Novartis Medal Lecture

Lsm proteins and RNA processing
J.D. Beggs

433-438

Biochemical Society Focused Meetings

RNA Structure and Function

University of Edinburgh, U.K., 4-6 December 2004

Edited by **S.V. Graham (Glasgow, U.K.)** and **D.M.J. Lilley (Dundee, U.K.)**

Sponsored by BBSRC (Biotechnology and Biological Sciences Research Council), Glen Research, Promega UK Ltd, VH Bio Ltd, Stratogene, New England Biolabs (UK) Ltd, MWG Biotech UK Ltd, Ambion Europe Ltd and Link Technologies Ltd

- Structure-function analysis of the U2 snRNP-associated splicing factor SF3a
A. Krämer, F. Ferfaglia, C.-J. Huang, F. Mulhaupt, D. Nestic and G. Tanackovic 439-442
- Multiple roles of arginine/serine-rich splicing factors in RNA processing
J.R. Sanford, J. Ellis and J.F. Cáceres 443-446
- Towards understanding the catalytic core structure of the spliceosome
S.E. Butcher and D.A. Brow 447-449
- Assays for the RNA chaperone activity of proteins
L. Rajkowitsch, K. Semrad, O. Mayer and R. Schroeder 450-456
- Regulation of alternative splicing by PTB and associated factors
R. Spellman, A. Rideau, A. Matlin, C. Gooding, F. Robinson, N. McGlincy, S.N. Grellscheid, J. Southby, M. Wollerton and C.W.J. Smith 457-460
- Folding and catalysis of the hairpin ribozyme
T.J. Wilson, M. Nahas, T. Ha and D.M.J. Lilley 461-465
- Linkage between proton binding and folding in RNA: implications for RNA catalysis
P.C. Bevilacqua, T.S. Brown, D. Chadalavada, J. Lecomte, E. Moody and S.-i. Nakano 466-470
- Expression of an RNAi-resistant SLBP restores proper S-phase progression
E.J. Wagner, A. Berkow and W.F. Marzluff 471-473
- Engineered riboswitches control gene expression by small molecules
B. Suess 474-476
- A database search for hammerhead ribozyme motifs
S. Gräf, R. Przybilski, G. Steger and C. Hammann 477-478
- Probing the structure of *Saccharomyces cerevisiae* RNase MRP
S.C. Walker, T.V. Aspinall, J.M.B. Gordon and J.M. Avis 479-481

| | |
|--|----------------|
| Reverse splicing of a mobile twin-ribozyme group I intron into the natural small subunit rRNA insertion site Á.B. Birgisdottir and S.D. Johansen | 482–484 |
| RNA backbone rotamers – finding your way in seven dimensions L.J.W. Murray, J.S. Richardson, W.B. Arendall III and D.C. Richardson | 485–487 |
| Ribosome crystallography: catalysis and evolution of peptide-bond formation, nascent chain elongation and its co-translational folding A. Bashan and A. Yonath | 488–492 |
| Ten remarks on peptide bond formation on the ribosome M.V. Rodnina, M. Beringer and P. Bieling | 493–498 |
| The herpes simplex virus ICP27 protein: a multifunctional post-transcriptional regulator of gene expression R.W.P. Smith, P. Malik and J.B. Clements | 499–501 |

Systems Biology: Will it Work?

University of Sheffield, U.K., 12–14 January 2005

Edited by M. Williamson

Sponsored by BBSRC (Biotechnology and Biological Sciences Research Council), British Biophysical Society and GlaxoSmithKline

| | |
|---|----------------|
| Systems biology: will it work? M.P. Williamson | 503–506 |
| A systems- and signal-oriented approach to intracellular dynamics O. Wolkenhauer, S.N. Sreenath, P. Wellstead, M. Ullah and K.-H. Cho | 507–515 |
| Systems biology may work when we learn to understand the parts in terms of the whole A. Cornish-Bowden and M.L. Cárdenas | 516–519 |
| Metabolomics, machine learning and modelling: towards an understanding of the language of cells D.B. Kell | 520–524 |
| Energy transduction by respiratory complex I – an evaluation of current knowledge J. Hirst | 525–529 |
| Algorithms for protein interaction networks M. Lappe and L. Holm | 530–534 |
| Location proteomics: a systems approach to subcellular location R.F. Murphy | 535–538 |
| The heart is already working D. Noble | 539–542 |
