***TRANSACTIONS***

**677th Meeting, Cardiff University, Wales**

colloquia

**Biology of the Intervertebral Disc**

**Connective Tissue**

**Plant Food Allergens**

**mRNA Degradation: an Important Process in Controlling Gene  
Expression**

**Structure–Function Studies of the Complement System**

**Regulation of Fatty Acid Synthesis**

**Focused Meeting**

**Ribozymes and RNA Catalysis**

■ *Biochemical Society Transactions* (ISSN 0300-5127 for print/online journal; ISSN 1470-8752 for online-only journal) is published by Portland Press Ltd on behalf of the Biochemical Society and contains the lectures and colloquia presented at a meeting of the Biochemical Society or one of its constituent interest groups and the colloquia of other scientific meetings of biochemical interest held in the U.K. or elsewhere. Submitted primary research papers are not published and authors are reminded that detailed presentation of new experimental data may prejudice its subsequent publication in precisely that same form elsewhere. Articles are published subject to editorial acceptance and authors will be issued with instructions on the format of their article before the meeting. Authors intending to present posters at Society meetings should contact the Meetings Office, The Biochemical Society, 59 Portland Place, London W1B 1QW, U.K. (telephone 020 7580 5530; fax 020 7637 7626; e-mail [meetings@biochemistry.org](mailto:meetings@biochemistry.org)).

■ *Biochemical Society Transactions Online* (<http://bst.portlandpress.com>)

■ For information about the advantages of membership of the Biochemical Society, contact the Executive Secretary, The Biochemical Society, 59 Portland Place, London W1B 1QW, U.K. (telephone 020 7580 5530).

■ Editorial and publishing office: *Biochemical Society Transactions*, 59 Portland Place, London W1B 1QW, U.K. (telephone 020 7637 5873; fax 020 7323 1136; e-mail [editorial@portlandpress.com](mailto:editorial@portlandpress.com)).

■ *Biochemical Society Transactions*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001, U.S.A.

### Subscription rates

■ Subscriptions department: Portland Customer Services, P.O. Box 32, Commerce Way, Colchester CO2 8HP, U.K. (telephone 01206 796351; fax 01206 799331; e-mail [sales@portland-services.com](mailto:sales@portland-services.com)). Subscription rates for volume 31, parts 1–6 (2003) paper and online:

Volume 31		North America	Rest of world	Euro price
Paper and Online	Institutional	\$355.00	£208.00	€354.00
Online only	Institutional	\$327.00	£191.00	€326.00
Paper only	Institutional	\$344.00	£203.00	€332.00
	Single issues	\$90.00	£55.00	€92.00

VAT is due on some supplies to subscribers within the U.K. and to non-registered subscribers elsewhere in the EU. If in the EU, please state your VAT number otherwise VAT may be charged at the national rate. Subscribers to the *Biochemical Journal* may take a joint subscription to that journal and to *Biochemical Society Transactions*, saving \$30 (North America), €28.50 (EU) or £17 (rest of world), or to *Biochemical Society Transactions*, *Biochemical Journal* and *Biotechnology and Applied Biochemistry*, saving \$40 (North America), €39 (EU) or £23 (rest of world). Overseas rates include air freight delivery. Priority delivery is available at extra cost (please ask for details). Back issues are available.

■ Electronic back archive free to all users with Internet access.

■ All rights reserved. Apart from any fair dealing for the purposes of research or private study, or criticism or review, as permitted under the Copyright, Designs and Patents Act, 1988, this publication may be reproduced, stored or transmitted, in any form or by any means, only with the prior permission in writing of the publishers, or in the case of reprographic reproduction in accordance with the terms of permissions granted by the copyright clearing houses such as the Copyright Licensing Agency (U.K.) or the Copyright Clearance Center (U.S.A.). The CCC item-fee code for this publication is 0300-5127/2002/\$30.00+0.00. Inquiries concerning reproduction outside those terms should be sent to the publishers at the London address.

■ Although, at the time of going to press, the information contained in this publication is believed to be correct, neither the authors nor the publisher nor the editor assume any responsibility for any errors or omissions herein contained. Opinions expressed in articles are not necessarily those of the editor, the publisher or the Biochemical Society.

■ Display advertising is accepted; information is available on request from the London office of Portland Press.

■ Periodicals postage paid at Rahway, NJ.

■ Postmaster: send address corrections to *Biochemical Society Transactions*, c/o Mercury Airfreight International Ltd, 365 Blair Road, Avenel, NJ 07001.

■ Printed in Great Britain by the University Press, Cambridge.

## Author Index

- Abadi, R. H. H. B.**  
—; Cytidylyl cyclase activity, enzymic conversion of CTP into cCMP, A130
- Abdallah, M. A.**, See Schalk, I. J.
- Abt, B.**, See Oberegger, H.
- Abubakar, M. G.**  
—; Taylor, A.; Fern, G. A.  
Dietary vitamin E reduces plasma and liver markers of oxidant stress in the aluminium treated rat, A30
- Abulahbas, M.**  
—; Naseem, K.; Nicolaou, A.  
Effect of NO donors on sulphur amino acids produced by rat hepatoma cells, A72
- Adam, J. M.**, See Oke, A. O.
- Adams, C.**, See Babraj, J.
- Afourtit, C.**, See Crichton, P. G.
- Afonso, S.**  
—; Rouvier Garay, V.; Martinez, M.; Molinari, A.; Batlle, A.  
Oxidative stress induced by Griseofulvin in mice liver, A72
- Agius, L.**  
—; Centelles, J.; Cascante, M.  
Multiple glucose 6-phosphate pools or channelling of flux in diverse pathways?, A6, 38
- Ahluwalia, M.**, See Lin, T. T.
- Ainscow, E. K.**, See Varadi, A.
- Aitken, A.**, See Baxter, H. C.; Clokie, S. J. H.  
—; Baxter, H.; Dubois, T.; Clokie, S.; Mackie, S.; Mitchell, K.; Peden, A.; Zemlickova, E.  
Specificity of 14-3-3 isoform dimer interactions and phosphorylation, 351  
—; 14-3-3 structure, function and role in neurodegenerative diseases, trafficking and nuclear signalling, A61
- Albury, M. S.**, See Crichton, P. G.
- Alcocer, M. J.**, See Murtagh, G. J.
- Ali, T. M.**, See Saeed, S. A.
- Alini, M.**, See Roughley, P. J.
- Allan, V. J.**, See Varadi, A.
- Allinson, T. M. J.**  
—; Turner, A. J.; Hooper, N. M.  
Proteolytic processing of the amyloid precursor protein by  $\alpha$ -secretase, A78
- Allsop, D.**, See Gibson, G. L.; Moore, S.; Turnbull, I. S.
- Al-Sabah, S. Y.**  
—; Donnelly, D.  
Investigation into the role of the second and third extracellular loop domains of the glucagon-like peptide-1 receptor in ligand binding and activation, A96
- Alvarez, D.**, See Novac, O.; Zannis-Hadjopoulos, M.  
—; Callejo, M.; Novac, O.; Price, G. B.; Zannis-Hadjopoulos, M.  
Role of cruciform binding protein (CBP)/14-3-3 in DNA replication, A89
- Amour, A.**, See Scholefield, Z.
- An, H.**, See Thonar, E.
- Anderson, G. J.**, See McKie, A. T.  
—; Frazer, D. M.; Wilkins, S. J.; Becker, E. M.; Millard, K. N.; Murphy, T. L.; McKie, A. T.; Vulpe, C. D.  
Relationship between intestinal iron-transporter expression, hepatic hepcidin levels and the control of iron absorption, 724
- Anderson, N. G.**, See Webb, P. R.  
—; Sanderson, C.; Bundred, N. J.  
Mitogenic signalling via the parathyroid hormone-related protein receptor, A87
- Anderson, P.**, See Kedersha, N.
- Andrews, N.**, See Yu, L. G.
- Andriopoulou, P.**, See Maragoudakis, M. E.
- Anemüller, S.**, See Hubmacher, D.; Reindel, S.; Uhrigshardt, H.
- Antoni, F. A.**, See Haunso, A.  
—; Simpson, J.  
Calcium-dependent proteolysis of adenylyl cyclase IX (ACIX), A85
- Antoniu, J.**, See Roughley, P. J.
- Antoniw, P.**, See Weir, A. N. C.
- Aplin, J. D.**, See Barclay, M.
- Appleford, P. J.**  
—; Griffiths, M.; Chomey, E. G.; Yao, S. Y. M.; MacGregor, D.; Isaac, R. E.; Hope, I. A.; Coates, D.; Cass, C. E.; Young, J. D.; Baldwin, S. A.  
*Caenorhabditis elegans* as a model organism in the study of nucleoside transporters, A44
- Arad, S. (Malis).**, See Shrestha, R.
- Archer, C. W.**, See Bishop, J. C.; Khan, I. M.; Richardson, K.; Webster, S. V.; Williams, R.
- Archer, D. B.**, See Murtagh, G. J.
- Arlaud, G. J.**  
—; Gaboriaud, C.; Thielens, N. M.; Rossi, V.  
Structural biology of CI, A98, 1001
- Armour, K. L.**  
—; Atherton, A.; Williamson, L. M.; Clark, M. R.  
The contrasting IgG-binding interaction of human and herpes simplex virus Fc receptors, A66, 495
- Arndt, K.**, See Wu, D.
- Ashcroft, S. J. H.**, See Mikhailov, M. V.  
—; Practical statistics for the biosciences, A114
- Askew, J.**, See Moore, S.
- Aslam, M.**, See Perkins, S. J.
- Asser, T.**, See Teesalu, T.
- Atherton, A.**, See Armour, K. L.
- Atkinson, J. P.**, See Herbert, A.  
—; CRI: evolving to the tune of a powerful pathogen, A99
- Aurora, R.**, See Bhattacharyya-Pakrasi, M.
- Austen, B.**, See Gunasekera, N.; Sidera, C.  
—; El-Agnaf, O.; Nagala, S.; Patel, B.; Gunasekera, N.; Lee, M.; Lelyveld, V.  
Properties of neurotoxic peptides related to the BRI gene, A56, 557
- Baaden, M.**  
—; Sanson, M. S. P.  
Barrels and corks in a computer-modelling bacterial iron transport system, A44
- Baboonian, C.**, See D'Cruz, L. G.; van der Molen, B. A.
- Babraj, J.**  
—; Cuthbertson, D. J.; Rickhuss, P.; Meier-Augenstein, W.; Smith, K.; Bohé, J.; Wolfe, R. R.; Gibson, J. N. A.; Adams, C.; Rennie, M. J.  
Sequential extracts of human bone show differing collagen synthetic rates, A8, A30, 61
- Badvie, S.**  
—; Mant, C.; Cason, J.  
Sequence variation of the major capsid protein of human papillomavirus type 6, A38
- Bahn, E.**, See Baxter, H. C.
- Baig, S.**  
—; Erythropoietin modulates interleukin-1 $\beta$ -induced nitrite production in rheumatoid synovial fibroblasts, A105  
—; Patel, Y.; Coussons, P.; Grant, R.  
Erythropoietin and interleukin-1 $\beta$  modulate nitrite production in a Swiss 3T3 cell model of rheumatoid synovial fibroblasts, 883  
—; Patel Y.; Coussons, P. J.; Grant, R.  
Erythropoietin modulates interleukin-1 $\beta$ -induced nitrite production in rheumatoid synovial fibroblasts, A126
- Bailey, J. M.**

## Subject Index

- ABri, neurotoxicity of, A82  
Acetyl group deficit, mitochondrial ATP production in, A10, 275  
Acetyl-CoA carboxylase, regulation of, A101, 1059  
*Acidithiobacillus ferrooxidans* eco-types, uranium complexes formed by, molecular and atomic analysis of, 669  
Acyl-CoA, in plants, cell processes regulated by, 1095  
Acyl-CoA dehydrogenase, human electron-transferring flavoprotein docking mechanism and, A32  
Acyl-CoA desaturase genes, environmentally regulated, A103  
ADan, neurotoxicity of, A82  
Adenovirus vectors, in extracellular matrix modulation, A21, 107  
Adenylate cyclase receptors, signal transduction in, A58  
Adenylyl cyclase IX  
  active core of, characterisation of, A86  
  calcium-dependent proteolysis of, A85  
Adhesion formation  
  to B lymphoma cells, EMR4 in, A86  
  peritoneal, plasminogen activators in, A39, 126  
Adipocytes  
  differentiation of, protein kinase C translocation during, A90  
  of insect, neuropeptide in metabolic control of, A33  
Adipose tissue, in immune system and exercise fatigue, A10, 270  
ADP-ribosylation factor (ARF), Hop-1 interaction with, in GPCRs, A87  
 $\beta_2$ -Adrenergic receptor, cardiac fibroblast proliferation induced by, A42  
Adrenomedullin  
  CGRP receptors and, 432  
  in osteoblast metabolism, A94  
Adrenomedullin receptors, signal transduction and, A58  
Aerobic conditions, aqueous, chelator selective binding of iron(II) in, 758  
Affymetric microarray technology, present and future applications of, A12  
AFX transcription factor, phosphorylation event effects on, 391  
*Agaricus bisporus* lectin, cell proliferation reversed by, A30  
Aggrecan  
  activity in chondrocytes, H<sup>+</sup>-ATPase activity and, A124  
  in aged and pathological intervertebral disc tissue, A111  
  degradation of, osmolarity and, A123  
Aggregation, prevention by antibody fragment, A93  
Aging of intervertebral disc  
  aggrecan and interstitial proteoglycan metabolism in, A111  
  degeneration and repair of, proteoglycans in, A113, 869  
Alanine scan, of GLP-1 receptor extracellular loop domain, A96  
Albumin  
  allergens from  
    in plants, 913, 919  
    stability of, A128  
  solution structure of, A108  
Alga, marine, 14-3-3 proteins in, A90  
Alginate gel, matrix formed by nucleus pulposus and annulus fibrosus cells in, 874  
Allergen  
  albumin  
    in plants, 913, 916  
    solution structure of, A108  
    stability of, A128  
  pathogenesis-related proteins as, A109, 935  
Allergenicity, stability of diet-derived proteins to, A129  
Allergy  
  to apples, post-harvest treatment of, immunoassaying effects of, A129  
  to food  
    clinical aspects of, A106, 901  
    in cupin superfamily, A109, 925  
    epidemiology of, A107  
    gastric emulsions and, 916  
    industrial dimensions of, A109, 941  
    oral tolerance in, A107  
  pathogenesis-related proteins in, A109, 930  
  from plants  
    nonspecific lipid transfer proteins in, 910  
    plant biotechnology and, A110  
    protein families and, A129, 906  
    2 S albumin in, 913, 919  
  to fruit  
    latex allergy with, A109, 935  
    post-harvest treatment of, immunoassaying effects of, A129  
  to latex, fruit allergy with, A109, 935  
Allied health profession curriculum, biochemistry in, A24  
Allosteric feedback loop, regulatory design of, 19  
Alzheimer's disease: *see also* Amyloid entries.  
  cholesterol and, A54, A81, 525  
  neuropathology of, A53  
   $\gamma$ -secretase inhibition and, A54, 534  
   $\beta$ -secretase in, A54, 530  
  treatment of, A71, 574  
  immunisation in, A55  
Amino alditol, mycobacterial cell wall biosynthesis inhibited by, A27  
5-Aminolaevulinic acid  
  acute and chronic intoxication with, effects in brain, A73  
  formation of, glutamyl-tRNA reductase in, A47, 579  
  PPIX synthesis induced by, pharmacokinetics of, A72  
  transport in mammary adenocarcinoma cells, A71  
5-Aminolaevulinic acid dehydratase from *Coryphaenoides armatus*, A73  
  and enzymic synthesis of porphobilinogen, A47  
  human recombinant, A77  
  mutants, metals, and mechanism of, A47, 584  
  from *Pisum sativum*, A76  
Aminopeptidase(s), H11 group of, characterisation and expression of, A41  
Aminopeptidase P, cytoplasmic, in *Caenorhabditis elegans*, A40  
A-minor motifs, in RNA, biochemical identification of, 1126  
AMP, protein kinase activated by, in regulation of fatty acid synthesis and degradation, A102, 1064  
AMPA receptors, in cortical spreading depression, A83  
AMP-activated protein kinase  
  fatty acid metabolism and, in epithelia, A121  
  gene transcription regulation in, in islets, 307  
Amyloid fibrils  
  formation by stefin B, A80, 543  
  formed from  $\beta$ -lactoglobulin, A83  
  structure of, A54, 521  
Amyloid  $\beta$ -oligomers, production, toxicity, and therapeutic inhibition of, 552  
Amyloid precursor protein: *see also* Alzheimer's disease.  
  cleavage of  
    heparan sulphate and, A78  
     $\gamma$ -secretase specificity toward, A95  
  processing in neuroblastoma cells expressing prion protein, A79  
  proteolytic processing of, by  $\alpha$ -secretase, A78  
Amyloid precursor protein cleaving enzyme, beta-site, A81  
Amyloid  $\beta$ -protein  
  aggregation of, inhibition by cyclodextrin dimers and trimers, A81  
  cell-derived, production, activity, and inhibition of, A56  
  cholesterol level and, A54, A81, 525  
  detection with ProteinChip Biology System, A57  
  toxic mechanisms of, A85  
  toxicity and protofibril formation in, inhibition with N-methylated derivatives, A78, 537  
Amyloid sequences, replacing repeat regions of yeast prion-forming domain with, A80  
Amyloidogenic lysozyme variants, in aggregation, antibody fragment action on, A93  
Amyloidosis, chronic nicotine treatment for, A78  
Amyotrophic lateral sclerosis, familial, Cu,Zn superoxide dismutase aggregation in, A85  
Angiogenesis  
  thrombin-induced, 173  
  mechanism of, A15  
  tissue factor inhibition and, A36, 217  
Angiotensin-converting enzyme, during *Drosophila* metamorphosis, 20-hydroxyecdysone regulation of, A39  
Animals, haem degradation in, A50, 630  
Annulus fibrosus  
  development of, A110, 874  
  matrix formed by, A113, 874  
Antenna, of purple bacteria, structure and function of, A52  
Antibodies  
  aggregation prevention by, A93  
  bispecific, targeting cancer cells, A67, 507  
  chimeric human, against *Pseudomonas aeruginosa* surface antigen, A92  
  formatting fragments of, for specific therapeutic functions, A68, 512  
  as paradigm for molecular recognition, A47, 341  
  stable single-domain, from camelids, A93  
  therapeutic  
    engineering for improved function, 487  
    formatting fragments for, 512  
    Troy and Pep strategies for, 500  
 $\alpha_1$ -Antichymotrypsin, gene regulation of, A20, 93  
Anticomplement agents  
  to deliver active regulator to disease sites, A120  
  targeting C3, design of, A100  
  targeting of, A100  
Anticomplement therapy, A100  
  bacterial expression and membrane targeting of CD59 for, A119  
Antigen receptor signalling, B-lymphocyte development and, 812  
Antimalaria drugs, fatty acid synthesis and, A120  
Antimicrobials, antiproteases as, A22, 111  
Antioxidants, cell death reduced by, in wounded articular cartilage, A127  
Antiprotease(s)  
   $\alpha_1$ -antichymotrypsin, gene regulation of, A20, 93  
  antimicrobial activity of, A22, 111  
   $\alpha_1$ -antitrypsin

- deficiency of, dementia and, 89  
gene regulation of, 93  
in infection and inflammation, A22, 116  
matrix metalloproteinase-9 inhibition, vein graft stenosis and, 120  
skeletal muscle regeneration and, A40  
Antithrombotic substances, in herbs and spices, A35  
 $\alpha_1$ -Antitrypsin  
deficiency of, dementia and, 89  
gene regulation of, A20, 93  
 $\alpha_1$ -Antitrypsin deficiency, as hypersensitive mousetrap, A20  
Anti-tumour effect, hammerhead ribozymes in, 1145  
Antiviral research, hepatitis C virus ribosome entry site in, 140  
Apple allergy, post-harvest treatment of, immunosassaying effects of, A129  
*Aquilegia vulgaris*,  $\Delta^8$ -sphingolipid desaturase in, isolation and characterisation of cDNA encoding, 1073  
*Arabidopsis*  
glycosyltransferases of, genomics of, A25  
multigene glycosyltransferases in, 301  
splicing factor orthologues in, 146  
Arachidonic acid, platelet aggregation mediated by, cyclooxygenase and signalling inhibitors in, A130  
Archaea, methanogenic, nickel tetrapyrrole F430 in, A51  
ARF, *see* ADP-ribosylation factor  
Arginine dibasic convertase gene promoter activity in, A42  
Arthritis, rheumatoid, glutamate signalling in, A127  
Articular cartilage  
chondrocytes in  
genotyping of, A128  
matrix deposition by, A126  
subpopulation differences in, A128  
TNF- $\alpha$  up-regulation of protein kinase R in, A125, 886  
collagen type II in, changes in expression of, A127  
collagen type IX in, interaction with fibronectin, A126  
supercal zone proteoglycan of, matrix protease degradation of, A125  
thymosin  $\beta_4$  regulation in, A125, 879  
death in, A127  
*Aspergillus nidulans* SREa regulon members, in siderophore biosynthesis and utilisation, 781  
Atherosclerosis  
coronary, in diabetes, monocyte activity in, metabolic syndrome effect on, A131  
extracellular proteolysis in, A13, 163  
inflammatory basis of, A130  
ATP, mitochondrial production of, acetyl group deficit and, A10, 275  
ATP hydrolysis, and metal ion insertion into porphyrins, magnesium chelase in coupling of, A75  
AU-rich element, TNF mRNA translational control by, A116, 952  
Autoimmune disease  
B lymphocyte depletion in, 824  
non-organ-specific, Fc $\gamma$  receptor III reactivity in, 819  
Autoimmune encephalomyelitis, proteolytic system in, A15  
B lymphocytes  
calcium responses of, innate immunity linkage with, CD19-CD21 complex in, 807
- depletion of, in rheumatoid arthritis and other autoimmune disorders, 824  
development of, antigen receptor signalling and, 812  
B lymphoma cells, adhesion to, EMR4 in, A86  
*Bacillus megaterium*  
cobalamin biosynthesis in, mechanism of, A73, 610  
*Bacillus subtilis*, haem A synthesis in, strobhaem production in, 610  
Back pain, intervertebral disc in, A110, A74, 590  
Bacteria  
Bacterial endotoxin, elafin interaction with, A40  
Bacterial microaerobic metabolism, cytochrome *cbd*, oxidase and, 653  
Barrier properties, of urothelium, A44  
Base pairing, group I introns and RNA folding, 1149  
Beta cells, *see* Islets  
Beta-oxidation complexes, intramitochondrial, A5  
Beta-site amyloid precursor protein cleaving enzyme, A81  
Biochemical tests  
converting to clinical decisions, A115  
disposable plastic microfluidic device arrays in, 73  
Biochemistry  
in allied health curriculum, A24  
in complementary medicine curriculum, A24  
in human nutrition and dietetics degree courses, A23  
for nurses, A23  
for physiological measurement technicians, A23  
in podiatry curriculum, A23  
Biochemistry students, mathematics courses for, A114  
Bioenergetics, of muscle, A9, 232  
Biotin-formats, C protein-coupled receptors and, A61, 473  
Biomarkers, discovery and validation of, ProteinChIP biology system in, A13  
Bivalent metal ion  
RNase P RNA-mediated catalysis, 1153  
hammerhead ribozymes, 145  
Bladder cancer, proteomic strategies in, A12  
Blood coagulation proteases  
cancer metastatic potential and, A17, 207  
extracellular proteolysis in atherosclerosis, 163  
human cancer and, 201  
non-haemostatic plasmin generation and, 189  
thrombin and proase-activator receptor I, in pulmonary fibrosis, 211  
thrombin-induced angiogenesis and, 173  
tissue factor inhibition and angiogenesis, 217  
tissue fibrosis and, 194  
tissue plasminogen activator
- in neurobiology and neuropathology, 183  
in neuronal survival and function, A15, 222  
urokinase plasminogen activator anti-invasive cancer therapy and, 177  
as marker of cancer metastatic potential, A17, 207  
urokinase receptor system and kininogen in inflammation, 168  
Blood function, after multiple hyperbaric oxygen treatments, A34  
Blood group substances, fucosyl transferases and, A2  
Bone, collagen synthetic rates in, A30, 61  
Bone remodelling, glutamate transporters in, A125  
Brain  
acute and chronic 5-aminolaevulinic acid intoxication in, A73  
marine, lateral geniculate nucleus of, 14-3-3 proteins in, A91  
Brain mitochondria, cytochrome c release from, neurodegeneration apoptotic mechanisms and, A84  
*Brassica napus*, lipid biosynthesis in, antisense down-regulation in, 1056  
Break Point Closure Region kinase, 14-3-3 protein interaction with, A91  
Breast adenocarcinoma cells, aminolaevulinic acid transport in, A71  
BRI gene mutation  
in familial British and Danish dementias, A56, 557  
neurotoxic peptides related to, 557  
C1, structural biology of, A98, 1001  
C1q, binding to myelomonocytic cells, A118  
C1q receptor, structure-function studies of, A99, 1010  
C3d, complement receptor 2 complex with, A97, 983  
C3d:CR2 SCR-1/2 complex, SCR-1 distance from, SCR-2 in, A118  
C4b-binding protein, structure-function of, A97, 978  
C5 convertase, structure-function studies of, A98, 1006  
C55, interaction with non-complement ligands, 1014  
*Caenorhabditis elegans*  
cytoplasmic aminopeptidase P in, A40  
glycome of, A4  
as model of nucleoside transporters, A44  
N-glycans in development of, proteomics of, A1  
O-glycosylation in, genomic and RNA interference screens in, A1  
Calcineurin, in skeletal muscle fibre regulation, A33  
Calcitonin gene-related peptide (CCRP) binding of mutations to hydrophilic residues, A86  
functional relevance of, A60  
interaction with its receptors, A59, 451  
non-peptide antagonists for, 468  
receptor component protein rep and, A60  
Calcitonin gene-related peptide (CCRP) receptor  
adrenomedullin and, 432  
non-peptide antagonists for, A61  
Calcitonin receptor  
functional relevance of, 455  
genetic transcriptional regulation of, A57  
Calcitonin receptor gene, transcriptional regulation of, 423  
Calcitonin receptor-like receptor
- deficiency of, dementia and, 89  
gene regulation of, 93  
in infection and inflammation, A22, 116  
matrix metalloproteinase-9 inhibition, vein graft stenosis and, 120  
skeletal muscle regeneration and, A40  
Antithrombotic substances, in herbs and spices, A35  
 $\alpha_1$ -Antitrypsin  
deficiency of, dementia and, 89  
gene regulation of, A20, 93  
 $\alpha_1$ -Antitrypsin deficiency, as hypersensitive mousetrap, A20  
Anti-tumour effect, hammerhead ribozymes in, 1145  
Antiviral research, hepatitis C virus ribosome entry site in, 140  
Apple allergy, post-harvest treatment of, immunosassaying effects of, A129  
*Aquilegia vulgaris*,  $\Delta^8$ -sphingolipid desaturase in, isolation and characterisation of cDNA encoding, 1073  
*Arabidopsis*  
glycosyltransferases of, genomics of, A25  
multigene glycosyltransferases in, 301  
splicing factor orthologues in, 146  
Arachidonic acid, platelet aggregation mediated by, cyclooxygenase and signalling inhibitors in, A130  
Archaea, methanogenic, nickel tetrapyrrole F430 in, A51  
ARF, *see* ADP-ribosylation factor  
Arginine dibasic convertase gene promoter activity in, A42  
Arthritis, rheumatoid, glutamate signalling in, A127  
Articular cartilage  
chondrocytes in  
genotyping of, A128  
matrix deposition by, A126  
subpopulation differences in, A128  
TNF- $\alpha$  up-regulation of protein kinase R in, A125, 886  
collagen type II in, changes in expression of, A127  
collagen type IX in, interaction with fibronectin, A126  
supercal zone proteoglycan of, matrix protease degradation of, A125  
thymosin  $\beta_4$  regulation in, A125, 879  
death in, A127  
*Aspergillus nidulans* SREa regulon members, in siderophore biosynthesis and utilisation, 781  
Atherosclerosis  
coronary, in diabetes, monocyte activity in, metabolic syndrome effect on, A131  
extracellular proteolysis in, A13, 163  
inflammatory basis of, A130  
ATP, mitochondrial production of, acetyl group deficit and, A10, 275  
ATP hydrolysis, and metal ion insertion into porphyrins, magnesium chelase in coupling of, A75  
AU-rich element, TNF mRNA translational control by, A116, 952  
Autoimmune disease  
B lymphocyte depletion in, 824  
non-organ-specific, Fc $\gamma$  receptor III reactivity in, 819  
Autoimmune encephalomyelitis, proteolytic system in, A15

- RAMP combination with, pharmacology and desensitisation of, A87  
transcriptional regulation of, in microvascular endothelial cells, A89
- Calcium, adenylyl cyclase IX proteolysis dependent on, A85
- Calcium effector, VPAC receptor coupling to  
loop sequence and, 447  
structural sequence and, A88
- Calcium response, of B lymphocytes, innate immunity linkage with, CD19-CD21 complex in, 807
- Calmodulin  
conformational changes in activation of protein kinases, 55  
interaction with metabotropic glutamate receptors, A88  
in protein kinase activation, A33
- Calpain  
lipid interactions of, A39  
in myometrial MLCK expression and cleavage, preterm labour and, A41
- Camelids, stable single-domain antibody fragments from, A93
- Cancer  
anti-invasive therapy for, urokinase plasminogen activator in, 177  
human, blood coagulation proteases in, 201  
metastatic potential of, uPA as marker of, A17, 207  
tissue factor and thrombin generation and, A17
- Cancer cells, bispecific antibodies targeting, A67, 507
- Cancer therapy, urokinase receptors as target of, A13
- Capillary formation, in endothelial and fibroblast cells, tissue factor effect on, A36
- Capsid protein, of papillomavirus type 6, A38
- Carbohydrate-active enzymes  
genomics of, A24  
structure of, 291
- Carbon flow, for fatty acid synthesis, A100
- Carbon metabolism, in tobacco, mitochondrial HSP70 and, A31
- Carbon monoxide toxicity, in heart, ischaemia/reperfusion-like injury from, A34
- Carbon-carbon bond formation, catalysed by ribozymes, 1137
- Cardiovascular risk, genetic and dietary factors in, A11
- Cartilage  
articular  
chondrocytes of  
genotyping of, A128  
matrix deposition by, A126  
subpopulation differences in, A128  
TNF- $\alpha$  up-regulation of protein kinase R in, A125, 886  
collagen type II in, changes in expression of, A127  
collagen type IX in, interaction with fibronectin, A126  
superficial zone proteoglycan of, matrix protease degradation of, A125  
thymosin  $\beta$ 4 regulation in, A125, 879  
wounded, antioxidant-reduced cell death in, A127  
extracellular matrix degradation in, A124  
research on, recent developments in, A105, 894
- Cartilage metabolism, *n*-3 fatty acids and, A121
- Cartilage tissue, engineering of, A113
- Catalytic RNA, ribozymes, twenty years later, 1162

- nuclear mRNA degradation pathways in, A117
- spliceosomes of, molecular interactions of, A18
- transcriptional termination by RNA polymerase II in, A18
- Zinc
- deficiency of, in plants, 766
- neprilysin zinc family of, in *Drosophila* peptide signalling, A40
- Zinc finger proteins, CCCH tandem, tristetraprolin family of, in mRNA turnover, A115, 945
