Colworth Medal Lecture

Pathways for remodelling chromatin

T. Owen-Hughes

893-905

Biochemical Society Focused Meetings

Calcium Oscillations and the 5th UK Calcium Signalling Conference

University of Liverpool, 1-2 May 2003

Edited by A. Simpson, A. Tepikin, J. Quayle and T. Kamishima (Liverpool)

Sponsored by Bio-Rad, Carl Zeiss International, Improvion, Kinetic Imaging Ltd., Leica Microsystems (UK) Ltd., MerseyBIO, PerkinElmer Life and Analytical Sciences, Photon Technology International Inc., The Physiological Society, The Wellcome Trust and VisiTech International

Ca ²⁺ oscillations at fertilization in mammals G. Halet, P. Marangos, G. FitzHarris and J. Carroll	907-911
Molecular and cellular requirements for the regulation of adenylate cyclases by calcium D.M.F. Cooper	912-915
Calcium entry and the control of calcium oscillations T.J. Shuttleworth and O. Mignen	916-919
Sarcolemma agonist-induced interactions between InsP ₃ and ryanodine receptors in Ca ²⁺ oscillations and waves in smooth muscle J.G. McCarron, K.N. Bradley, D. MacMillan and T.C. Muir	920-924
Calcium oscillations in T-cells: mechanisms and consequences for gene expression R.S. Lewis	925-929
Cardiac calcium signalling M.J. Berridge	930-933
Regulation of [Ca ²⁺] _c oscillations by plasma membrane Ca ²⁺ fluxes: a role for natriuretic peptides A.K. Green, O. Zolle and A.W.M. Simpson	934-938
Anti-arrhythmic actions of polyunsaturated fatty acids in cardiac muscle exerted via the sarcoplasmic reticulum S. O'Neill	939-942
Ca ²⁺ -induced Ca ²⁺ release in cardiac and smooth muscle cells T. Kamishima and J.M. Quayle	943-946

Generation and modulation of cytosolic Ca ²⁺ signals in pancreatic acinar cells: techniques and mechanisms N.J. Dolman, A.V. Tepikin and O.H. Petersen	947-949
Bi-directional signalling from the InsP ₃ receptor: regulation by calcium and accessory factors H.L. Roderick and M.D. Bootman	950-953
Modulation of Ca ²⁺ oscillations by phosphorylation of Ins(1,4,5)P ₃ receptors D.I. Yule, S.V. Straub and J.I.E. Bruce	954-957
Ins(1,4,5)P ₃ -mediated calcium signals and apoptosis: is there a role for Bcl-2? C.W. Distelhorst and H.L. Roderick	958-959
Agonist-induced calcium and oxidative stress responses in endothelial cells J.A. Wilkinson and R. Jacob	960-962
Role of myristoylation in the intracellular targeting of neuronal calcium sensor (NCS) proteins D.W. O'Callaghan and R.D. Burgoyne	963-965
The Ras binary switch: an ideal processor for decoding complex Ca ²⁺ signals? S.A. Walker, P.J. Lockyer and P.J. Cullen	966-969

Intermolecular Associations in 2D and 3D

University of Nottingham, 19-20 June 2003

Edited by S. E. Harding and P. O'Shea (Nottingham)

Sponsored by BioCore International SA, Oxford University Press, Pro2Kem Ltd. and Wyatt Technology UK Ltd.

Introductory remarks S.E. Harding and P. O'Shea	971-972
X-ray crystallographic studies of protein-ligand interactions R.A. Palmer and H. Niwa	973-979
Molecular modelling probes: docking and scoring R.T. Kroemer	980-984
Protein-ligand and protein-protein interactions studied by electrospray ionization and mass spectrometry W.I. Burkitt, P.J. Derrick, D. Lafitte and I. Bronstein	985-989
Intermolecular interactions with/within cell membranes and the trinity of membrane potentials: kinetics and imaging P. O'Shea	990-996
Scanning FCS, a novel method for three-dimensional particle tracking V. Levi, Q. Ruan, K. Kis-Petikova and E. Gratton	997-1000
Interprotein interactions are responsible for the confined diffusion of a G-protein-coupled receptor at the cell surface F. Daumas, N. Destainville, C. Millot, A. Lopez, D. Dean and L. Salomé	1001-1005
Studies of protein-ligand interactions by NMR J. Clarkson and I.D. Campbell	1006-1009

The development of chromatography for the characterization of protein interactions: a personal perspective D.J. Winzor	1010–1014
Tracer sedimentation equilibrium: a powerful tool for the quantitative characterization of macromolecular self- and hetero-associations in solution G. Rivas and A.P. Minton	1015–1019
Imaging molecular interactions in cells by dynamic and static fluorescence anisotropy (rFLIM and emFRET) D.S. Lidke, P. Nagy, B.G. Barisas, R. Heintzmann, J.N. Post, K.A. Lidke, A.H.A. Clayton, D.J. Arndt-Jovin and T.M. Jovin	1020–1027
Measurements of associations of cell-surface receptors by single-particle fluorescence imaging R.J. Cherry, I.E.G. Morrison, I. Karakikes, R.E. Barber, G. Silkstone and N. Fernández	1028–1031
Binding properties and anti-bacterial activities of V-region identical, human IgG and IgM antibodies, against group B <i>Neisseria meningitidis</i> T.E. Michaelsen, Ø. Ihle, K.J. Beckstrøm, T.K. Herstad, R.H. Sandin, J. Kolberg and A. Aase	1032–1035
Mucoadhesive interactions S.E. Harding	1036–1041
The androgen receptor transactivation domain: the interplay between protein conformation and protein–protein interactions J. Reid, R. Betney, K. Watt and I.J. McEwan	1042–1046
Time-resolved stimulated emission depletion in two-photon excited states A.J. Bain, R.J. Marsh, D.A. Armoogum, O. Mongin, L. Porrès and M. Blanchard-Desce	1047–1051
Measuring and visualizing single molecular interactions in biology S. Allen, S.M. Rigby-Singleton, H. Harris, M.C. Davies and P. O’Shea	1052–1057

Irish Area Section Meeting

Triglyceride-Rich Lipoproteins and Atherosclerosis

Royal College of Surgeons in Ireland, Dublin, 25–26 June 2003

Edited by P. Collins (RCSI, Dublin)

Sponsored by Merck, Sharp & Dohme (Ireland) and Labplan Ltd., Science Support Solutions

Oxidant stress: a key determinant of atherothrombosis J. Loscalzo	1059–1061
Oxidative modification of triacylglycerol-rich lipoproteins I.S. Young, C. McFarlane and J. McEneny	1062–1065
Triacylglycerol-rich lipoproteins and the generation of small, dense low-density lipoprotein C.J. Packard	1066–1069
Relevance of hepatic lipase to the metabolism of triacylglycerol-rich lipoproteins A. Zambon, S. Bertocco, N. Vitturi, V. Polentarutti, D. Vianello and G. Crepaldi	1070–1074

Regression of pre-established atherosclerosis in the apoE ^{-/-} mouse by conjugated linoleic acid S. Toomey, H. Roche, D. Fitzgerald and O. Belton	1075–1079
Triacylglycerol-rich lipoproteins and atherosclerosis – where is the link? P. Cullen	1080–1084
The extended postprandial phase in diabetes D. Owens	1085–1089
Postprandial lipaemia in familial combined hyperlipidaemia M. Castro Cabezas	1090–1093
