Colworth Medal Lecture

The structure of the bacterial protein translocation complex SecYEG

I. Collinson

1225–1230

Jubilee Lecture

Alternative mechanisms of initiating translation of mammalian mRNAs

R.J. Jackson

1231–1241

Focus Topics at BioScience2005

Cell Architecture: from Structure to Function

SECC Glasgow, U.K., 17–21 July 2005

Edited by S. Cockroft (University College London, U.K.), Y. Goda (University College London, U.K.), R. Insall (Birmingham, U.K.) and M. Wakelam (Birmingham, U.K.)

Regulation of actin assembly by SCAR/WAVE proteins

N. Ibarra, A. Pollitt and R.H. Insall

1243–1246

SH3 domain-containing proteins and the actin cytoskeleton in yeast

G. Mirey, A. Soulard, C. Orange, S. Friant and B. Winsor

1247–1249

Coupling the dynamics of two actin networks – new views on the mechanics of cell protrusion

G. Danuser

1250–1253

Dystroglycan: a multifunctional adaptor protein

J.R. Higginson and S.J. Winder

1254–1255

Formins and VASPs may co-operate in the formation of filopodia

A. Schirenbeck, R. Arasada, T. Bretschneider, M. Schleicher and J. Faix

1256–1259

A role for actin in aging and apoptosis

C.W. Gourlay and K.R. Ayscough

1260–1264

Arf, Sec7 and Brefeldin A: a model towards the therapeutic inhibition of guanine nucleotide-exchange factors

M. Zeghouf, B. Guibert, J.-C. Zeeh and J. Cherfils

1265–1268

Arf family GTPases: roles in membrane traffic and microtubule dynamics R.A. Kahn, L. Volpicelli-Daley, B. Bowzard, P. Shrivastava-Ranjan, Y. Li, C. Zhou and L. Cunningham	1269–1272
Interactions between Sla1p, Lsb5p and Arf3p in yeast endocytosis R. Costa and K.R. Ayscough	1273–1275
Arfs, phosphoinositides and membrane traffic J.G. Donaldson	1276–1278
Centaurin- α_1 and KIF13B kinesin motor protein interaction in ARF6 signalling V. Kanamarlapudi	1279–1281
Centaurin β_4 in cancer R.K. Martin and T.R. Jackson	1282–1284
Phosphoinositide regulation of clathrin-mediated endocytosis V. Haucke	1285–1289
Membrane traffic in cytokinesis J. Matheson, X. Yu, A.B. Fielding and G.W. Gould	1290–1294
Retrograde signalling at the synapse: a role for Wnt proteins P.C. Salinas	1295–1298
Physiological roles of spine motility: development, plasticity and disorders R.A. McKinney	1299–1302
The regulation of membrane to cytosol partitioning of signalling proteins by phosphoinositides and their soluble headgroups C.P. Downes, A. Gray, A. Fairservice, S.T. Safrany, I.H. Batty and I. Fleming	1303–1307
Genetic, biochemical and structural approaches to talin function D.R. Critchley	1308–1312
Two functionally distinct pools of Src kinases for PDGF receptor signalling L. Veracini, M. Franco, A. Boureux, V. Simon, S. Roche and C. Benistant	1313–1315
Compartmentalized cAMP signalling regulates vasopressin-mediated water reabsorption by controlling aquaporin-2 V. Henn, E. Stefan, G.S. Baillie, M.D. Houslay, W. Rosenthal and E. Klussmann	1316–1318

Cellular Information Processing

SECC Glasgow, U.K., 17–21 July 2005

Edited by F. Antoni (Edinburgh, U.K.), C. Cooper (Essex, U.K.), M. Cousin (Edinburgh, U.K.), A. Morgan (Liverpool, U.K.), M. Murphy (Cambridge, U.K.), S. Pyne (Strathclyde, U.K.) and M. Wakelam (Birmingham, U.K.)

Compartmentalization of adenylate cyclase and cAMP signalling D.M.F. Cooper	1319–1322
Imaging the cAMP-dependent signal transduction pathway M. Zaccolo, T. Cesetti, G. Di Benedetto, M. Mongillo, V. Lissandron, A. Terrin and I. Zamparo	1323–1326

Microtubule-associated proteins (MAPs) regulate cAMP signalling through exchange protein directly activated by cAMP (EPAC) S.J. Yarwood	1327–1329
Cyclic nucleotide signalling: a molecular approach to drug discovery for Alzheimer's disease I. McPhee, L.C.D. Gibson, J. Kewney, C. Darroch, P.A. Stevens, D. Spinks, A. Cooreman and S.J. MacKenzie	1330–1332
β -Arrestin-recruited phosphodiesterase-4 desensitizes the AKAP79/PKA-mediated switching of β_2 -adrenoceptor signalling to activation of ERK M.D. Houslay and G.S. Baillie	1333–1336
Genetic manipulation and functional analysis of cAMP signalling in cardiac muscle: implications for a new target of pharmacotherapy Y. Ishikawa, K. Iwatsubo, T. Tsunematsu and S. Okumura	1337–1340
Regulation of exocytosis by protein kinase C A. Morgan, R.D. Burgoyne, J.W. Barclay, T.J. Craig, G.R. Prescott, L.F. Ciuffo, G.J.O. Evans and M.E. Graham	1341–1344
RIM function in short- and long-term synaptic plasticity P.S. Kaeser and T.C. Südhof	1345–1349
Tyrosine phosphorylation of synaptophysin in synaptic vesicle recycling G.J.O. Evans and M.A. Cousin	1350–1353
AMPA receptor phosphorylation during synaptic plasticity J. Boehm and R. Malinow	1354–1356
New metabolically stabilized analogues of lysophosphatidic acid: agonists, antagonists and enzyme inhibitors G.D. Prestwich, Y. Xu, L. Qian, J. Gajewiak and G. Jiang	1357–1361
Critical role of acylglycerol kinase in epidermal growth factor-induced mitogenesis of prostate cancer cells S. Spiegel and S. Milstien	1362–1365
Structural characteristics of lysophosphatidic acid biological targets A.L. Parrill	1366–1369
Lipid phosphate phosphatases and lipid phosphate signalling S. Pyne, J.S. Long, N.T. Ktistakis and N.J. Pyne	1370–1374
Thiol redox control via thioredoxin and glutaredoxin systems A. Holmgren, C. Johansson, C. Berndt, M.E. Lönn, C. Hudemann and C.H. Lillig	1375–1377
Oxidoreduction of protein thiols in redox regulation P. Ghezzi	1378–1381
Defining the protein–protein interactions of the mammalian endoplasmic reticulum oxidoreductases (EROs) S. Dias-Gunasekara and A.M. Benham	1382–1384

Cell signalling by oxidized lipids and the role of reactive oxygen species in the endothelium J.W. Zmijewski, A. Landar, N. Watanabe, D.A. Dickinson, N. Noguchi and V.M. Darley-Usmar	1385–1389
Disulphide formation on mitochondrial protein thiols T.R. Hurd, A. Filipovska, N.J. Costa, C.C. Dahm and M.P. Murphy	1390–1393
What else has to happen for nitric oxide to induce cell death? V. Borutaite and G. Brown	1394–1396
Role of GSH in the modulation of NOS-2 expression in the weaned mammary gland R. Zaragoza, E.R. García-Trevijano, V.J. Miralles, M. Mata, C. García, R. Carmena, T. Barber, F.V. Pallardó, L. Torres and J.R. Viña	1397–1398
Mitochondria and regulated tyrosine nitration T. Koeck, D.J. Stuehr and K.S. Aulak	1399–1403

Large-Scale Screening

SECC Glasgow, U.K., 17–21 July 2005

Edited by B. Baum (Ludwig Institute, London, U.K.), K. Brindle (Cambridge, U.K.), S. Eaton (Institute of Child Health, London, U.K.) and I. Johnstone (Glasgow, U.K.)

Functional mapping of Toll/interleukin-1 signalling networks by expression cloning E. Kiss-Toth, D.H. Wyllie, K. Holland, L. Marsden, V. Jozsa, K.M. Oxley, T. Polgar, E.E. Qwarnstrom and S.K. Dower	1405–1406
High-throughput subcellular protein localization using cell arrays Y.-H. Hu, D. Vanhecke, H. Lehrach and M. Janitz	1407–1408
RNAi libraries and kinetoplast DNA P.T. Englund, E.E.C. Agbo, M.E. Lindsay, B. Liu, Y. Liu, S.A. Motyka, G. Yildirim and Z. Zhao	1409–1412
Myocardial phenotyping using isotopomer analysis of metabolic fluxes C. Des Rosiers and J.C. Chatham	1413–1417
Ramifications of impaired PRPP synthesis in <i>Saccharomyces cerevisiae</i> S. Vavassori, K. Wang, L.M. Schweizer and M. Schweizer	1418–1420
Metabolic flux distribution analysis by ¹³ C-tracer experiments using the Markov chain–Monte Carlo method J. Yang, S. Wongsu, V. Kadirkamanathan, S.A. Billings and P.C. Wright	1421–1422
Transcriptional regulation and metabolism M.P. Brynildsen, W.W. Wong and J.C. Liao	1423–1426
Modelling and simulation for metabolomics data analysis P. Mendes, D. Camacho and A. de la Fuente	1427–1429
Enhancing crop yield in Solanaceous species through the genetic manipulation of energy metabolism A. Nunes-Nesi, F. Carrari, A. Lytovchenko and A.R. Fernie	1430–1434

The Nucleus and Gene Expression

SECC Glasgow, U.K., 17–21 July 2005

Edited by W. Bickmore (Edinburgh, U.K.), R. Borts (Leicester, U.K.), J. Cáceres (Edinburgh, U.K.), A. Maxwell (John Innes Centre, Norwich, U.K.), S. Newbury (Newcastle upon Tyne, U.K.), D. Wigley (Cancer Research London, U.K.) and A. Willis (Nottingham, U.K.)

An <i>in silico</i> analysis of trypanosomatid RNA polymerases: insights into their unusual transcription S. Kelly, B. Wickstead and K. Gull	1435–1437
Chromosome positioning is largely unaffected in lymphoblastoid cell lines containing emerin or A-type lamin mutations K.J. Meaburn, N. Levy, D. Toniolo and J.M. Bridger	1438–1440
Nucleolar biogenesis: the first small steps J.-L. Prieto and B. McStay	1441–1443
Transcriptional control by chromosome-associated protein phosphatase-1 D. Bennett	1444–1446
Multifaceted role of the <i>Saccharomyces cerevisiae</i> Srs2 helicase in homologous recombination regulation M.A. Macris and P. Sung	1447–1450
Making crossovers during meiosis M.C. Whitby	1451–1455
Roles of the Bloom's syndrome helicase in the maintenance of genome stability C.F. Cheok, C.Z. Bachrati, K.L. Chan, C. Ralf, L. Wu and I.D. Hickson	1456–1459
Coupling ATP hydrolysis to DNA strand passage in type IIA DNA topoisomerases A. Maxwell, L. Costenaro, S. Mittelheiser and A.D. Bates	1460–1464
Recent advances in understanding structure–function relationships in the type II topoisomerase mechanism A.J. Schoeffler and J.M. Berger	1465–1470
Helicases that interact with replication forks: new candidates from archaea E.L. Bolt	1471–1473
Helicase-catalysed translocation and strand separation R.L. Eoff and K.D. Raney	1474–1478
Takeover of host ribosomes by divergent IRES elements P. Sarnow, R.C. Cevallos and E. Jan	1479–1482
Investigation of interactions of polypyrimidine tract-binding protein with artificial internal ribosome entry segments K.A. Spriggs, S.A. Mitchell and A.E. Willis	1483–1486

eIF2B, a mediator of general and gene-specific translational control
G.D. Pavitt **1487–1492**

Unique features of selenocysteine incorporation function within the context
of general eukaryotic translational processes
A.I. Small-Howard and M.J. Berry **1493–1497**

Stem Cells and Development

SECC Glasgow, U.K., 17–21 July 2005

Edited by T. Kouzarides (Cambridge, U.K.), S. Newbury (Newcastle upon Tyne, U.K.), B. Richardson (University College London, U.K.), R. Sablowski (John Innes Centre, Norwich, U.K.), D. Tosh (Bath, U.K.), M. Welham (Bath, U.K.) and A. Willis (Nottingham, U.K.)

Shoot development – genetic interactions in the meristem
M.E. Byrne **1499–1501**

Amazing grass: developmental genetics of maize domestication
E. Vollbrecht and B. Sigmon **1502–1506**

The regulation of cell migration by PTEN
N.R. Leslie, X. Yang, C.P. Downes and C.J. Weijer **1507–1508**

The mechanism of hedgehog signal transduction
D. Kalderon **1509–1512**

Myostatin: a modulator of skeletal-muscle stem cells
F.S. Walsh and A.J. Celeste **1513–1517**

The homeodomain protein Nanog and pluripotency in mouse embryonic
stem cells
A. Yates and I. Chambers **1518–1521**

Role of the phosphoinositide 3-kinase pathway in mouse embryonic stem
(ES) cells
K. Takahashi, M. Murakami and S. Yamanaka **1522–1525**

Embryonic stem (ES) cells and embryonal carcinoma (EC) cells: opposite sides
of the same coin
P.W. Andrews, M.M. Matin, A.R. Bahrami, I. Damjanov, P. Gokhale and J.S. Draper **1526–1530**

Cancer stem cells: AMLs show the way
D. Bonnet **1531–1533**

Generation of embryos directly from embryonic stem cells by tetraploid embryo
complementation reveals a role for GATA factors in organogenesis
S.A. Duncan **1534–1536**

Role of MBD2 in gene regulation and tumorigenesis
J. Berger and A. Bird **1537–1540**

Post-transcriptional regulation in *Xenopus* embryos: role and targets of EDEN-BP
H.B. Osborne, C. Gautier-Courteille, A. Graindorge, C. Barreau, Y. Audic, R. Thuret, N. Pollet and L. Paillard **1541–1543**

Contrasting mechanisms of regulating translation of specific <i>Drosophila</i> germline mRNAs at the level of 5'-cap structure binding P. Lasko, P. Cho, F. Poulin and N. Sonenberg	1544-1546
