate respiration complex of <i>Escherichia coli</i> : Subunit composition. <i>By</i> R. A. Clegg	689
The size of nitrate reductase in <i>Escherichia coli</i> . <i>By</i> R. A. Clegg	691
Changes in sugar composition of membrane-bound glycoproteins during postnatal development of rat cerebellum. <i>By</i> G. Gombos, J.-P. Zanetta, M. S. Ghandour, J. Robert & G. Vincendon	694
Changes of ganglioside pattern during postnatal development of rat cerebellum. <i>By</i> G. Vincendon, M. S. Ghandour, J. Robert, G. Gombos & G. Rebel	696
Cerebroside accumulation, biphasic myelination and fatty acid synthesis in pig spinal cord during development. <i>By</i> D. Sweasey & D. S. P. Patterson	698
The effects of cobalt-induced epilepsy on the unesterified fatty acid content of rat cerebral cortex. <i>By</i> G. G. Lunt & Y. K. Grove	701
Effect of age on the development and properties of brain monoamine oxidase. <i>By</i> M. B. H. Youdim, D. G. Grahame-Smith & M. Holzbauer	702
5-Hydroxytryptamine synthesis in the rat brain after chlorpromazine administration. <i>By</i> D. A. Bender	704
Further studies on brain γ -aminobutyric acid metabolism after administration of pyridoxine to vitamin B-6-deficient suckling rats. <i>By</i> B. Ackroyd & W. R. D. Smith	707
Studies on free calcium inside pigeon erythrocyte 'ghosts' by using the calcium-activated luminescent protein, obelin. <i>By</i> A. K. Campbell & R. L. Dormer	709
Administration of insulin to rats induces cycloheximide-sensitive changes in the calcium-ion-transport system of mitochondria isolated subsequently from liver. <i>By</i> G. J. Barritt, D. M. Dorman & F. L. Bygrave	711
The distribution of bivalent-cation-stimulated adenosine triphosphate hydrolysis and calcium accumulation in subcellular fractions of rat pancreas. <i>By</i> B. E. Argent, R. K. Smith & R. M. Case	713
A kinetic analysis of the fructose 1,6-diphosphate-activated pyruvate kinase from the hepatopancreas of <i>Carcinus maenas</i> . <i>By</i> I. G. Giles, P. C. Poat & K. A. Munday	714
Inhibition of rat and sheep adipose-tissue lipogenesis by palmitic acid and linoleic acid added <i>in vitro</i> . <i>By</i> R. G. Vernon	717
Alterations in adipose-tissue pyruvate dehydrogenase activity in starved, fat-fed and diabetic rats. <i>By</i> D. Stansbie, R. M. Denton & P. J. Randle	718
Postsynthetic stabilized modification of adenylate cyclase by metabolites. <i>By</i> S. Brydon-Golz & A. Bennun	721
Adrenergic controls in the S phase of liver regeneration. <i>By</i> S. Thrower & M. G. Ord	724
Comparison of nervous-tissue lipid fatty acid patterns of various animal species with particular reference to docosahexaenoic acid. <i>By</i> R. S. Jerde, P. B. Joel, J. R. Stroemer, R. O. Haight & C. D. Joel	727

Effect of liposomal entrapment on the protective action of glutathione against paracetamol-induced liver necrosis. <i>By</i> A. Malnoë, A. Louis, M. S. Benedetti, M. Schneider, R. L. Smith, L. Kreber & R. Lam	730
Effects of detergents on virus- and chemically induced fusion of erythrocytes. <i>By</i> C. A. Hart, Q. F. Ahkong, D. Fisher, A. H. Goodall, T. Hallinan & J. A. Lucy	733
Effects of thiol reagents on virus- and chemically induced fusion of erythrocytes. <i>By</i> C. A. Hart, Q. F. Ahkong, D. Fisher, T. Hallinan, S. J. Quirk & J. A. Lucy	734
The protective effects of cephaloridine on rat kidney lysosomes <i>in vitro</i> . <i>By</i> M. Fry, E. O. Ngaha & D. T. Plummer	736
Phosphorylation of homomevalonic acid by an enzyme system from rat liver. <i>By</i> A. S. Beedle, H. H. Rees & T. W. Goodwin	738
Phosphatidylcholine biosynthesis in the anaerobic protozoon <i>Entodinium caudatum</i> . <i>By</i> F. L. Bygrave & R. M. C. Dawson	740
Carotenoid biosynthesis by a cell-free preparation from a <i>Flavobacterium</i> species. <i>By</i> D. J. Brown, G. Britton & T. W. Goodwin	741
Phenazine biosynthesis by pseudomonad. <i>By</i> G. S. Byng & J. M. Turner	742
The affinity of retinol and its analogues for retinol-binding protein. <i>By</i> H. Muhilal & J. Glover	744
Presence of plasma-membrane enzymes in bile and their partial purification by affinity chromatography with concanavalin A. <i>By</i> G. Holdsworth & R. Coleman	746
Effects of detergents on erythrocyte membranes: Different patterns of solubilization of the membrane proteins by dihydroxy and trihydroxy bile salts. <i>By</i> R. Coleman & G. Holdsworth	747
Changes in the phospholipid composition of sheep reticulocytes on maturation. <i>By</i> P. Kemp, J. C. Ellory & E. A. Munn	749
Elevation of intracellular calcium ion concentration provokes production of 1,2-diacylglycerol and phosphatidate in human erythrocytes. <i>By</i> D. Allan & R. H. Michell	751
Difference in the enzymic, polypeptide, glycopeptide, glycolipid and phospholipid compositions of plasma membranes from the two surfaces of intestinal epithelial cells. <i>By</i> B. A. Lewis, G. M. Gray, R. Coleman & R. H. Michell	752
Identification and isolation of basolateral plasma membranes from intestinal epithelial cell sheets. <i>By</i> B. A. Lewis, A. Elkin, R. H. Michell & R. Coleman	754
Topographical association of a glucokinase with a Golgi-rich fraction from rat liver. <i>By</i> G. Berthillier, R. Coleman & D. G. Walker	755
Preparation and properties of membranes from the Gram-negative bacterium <i>Erwinia carotovora</i> . <i>By</i> S. D. Shukla & J. M. Turner	756
Isolation and analysis of the luminal membrane from the calf urinary bladder. <i>By</i> C. D. Stubbs, B. Ketterer & R. M. Hicks	759
Isolation and characterization of a cell-surface fraction from hamster-embryo fibroblasts. <i>By</i> J. M. Graham & R. O. Hynes	761
Cross-linking of isolated oligomycin-insensitive adenosine triphosphatase from ox heart mitochondria. <i>By</i> P. T. Wingfield & D. H. Boxer	763
The polypeptides of the ox heart mitochondrial inner membrane: Isolation of the major component. <i>By</i> D. H. Boxer & P. T. Wingfield	765
Further purification and properties of the calcium-activated luminescent protein obelin, and its entrapment in liposomes. <i>By</i> R. L. Dormer & A. K. Campbell	768

CONTENTS

ix

Biosynthetic utilization of ethanolamine by <i>Erwinia carotovora</i> . <i>By</i> H. B. Clough, S. D. Shukla & J. M. Turner	769
The role of unsaturated fatty acids in mitochondrial membrane functions. <i>By</i> J. M. Haslam & N. F. Fellows	772
High-performance liquid chromatography of ubiquinones, ficaprenols and dolichols. <i>By</i> P. L. Donnahey & F. W. Hemming	775
BOOK REVIEWS	777
