Biochemical Society Focused Meetings

Non-Vesicular Intracellular Traffic

Goodenough College, London, U.K., 15–16 December 2005

Edited by S. Cockcroft (University College London, U.K.) and T. Levine (Institute of Ophthalmology, London, U.K.)

Sterol and lipid trafficking in mammalian cells F.R. Maxfield and M. Mondal	335–339
Nucleus–vacuole junctions in yeast: anatomy of a membrane contact site E. Kvam and D.S. Goldfarb	340–342
MLN64 and MENTHO, two mediators of endosomal cholesterol transport F. Alpy and C. Tomasetto	343–345
Sec14p-like proteins regulate phosphoinositide homeostasis and intracellular protein and lipid trafficking in yeast C.J. Mousley, K.R. Tyeryar, M.M. Ryan and V.A. Bankaitis	346–350
Moving Ca ²⁺ from the endoplasmic reticulum to mitochondria: is spatial intimacy enough? G.A. Rutter	351–355
Sterol trafficking between the endoplasmic reticulum and plasma membrane in yeast D.P. Sullivan, H. Ohvo-Rekilä, N.A. Baumann, C.T. Beh and A.K. Menon	356–358
Uptake and trafficking of exogenous sterols in <i>Saccharomyces cerevisiae</i> S. Raychaudhuri and W.A. Prinz	359–362
Lipid homeostasis and Golgi secretory function S. Lev	363–366
Organization and functions of sphingolipid biosynthesis in yeast H. Riezman	367–369
Interaction of the smooth endoplasmic reticulum and mitochondria J.G. Goetz and I.R. Nabi	370–373
Regulation of ecto-5'-nucleotidase activity via Ca ²⁺ -dependent, annexin 2-mediated membrane rearrangement? E.B. Babiychuk and A. Draeger	374–376
Phosphatidylinositol-transfer protein and its homologues in yeast P. Griac, R. Holic and D. Tahotna	377–380
Movement of calcium signals and calcium-binding proteins: firewalls, traps and tunnels S.L. Barrow, M.W. Sherwood, N.J. Dolman, O.V. Gerasimenko, S.G. Voronina and A.V. Tepikin	381–384

Endoplasmic reticulum generates calcium signalling microdomains around the nucleus and spindle in syncytial *Drosophila* embryos

H. Parry, A. McDougall and M. Whitaker

385–388

The OSBP-related proteins (ORPs): global sterol sensors for co-ordination of cellular lipid metabolism, membrane trafficking and signalling processes?

V.M. Olkkonen, M. Johansson, M. Suchanek, D. Yan, R. Hynnen, C. Ehnholm, M. Jauhiainen, C. Thiele and M. Lehto

389–391

Endosomal cholesterol traffic: vesicular and non-vesicular mechanisms meet

M. Hölttä-Vuori and E. Ikonen

392–394

Lipid trafficking between the endoplasmic reticulum and the chloroplast

K. Awai, C. Xu, B. Lu and C. Benning

395–398

Lipid dynamics in neurons

J.E. Vance, B. Karten and H. Hayashi

399–403

Macromolecular assemblies regulate non-vesicular phosphatidylserine traffic in yeast

J.-Y. Choi, W.R. Riekhof, W.-I. Wu and D.R. Voelker

404–408

Cytokine–Proteoglycan Interactions: Biology and Structure

Royal Holloway University of London, Egham Hill, U.K., 9–10 January 2006

Edited by B. Mulloy (NIBSC, U.K.) and C. Rider (Royal Holloway University of London, U.K.)

Cytokines and proteoglycans: an introductory overview

B. Mulloy and C.C. Rider

409–413

Signalling by HGF/SF and Met: the role of heparan sulphate co-receptors

L.E. Kemp, B. Mulloy and E. Gherardi

414–417

Interaction of the guidance molecule Slit with cellular receptors

E. Hohenester, S. Hussain and J.A. Howitt

418–421

The biological relevance of chemokine–proteoglycan interactions

A.E.I. Proudfoot

422–426

Protein–GAG interactions: new surface-based techniques, spectroscopies and nanotechnology probes

E.A. Yates, C.J. Terry, C. Rees, T.R. Rudd, L. Duchesne, M.A. Skidmore, R. Lévy, N.T.K. Thanh, R.J. Nichols, D.T. Clarke and D.G. Fernig

427–430

Computational approaches to the identification of heparin-binding sites on the surfaces of proteins

M. Forster and B. Mulloy

431–434

Developing chemokine mutants with improved proteoglycan affinity and knocked-out GPCR activity as anti-inflammatory recombinant drugs

H. Potzinger, E. Geretti, B. Brandner, V. Wabitsch, A.-M. Piccinini, A. Rek and A.J. Kungl

435–437

Multiprotein signalling complexes: regional assembly on heparan sulphate

J.T. Gallagher

438–441

Insights into the role of heparan sulphate in fibroblast growth factor signalling N.J. Harmer	442-445
TSG-6: a pluripotent inflammatory mediator? C.M. Milner, V.A. Higman and A.J. Day	446-450
The role of heparan sulphate proteoglycans in angiogenesis S.E. Stringer	451-453
Heparan sulphate requirement in platelet-derived growth factor B-mediated pericyte recruitment S. Kurup, A. Abramsson, J.P. Li, U. Lindahl, L. Kjellen, C. Betsholtz, H. Gerhardt and D. Spillmann	454-455
Basic fibroblast growth factor: an extracellular mechanotransducer in articular cartilage? T. Vincent and J. Saklatvala	456-457
Heparin/heparan sulphate binding in the TGF- β cytokine superfamily C.C. Rider	458-460
Interferon and heparan sulphate H. Lortat-Jacob	461-464
