Biochemical Society Special Lecture

Nitrate- and nitrite-responsive sensors NarX and NarQ of proteobacteria

V. Stewart

1-10

Morton Medal Lecture

New insights into the roles of phosphoinositides and inositol polyphosphates in yeast

R.H. Michell (pictured), N.M. Perera and S.K. Dove

11-15

Independent Meeting

Signalling the Future

University of Liverpool, Liverpool, 4-6 September 2002

Edited by D. Fernig (Liverpool), M. Fisher (Liverpool), M. Wheatley (Birmingham), M. Parker (Imperial College London), O. Petersen (Liverpool), M. Wakelam (Birmingham), P. Hawkins (Cambridge), S. Cook (Cambridge), S. Jackson (Cambridge), P. Ingham (Sheffield), T. Hart (Liverpool), M. Bennett (Liverpool), J. Saunders (Liverpool), R. Beynon (Liverpool) and J. Hurst (Liverpool)

Sponsored by The Cancer and Polio Research Fund, The Biochemical Society, AstraZeneca, The International Union of Biochemistry and Molecular Biology, Centre for Comparative and Infectious Diseases, University of Liverpool, The Society for Endocrinology, The British Society for Developmental Biology, The European Chemoreception Research Organization, Cancer Research UK, The Wellcome Trust, The Physiological Society, GlaxoSmithKline, Pfizer, BioRad, Micromass, Trends in Biochemical Sciences and Kinetic Imaging

Liverpool: the early years of biochemistry

G.A.J. Pitt

16-19

Signal transduction by vascular endothelial growth factor receptors

L. Claesson-Welsh

20-24

Isolation of novel Src substrates

S.A. Courtneidge

25-28

Structure and activation of muscarinic acetylcholine receptors

E.C. Hulme, Z.L. Lu, J.W. Saldanha and M.S. Bee

29-34

Agonist binding to peptide hormone receptors

M. Wheatley, S.R. Hawtin, V.J. Wesley, H.C. Howard, J. Simms, A. Miles, K. McEwan and R.A. Parslow

35-39

The complex matter of DNA double-strand break detection

J.M. Bradbury and S.P. Jackson

40-44

Neural differentiation of mouse embryonic stem cells

M.P. Stavridis and A.G. Smith

45-49

Neuron-glia interactions during axon guidance in *Drosophila*

A. Hidalgo

50-55

Structure and mechanism of the oestrogen receptor E.H. Kong, A.C.W. Pike and R.E. Hubbard	56–59
Glucocorticoid suppression of nuclear factor- κ B: a role for histone modifications M. Kagoshima, K. Ito, B. Cosio and I.M. Adcock	60–65
Cross-coupling between the oestrogen receptor and phosphoinositide 3-kinase J.K. Liao	66–70
Route of steroid-activated macromolecules through nuclear pores imaged with atomic force microscopy H. Oberleithner, C. Schäfer, V. Shahin and L. Albermann	71–75
Calcium signalling in and around the nuclear envelope J. Gerasimenko, Y. Maruyama, A. Tepikin, O.H. Petersen and O. Gerasimenko	76–78
Activated M-phase-promoting factor (MPF) is exported from the nucleus of starfish oocytes to increase the sensitivity of the Ins(1,4,5) P_3 receptors L. Santella, E. Ercolano, D. Lim, G.A. Nusco and F. Moccia	79–82
The role of Rap1 in integrin-mediated cell adhesion J.L. Bos, K. de Bruyn, J. Enserink, B. Kuiperij, S. Rangarajan, H. Rehmann, J. Riedl, J. de Rooij, F. van Mansfeld and F. Zwartkruis	83–86
A-kinase-anchoring proteins and cytoskeletal signalling events J.D. Scott	87–89
Integrin–protein kinase C relationships J. Ivaska, S. Kermorgant, R. Whelan, M. Parsons, T. Ng and P.J. Parker	90–93
Phospholipase D1 and potential targets of its hydrolysis product, phosphatidic acid N.T. Ktistakis, C. Delon, M. Manifava, E. Wood, I. Ganley and J.M. Sugars	94–97
Regulation, secretion and activity of type III-secreted proteins of enterohaemorrhagic <i>Escherichia coli</i> O157 A.J. Roe, D.E.E. Hoey and D.L. Gally	98–103
<i>Yersinia pestis</i> and plague R.W. Titball, J. Hill, D.G. Lawton and K.A. Brown	104–107
Temporal regulation of outer surface proteins of the Lyme-disease spirochaete <i>Borrelia burgdorferi</i> T.G. Schwan	108–112
Sense of smell: recognition and transduction of olfactory signals H. Breer	113–116
Pheromones, binding proteins and receptor responses in rodents M.V. Novotny	117–122
Plant stress signalling: understanding and exploiting plant–plant interactions J.A. Pickett, H.B. Rasmussen, C.M. Woodcock, M. Matthes and J.A. Napier	123–127
Arthropod semiochemicals: mosquitoes, midges and sealice A.J. Mordue Luntz	128–133
Grouping of odorant receptors: odour maps in the mammalian olfactory bulb K. Mori	134–136

Olfactory adventures of elephantine pheromones L.E.L. Rasmussen, J. Lazar and D.R. Greenwood	137-141
Multiple roles of major urinary proteins in the house mouse, <i>Mus domesticus</i> R.J. Beynon and J.L. Hurst	142-146
Chemical signalling in mice G.K. Beauchamp and K. Yamazaki	147-151
Towards an understanding of the pregnancy-blocking urinary chemosignals of mice P.A. Brennan and P. Peele	152-155
The future: putting Humpty-Dumpty together again D. Noble	156-158
Communication: from neurons to people; from present to future S.P.R. Rose	159-161

Independent Meeting

AMPK 2002 – 2nd International Meeting on AMP-activated Protein Kinase

University of Dundee, Scotland, 12–14 September 2002

Edited by D.G. Hardie (Dundee) and D. Carling (Imperial College London)

Sponsored by The Wellcome Trust, The Biochemical Society, BioDundee, Novo-Nordisk, Merck Sante, Aventis Pharma, Eli Lilly, Mercury Therapeutics, Merck & Co Inc., Pfizer Inc., Abbott, GlaxoSmithKline, Boehringer, AstraZeneca, Upstate and Roche

AMP-activated protein kinase, super metabolic regulator B.E. Kemp, D. Stapleton, D.J. Campbell, Z.-P. Chen, S. Murthy, M. Walter, A. Gupta, J.J. Adams, F. Katsis, B. van Denderen, I.G. Jennings, T. Iseli, B.J. Mitchell and L.A. Witters	162-168
A molecular approach to the concerted action of kinases involved in energy homoeostasis D. Neumann, U. Schlattner and T. Wallimann	169-174
Role of the yeast Snf1 protein kinase in invasive growth S. Kuchin, V.K. Vyas and M. Carlson	175-177
Snf1 protein kinase: a key player in the response to cellular stress in yeast P. Sanz	178-181
Long-term regulation of AMP-activated protein kinase and acetyl-CoA carboxylase in skeletal muscle W.W. Winder, D.G. Hardie, K.J. Mustard, L.J. Greenwood, B.E. Paxton, S.H. Park, D.S. Rubink and E.B. Taylor	182-185
A possible role for AMP-activated protein kinase in exercise-induced glucose utilization: insights from humans and transgenic animals J.N. Nielsen, S.B. Jørgensen, C. Frøsig, B. Viollet, F. Andreelli, S. Vaulont, B. Kiens, E.A. Richter and J.F.P. Wojtaszewski	186-190
AMP-activated protein kinase regulation and action in skeletal muscle during exercise N. Musi, H. Yu and L.J. Goodyear	191-195

Role of AMP-activated protein kinase in leptin-induced fatty acid oxidation in muscle Y. Minokoshi and B.B. Kahn	196–201
Malonyl-CoA and AMP-activated protein kinase (AMPK): possible links between insulin resistance in muscle and early endothelial cell damage in diabetes N.B. Ruderman, J.M. Cacicedo, S. Itani, N. Yagihashi, A.K. Saha, J.M. Ye, K. Chen, M. Zou, D. Carling, G. Boden, R.A. Cohen, J. Keaney, E.W. Kraegen and Y. Ido	202–206
AMP-activated protein kinase regulation of fatty acid oxidation in the ischaemic heart T.A. Hopkins, J.R.B. Dyck and G.D. Lopaschuk	207–212
New targets of AMP-activated protein kinase L. Hue, C. Beauloye, L. Bertrand, S. Horman, U. Krause, A.-S. Marsin, D. Meisse, D. Vertommen and M.H. Rider	213–215
Physiological role of AMP-activated protein kinase (AMPK): insights from knockout mouse models B. Viollet, F. Andreelli, S.B. Jørgensen, C. Perrin, D. Flamez, J. Mu, J.F.P. Wojtaszewski, F.C. Schuit, M. Birnbaum, E. Richter, R. Burcelin and S. Vaulont	216–219
AMP-activated protein kinase and hepatic genes involved in glucose metabolism P. Ferré, D. Azzout-Marniche and F. Foufelle	220–223
AMP-activated protein kinase regulates gene expression by direct phosphorylation of nuclear proteins T. Leff	224–227
Glycogen storage disease as a unifying mechanism of disease in the PRKAG2 cardiac syndrome M.H. Gollob	228–231
Identification and characterization of AMPK γ 3 mutations in the pig L. Andersson	232–235
Selective suppression of AMP-activated protein kinase in skeletal muscle: update on 'lazy mice' J. Mu, E.R. Barton and M.J. Birnbaum	236–241

Irish Area Section Meeting

Cellular Stress Responses and Cancer

National University of Ireland, Galway, 4–5 July 2002

Edited by M.P. Carty and N. Lowndes (Galway)

Role of the <i>Saccharomyces cerevisiae</i> Rad9 protein in sensing and responding to DNA damage G.W.-L. Toh and N.F. Lowndes	242–246
Protein–protein interactions during mammalian DNA single-strand break repair K.W. Caldecott	247–251

The <i>RAD30</i> cancer susceptibility gene M.P. Carty, M. Glynn, M. Maher, T. Smith, J. Yao, K. Dixon, J. McCann, L. Rynn and A. Flanagan	252–256
Role played by BRCA1 in regulating the cellular response to stress P.M. Gilmore, J.E. Quinn, P.B. Mullan, H.N. Andrews, N. McCabe, M. Carty, R.D. Kennedy and D.P. Harkin	257–262
Sister chromatid cohesion and genome stability in vertebrate cells C. Morrison, P. Vagnarelli, E. Sonoda, S. Takeda and W.C. Earnshaw	263–265
Regulation of eukaryotic DNA replication at the initiation step S. Pollok, J. Stoepel, C. Bauerschmidt, E. Kremmer and H.-P. Nasheuer	266–269

Biochemical Society Focused Meeting

PI 3-Kinase in the Immune System

Novartis Horsham Research Centre, 9–10 September 2002

Edited by M.J. Welham (Bath), S.E. Ward (Bath) and P. Finan (Novartis)

Sponsored by GlaxoSmithKline, The Biochemical Society, ICOS, New England Biolabs, Novartis, Pfizer and Serono Pharmaceuticals

PI3K-signalling in B- and T-cells: insights from gene-targeted mice K. Okkenhaug and B. Vanhaesebroeck	270–274
Phosphoinositide 3-kinase γ : a key modulator in inflammation and allergy M.P. Wymann, K. Björklöf, R. Calvez, P. Finan, M. Thomas, A. Trifilieff, M. Barbier, F. Altruda, E. Hirsch and M. Laffargue	275–280
Fc γ RIIB activation leads to inhibition of signalling by independently ligated receptors A.M. Brauweiler and J.C. Cambier	281–285
Role of Src homology 2-containing-inositol 5'-phosphatase (SHIP) in mast cells and macrophages M.J. Rauh, J. Kalesnikoff, M. Hughes, L. Sly, V. Lam and G. Krystal	286–291
Regulation of cell survival and proliferation by the FOXO (Forkhead box, class O) subfamily of Forkhead transcription factors K.U. Birkenkamp and P.J. Coffey	292–297
