Biochemical Society Focused Meetings

Post-Transcriptional Regulation of Plant Gene Expression

University of East Anglia, Norwich, U.K., 15–17 April 2004

Edited by A.J. Michael (Institute of Food Research, Norwich) and John W.S. Brown (Scottish Crop Research Institute, Dundee, U.K.)

Sponsored by Ambion, Biotechnology and Biological Sciences Research Council, Daiwa Foundation, The Gatsby Charitable Foundation, The Institute of Food Research, The John Innes Centre, The Scottish Crop Research Institute and VWR International

Involvement of the nucleolus in plant virus systemic infection

S.H. Kim, E.V. Ryabov, J.W.S. Brown and M. Taliansky 557–560

A plethora of plant serine/arginine-rich proteins: redundancy or evolution of novel gene functions?

M. Kalyna and A. Barta 561–564

RNA processing and *Arabidopsis* flowering time control

G.G. Simpson, V. Quesada, I.R. Henderson, P.P. Dijkwel, R. Macknight and C. Dean 565–566

Post-transcriptional steps involved in the assembly of photosystem I in *Chlamydomonas*

J.-D. Rochaix, K. Perron, D. Dauvillée, F. Laroche, Y. Takahashi and M. Goldschmidt-Clermont 567–570

Chloroplast RNA-binding and pentatricopeptide repeat proteins

T. Nakamura, G. Schuster, M. Sugiura and M. Sugita 571–574

Genetics of the DST-mediated mRNA decay pathway using a transgene-based selection

P. Lidder, M.A. Johnson, M.L. Sullivan, D.M. Thompson, M.A. Pérez-Amador, C.J. Howard and P.J. Green 575–577

Characterization of a crucifer plant pre-rRNA processing complex

J. Sáez-Vasquez, D. Caparros-Ruiz, F. Barneche and M. Echeverría 578–580

Plant growth: the translational connection

C. Robaglia, B. Menand, Y. Lei, R. Sormani, M. Nicolăi, C. Gery, E. Teoulé, D. Deprost and C. Meyer 581–584

The role of the initiation surveillance complex in promoting efficient protein synthesis

D.R. Gallie 585–588

Plant translation initiation factors: it is not easy to be green

K.S. Browning 589–591

Control of translation reinitiation on the cauliflower mosaic virus (CaMV) polycistronic RNA

L. Ryabova, H.-S. Park and T. Hohn 592–596

Autoregulation of the gene for cystathionine γ -synthase in *Arabidopsis*: post-transcriptional regulation induced by S-adenosylmethionine

H. Onouchi, I. Lambein, R. Sakurai, A. Suzuki, Y. Chiba and S. Naito 597–600

Regulation of chloroplast translation: interactions of RNA elements, RNA-binding proteins and the plastid ribosome A. Manuell, M.V. Beligni, K. Yamaguchi and S.P. Mayfield	601–605
Translation inhibition during the induction of apoptosis: RNA or protein degradation? M. Bushell, M. Stoneley, P. Sarnow and A.E. Willis	606–610
A key factor of translation reinitiation, ribosomal protein L24, is involved in gynoecium development in <i>Arabidopsis</i> T. Nishimura, T. Wada and K. Okada	611–613
Choice of a start codon in a single transcript determines DNA ligase 1 isoform production and intracellular targeting in <i>Arabidopsis thaliana</i> P.A. Sunderland, C.E. West, W.M. Waterworth and C.M. Bray	614–616

Heat Shock Proteins and Modulation of Cellular Function

Guy's Hospital, London, U.K.

Edited by C. Kelly (King's College London)

Mechanism of substrate recognition by Hsp70 chaperones A. Erbse, M.P. Mayer and B. Bukau	617–621
Peptides complexed with the protein HSP70 generate efficient human cytolytic T-lymphocyte responses B. Javid, P.A. MacAry, W. Oehlmann, M. Singh and P.J. Lehner	622–625
BCG (Bacille Calmette–Guérin) HspCs (heat-shock protein–peptide complexes) induce T-helper 1 responses and protect against live challenge in a murine aerosol challenge model of pulmonary tuberculosis C.A.L.S. Colaco, C.R. Bailey, J. Keeble and K.B. Walker	626–628
Functional domains of HSP70 stimulate generation of cytokines and chemokines, maturation of dendritic cells and adjuvanticity T. Lehner, Y. Wang, T. Whittall, E. McGowan, C.G. Kelly and M. Singh	629–632
Scavenger receptors and heat-shock protein-mediated antigen cross-presentation Y. Delneste	633–635
Heat-shock protein 70 and heat-shock protein 90 associate with Toll-like receptor 4 in response to bacterial lipopolysaccharide M. Triantafilou and K. Triantafilou	636–639
Neuronal DnaJ proteins HSJ1a and HSJ1b: a role in linking the Hsp70 chaperone machine to the ubiquitin–proteasome system? J.P. Chapple, J. van der Spuy, S. Poopalasundaram and M.E. Cheetham	640–642
Role of AIP and its homologue the blindness-associated protein AIPL1 in regulating client protein nuclear translocation J. van der Spuy and M.E. Cheetham	643–645

BioScience 2004 Abstracts
