

675th York Meeting Joint With The Physiological Society

ABSTRACTS

Abstract no.

Page no.

THE COLWORTH MEDAL LECTURE

Time: Tuesday 18 December, 11.30–12.30

- M1 Complexities in expressed sequence tag (ETS)-domain transcription factor function and regulation
A. Sharrocks 1

ASTRAZENECA AWARD LECTURE

Time: Wednesday 19 December, 11.30–12.30

- M2 Experimental and bioinformatic approaches to functional genomics
S.G. Oliver 1

SPEAKER ABSTRACTS

ANNUAL SYMPOSIUM

Glycogenomics: The Impact of Genomics and Informatics in Glycobiology

*Speaker Session Times: Monday 17 December, 10.30–18.00
Tuesday 18 December, 09.00–17.10*

- A1 A functional post-translational proteomics approach to study the role of N-glycans in the development of *Caenorhabditis elegans*
H. Schachter 1
- A2 Genomic and RNA interference screens targeted at O-glycosylation in *C. elegans*
F.K. Hagen 1
- A3 Fucosyl transferases and blood group substances
J. Lowe 2
- A4 Comparative aspects of transferases
A. Imberty 2
- A5 Sequence motifs in glycosyltransferases
S. Munro 2
- A6 Heparan sulphate without 2-O-sulphation can promote signalling by fibroblast growth factor (FGF)-1, FGF-2 and hepatocyte growth factor (HGF)
C. Merry 2
- A7 Lectins and protein traffic early in the secretory pathway
H.P. Hauri 3

Subscribing institutions are encouraged to copy and distribute this table of contents for non-commercial purposes

Abstract no.	Page no.
B10 Substrate channelling in the pyruvate dehydrogenase multienzyme complex R.N. Perham	7
B11 The cAMP cascade and mitochondrial oxidative phosphorylation: physiopathological implications S. Papa	7
B12 Control analysis of gene expression R.K. Curtis	8
B13 Sequential extracts of human bone shows differing collagen synthetic rates J. Babraj	8
B14 Calmodulin conformational changes in the activation of protein kinases K. Török	8

BIOENERGETICS GROUP AND PHYSIOLOGICAL SOCIETY

Skeletal Muscle Energetics and Exercise Tolerance

*Speaker Session Times: Tuesday 18 December, 08.55–16.40
 Wednesday 19 December, 09.00–17.25*

C1 Energetics of muscle contraction: the whole is less than the sum of its parts M.J. Kushmerick	8
C2 Evolving techniques for investigation of muscle bioenergetics and oxygenation R. Richardson	
C3 Exertional oxygen uptake kinetics: a stamen of stamina? B.J. Whipp	9
C4 Measuring real levels of oxygen <i>in vivo</i> : opportunities and challenges H.M. Swartz	9
C5 Mitochondrial function at low oxygen levels E. Gnaiger	9
C6 Lactate shuttles in Nature G.A. Brooks	10
C7 Adipose tissue, the immune system and exercise fatigue: how activated lymphocytes compete for lipids C.M. Pond	10
C8 The acetyl-group deficit limits mitochondrial ATP production at the onset of exercise P.L. Greenhaff	10
C9 Different modes of phosphofructokinase (PFK) activation in working vertebrate muscle G. Wegener	10
C10 Exercise and oxidative stress C.E. Cooper	11
C11 Gene expression in muscle in response to exercise G. Goldspink	11

Abstract no.	Page no.
 BIOCHEMICAL IMMUNOLOGY GROUP	
Staying Healthy with Chips. The Future of Diagnosis	
<i>Speaker Session Time: Monday 17 December, 10.30–17.10</i>	
D1 Fish and chips: unravelling the interactions between genetic and dietary factors in determining cardiovascular risk J.M. Ordovas	11
D2 Functional genomic approaches to understanding heritable and acquired disorders of connective tissue C.D. Boyd	11
D3 Proteomic strategies in bladder cancer J.E. Celis	12
D4 Affymetrix microarray technology: present and future applications G.E. Scopes	12
D5 Application of disposable plastic microfluidic device arrays with customized chemistries to multiplexed biochemical assays A.J. Ricco	12
D6 Geniom Technology: exploring Nature's plasticity with a flexible probing tool – and finding new ways for its electronic distribution M. Beier	12
D7 The ProteinChip® Biology System from CIPHERGEN Biosystems: a novel proteomics platform for rapid biomarker discovery and validation K.A. Chapman	13
 PROTEIN AND PEPTIDE SCIENCE GROUP	
Non-Haemostatic Role for Blood Coagulation Proteases and their Receptors	
<i>Speaker Session Times: Tuesday 18 December, 09.00–16.45 Wednesday 19 December, 09.00–17.10</i>	
E1 Extracellular proteolysis in development and progression of atherosclerosis H.R. Lijnen	13
E2 Structural analysis of the interaction between urokinase and its receptor – a potential target for anti-invasive cancer therapy M. Ploug	13
E3 Haemostatic factors occupy new territory: the role of the urokinase receptor system and kininogen in inflammation K.T. Preissner	13
E4 The urokinase receptor as an effector of G-protein-coupled receptors F. Blasi	14
E5 Signal transduction via the urokinase receptor: role in cell migration and proliferation I. Dumler	14
E6 Regulation of urokinase plasminogen activator receptor (uPAR) function by the tetraspan protein CD82 R. Bass	14

Abstract no.	Page no.
F7 Molecular interactions in the yeast spliceosome J.D. Beggs	18
F8 Making ribosomes D. Tollervey	19
F9 Bacterial mRNA decay: structure and function of the <i>E. coli</i> degradosome A. Carpousis	19
F10 Structure, function and dynamics of the eIF4F complex J. McCarthy	19
F11 Expanding the genetic code: selenocysteine insertion into proteins A. Böck	19
F12 Assembly and function of protein–RNA sub-complexes of the mammalian signal recognition particle S. Cusack	20
F13 Regulatory roles for the ribosome in protein targeting to the endoplasmic reticulum M. Pool	20

BIOCHEMICAL IMMUNOLOGY GROUP

Proteases and Anti-Proteases: Molecular Mechanisms and Novel Therapeutic Targets

Speaker Session Time: Monday 17 December, 10.30–17.40

G1 Hypersensitive mouse traps, α_1 -antitrypsin deficiency and dementia D.A. Lomas	20
G2 Gene regulation of the serine proteinase inhibitors α_1 -antitrypsin and α_1 -antichymotrypsin N.A. Kalsheker	20
G3 Role of proteinases in emphysema S.D. Shapiro	21
G4 Potential roles of metalloproteinases in cell migration J. Gavrilović	21
G5 Mechanisms of action of collagenases and tissue inhibitor of metalloproteinases (TIMPs) H. Nagase	21
G6 Modulation of extracellular matrix using adenovirus vectors C.D. Richards	21
G7 Simvastatin inhibits human saphenous vein neointima formation via inhibition of smooth-muscle-cell proliferation and migration K.E. Porter	22
G8 The role of plasminogen activators in peritoneal adhesion formation S.E. Herrick	22
G9 Anti-microbial activity of anti-proteases J.-M. Sallenave	22
G10 Novel roles of anti-proteases in infection and inflammation P.S. Hiemstra	22

Abstract no.	Page no.
EDUCATION GROUP	
Biochemistry in the Curricula of Professions Allied to Medicine	
<i>Speaker Session Time: Tuesday 18 December, 09.00–16.00</i>	
H1 Biochemistry in the curriculum of podiatry courses W. Turner	23
H2 Biochemistry in human nutrition and dietetics degree courses A. Searle	23
H3 Physiological measurements technicians – the challenge of biochemistry V.E. Hick	23
H4 Do nurses need biochemistry? H.E. Walthall	23
H5 The rationale and teaching of biochemistry within complementary medicine P.B. Lowe	24
H6 Biochemistry: a STOPover for PAMs? M. Lewis	24
HOST COLLOQUIUM	
Plant Glyco-Related Genomics	
<i>Speaker Session Time: Wednesday 19 December, 09.00–11.30</i>	
I1 Carbohydrate-active enzymes in completely sequenced genomes B. Henrissat	24
I2 Structural genomics of carbohydrate-active enzymes: implications for the synthesis of plant polysaccharides G.J. Davies	24
I3 Genetic dissection of plant cell wall biosynthesis D.T. Bonetta	25
I4 Functional genomics of the <i>Arabidopsis</i> multigene family of glycosyltransferases involved in cellular homeostasis D. Bowles	25
PROFESSIONAL AND EDUCATIONAL COMMITTEE AND THE EDUCATION GROUP	
Developing Skills Through Undergraduate Work Placements	
<i>Speaker Session Time: Monday 17th December, 10.30–13.00</i>	
J1 Student perspective on work placement A.J. Wright	25
J2 The placement triangle: employer, student, university relationships A.M. Hall	25
J3 Undergraduate work placements are beneficial to the employer G.L. Shackleton	26

Abstract no.	Page no.
J4 My experience of work placement J. Pritchett	26
J5 Diversity in extramural placements R. Barraclough	26

ANNUAL SYMPOSIUM

Glycogenomics: The Impact of Genomics and Informatics in Glycobiology

1–7 Poster Session Time: Monday 17 December, 13.10–14.30

8–14 Poster Session Time: Monday 17 December, 16.30–18.00

1 Keratan sulphate in endometrium and placenta M. Barclay, A.H. Merry, L. Royle, P. Rudd, E. Edi-Osagie, B.A. Lieberman and J.D. Aplin	26
2 Conserved peptide motifs of glycosyltransferases C. Jeanneau, D. Grando, A. Imberty and C. Breton	27
3 Amino alditols as inhibitors of mycobacterial cell wall biosynthesis J.C. Errey, G.D. Newbury, L. Ballell and R.A. Field	27
4 The role of IgG1-Fc oligosaccharide residues in Fc γ RIIb binding Y. Mimura, P. Sonderrmann, R. Ghirlando, J. Lund, M. Goodall and R. Jefferis	27
5 Generation and phenotyping of a <i>Trypanosoma brucei</i> glucosidase II null mutant D. C. Jones, A. Mehlert and M.A.J. Ferguson	27
6 A fingerprinting method for chondroitin/dermatan sulphate and hyaluronan oligosaccharides R.M. Lauder, T.N. Huckerby and I.A. Nieduszynski	28
7 Control of IgG-Fc glycosylation by its protein structure J. Lund, N. Takahashi, M. Goodall and R. Jefferis	28
8 Neoglyconjugate IgG-Fc molecules have enhanced function relative to aglycosylated IgG-Fc G. Watt, J. Lund, M. Goodall, R. Tyler, R. Jefferis and G.-J. Boons	28
9 Heparan sulphate without 2-O-sulphation can promote signalling by fibroblast growth factor (FGF)-1, FGF-2 and hepatocyte growth factor (HGF) C. Merry, E. Danteuille, V. Wilson and J. Gallagher	28
10 Poster withdrawn	29
11 A specific glycoform of MCH1 is required for the formation of the multimolecular complex involved in the assembly of MHC1:peptide complexes C.M. Radcliffe G. Diedrich, R. Dwek, P.M. Rudd and P. Cresswell	29
12 A scheme for graphical representation of glycans C.E. Sansom and A.H. Merry	29
13 Gene discovery through expressed sequence tag (EST) in <i>Porphyridium</i> sp.: search for genes of industrial and scientific importance R. Shrestha, M. Lapidot, Y. Weinstein and S. (Malis) Arad	29

Abstract no.	Page no.
14 An N-terminal truncated form of Orp150 is a cytoplasmic ligand for the anti-proliferative edible mushroom <i>Agaricus bisporus</i> lectin and is required for nuclear localization sequence (NLS)-dependent nuclear protein import L.G. Yu, N. Andrews, M. Weldon, O.V. Gerasimenko, B.J. Campbell, I. Grierson, O.H. Petersen and J.M. Rhodes	30
 REGULATION IN METABOLISM GROUP	
Metabolite Channelling and Metabolic Complexity	
<i>Poster Session Time: Tuesday 18 December, 12.30–14.00</i>	
15 Dietary vitamin E reduces plasma and liver markers of oxidant stress in the aluminium-treated rat M.G. Abubakar, A. Taylor and G.A. Fern	30
16 Control of electron transfer in <i>Schizosaccharomyces pombe</i> mitochondria P.G. Crichton, C. Affourtit, M.S. Albury and A.L. Moore	30
17 Sequential extracts of human bone shows differing collagen synthetic rates J. Babraj, D.J. Cuthbertson, W. Meier-Augenstein, K. Smith and M.J. Rennie	30
18 An NMR study of nutrient metabolism in the pancreatic β cell-line BRIN-BD11 L. Brennan, A. Shine, C. Hewage, K.M. Brindle, J.P.G. Malthouse, N.H. McClenaghan, P.R. Flatt and P. Newsholme	31
19 Hepatic intralobular heterogeneity of glucose and glycogen metabolism H.C. Murphy, R.A. Iles, R.D. Cohen and S.P. Burns	31
20 Overexpression of a mitochondrially located HSP70 alters carbon metabolism in tobacco J.E. Carré, J. Gordon and A.L. Moore	31
21 Functional genomics via the metabolome: multivariate FANCY strategy for characterizing genes of unknown function J.I. Castrillo, A. Hayes, D. Broadhurst, J. Rowland, D.B. Kell, K.M. Brindle and S.G. Oliver	31
22 Control analysis of gene expression R.K. Curtis and M.D. Brand	32
23 Investigations into the allosteric mechanism of a trimeric mutant of Clostridial glutamate dehydrogenase G.A. Dunlevy and P.C. Engel	32
24 An investigation into the specific residues involved in the docking mechanism between human electron-transferring flavoprotein (hETF) and human medium chain acyl-CoA dehydrogenase M.F. Fagan and P. C. Engel	32
25 The cAMP cascade and mitochondrial oxidative phosphorylation: physiopathological implications S. Papa, A.M. Sardanelli, S. Scacco, V. Petruzzella, Z. Technikova-Dobrova, A. Gaballo and A. Signorile	32
26 Calmodulin conformational changes in the activation of protein kinases K. Török	33
27 A neuropeptide in the metabolic control of insect adipocytes J.F. Liewald, H. Nawrath and G. Wegener	33

Abstract no.	Page no.
28 Why does glucose-6-phosphate dehydrogenase (G6PDH) deficiency increase susceptibility to diabetes? I.C. West	33

BIOENERGETICS GROUP AND PHYSIOLOGICAL SOCIETY

Skeletal Muscle Energetics and Exercise Tolerance

Poster Session Time: Tuesday 18 December, 12.30–14.00

29 Skeletal muscle fibre type regulation: both MEK1/2 and calcineurin blockade change expression of myosin heavy chain isoforms J. Higginson, H. Wackerhage, N. Woods, P. Schjerling, A. Ratkevicius, N. Grunnet and B. Quistorff	33
30 Up-regulation of an insulin-like growth factor (IGF)-1 splice variant in active muscle M. Hill	34
31 Effects of multiple hyperbaric oxygen treatments on blood function R.D. Handy, A.J. Moody, P. Bryson, L.M. Handy and R. Sneyd	34
32 Carbon monoxide toxicity in the heart: evidence for ischaemia–reperfusion-like injury A.P. Patel, A.J. Moody, R.D. Handy and R.J. Sneyd	34
33 Different modes of phosphofructokinase (PFK) activation in working vertebrate muscle G. Wegener and U. Krause	34
34 Comparison of energy release in intact and skinned muscle fibres during development of isometric force T.G. West, N.A. Curtin, M.A. Ferenczi, Z.-H. He and R.C. Woledge	35

PROTEIN AND PEPTIDE SCIENCE GROUP

Non-Haemostatic Role for Blood Coagulation Proteases and their Receptors

Poster Session Time: Wednesday 19 December, 12.30–14.30

35 Identification of anti-thrombotic substances in common herbs and spices J.M. Bailey, A.N. Makheja and J.Y. Vanderhoek	35
36 Regulation of urokinase plasminogen activator receptor (uPAR) function by the tetraspan protein CD82 R. Bass, F. Werner, F. Berdichevski and V. Ellis	35
37 The regulation of tissue factor gene expression and activity by oxidized low-density lipoproteins A.O. Oke, C. Ettelaie, N.J. James, J.M. Adam and K.R. Bruckdorfer	35
38 Role of thrombin and its major cellular receptor, protease-activated receptor-1, in experimental pulmonary fibrosis D.C.J. Howell, G.J. Laurent and R.C. Chambers	36
39 The influence of tissue factor on capillary formation by endothelial and fibroblast cells C. Ettelaie, N.J. James, A.O. Oke and K.R. Bruckdorfer	36
40 Inhibition of tissue factor activity reduces the density of cellular network formation in an <i>in vitro</i> model of angiogenesis N.J. James, C. Ettelaie, A.O. Oke and K.R. Bruckdorfer	36

Abstract no.	Page no.
41 Kinetic analysis of the cleavage of human protease-activated receptor 1/2/3 and 4 [PAR-1/2/3 and 4] by trypsin and thrombin using synthetic quenched-fluorescent peptide substrates M.T. Fox, B. Greer, J. Lawson, A. Healy and P. Harriott	36
42 Characterization of green fluorescent protein tagged urokinase-type plasminogen activator receptor (uPAR) variants Z. Holloway, J. Marshall and P. Rettenberger	37
43 Influence of peroxisome proliferator activated nuclear receptors (PPARs) agonists on the procoagulant response of endothelial cells following treatment with tumour necrosis factor α (TNF α) S. Xie and M.F. Scully	37

NUCLEIC ACIDS AND MOLECULAR BIOLOGY GROUP

RNA-Protein Machines

Poster Session Time: Tuesday 18 December, 12.30–14.00

44 Localization of metallothionein in Chinese-hamster ovary (CHO) cells requires a 41-nucleotide sequence within the 3'untranslated region of its mRNA M. Levadoux-Martin and J.E. Hesketh	37
45 RNA-protein interactions in the ϕ 29 molecular motor J.P.A. Wood, S. Capaldi and N.J. Stonehouse	37
46 Nuclear localization of iron regulatory proteins K.N. White, D. Cunninghame Graham and A. Bomford	38

BIOCHEMICAL IMMUNOLOGY GROUP

Proteases and Anti-Proteases: Molecular Mechanisms and Novel Therapeutic Targets

Poster Session Time: Monday 17 December, 13.10–14.30

47 HE4, an alternatively spliced whey acidic protein (WAP) domain containing protein may contribute to host defence C.D. Bingle, V. Singleton and L. Bingle	38
48 Sequence variation of the major capsid protein of human papillomavirus type 6 S. Badvie, C. Mant and J. Cason	38
49 Investigation of the role of the serine protease HtrA in matrix calcification C. Farrington, S.L. Dallas, R.P. Boot-Handford and A.E. Canfield	38
50 Regulation of inflammation in community acquired pneumonia by tumour necrosis factor (TNF)- α converting enzyme C.M. Greene, G.J. Lowe, C.C. Taggart, P.M. Gallagher, N.G. McElvaney and S.J. O'Neill	39
51 The lipid interactions of m-calpain S. Biswas, F. Harris and D.A. Phoenix	39
52 The role of plasminogen activators in peritoneal adhesion formation H. Sulaiman, L. Dawson, G.J. Laurent, G. Bellingan and S.E. Herrick	39

Abstract no.	Page no.
53 Expression of <i>Drosophila</i> angiotensin converting enzyme (Ance) during metamorphosis: regulation by 20-hydroxyecdysone R.J. Siviter, D. Cottam, C.M. Taylor, D. Hurst, A. Denton, P. Dani, M.J. Milner, A.D. Shirras and R.E. Isaac	39
54 The Nephrylsin (NEP) family of zinc-implications for peptide signalling in <i>Drosophila melanogaster</i> J.E. Thomas, R.J. Siviter, A.D. Shirras, A.J. Turner and R.E. Isaac	40
55 Peptide metabolism in <i>C. elegans</i> : expression and functional characterization of a cytoplasmic aminopeptidase P D.R. Brooks, V. Laurent, D. Coates and R.E. Isaac	40
56 Modification of skeletal muscle regeneration by anti-proteases M.P. Lewis, L. Dodgson, A. Singh, N.P. Hunt and H.L. Tippett	40
57 The interaction of elafin (elastase-specific inhibitor) with bacterial endotoxin J.W. McMichael and J.-M. Sallenave	40
58 Calpain expression and cleavage of myosin light-chain kinase (mlck) in human myometrium: implications for preterm labour F. Moore and A. Lopez Bernal	41
59 The H11 group of membrane aminopeptidases; characterization and expression E.A. Munn, T.S. Smith, M. Graham, H. Smith, W.J. Coadwell, R. Hederer, A. Hutchings, J. Rocha, S.E. Newton, J. Sexton, V. Cook, M. Walkiewicz, D. Hasse, S. Nikolaou, D. Hartman and D. Donald	41
60 Fate of cystatin C lacking its leader sequence in retinal pigment epithelial cells L. Paraoan, M.R.H. White, D.G. Spiller, I. Grierson and B.E.H. Maden	41
61 Simvastatin inhibits human saphenous vein neointima formation via inhibition of smooth-muscle-cell proliferation and migration K.E. Porter, J. Naik, N.A. Turner and N.J.M. London	41
62 Identification of a putative cell type specific repressor activity within the N-arginine dibasic (NRD) convertase gene promoter M.I. Psatha and A.R. Pierotti	42
63 Proteolytic susceptibility of secretory leucoprotease inhibitor C. Taggart, G. Lowe, C. Greene, A. Mulgrew, R. Levine, S. O'Neill and N.G. McElvaney	42
64 β_2 -Adrenergic receptor-induced proliferation of human cardiac fibroblasts N.A. Turner, K.E. Porter, W.H.T. Smith, H.L. White and A.J. Balmforth	42

EDUCATION GROUP

Biochemistry in the Curricula of Professions Allied to Medicine

Poster Session Time: Tuesday 18 December, 12.30–14.00

65 Characterization of the 5'UTR region of the human cardiac troponin T gene (Genbank® AY0044273) L.G. D'Cruz, J. Oberoi, F. Mughal, W.J. McKenna, N.D. Carter and C. Baboonian	42
66 Mutations in the human cardiac β -myosin heavy chain protein: a molecular dynamic analysis L.G. D'Cruz, J. Oberoi, F. Mughal, W.J. McKenna, N.D. Carter and C. Baboonian	43

Abstract no.	Page no.
67 Curriculum content – driven by evidence of need or by policy and dogma? L.M. Jervis and L. Jervis	43
68 Poster withdrawn	43
69 Poster withdrawn	43

HOST COLLOQUIUM

Plant Glyco-Related Genomics

Poster Session Time: Wednesday 19 December, 12.30–14.30

70 Phosphoenolpyruvate carboxykinase gene (<i>cspck</i>) from cucumber (<i>Cucumis sativus</i> L.) D.-J. Kim	44
---	----

THE PHYSIOLOGICAL SOCIETY COLLOQUIUM

Transporting the Essentials: Nutrient and Micronutrient Transporters

Poster Session Time: Monday 17 December, 13.10–14.30

71 Barrels and corks in a computer – modelling bacterial iron transport system M. Baaden and M.S.P. Sansom	44
72 The barrier properties of <i>in vitro</i> -generated normal human urothelium W.R. Cross, I. Eardley, H.J. Leese and J. Southgate	44
73 <i>Caenorhabditis elegans</i> as a model organism in the study of nucleoside transporters P.J. Appleford, M. Griffiths, E.G. Chomey, S.Y.M. Yao, D. MacGregor, R.E. Isaac, I.A. Hope, D. Coates, C.E. Cass, J.D. Young and S.A. Baldwin	44
74 Regulation of vitamin C transport by protein kinase C (PKC) W.-J. Liang, D. Johnson, L. Ma and S.M. Jarvis	45
75 Stable expression and characterization of the human sodium-dependent vitamin C transporter isoforms (hSVCT1 and hSVCT2) in mammalian cells S. Rosier, W.-J. Liang and S.M. Jarvis	45
76 Poster withdrawn	45

MISCELLANEOUS POSTERS

Poster Session Time: Tuesday 18 December, 16.30–18.00

77 Examination of gene expression in yeast using microarray technology A.M. Bashein, B. Rash, A. Hayes and S.G. Oliver	45
78 Effects of endotoxin on surfactant function and lung mechanics in the rabbit M.S. Freeman, H.L. McMath and M.F. Fitzgerald	46
79 Na ⁺ , K ⁺ , ATPase activity of the human preimplantation embryo F.D. Houghton, P.G. Humpherson, J.A. Hawkhead and H.J. Leese	46
80 Protein turnover: the missing link in proteomics J.M. Pratt, S.J. Gaskell, D.H.L. Robertson, I. Riba-Garcia, S.G. Oliver, P. Butler, J. Petty, A. Hayes and R.J. Beynon	46

Abstract no.

Page no.

- 81 Differential gene expression implicates protein kinase C isoenzyme activation in response to glutathione depletion in HepG2 cells
A.T. White, F.J. Elcock and J.K. Chipman **46**
-

Speakers' papers will be published in *Biochemical Society Transactions*
volume 30, part 2 (May 2002)
