Novartis Medal Lecture

Photosystem II: an enzyme of global significance

J. Barber

619–631

Colworth Medal Lecture

Cellular functions of the BRCA tumour-suppressor proteins

S.J. Boulton

633–645

Morton Lecture

Signalling through Class I PI3Ks in mammalian cells

P.T. Hawkins, K.E. Anderson, K. Davidson and L.R. Stephens

647–662

Biochemical Society Award Lecture

The mystery of intracellular developmental programmes and timers

M. Raff

663–670

Focus Topics at BioScience2006

Co-ordination of Cellular Processes

SECC Glasgow, U.K., 23–27 July 2006

Edited by P. Clarke (Dundee, U.K.), P. Coffey (Utrecht, The Netherlands), M. Cousin (Edinburgh, U.K.), I. Dransfield (Edinburgh, U.K.), S. High (Manchester, U.K.) and G. Rutter (Imperial College London, U.K.)

The role of myosin Va in secretory granule trafficking and exocytosis

T.W. Eichler, T. Kögel, N.V. Bukoreshtliev, H.-H. Gerdes

671–674

Rapid three-dimensional imaging of individual insulin release events by Nipkow disc confocal microscopy

G.A. Rutter, M.K. Loder and M.A. Ravier

675–678

Fluorescence lifetime imaging microscopy (FLIM) to quantify protein–protein interactions inside cells

R.R. Duncan

679–682

Interactions between Rabs, tethers, SNAREs and their regulators in exocytosis P. Novick, M. Medkova, G. Dong, A. Hutagalung, K. Reinisch and B. Grosshans	683–686
The molecular mechanisms of the mammalian exocyst complex in exocytosis S. Wang and S.C. Hsu	687–690
Rab27 and its effectors in secretory granule exocytosis: a novel docking machinery composed of a Rab27 · effector complex M. Fukuda	691–695
Mechanisms controlling the expression of the components of the exocytotic apparatus under physiological and pathological conditions A. Abderrahmani, V. Plaisance, P. Lovis and R. Regazzi	696–700
Structural basis for the nuclear protein import cycle M. Stewart	701–704
The Kaposi's sarcoma-associated herpesvirus ORF57 protein: a pleurotropic regulator of gene expression P. Malik and E.C. Schirmer	705–710
Ran at kinetochores M. Dasso	711–715
Mitotic spindle morphogenesis: Ran on the microtubule cytoskeleton and beyond B. Goodman and Y. Zheng	716–721
FOXO transcription factors: key regulators of cell fate E.W.-F. Lam, R.E. Francis and M. Petkovic	722–726
Phosphoinositide 3-kinase signalling and FoxO transcription factors in rheumatoid arthritis K.A. Reedquist, J. Ludikhuizen and P.P. Tak	727–730
FOXOs in the maintenance of vascular homeostasis J.-H. Paik	731–734

Information Processing and Molecular Signalling

SECC Glasgow, U.K., 23–27 July 2006

Edited by M. Clague (Liverpool, U.K.), P. Cullen (Bristol, U.K.), S. Keyse (Dundee, U.K.), R. Layfield (Nottingham, U.K.), J. Mayer (Nottingham, U.K.), P. Newsholme (University College Dublin, Ireland), R. Porter (Trinity College Dublin, Ireland), R. Reece (Manchester, U.K.), S. Shears (NIH, U.S.A.), S. Shirazi-Beechey (Liverpool, U.K.), S. Urbé (Liverpool, U.K.) and M. Wymann (Basel, Switzerland)

p62 mutations, ubiquitin recognition and Paget's disease of bone R. Layfield, J.R. Cavey, D. Najat, J. Long, P.W. Sheppard, S.H. Ralston and M.S. Searle	735–737
Molecular misreading: the occurrence of frameshift proteins in different diseases F.W. van Leeuwen, J.M. Kros, W. Kamphorst, C. van Schravendijk and R.A.I. de Vos	738–742
The aggravating role of the ubiquitin–proteasome system in neurodegenerative disease C.-C. Hung, E.J. Davison, P.A. Robinson and H.C. Ardley	743–745
Gankyrin, the 26 S proteasome, the cell cycle and cancer R.J. Mayer and J. Fujita	746–748

Parkin: a multifaceted ubiquitin ligase D.J. Moore	749-753
Control of growth factor receptor dynamics by reversible ubiquitination S. Urbé, J. McCullough, P. Row, I.A. Prior, R. Welchman and M.J. Clague	754-756
The role of ubiquitin in neurotrophin receptor signalling and sorting M.W. Wooten and T. Geetha	757-760
Reversible ubiquitination regulates the Smad/TGF- β signalling pathway S.J. Wicks, T. Grocott, K. Haros, M. Maillard, P. ten Dijke and A. Chantry	761-763
De-ubiquitinating enzymes: intracellular signalling and disease J.A. Johnston and J.F. Burrows	764-769
The G-protein-coupled receptor 40 family (GPR40-GPR43) and its role in nutrient sensing D.K. Covington, C.A. Briscoe, A.J. Brown and C.K. Jayawickreme	770-773
Nutrient regulation of pancreatic β -cell function in diabetes: problems and potential solutions P.R. Flatt and B.D. Green	774-778
Maternal nutrition during pregnancy and health of the offspring M.S. Martin-Gronert and S.E. Ozanne	779-782
Hsp90 chaperone control over transcriptional regulation by the yeast Slr2(Mpk1)p and human ERK5 mitogen-activated protein kinases (MAPKs) P.W. Piper, A.W. Truman, S.H. Millson and J. Nuttall	783-785
Regulation of purine nucleotide biosynthesis: in yeast and beyond R.J. Rolfes	786-790
Regulation by Per-Arnt-Sim (PAS) kinase of pancreatic duodenal homeobox-1 nuclear import in pancreatic β -cells R. An, G. da Silva Xavier, H.-X. Hao, F. Semplici, J. Rutter and G.A. Rutter	791-793
Phosphorylation of Zn(II) ₂ Cys ₆ proteins: a cause or effect of transcriptional activation? M.K. Leverentz and R.J. Reece	794-797
Mechanisms regulating energy metabolism by adiponectin in obesity and diabetes X. Fang and G. Sweeney	798-801
Regulation of insulin secretion by uncoupling protein C.B. Chan and N. Kashemsant	802-805
Nicotinamide nucleotide transhydrogenase: a link between insulin secretion, glucose metabolism and oxidative stress H. Freeman, K. Shimomura, R.D. Cox and F.M. Ashcroft	806-810
The importance of redox shuttles to pancreatic β -cell energy metabolism and function K. Bender, P. Newsholme, L. Brennan and P. Maechler	811-814
Molecular architecture of the pyruvate dehydrogenase complex: bridging the gap M. Smolle and J.G. Lindsay	815-818

Mitochondrial diabetes and its lessons for common Type 2 diabetes J.A. Maassen, L.M. 't Hart, G.M.C. Janssen, E. Reiling, J.A. Romijn and H.H. Lemkes	819–823
Mitochondrial damages and the regulation of insulin secretion P. Maechler and P.B.M. de Andrade	824–827
The JIP family of MAPK scaffold proteins A.J. Whitmarsh	828–832
The role of scaffold proteins in MEK/ERK signalling D.B. Sacks	833–836
Mechanisms of MAPK signalling specificity L. Bardwell	837–841
Spatio-temporal regulation of mitogen-activated protein kinase (MAPK) signalling by protein phosphatases M. Karlsson, M. Mandl and S.M. Keyse	842–845
The GAP1 family of GTPase-activating proteins: spatial and temporal regulators of small GTPase signalling S. Yarwood, D. Bouyoucef-Cherchalli, P.J. Cullen and S. Kupzig	846–850
Regulation of RalA GTPase by phosphatidylinositol 3-kinase as visualized by FRET probes H. Yoshizaki, K. Aoki, T. Nakamura and M. Matsuda	851–854
The lipid second messenger diacylglycerol as a negative regulator of Rac signalling H. Wang and M.G. Kazanietz	855–857
Regulation of Ras in lymphocytes: get a GRP J.C. Stone	858–861

Ion Channels: Communication across Membranes

SECC Glasgow, U.K., 23–27 July 2006

Edited by G. Banting (Bristol, U.K.), C. Connolly (Dundee, U.K.), A. Dolphin (University College London, U.K.), J. Henley (Bristol, U.K.), A. Lai (Cardiff, U.K.) and C. Taylor (Cambridge, U.K.)

The role of GABA _A receptor biogenesis, structure and function in epilepsy S. Mizielinska, S. Greenwood and C.N. Connolly	863–867
Impact of subunit positioning on GABA _A receptor function E. Sigel, R. Baur, N. Boulineau and F. Minier	868–871
Do polymorphisms in the human 5-HT ₃ genes contribute to pathological phenotypes? K. Krzywkowski	872–876
Structure and trafficking of NMDA and GABA _A receptors F.A. Stephenson	877–881
Novel structural determinants of single-channel conductance in nicotinic acetylcholine and 5-hydroxytryptamine type-3 receptors J.A. Peters, J.E. Carland, M.A. Cooper, M.R. Livesey, T.Z. Deeb, T.G. Hales and J.J. Lambert	882–886

The structural biology of voltage-gated calcium channel function and regulation F. Van Petegem and D.L. Minor, Jr	887–893
Do voltage-gated calcium channel $\alpha_2\delta$ subunits require proteolytic processing into α_2 and δ to be functional? L. Douglas, A. Davies, J. Wratten and A.C. Dolphin	894–898
Gating of two-pore domain K ⁺ channels by extracellular pH M.I. Niemeyer, F.D. González-Nilo, L. Zúñiga, W. González, L.P. Cid and F.V. Sepúlveda	899–902
Role of voltage-gated L-type Ca ²⁺ channel isoforms for brain function J. Striessnig, A. Koschak, M.J. Sinnegger-Brauns, A. Hetzenauer, N.K. Nguyen, P. Busquet, G. Pelster and N. Singewald	903–909
Plasma membrane IP ₃ receptors C.W. Taylor and O. Dellis	910–912
Role of ryanodine receptor mutations in cardiac pathology: more questions than answers? N.L. Thomas, C.H. George and F.A. Lai	913–918
Redox regulation of the ryanodine receptor/calcium release channel S. Zissimopoulos and F.A. Lai	919–921
NAADP, a new intracellular messenger that mobilizes Ca ²⁺ from acidic stores A. Galione	922–926
Kainate receptor-interacting proteins and membrane trafficking F. Coussen and C. Mulle	927–930
Molecular mechanisms for regulation of AMPAR trafficking by PICK1 J.G. Hanley	931–935
Pro-survival signalling from the NMDA receptor G.E. Hardingham	936–938
Active zone assembly and synaptic release R.J. Kittel, S. Hallermann, S. Thomsen, C. Wichmann, S.J. Sigrist and M. Heckmann	939–941
Molecular characterization of the metabotropic glutamate receptor family in <i>Caenorhabditis elegans</i> J. Dillon, N.A. Hopper, L. Holden-Dye and V. O'Connor	942–948
Synaptic plasticity of kainate receptors J.R. Mellor	949–951

Proteins: Structure and Function

SECC Glasgow, U.K., 23–27 July 2006

Edited by C. Bagshaw (Leicester, U.K.), G. Brown (Cambridge, U.K.), R. Knowles (GlaxoSmithKline, U.K.) and G. Roberts (Leicester, U.K.)

Interactions between nitric oxide, oxygen, reactive oxygen species and reactive nitrogen species G.C. Brown and V. Borutaite	953–956
--	---------

Linking proximal and downstream signalling events in hepatic ischaemia/reperfusion injury G. Jeyabalan, A. Tsung and T.R. Billiar	957–959
Redox signalling involving NADPH oxidase-derived reactive oxygen species R. Dworakowski, N. Anilkumar, M. Zhang and A.M. Shah	960–964
Superoxide, peroxynitrite and oxidative/nitrative stress in inflammation D. Salvemini, T.M. Doyle and S. Cuzzocrea	965–970
Folding and unfolding for binding: large-scale protein dynamics in protein–protein interactions G.C.K. Roberts	971–974
Ligand migration and escape pathways in haem proteins D. Lavalette, C. Tétreau and L. Mouawad	975–978
Blinking fluorophores: what do they tell us about protein dynamics? C.R. Bagshaw and D. Cherny	979–982
Cell biochemistry studied by single-molecule imaging G.I. Mashanov, T.A. Nenasheva, M. Peckham and J.E. Molloy	983–988
Inhibitors of the catalytic domain of mitochondrial ATP synthase J.R. Gledhill and J.E. Walker	989–992
F ₁ -ATPase: a highly coupled reversible rotary motor R. Iino and H. Noji	993–996
