Colworth Medal Lecture

Chemical insights from structural studies of enzymes

J.H. Naismith

647-654

Focus Topics at BioScience2004

Lipids, Rafts and Traffic

A Focus Topic at BioScience2004, held at SECC Glasgow, U.K., 18-22 July 2004

Edited by G. Banting (Bristol, U.K.), N. Bulleid (Manchester, U.K.), C. Connolly (Dundee, U.K.), S. High (Manchester, U.K.) and K. Okkenhaug (Babraham Institute, Cambridge, U.K.)

- Oxidative protein folding in the mammalian endoplasmic reticulum
C.E. Jessop, S. Chakravarthi, R.H. Watkins and N.J. Bulleid 655-658
- Tail-anchored protein biosynthesis at the endoplasmic reticulum: the same but different
S. High and B.M. Abell 659-662
- Catalysis of disulphide bond formation in the endoplasmic reticulum
L. Ellgaard 663-667
- Functional ramifications of FRET-detected nascent chain folding far inside the membrane-bound ribosome
A.E. Johnson 668-672
- Distribution of lipid raft markers in live cells
O.O. Glebov and B.J. Nichols 673-675
- Can membrane nanotubes facilitate communication between immune cells?
B. Önfelt and D.M. Davis 676-678
- Clustering of death receptors in lipid rafts initiates neutrophil spontaneous apoptosis
D. Scheel-Toellner, K. Wang, L.K. Assi, P.R. Webb, R.M. Craddock, M. Salmon and J.M. Lord 679-681
- Intraflagellar transport motors in *Caenorhabditis elegans* neurons
J.M. Scholey, G. Ou, J. Snow and A. Gunnarson 682-684
- Myosin VI: a multifunctional motor
I. Lister, R. Roberts, S. Schmitz, M. Walker, J. Trinick, C. Veigel, F. Buss and J. Kendrick-Jones 685-688
- Imaging myosin 10 in cells
D. Tacon, P.J. Knight and M. Peckham 689-693

Towards bridging the gap from molecular forces to the movement of organisms B.G. Nielsen	694–696
Post-transcriptional processing of cellular RNAs in herpes simplex virus-infected cells B. Taddeo, A. Esclatine and B. Roizman	697–701
Characterization of the <i>cis</i> -acting element directing perinuclear localization of the <i>Metallothionein-1</i> mRNA H. Chabanon, D. Nury, I. Mickleburgh, B. Burtle and J. Hesketh	702–704
Isolation and identification of a protein binding to the localization element of <i>Metallothionein-1</i> mRNA I. Mickleburgh, B. Burtle, D. Nury, H. Chabanon, Z. Chrzanowska-Lightowlers and J.E. Hesketh	705–706

Structure Related to Function: Molecules and Cells

A Focus Topic at BioScience2004, held at SECC Glasgow, U.K., 18–22 July 2004

Edited by D. Alessi (Dundee, U.K.), T. Cass (Imperial College London, U.K.), T. Corfield (Bristol, U.K.), M. Cousin (Edinburgh, U.K.), A. Entwistle (Ludwig Institute for Cancer Research, London, U.K.), I. Fearnley (Cambridge, U.K.), P. Haris (De Montfort, Leicester, U.K.), J. Mayer (Nottingham, U.K.) and M. Tuite (Canterbury, U.K.)

Pleckstrin homology domains: not just for phosphoinositides M.A. Lemmon	707–711
Lipid rafts clustering and signalling by listeriolysin O N.O. Gekara and S. Weiss	712–714
p97 and close encounters of every kind: a brief review I. Dreveny, V.E. Pye, F. Beuron, L.C. Briggs, R.L. Isaacson, S.J. Matthews, C. McKeown, X. Yuan, X. Zhang and P.S. Freemont	715–720
Structural features of the low-density lipoprotein receptor facilitating ligand binding and release N. Beglova, H. Jeon, C. Fisher and S.C. Blacklow	721–723
The anaphase-promoting complex (APC): the sum of its parts? L.A. Passmore	724–727
Structural and functional studies of mutations affecting the UBA domain of SQSTM1 (p62) which cause Paget's disease of bone R. Layfield, B. Ciani, S.H. Ralston, L.J. Hocking, P.W. Sheppard, M.S. Searle and J.R. Cavey	728–730
HAUSP/USP7 as an Epstein–Barr virus target M.N. Holowaty and L. Frappier	731–732
Mechanisms of elongation on the ribosome: dynamics of a macromolecular machine W. Wintermeyer, F. Peske, M. Beringer, K.B. Gromadski, A. Savelsbergh and M.V. Rodnina	733–737
X-ray crystallographic studies for ligand–protein interaction changes in rhodopsin T. Okada	738–741
Active and inactive conformations of the epidermal growth factor receptor K.M. Ferguson	742–745

Characterization of simian virus 40 on its infectious entry pathway in cells using fluorescence correlation spectroscopy S. Bernacchi, G. Mueller, J. Langowski and W. Waldeck	746-749
Activation of the blood-brain barrier by SIV (simian immunodeficiency virus) requires cell-associated virus and is not restricted to endothelial cell activation A.G. MacLean, T.A. Rasmussen, D. Bieniemy and A.A. Lackner	750-752
Fluorescence studies of single biomolecules H. Li, L. Ying, X. Ren, S. Balasubramanian and D. Klenerman	753-756
The effect of force on thermodynamics and kinetics: unfolding single RNA molecules I. Tinoco, Jr, D. Collin and P.T.X. Li	757-760
Single protein molecular dynamics determined with ultra-high precision Y.C. Sasaki	761-763
N-glycosylated catalytic unit meets O-glycosylated propeptide: complex protein architecture in a fungal hexosaminidase O. Plíhal, J. Sklenář, J. Kmoníčková, P. Man, P. Pompach, V. Havlíček, V. Křen and K. Bezouška	764-765
The N-glycan glucosidase system in <i>Trypanosoma brucei</i> D. Jones, A. Mehlert and M.A.J. Ferguson	766-768
Molecular mechanisms in clathrin-mediated membrane budding revealed through subcellular proteomics B. Ritter, F. Blondeau, A.Yu. Denisov, K. Gehring and P.S. McPherson	769-773
Moving proteins from the cytosol into mitochondria A. Chacinska and P. Rehling	774-776
Mass spectrometry is a powerful tool for identification of proteins associated with lipid rafts of Jurkat T-cell line P. Pompach, P. Man, P. Novák, V. Havlíček, A. Fišerová and K. Bezouška	777-779

Signalling Outwards and Inwards

A Focus Topic at BioScience2004, held at SECC Glasgow, U.K., 18-22 July 2004

Edited by J. Challiss (Leicester, U.K.), A. Harwood (University College London, U.K.), M. Humphries (Manchester, U.K.), C. Isacke (Institute of Cancer Research, London, U.K.), R. Liddington (Burnham Institute, La Jolla, CA, U.S.A.), T. Palmer (Glasgow, U.K.), K. Siddle (Cambridge, U.K.), C. Sutherland (Dundee, U.K.), H. Wallace (Aberdeen, U.K.) and M. Welham (Bath, U.K.)

BCR activation of PI3K is Vav-independent in murine B cells E. Vigorito, E. Clayton and M. Turner	781-784
The role of SHIP1 in macrophage programming and activation M.J. Rauh, L.M. Sly, J. Kalesnikoff, M.R. Hughes, L.-P. Cao, V. Lam and G. Krystal	785-788
The p110 δ subunit of phosphoinositide 3-kinase is required for the lipopolysaccharide response of mouse B cells B.J. Hebeis, E. Vigorito and M. Turner	789-791

PDE6 is an effector for the Wnt/Ca ²⁺ /cGMP-signalling pathway in development H. Wang, Y. Lee and C.C. Malbon	792-796
Plakoglobin expression and localization in zebrafish embryo development E.D. Martin and M. Grealy	797-798
A molecular cell biology of lithium R. Williams, W.J. Ryves, E.C. Dalton, B. Eickholt, G. Shaltiel, G. Agam and A.J. Harwood	799-802
Glycogen synthase kinase-3 in insulin and Wnt signalling: a double-edged sword? S. Patel, B. Doble and J.R. Woodgett	803-808
Glycogen synthase kinase 3 β and the regulation of axon growth R.G. Goold and P.R. Gordon-Weeks	809-811
Uncoupling insulin signalling by serine/threonine phosphorylation: a molecular basis for insulin resistance Y. Zick	812-816
Analysis of insulin signalling by RNAi-based gene silencing Q.L. Zhou, J.G. Park, Z.Y. Jiang, J.J. Holik, P. Mitra, S. Semiz, A. Guilherme, A.M. Powelka, X. Tang, J. Virbasius and M.P. Czech	817-821
Mechanisms of integration of cells and extracellular matrices by integrins M.J. Humphries, M.A. Travis, K. Clark and A.P. Mould	822-825
Physical and functional interaction between integrins and hERG potassium channels A. Arcangeli, A. Becchetti, A. Cherubini, O. Crociani, P. Defilippi, L. Guasti, G. Hofmann, S. Pillozzi, M. Olivotto and E. Wanke	826-827
Crumbs homologue 1 in polarity and blindness J. Meuleman, S.A. van de Pavert and J. Wijnholds	828-830
Cytoskeletal proteins talin and vinculin in integrin-mediated adhesion D.R. Critchley	831-836
The integrity of cholesterol-enriched microdomains is essential for the constitutive high activity of protein kinase B in tumour cells S. Elhyany, E. Assa-Kunik, S. Tsory, T. Muller, S. Fedida, S. Segal and D. Fishman	837-839
Regulation of cellular processes by PPAR γ ligands in neuroblastoma cells is modulated by the level of retinoblastoma protein expression V.C. Emmans, H.A. Rodway, A.N. Hunt and K.A. Lillycrop	840-842
Heterodimers and family-B GPCRs: RAMPs, CGRP and adrenomedullin A.C. Conner, J. Simms, D.L. Hay, K. Mahmoud, S.G. Howitt, M. Wheatley and D.R. Poyner	843-846
Dimerization of α_1 -adrenoceptors G. Milligan, J. Pediani, M. Fidock and J.F. López-Giménez	847-850
GPCR-interacting proteins (GIPs): nature and functions J. Bockaert, G. Roussignol, C. Bécamel, S. Gavarini, L. Joubert, A. Dumuis, L. Fagni and P. Marin	851-855
Hetero-oligomers of α_{2A} -adrenergic and μ -opioid receptors do not lead to transactivation of G-proteins or altered endocytosis profiles Y.Q. Zhang and L.E. Limbird	856-860

AKAP (A-kinase anchoring protein) domains: beads of structure-function on the necklace of G-protein signalling C.C. Malbon, J. Tao, E. Shumay and H.-Y. Wang	861-864
Amylin receptors: molecular composition and pharmacology D.L. Hay, G. Christopoulos, A. Christopoulos and P.M. Sexton	865-867
Determining calmodulin binding to metabotropic glutamate receptors with distinct protein-interaction methods K. Lidwell, J. Dillon, A. Sihota, V. O'Connor and B. Pilkington	868-870
Molecular mechanisms of GABA _B receptor activation: new insights from the mechanism of action of CGP7930, a positive allosteric modulator V. Binet, C. Goudet, C. Brajon, L. Le Corre, F. Acher, J.-P. Pin and L. Prézeau	871-872

Biochemical Society Focused Meeting

GPCR Allosterism and Accessory Proteins: New Insights into Drug Discovery

Focused Meeting and Satellite to BioScience2004, held at Organon Laboratories Ltd, Newhouse, Glasgow, U.K., 17 July 2004

Edited by A. Clark (Organon, U.K.), B. Henry (Organon, U.K.) and J. Presland (Organon, U.K.)

Sponsored by Organon Laboratories and Invitrogen

G-protein-coupled receptor allosterism: the promise and the problem(s) A. Christopoulos, L.T. May, V.A. Avlani and P.M. Sexton	873-877
Interactions between G-protein-coupled receptors and periplakin: a selective means to regulate G-protein activation G. Milligan, H. Murdoch, E. Kellett, J.H. White and G.-J. Feng	878-880
Allosteric modulators of metabotropic glutamate receptors: lessons learnt from mGlu1, mGlu2 and mGlu5 potentiators and antagonists M.P. Johnson, E.S. Nisenbaum, T.H. Large, R. Emkey, M. Baez and A.E. Kingston	881-887
G-protein-coupled receptor accessory proteins: their potential role in future drug discovery J. Presland	888-891
