THE TENTH HOPKINS MEMORIAL LECTURE

	PAGE
Reconstitution, mechanism of action and control of ion pumps. <i>By</i> E. Racker	785

558TH MEETING, EDINBURGH

Colloquium: Cytochrome *P*-450

Ligand reactions of cytochrome <i>P</i> -450. <i>By</i> V. Ullrich, W. Nastainczyk & H. H. Ruf	803
Mono-oxygenase-linked hydrogen peroxide production and degradation in liver microsomal fractions. <i>By</i> A. G. Hildebrandt, M. Tjoe & I. Roots	807
Cytochrome <i>P</i> -450: An oxygenase, peroxidase and oxidase. <i>By</i> R. W. Estabrook, J. Werringer, E. G. Hrycaj, P. J. O'Brien, A. D. Rahimtula & J. A. Peterson	811
Purified liver microsomal cytochrome <i>P</i> -450: Catalytic mechanism and characterization of multiple forms. <i>By</i> M. J. Coon, G. D. Nordblom, R. E. White & D. A. Haugen	813
Multiplicity of liver microsomal cytochrome <i>P</i> -450: Separation, purification and characterization (<i>by title only</i>). <i>By</i> A. Y. H. Lu, D. Ryan, J. Kawalek, P. Thomas, S. B. West, M. T. Huang & W. Levin	817
Studies on cytochrome <i>P</i> -450-linked functions in isolated rat liver cells. <i>By</i> S. Orrenius, P. Moldéus, H. Vadi & R. Grundin	817
The binding of catechol metabolites to proteins: Involvement of cytochrome <i>P</i> -450 and nicotinamide-adenine dinucleotide-cytochrome <i>c</i> oxidoreductase. <i>By</i> H. M. Bolt, P. Wollenberg, M. Scheulen, H. Kappus & H. Remmer	820
Product formation from ferrous oxy-cytochrome <i>P</i> -450. <i>By</i> I. C. Gunsalus, S. G. Sligar & P. G. Debrunner	821
Cytochrome <i>P</i> -450-dependent hydroxylations in biosynthesis and metabolism of bile acids. <i>By</i> I. Björkhem, H. Danielsson & K. Wikvall	825
Electron-paramagnetic-resonance studies of cytochrome <i>P</i> -450 in whole rat adrenal glands. <i>By</i> E. R. Simpson, D. L. Williams-Smith, S. M. Barlow & P. J. Morrison	828
Cytochrome <i>P</i> -450 and steroidogenesis. <i>By</i> J. I. Mason & G. S. Boyd	832

Colloquium: Carbohydrate Metabolism in Micro-Organisms

The utilization of glucose by <i>Escherichia coli</i> . <i>By</i> H. L. Kornberg	835
The methylglyoxal by-pass of the Embden-Meyerhof pathway. <i>By</i> R. A. Cooper	837
Structure and biosynthesis of the teichoic acids. <i>By</i> J. Baddiley	840
Lipids in the synthesis of lipopolysaccharides and exopolysaccharides. <i>By</i> I. W. Sutherland	840

	PAGE
The production of industrially important bacterial polysaccharides. <i>By</i> C. Bucke, L. Deavin, C. J. Lawson & D. F. Pindar	844
Colloquium: The Structures of some Carbohydrate-Metabolizing Enzymes	
Active-site-directed inhibitors of glycosidases. <i>By</i> G. Legler	847
Structure and regulation of enzymes for the degradation and resynthesis of glycogen. <i>By</i> P. Cohen, J. F. Antoniw, H. G. Nimmo & C. G. Proud	849
Structures of glycolytic enzymes (<i>by title only</i>). <i>By</i> D. C. Phillips	855
The mechanism of action of some glycohydrolases. <i>By</i> C. K. de Bruyne	855
Colloquium: High-Efficiency Liquid Chromatography and Mass Spectrometry	
Continuous monitoring of liquid chromatography by mass spectrometry: Application to polypeptide sequencing. <i>By</i> F. W. McLafferty & B. G. Dawkins	856
Liquid-chromatography hardware: A consolidation phase? <i>By</i> P. A. Bristow	858
Some applications of high-pressure liquid chromatography in biochemistry. <i>By</i> I. Halász	860
Pharmaceutical applications of high-efficiency liquid chromatography. <i>By</i> F. Bailey	861
High-performance liquid chromatography of dansyl derivatives of amino acids, peptides and biological amines (<i>by title only</i>). <i>By</i> E. Bayer	864
Biochemical applications of high-pressure liquid chromatography. <i>By</i> A. Pryde	864
High-pressure liquid chromatography of bile pigments and natural porphyrins. <i>By</i> M. S. Stoll, C. K. Lim & C. H. Gray	867
The use of mass spectrometry for off-line monitoring of liquid chromatography. <i>By</i> B. Wilson, H. Greenwood, W. Snedden & R. E. Majors	867
Colloquium: Control of Antibody Biosynthesis	
Investigation of the genetic diversity of mouse immunoglobulin κ -chain genes. <i>By</i> T. H. Rabbitts & C. Milstein	870
Ontogeny and heterogeneity of immunoglobulin-producing and mitogen-reactive lymphocytes (<i>by title only</i>). <i>By</i> F. Melchers	872
Genetic control of lymphocyte receptor specificity (<i>by title only</i>). <i>By</i> K. Eichmann	872
Messenger ribonucleic acids from mutant myeloma cells. <i>By</i> D. S. Secher, R. F. Gesteland & C. Milstein	873
Communications	
A possible enzymic assay for trichothecene mycotoxins in animal feedstuffs. <i>By</i> P. M. D. Foster, T. F. Slater & D. S. P. Patterson	875
Hepatic changes produced by administration of pure isomers of polychlorinated biphenyls (<i>by title only</i>). <i>By</i> M. D. Stonard & J. B. Greig	878
Studies on a 4-methoxybenzoate <i>O</i> -demethylase from <i>Pseudomonas putida</i> : Substrate and solvent isotope effects on the uncoupling of mono-oxygenation. <i>By</i> F.-H. Bernhardt & H.-H. Ruf	878
Glucuronidation of 1-naphthol and bilirubin by intact liver and microsomal fraction: Influence of the uridine diphosphate glucuronic acid content. <i>By</i> M. M. Abou-El-Makarem, G. Otani & K. W. Bock	881
The metabolism of cimetidine in the rat, dog and man. <i>By</i> D. C. Taylor & P. R. Cresswell	884
Metabolism of 1,25-dihydroxy[26,27- ³ H]cholecalciferol in man and in the rat after oral and intravenous dosage. <i>By</i> E. B. Mawer, J. Backhouse, S. Hughes & C. M. Taylor	886

	PAGE
The influence of the shape of the substrate on the steric course of reactions catalysed by a dehydrogenase dependent on nicotinamide-adenine dinucleotide. <i>By</i> W. Gibb, J. Jeffery, D. N. Kirk & H. Mahdi	888
Prostaglandins and human placental oestradiol-17 β dehydrogenase. <i>By</i> M. A. Shaw & J. Jeffery	889
Comparative studies on the metabolism of radioactive oestrone and oestrone sulphate in the isolated perfused rat liver. <i>By</i> M. Höller, M. Napp & H. Breuer	890
Evidence for the activation of bovine adrenal cholesterol ester hydrolase by a phosphorylation involving an adenosine 3':5'-cyclic monophosphate-dependent protein kinase. <i>By</i> G. J. Beckett & G. S. Boyd	892
The effects of luteinizing hormone <i>in vivo</i> on cholesterol side-chain cleavage activity in mitochondria of the rat corpus luteum. <i>By</i> J. R. Arthur & G. S. Boyd	895
Synthesis and enzymic properties of a 63-residue analogue of ribonuclease A. <i>By</i> B. Gutte	897
A shortened synthetic pro-insulin. <i>By</i> W. Kullmann & B. Gutte	899
Insulin biosynthesis in a broken-cell preparation of islets of Langerhans. <i>By</i> D. G. Parry & K. W. Taylor	903
The electrogenicity of amino acid absorption in mouse ascites-tumour cells. <i>By</i> R. D. Philo & A. A. Eddy	904
Amino acid incorporation into transfer ribonucleic acid fragments and into heterologous combinations of fragments. <i>By</i> W. Wübbeler, C. Lossow, F. Fittler & H. G. Zachau	906
The mechanism of aminoacylation of yeast phenylalanine transfer ribonucleic acid. <i>By</i> R. Thiebe	907
Kinetic mechanism of transfer ribonucleic acid (cytosine-5)-methylase from rat liver. <i>By</i> P. Kahle & H. Kröger	908
Purification of methionine-accepting transfer ribonucleic acid from <i>Scenedesmus obliquus</i> D3. <i>By</i> D. S. Jones & F. T. Jay	909
Polyacrylamide-gel electrophoresis of messenger ribonucleic acid extracted from cells infected with pig herpes virus 1. <i>By</i> J. K. Vass & W. S. Stevely	910
Intracellular distribution of ribonuclease activity during erythroid-cell maturation. <i>By</i> S. A. Hulea & H. R. V. Arnstein	911
Procollagen biosynthesis and polyribosome-membrane interactions in embryonic chick tendon cells. <i>By</i> R. Harwood, B. Durrant, M. E. Grant & D. S. Jackson	914
Further characterization of procollagen messenger ribonucleic acid from embryonic chick tendon cells. <i>By</i> R. Harwood, M. E. Grant & D. S. Jackson	916
Studies on collagen synthesis in the mature dermal scar in the guinea pig. <i>By</i> M. J. Barnes, L. F. Morton, A. J. Bailey & R. C. Bennett	917
Pyruvate dehydrogenase complex from brewer's yeast: Regulation by the carbon source. <i>By</i> J. Ullrich & U. Wais	920
Substrate stereochemistry of the cleavage reaction in citramalate lyase. <i>By</i> W. Buckel & A. Bobi	924
Investigations into the primary and tertiary structures of ox liver glutamate dehydrogenase. <i>By</i> I. Rasched, A. Bohn, M. David & H. Sund	926
Hypophosphatasia: Enzyme studies in cultured cells and tissues. <i>By</i> W. G. Brydon, P. M. Crofton, A. F. Smith, D. G. D. Barr & R. A. Harkness	927
Metabolite concentrations in bacteria: the identification of controlled enzymes from anomalous metabolite concentrations in a mutant. <i>By</i> A. M. Cook, E. Urban & H. G. Schlegel	929

	PAGE
Isopycnic equilibration of gastrin-storage organelles. <i>By</i> C. N. A. Trotman, I. J. S. Fiddes, E. R. Grund, B. McFarlane, S. McHanwell, D. J. Sanders, C. Sanderson & B. Shaw	931
Purification of human C1 esterase inhibitor. <i>By</i> W. H. K. Anderson, J. K. Smith & J. E. Fothergill	933
Proteolytic specificity of human complement subcomponent C1s. <i>By</i> G. K. Scott & J. E. Fothergill	934
Artificial dimers of actin. <i>By</i> H. Fasold, H. Baumert & N. Bender	935
Distribution of transmitter-related enzymes in the rat sensorimotor cortex. <i>By</i> P. W. Beesley & P. C. Emson	936
Storage of iron as ferritin in the liver of the protein-deficient rat. <i>By</i> M. Stanton & W. N. M. Ramsay	939
A study of the fluorescence of 5-hydroxycoumarin, 5-methoxycoumarin and aflatoxin B1. <i>By</i> E. A. Bababunmi, M. R. French, R. J. Rutman, O. Bassir & L. G. Dring	940
Polymyxin-B-binding capacities of isolated phospholipids from <i>Salmonella typhimurium</i> . <i>By</i> M. Teuber, H.-P. Engel & J. Bader	943
Reductive mobilization of ferritin iron by reduced nicotinamide-adenine dinucleotide and flavin mononucleotide. <i>By</i> R. R. Crichton, F. Roman & M. Wauters	946
The interaction of cod liver mitochondria with copper ions. <i>By</i> B. N. Zaba & E. J. Harris	949
Effects of sucrose and dextran on the toxicity of lead to mitochondria in the presence of inorganic phosphate <i>in vitro</i> . <i>By</i> D. R. Parr & E. J. Harris	951
Inhibition of mitochondrial accumulation and utilization of glutamate occurring when oxoglutarate oxidation is impeded by poison or lack of cofactors. <i>By</i> E. J. Harris	953
Intramitochondrial synthesis of free and bound <i>N</i> -acetylneuraminic acid. <i>By</i> H. Luthe, H.-J. Luck, H. Unger & H.-D. Söling	955
The effect of ionic strength on the magnesium ion-activated adenosine triphosphatase of natural actomyosin from mammalian skeletal muscle. <i>By</i> C. Mothersill & J. V. McLoughlin	956
The influence of various compounds <i>in vitro</i> on the hepatic microsomal metabolism of dimethylnitrosamine in the rat. <i>By</i> B. G. Lake, M. J. Minski, J. C. Phillips, S. D. Gangolli & A. G. Lloyd	959
Kinetics of microsomal ω - and $(\omega - 1)$ -hydroxylation of 4-chloropropionanilide. <i>By</i> W. Lenk	961
Substrate specificity of mitochondrial and microsomal cholesterol-oxidizing systems. <i>By</i> J. R. Arthur, H. A. F. Blair, G. S. Boyd, N. G. Hattersley & K. E. Suckling	963
The role of cytochrome <i>P</i> -450 in the 7-hydroxylation of cholesterol. <i>By</i> S. Balasubramaniam & K. A. Mitropoulos	964
Cumene hydroperoxide-mediated formation of inhibited complexes of methylenedioxyphenyl compounds with cytochrome <i>P</i> -450. <i>By</i> C. R. Elcombe, J. Bridges, R. H. Nimmo-Smith & J. Werringloer	967
Structure-binding relationships between benzimidazoles and cytochrome <i>P</i> -450. <i>By</i> M. Dickins, C. R. Elcombe, R. H. Nimmo-Smith & J. W. Bridges	970
Differences caused by different inducing substances in the specificity of hydroxylases and in the type of hydroxylating cytochrome in liver microsomal fractions. <i>By</i> G. Mohn	972

	PAGE
Induction of cytochrome <i>P</i> -450 in yeast by phenobarbital. <i>By</i> A. Wiseman & T.-K. Lim	974
The role of phospholipids in cytochrome <i>P</i> -450-catalysed reactions. <i>By</i> M. Ingelman-Sundberg & J.-Å. Gustafsson	977
Protection of cytochrome <i>P</i> -450 by substrates against Tween-80-assisted thermal denaturation. <i>By</i> A. Wiseman & J. A. Gondal	977
Cytochrome <i>P</i> -450 of higher plants: Its relation to other systems and reactivity. <i>By</i> P. R. Rich	980
Gel chromatography of polysaccharides. <i>By</i> G. H. Fleet & D. J. Manners	981
Exopolysaccharide formation in non-proliferating suspensions of <i>Pseudomonas</i> PB1. <i>By</i> A. G. Williams & J. W. T. Wimpenny	983
α -Glucose 1-phosphate, a precursor in the biosynthesis of maltose in higher plants. <i>By</i> N. Schilling & O. Kandler	985
Kinetic and biological properties of trehalose phosphate synthase from <i>Neurospora crassa</i> . <i>By</i> R. Betz & A. W. Holldorf	988
The development of carbohydrases in germinating rye. <i>By</i> G. M. Ballance & D. J. Manners	989
The rate and products of degradation of xylans by rumen hemicellulases. <i>By</i> I. M. Morrison	992
The control of extracellular 1,3- β -glucanase activity in the basidiomycete species QM806. <i>By</i> B. Friebe & A. W. Holldorf	994
The effect of immobilization on the action pattern of β -amylase. <i>By</i> D. Cook & W. M. Ledingham	996
<i>Bacillus pumilus</i> β -D-xylosidase: Study of the thiol groups. <i>By</i> E. Saman, M. Claeysens & C. K. de Bruyne	998
<i>Bacillus pumilus</i> β -D-xylosidase: Dimeric-tetrameric structure elucidated by cross-linking studies. <i>By</i> M. Claeysens, E. Saman & C. K. de Bruyne	999
Effect of nitrogen source on the activities of key enzymes of carbohydrate metabolism in cultured plant cells <i>in vitro</i> . <i>By</i> W. Jessup & M. W. Fowler	1001
Uptake and inducible degradation of methyl α -D-glucopyranoside and maltose by <i>Bacillus subtilis</i> . <i>By</i> A. F. Schmalreck, H. Losher & M. Teuber	1004
pH- and magnesium ion-dependence of the hydrolyses of β -D-galactopyranosyl pyridinium salts catalysed by <i>Escherichia coli</i> β -galactosidase. <i>By</i> M. L. Sinnott, O. M. Viratelle & S. G. Withers	1006
Membrane cholesterol content and malignancy of Ehrlich ascites-carcinoma cells. <i>By</i> J. C. E. Alderson & C. Green	1009
Methylmalonate as a precursor <i>in vitro</i> of branched-chain fatty acids. <i>By</i> J. R. Scaife & G. A. Garton	1011
A simple fractionation procedure for histones by block Cellogel electrophoresis (<i>by title only</i>). <i>By</i> F. Machicao & J. Sonnenbichler	1012
The histones of <i>Euglena gracilis</i> . <i>By</i> N. J. Jardine & J. L. Leaver	1012
Synthesis and applications of a two-step reagent forming cross-links between ribonucleic acid and protein. <i>By</i> G. Fink & R. Brimacombe	1014
Restriction enzyme digests of the heavy nucleolar satellite deoxyribonucleic acid of <i>Physarum polycephalum</i> . <i>By</i> E. M. Bradbury, H. R. Matthews, H. V. Molgaard & K. Murray	1015
A protein-reactive adenosine 3':5'-cyclic monophosphate analogue. <i>By</i> M. Rack	1017

	PAGE
Measurement of rat liver microsomal 3-hydroxy-3-methylglutaryl-coenzyme A reductase activity, partially purified or in microsomal suspensions. <i>By</i> Y. A. Baqir, T. A. Egan & R. Booth	1018
Mechanism of the inhibition by carbonyl cyanide <i>m</i> -chlorophenylhydrazone of cytochrome <i>P</i> -450-catalysed drug metabolism in rat liver microsomal fraction. <i>By</i> I. Tsyrllov, O. Gromova & V. Lyakhovich	1020
Glycoproteins and microsomal electron-transport components in whole mouse liver microsomal fraction and submicrosomal fractions. <i>By</i> R. H. Mull, M. Schgaguler & K. Flemming	1023
Physicochemical characterization of [¹²⁵ I]iodinated [arginine]vasopressin. <i>By</i> H. Wagner & V. Maier	1025
Glycosidases in normal and atrophic skeletal muscle. <i>By</i> R. R. Wallace & M. H. R. Lewis	1027
Evidence for several α -mannosidase activities in rat testis. <i>By</i> S. M. Snaith	1030
A comparison of the isoenzymes of <i>N</i> -acetyl- β -glucosaminidase in primate kidney and serum. <i>By</i> R. J. Pierce, R. G. Price & J. Fowler	1031
Concentrations of nicotinamide-adenine dinucleotide coenzymes in tissue cultures of liver and kidney. <i>By</i> R. Schoental	1033
The preparation and assessment of the physiological competence of isolated chicken hepatocytes. <i>By</i> A. J. Dickson & D. R. Langslow	1034
Glucose production and its hormonal control in isolated chicken hepatocytes. <i>By</i> C. E. Anderson & D. R. Langslow	1037
The effects of glucose and fructose on glycogen metabolism in the isolated perfused rat liver. <i>By</i> A. K. Walli, L. Birkmann & H. Schimassek	1039
Effects of adrenaline, 2,4-dinitrophenol and oligomycin on lipogenesis and adenine nucleotide concentrations in isolated rat adipocytes. <i>By</i> H. Kather	1042
Studies on the synergistic effect of glucose and amino acids on insulin release from isolated rat islets. <i>By</i> Q. Khalid & M. A. Rahman	1043
Variation of blood saccharoid fraction in normal and diabetic human subjects. <i>By</i> A. Khanam & M. A. Rahman	1044
Studies on rat liver lipogenic enzymes and lipids. <i>By</i> F. M. Khan & M. A. Rahman	1045
Effect of maternal malnutrition on intra-uterine growth of the human foetus. <i>By</i> A. Shariff, S. Khan & M. A. Rahman	1047
Structure and mechanism of action of uridine diphosphate apiose/uridine diphosphate xylose synthase from cell-suspension cultures of parsley (<i>Petroselinum hortense</i>). <i>By</i> U. Matern, C. Gebb, D. Baron & H. Grisebach	1048
Anomerization reactions in D-glucose metabolism. <i>By</i> B. Hess & B. Wurster	1050
Reversible dissociation of glycolytic enzymes: Kinetic studies on lactate dehydrogenase, glyceraldehyde 3-phosphate dehydrogenase and aldolase. <i>By</i> R. Jaenicke, M. Engelhard, E. Kraus & R. Rudolph	1051
The catalytically active unit of fructose 1,6-bisphosphatase and the structure of the enzyme in crude tissue extracts of the rabbit and the rat. <i>By</i> H. J. Kolb	1054
Enolase isoenzyme in mammalian tissues. <i>By</i> C. C. Rider & C. B. Taylor	1057
The amino acid sequence of yeast phosphoglycerate mutase. <i>By</i> L. A. Fothergill & R. N. Harkins	1058
Inhibition of 3-phosphoglycerate dehydrogenase from <i>Pisum sativum</i> by pyridoxal 5'-phosphate and by pyridoxamine 5'-phosphate. <i>By</i> J. C. Slaughter	1058

	PAGE
Interaction of pyridoxal 5'-phosphate and D-glucose 6-phosphate dehydrogenase (Entner-Doudoroff enzyme) from <i>Pseudomonas fluorescens</i> . By D. Lessmann & G. Kurz	1061
Essential role of histidine residues for the catalytic activity of ribose phosphate isomerase. By W. R. Alexander, K. M. Doering, G. F. Domagk & J. M. Hermens	1062
Isolation of an electrophoretically homogeneous transketolase from the yeast <i>Candida utilis</i> . By W. Specht, R. Chilla, M. Rippa & G. F. Domagk	1063
Steady-state kinetics studies: Mechanism of action of alcohol dehydrogenases from yeast, horse liver and rat liver. By M. Feraudi, M. Kohlmeier & G. Schmolz	1063
Solubilization and partial purification of N-methylglutamate dehydrogenase from <i>Pseudomonas aminovorans</i> . By C. W. Bamforth & P. J. Large	1066
The interaction of tetraiodofluorescein with glutamate dehydrogenase from bovine liver. By M. Kempfle, R. Müller & H. Winkler	1069
Studies on the mechanism of the 2-oxoglutarate dehydrogenase system. By C. L. McMinn & J. H. Ottaway	1071
Accumulation, mobilization and turnover of glycogen in the blue-green bacterium <i>Anacystis nidulans</i> . By M. Lehmann & G. Wöber	1074
Utilization of branched α -glucans in <i>Bacillus amyloliquefaciens</i> . By H. Urlaub & G. Wöber	1076
Metabolism of trehalose and pullulan during the growth cycle of <i>Aureobasidium pullulans</i> . By B. J. Catley & P. J. Kelly	1079
Comparative properties and action patterns of the hemicellulases from the phytopathogens <i>Ceratocystis paradoxa</i> and <i>Cephalosporium sacchari</i> . By R. F. H. Dekker, G. N. Richards & T. Shambe	1081
Glucose repression of the inducible catabolic pathway for pentitols in <i>Rhodotorula gracilis</i> . By M. Höfer, P. Dahle & R. Klöppel	1083
The effect of D-galactosamine and uridine on the uracil nucleotide contents of isolated rat hepatocytes. By F. Hofmann & K. Decker	1084
Regulation of L-arabinose metabolism in <i>Pseudomonas fluorescens</i> . By K.-L. Schimz & G. Kurz	1087
Formation and significance of dihydrostreptose in streptomycin biosynthesis. By H.-P. Wahl, U. Matern, S. Maier & H. Grisebach	1089
Activity of glycosidases in diabetic animals (<i>db/db</i> mice and hamsters). By V. Maier, H. Laube, H. Schatz, R. Trunk & E.-F. Pfeiffer	1092
Yeast phosphoglycerate mutase: Correlation of amino acid sequence with 0.35 nm (3.5 Å) resolution X-ray crystallographic structure. By L. A. Fothergill, G. I. Hodgson & S. Winn	1092
Synthesis of a transition-state analogue of the reaction catalysed by lactate dehydrogenase, an enzyme-catalysed intramolecular redox reaction. By W. E. Trommer, H. Blume, H. Kapmeyer & G. Pfeleiderer	1093
Synthesis of poly- β -hydroxybutyrate <i>in vivo</i> and kinetics of β -ketothiolase <i>in vitro</i> in <i>Alcaligenes eutrophus</i> H16. By E.-M. Ruhr & H. G. Schlegel	1093
Sugar-lipid intermediates related to colanic acid produced <i>in vitro</i> by mucoid mutants of <i>Escherichia coli</i> . By J. G. Johnson & D. B. Wilson	1095
Isolation of 3-deoxy-2-octulosonate 8-phosphate phosphatase, a new specific enzyme in the biosynthesis of lipopolysaccharide. By H. Berger & F. Hammer-schmid	1096

	PAGE
Model membrane vesicles from <i>Proteus mirabilis</i> lipopolysaccharide. <i>By</i> K. Nixdorff, J. Gmeiner & H. H. Martin	1097
Evidence for an alteration in a regulatory element affecting the rate of synthesis of dihydrofolate reductase in hamster cells. <i>By</i> U. J. Hänggi & J. W. Littlefield	1100
The adhesion of baby-hamster kidney cells to glass surfaces coated with glycoproteins. <i>By</i> A. Allen & S. M. Minnikin	1103
Non-covalent forces hold glycoprotein molecules together in mucous gel. <i>By</i> T. Robson, A. Allen & R. H. Pain	1105
The digestion of the glycoprotein from pig gastric mucus with pepsin and other proteolytic enzymes. <i>By</i> M. Scawen & A. Allen	1107
Studies on the enzymic sialylation of hamster Tamm-Horsfall glycoprotein. <i>By</i> F. Serafini Cessi & R. D. Marshall	1110
Factors affecting glycoprotein synthesis in the rat gastric mucosa. <i>By</i> B. Johnston, A. M. Symons & D. V. Parke	1112
The stoichiometry and distribution of histone and non-histone proteins in chromatin (<i>by title only</i>). <i>By</i> J. Sonnenbichler, B. Riedel & I. Zetl	1115
Caesium chloride-density-gradient analysis of chromatin treated with micrococcal nuclease. <i>By</i> D. Doenecke	1115
λ dv-plasmid deoxyribonucleic acid-histone complexes and their cleavage by restriction nuclease. <i>By</i> M. Steinmetz, R. E. Streeck & H. G. Zachau	1117
Covalent linkage of poly(adenosine diphosphate ribose) to nuclear proteins of rat liver by two types of bonds. <i>By</i> P. Adamietz & H. Hilz	1118
Histone turnover in a non-proliferating tissue, the cat kidney. <i>By</i> G. Thomas, G. Roos, H.-W. Lange & K. Hempel	1120
Mutant <i>lac</i> repressors of <i>Escherichia coli</i> with altered deoxyribonucleic acid-binding properties. <i>By</i> M. Schlotmann, K. Beyreuther, N. Geisler & B. Müller-Hill	1123
Allosteric changes of the deoxyribonucleic acid-binding site of <i>lac</i> repressor from <i>Escherichia coli</i> . <i>By</i> K. Beyreuther	1125
Deoxyribonucleic acid polymerases and deoxyribonucleases in <i>Pisum sativum</i> . <i>By</i> C. Stevens, S. M. Jenns & J. A. Bryant	1126
Mammalian enzymes displaying deoxyribonucleic acid 5'-hydroxyl-kinase activity. <i>By</i> D. G. Evans, A. V. Muir, B. A. Milman & H. M. Keir	1129
Deoxyribonucleic acid ligase activities in BHK-21/C13 cells. <i>By</i> D. G. Evans, S. H. Ton & H. M. Keir	1131

STEROID GROUP, LONDON

Colloquium: Hormonal Regulation of Macromolecular Syntheses

The influence of androgen-receptor complexes on transcription by rat and human prostatic ribonucleic acid polymerases. <i>By</i> P. Davies	1133
Actions of steroid hormones on secretory processes in isolated nerve endings. <i>By</i> J. A. Edwardson & G. W. Bennett	1138
The regulation of egg-yolk protein synthesis by oestrogens. <i>By</i> M. J. Clemens	1140
Translational control of protein synthesis after re-initiation of the growth of cultured mouse fibroblasts. <i>By</i> P. S. Rudland, A. E. Smith & S. Weil	1145
Membrane-bound receptors for plant hormones. <i>By</i> M. A. Venis & S. Batt	1148

	PAGE
Regulation of macromolecular synthesis by oestrogen: A developmental approach. <i>By</i> A. M. Kaye, D. Sömjen, G. Sömjen, M. Walker, I. Ickson & H. R. Lindner	1151

STEROID GROUP, LIVERPOOL

Colloquium: Comparative Aspects of Steroid Chemistry

Are steroids universal biomolecules? <i>By</i> T. Sandor & S. Sonea	1157
The function of moulting hormones during insect development. <i>By</i> K. C. Highnam	1160
Steroid effects on gut function in birds. <i>By</i> D. H. Thomas, E. Skadhauge & M. W. Read	1164
Actions and metabolism of corticosteroids in teleost fishes. <i>By</i> I. W. Henderson, B. A. Jackson & G. Hargreaves	1168
Secretion of testosterone and corticosteroids by the adrenal cortex in the marsupials <i>Trichosurus vulpecula</i> and <i>Didelphis virginiana</i> and in the rat, and the effects of adrenocorticotrophin and gonadotrophin stimulation <i>in vitro</i> . <i>By</i> G. P. Vinson, J. B. G. Bell, M. B. Renfree & B. J. Whitehouse	1171

STEROID GROUP, SOUTHAMPTON

Colloquium: Steroid Hormones and Pregnancy

Early effects of oestrogen on the transcription of uterine ribonucleic acid. <i>By</i> J. T. Knowler, N. M. Borthwick & R. M. S. Smellie	1177
Steroids and the control of deoxyribonucleic acid synthesis in the uterus. <i>By</i> R. Leake, W. McNeill & M. Black	1180
Endocrine activities of the blastocyst and early embryonic tissue in the pig. <i>By</i> R. B. Heap, J. S. Perry, J. E. Gadsby & R. D. Burton	1183
The mechanism by which foetal cortisol controls the onset of parturition in the sheep. <i>By</i> A. P. F. Flint, A. B. M. Anderson, P. A. Steele & A. C. Turnbull	1189

559TH MEETING, CORK

Colloquium: Purine Metabolism

Purine nucleotide metabolism in mammalian cells. <i>By</i> J. F. Henderson	1195
Purines and their metabolism in plants. <i>By</i> E. G. Brown	1199
Disorders of purine metabolism in man. <i>By</i> W. N. Kelley	1202

Communications

Catabolite repression control of the D-gluconate transport system in <i>Bacillus subtilis</i> . <i>By</i> L. Baxter, M. McKillen & M. Syms	1205
β -Galactosidases of the queen scallop, <i>Chlamys opercularis</i> . <i>By</i> W. J. Donnelly	1208
Preliminary studies on a polygalacturonate lyase produced by <i>Bacillus</i> sp. RK9. <i>By</i> C. T. Kelly & W. M. Fogarty	1210
The action of hen and goose lysozymes on the cell-wall peptidoglycan of <i>Micrococcus lysodeikticus</i> . <i>By</i> P. Geoffroy & C. J. Bailey	1212
Creatinine hydrolase: Proton-magnetic-resonance spectroscopy in the examination of substrate specificity. <i>By</i> W. J. Donnelly	1215

	PAGE
Studies on the active site of the amidase from <i>Pseudomonas aeruginosa</i> . By M. J. Woods, M. A. Edgeworth & B. A. Orsi	1216
The relationship between peptide hydrolases of cytoplasm and brush borders of guinea-pig small-intestinal mucosa. By G. O'Cuinn & P. F. Fottrell	1219
Activation of trypsinogen in the normal and coeliac intestine. By J. J. Phelan, R. Keane & P. F. Fottrell	1221
Glutamine as metabolic substrate for isolated nerve-endings: Inhibition by ammonium ions. By H. F. Bradford & H. K. Ward	1223
Effects of univalent cations and neurotransmitters on the adenosine triphosphate-dependent uptake of calcium ions by brain microsomal fraction. By P. F. Duggan & D. N. Kelleher	1226
The effects of D-amphetamine, chlorpromazine, amitriptyline and lithium chloride on adenosine 5'-triphosphatases in ten regions of the rat brain. By J. McNulty, D. J. O'Donovan & B. E. Leonard	1229
Lipid composition of rabbit skeletal-muscle microsomal preparations. By D. P. Bradley & D. R. Headon	1231
Isolation of rabbit skeletal-muscle membranes containing phosphatase activity. By J. O'Flaherty & D. R. Headon	1233
A comprehensive system for the identification and quantitative determination of phenothiazines and their metabolites. By S. E. F. O'Donoghue-Ryan & J. P. Ryan	1235
Early changes induced by diethylnitrosamine and correlation with the sequence of events of macromolecular synthesis during experimental irreversible nodular hyperplasia in rat liver. By J. G. Nievel	1237
Transport and incorporation of labelled orotate into ribonucleic acid in isolated rat liver perfused with actinomycin D. By J. G. Nievel	1239
Changes in nucleotide composition and its relationship to macromolecular synthesis in coumarin-induced hepatomegaly. By J. G. Nievel	1241
Haemopoietic responses in chick embryos to administration of steroid hormones: A system for the study <i>in vitro</i> . By R. A. Irving & W. I. P. Mainwaring	1243
The role of 1,2-epoxyindene in the metabolism of indene by rat liver fractions. By T. J. R. Francis, R. J. Bick, P. Callaghan & R. P. Hopkins	1244
Analytical fractionation of rabbit skeletal-muscle microsomal preparations. By N. M. Joyce & D. R. Headon	1246
The differential fragmentation of rabbit skeletal-muscle membrane systems during homogenization. By E. J. Barrett & D. R. Headon	1248
The permeability properties of rat liver lysosomes to nucleosides. By R. Burton, C. D. Eck & J. B. Lloyd	1251
Resistance of urate oxidase to proteolytic digestion. By D. A. Fitzpatrick & K. F. McGeeney	1253
The purine nucleotide biosynthetic pathway in <i>Escherichia coli</i> : An unresolved problem. By G. M. Crosbie	1255
Pathways of pyrimidine salvage in <i>Drosophila melanogaster</i> . By M. M. Clynes & E. J. Duke	1256
The reaction of thiol-blocking reagents with adenylate deaminase from rabbit skeletal muscle. By D. O'Driscoll & C. A. Ross	1257
	1975

CONTENTS

xv

	PAGE
A chromatographic comparison of protein displaying deoxyribonucleic acid ligase activity extracted from nuclei of BHK-21/C13 cells before and after infection with herpes simplex virus type I. <i>By</i> D. G. Evans & H. M. Keir	1260
The chemical modification of deoxyribonucleic acid-photoreactivating enzyme from baker's yeast. <i>By</i> J. A. Hill, R. J. H. Davies & D. T. Elmore	1262
BOOK REVIEWS	1265
INDEXES	1273
