Colworth Medal Lecture

The twin-arginine transport system: moving folded proteins across membranes

F. Sargent

835-847

Focus Topics at Life Sciences 2007

Cardiovascular Bioscience

SECC Glasgow, U.K., 9-12 July 2007

Edited by S. Kennedy (Strathclyde, Glasgow, U.K.), M. Lloyd (Bath, U.K.) and C. Wainwright (Robert Gordon University, Aberdeen, U.K.).

Biochemistry and functional significance of collagen cross-linking

S.P. Robins

849-852

Cross-link breakers as a new therapeutic approach to cardiovascular disease

D. Susic

853-856

Mast cells and degradation of pericellular and extracellular matrices: potential contributions to erosion, rupture and intraplaque haemorrhage of atherosclerotic plaques

P.T. Kovanen

857-861

Dr Brian Gibberd (1931-2006): a pioneering clinician in Refsum's disease

A.S. Wierzbicki and M.D. Lloyd

862-864

Peroxisomes, Refsum's disease and the α - and ω -oxidation of phytanic acid

R.J.A. Wanders and J.C. Komen

865-869

Structural and mechanistic studies on the peroxisomal oxygenase phytanoyl-CoA 2-hydroxylase (PhyH)

C.J. Schofield and M.A. McDonough

870-875

The role of 2-hydroxyacyl-CoA lyase, a thiamin pyrophosphate-dependent enzyme, in the peroxisomal metabolism of 3-methyl-branched fatty acids and 2-hydroxy straight-chain fatty acids

M. Casteels, M. Sniekers, P. Fraccascia, G.P. Mannaerts and P.P. Van Veldhoven

876-880

Peroxisomal disorders affecting phytanic acid α -oxidation: a review

A.S. Wierzbicki

881-886

Is there life after plaque rupture?

C.L. Jackson

887-889

Ion channel switching and activation in smooth-muscle cells of occlusive vascular diseases D.J. Beech	890–894
The role of stem cells in vein graft remodelling Q. Xu	895–899
Current challenges in coronary stenting: from bench to bedside A.C. Morton, R.D. Walker and J. Gunn	900–904
Selected oral communications	
Hypoxic inhibition of human cardiac fibroblast invasion and MMP-2 activation may impair adaptive myocardial remodelling M.E. Morley, K. Riches, C. Peers and K.E. Porter	905–907
The potential roles of sphingolipids in vascular smooth-muscle function G.F. Nixon, F.A. Mathieson and I. Hunter	908–909
Prostacyclin analogues: the next drug-eluting stent? C. McCormick, R.M. Wadsworth, R.L. Jones and S. Kennedy	910–911

Signalling

SECC Glasgow, U.K., 9–12 July 2007

Edited by B. Austen (St. George's, University of London, U.K.), C. Dart (Liverpool, U.K.), R. Empson (Royal Holloway, University of London, U.K.), P. Haris (De Montfort, Leicester, U.K.), M. Houslay (Glasgow, U.K.), P. Parker (Cancer Research UK), A. Poole (Bristol, U.K.), G. Roberts (Leicester, U.K.) and L. Roderick (Babraham Institute, Cambridge, U.K.).

Plasma-membrane calcium pumps and hereditary deafness M. Brini, F. Di Leva, T. Domi, L. Fedrizzi, D. Lim and E. Carafoli	913–918
Plasma-membrane Ca ²⁺ pumps: structural diversity as the basis for functional versatility E.E. Strehler, A.G. Filoteo, J.T. Penniston and A.J. Caride	919–922
Mechanisms of neuronal damage in multiple sclerosis and its animal models: role of calcium pumps and exchangers M.P. Kurnellas, K.C. Donahue and S. Elkabes	923–926
The regulatory function of plasma-membrane Ca ²⁺ -ATPase (PMCA) in the heart D. Oceandy, P.J. Stanley, E.J. Cartwright and L. Neyses	927–930
Spatiotemporal control of cAMP signalling processes by anchored signalling complexes E. Jarnæss and K. Taskén	931–937
cAMP-specific phosphodiesterase-4D5 (PDE4D5) provides a paradigm for understanding the unique non-redundant roles that PDE4 isoforms play in shaping compartmentalized cAMP cell signalling M.J. Lynch, G.S. Baillie and M.D. Houslay	938–941
Ubiquitin signals in the NF- κ B pathway J. Terzic, I. Marinovic-Terzic, F. Ikeda and I. Dikic	942–945

Ryanodine receptor mutations in arrhythmias: advances in understanding the mechanisms of channel dysfunction N.L. Thomas, C.H. George, A.J. Williams and F.A. Lai	946–951
Sarcoplasmic reticulum calcium leak and cardiac arrhythmias M.G. Chelu and X.H.T. Wehrens	952–956
Calcium in the heart: when it's good, it's very very good, but when it's bad, it's horrid H.L. Roderick, D.R. Higazi, I. Smyrniak, C. Fearnley, D. Harzheim and M.D. Bootman	957–961
Rapid discovery of protein interactions by cell-free protein technologies M. He and M.J. Taussig	962–965
Insights into the structure and protein–protein interactions of the pro-apoptotic protein ASPP2 S. Rotem, C. Katz and A. Friedler	966–969
Visualization of protein interactions inside the secretory pathway B. Nyfeler and H.-P. Hauri	970–973
Protein–protein interactions in the assembly and subcellular trafficking of the BACE (β -site amyloid precursor protein-cleaving enzyme) complex of Alzheimer's disease R.B. Parsons and B.M. Austen	974–979
Picking pockets to fuel antimicrobial drug discovery W.N. Hunter	980–984
Solid-state NMR spectroscopy as a tool for drug design: from membrane-embedded targets to amyloid fibrils D.A. Middleton	985–990
Magic-angle-spinning NMR spectroscopy applied to small molecules and peptides in lipid bilayers C. Ader, R. Schneider, K. Seidel, M. Etzkorn and M. Baldus	991–995
Targeting the oncogenic protein kinase $C\alpha$ signalling pathway for the treatment of cancer A.P. Fields, L.A. Frederick and R.P. Regala	996–1000
Protein kinase $C\delta$ and apoptosis M.E. Reyland	1001–1004
Isoform-specific functions of protein kinase C: the platelet paradigm M.T. Harper and A.W. Poole	1005–1008
Murine models for chronic lymphocytic leukaemia A.M. Michie, R. Nakagawa and A.M. McCaig	1009–1012
Protein kinases, from B to C A.J. Cameron, M. De Rycker, V. Calleja, D. Alcor, S. Kjaer, B. Kostelecky, A. Saurin, A. Faisal, M. Laguerre, B.A. Hemmings, N. McDonald, B. Larijani and P.J. Parker	1013–1017
Functional PKC <i>in vivo</i> analysis using deficient mouse models M. Leitges	1018–1020

Competitive inhibitors and allosteric activators of protein kinase C isoenzymes: a personal account and progress report on transferring academic discoveries to the clinic G.R. Budas, T. Koyanagi, E.N. Churchill and D. Mochly-Rosen	1021–1026
Structure-based optimization of PKC θ inhibitors L. Mosyak, Z. Xu, D. Joseph-McCarthy, N. Brooijmans, W. Somers and D. Chaudhary	1027–1031
Selected oral communications	
Sodium regulation of GAF domain function M.J. Cann	1032–1034
Functional domains of the mouse β_3 -adrenoceptor associated with differential G-protein coupling M. Sato, D.S. Hutchinson, B.A. Evans and R.J. Summers	1035–1037
Study of the functional role of Bcl-2 family proteins in regulating Ca ²⁺ signals in apoptotic cells Y. Lao and D.C. Chang	1038–1039
The roles of PKC δ and ϵ isoenzymes in the regulation of myocardial ischaemia/reperfusion injury E.N. Churchill and D. Mochly-Rosen	1040–1042
Lifespan regulation of conventional protein kinase C isotypes D. Carmena and A. Sardini	1043–1045
The C2 domains of classical/conventional PKCs are specific PtdIns(4,5) P ₂ -sensing domains S. Corbalán-García, M. Guerrero-Valero, C. Marín-Vicente and J.C. Gómez-Fernández	1046–1048
Aldosterone-stimulated PKC signalling cascades: from receptor to effector W. Thomas, V. McEneaney and B.J. Harvey	1049–1051
Mitochondrial protein kinase C ϵ (PKC ϵ): emerging role in cardiac protection from ischaemic damage G.R. Budas and D. Mochly-Rosen	1052–1054

Ion Channels

SECC Glasgow, U.K., 9–12 July 2007

Edited by D. Fedida (British Columbia, Canada), A. Lee (Southampton, U.K.) and F. Michelangeli (Birmingham, U.K.).

Trafficking of ATP-sensitive potassium channels in health and disease A. Sivaprasadarao, T.K. Taneja, J. Mankouri and A.J. Smith	1055–1059
hERG channel trafficking: novel targets in drug-induced long QT syndrome A. Dennis, L. Wang, X. Wan and E. Ficker	1060–1063
Dynamic regulation of the voltage-gated Kv2.1 potassium channel by multisite phosphorylation D.P. Mohapatra, K.-S. Park and J.S. Trimmer	1064–1068
Localization and trafficking of cardiac voltage-gated potassium channels D.F. Steele, A. Dehghani Zadeh, M.E. Loewen and D. Fedida	1069–1073

Selected oral communications

- The role of abnormal trafficking of KCNE1 in long QT syndrome 5
S.C. Harmer and A. Tinker 1074-1076
- Ion channels in epilepsy
S.M. Mizielinska 1077-1079
- Voltage clamp fluorimetry studies of mammalian voltage-gated K⁺ channel gating
T.W. Claydon and D. Fedida 1080-1082

Inflammation

SECC Glasgow, U.K., 9-12 July 2007

Edited by J. Allen (University College Dublin, Ireland), G. Brown (Cambridge, U.K.), G. Cirino (Napoli, Italy), A. Floto (Cambridge, U.K.), I. Megson (UHI Millennium Institute, U.K.), C. Page (King's College London, U.K.), M. Perretti (Queen Mary, University of London, U.K.) and S. Ward (Bath, U.K.).

- Phagosomal acidification: measurement, manipulation and functional consequences
B.E. Steinberg, K.K. Huynh and S. Grinstein 1083-1087
- The role of calcium and other ions in sorting and delivery in the late endocytic pathway
J.P. Luzio, N.A. Bright and P.R. Pryor 1088-1091
- The V-ATPase α 2-subunit as a putative endosomal pH-sensor
V. Marshansky 1092-1099
- 
- The function of the NADPH oxidase of phagocytes, and its relationship to other NOXs
P. Behe and A.W. Segal 1100-1103
- Defining a role for platelets in allergic inflammation
S.C. Pitchford 1104-1108
- Lymphocyte cell motility: the twisting, turning tale of phosphoinositide 3-kinase
J.S. Oak, M.P. Matheu, I. Parker, M.D. Cahalan and D.A. Fruman 1109-1113
- Regulation of T-cell migration by co-stimulatory molecules
R. David and F.M. Marelli-Berg 1114-1118
- Mechanisms of inflammatory neurodegeneration: iNOS and NADPH oxidase
G.C. Brown 1119-1121
- Interleukin-1 and inflammatory neurodegeneration
A. Simi, N. Tsakiri, P. Wang and N.J. Rothwell 1122-1126
- Chronic microglial activation and progressive dopaminergic neurotoxicity
M.L. Block and J.-S. Hong 1127-1132
- Nitric oxide, ischaemia and brain inflammation
S. Murphy and C.L. Gibson 1133-1137

An overview of the biological significance of endogenous gases: new roles for old molecules L. Li and P.K. Moore	1138–1141
Carbon monoxide-releasing molecules (CO-RMs): vasodilatory, anti-ischaemic and anti-inflammatory activities R. Motterlini	1142–1146
Biochemistry of oxidative stress B. Halliwell	1147–1150
Redox regulation of lung inflammation: role of NADPH oxidase and NF- κ B signalling H. Yao, S.-R. Yang, A. Kode, S. Rajendrasozhan, S. Caito, D. Adenuga, R. Henry, I. Edirisinghe and I. Rahman	1151–1155
Resveratrol as an antioxidant and pro-oxidant agent: mechanisms and clinical implications C. Alarcón de la Lastra and I. Villegas	1156–1160
Selected oral communications	
Modulation of endothelial responses by the stromal microenvironment: effects on leucocyte recruitment H.M. McGettrick, A. Filer, G.E. Rainger, C.D. Buckley and G.B. Nash	1161–1162
Systemic inflammation and stroke: aetiology, pathology and targets for therapy B.W. McColl, S.M. Allan and N.J. Rothwell	1163–1165
Neurodegeneration in models of Gram-positive bacterial infections of the central nervous system J.J. Neher and G.C. Brown	1166–1167
P2X ₇ receptor-mediated reactive oxygen and nitrogen species formation: from receptor to generators J. Hewinson and A.B. MacKenzie	1168–1170

Metabolism

SECC Glasgow, U.K., 9–12 July 2007

Edited by M. Case (Manchester, U.K.), S. Eaton (University College London, U.K.), P. Newsholme (University College Dublin, Ireland), S. Shirazi-Beechey (Liverpool, U.K.) and C. Sutherland (Dundee, U.K.).

Insulin action on the liver <i>in vivo</i> A.D. Cherrington, M.C. Moore, D.K. Sindelar and D.S. Edgerton	1171–1174
Homocysteine metabolism in diabetes E.P. Wijekoon, M.E. Brosnan and J.T. Brosnan	1175–1179
Amino acid metabolism, insulin secretion and diabetes P. Newsholme, K. Bender, A. Kiely and L. Brennan	1180–1186
Amino acids and mTOR signalling in anabolic function C.G. Proud	1187–1190
Intestinal glucose sensing and regulation of intestinal glucose absorption J. Dyer, K. Daly, K.S.H. Salmon, D.K. Arora, Z. Kokrashvili, R.F. Margolskee and S.P. Shirazi-Beechey	1191–1194

Physiological significance of L-amino acid sensing by extracellular Ca ²⁺ -sensing receptors A.D. Conigrave, H.-C. Mun and S.C. Brennan	1195-1198
Long-chain fatty acid sensing in the gastrointestinal tract J. McLaughlin	1199-1202
Selected oral communications	
Early life programming of energy balance R.L. Cripps, Z.A. Archer, J.G. Mercer and S.E. Ozanne	1203-1204
PERK in the life and death of the pancreatic β -cell T.P. Herbert	1205-1207
Glucokinase activators: molecular tools for studying the physiology of insulin-secreting cells D. Johnson, R.M. Shepherd, D. Gill, T. Gorman, D.M. Smith and M.J. Dunne	1208-1210
Retinoic acid-mediated transcription and maturation of SREBP-1c regulates fatty acid synthase via <i>cis</i> -elements responsible for nutritional regulation K. Roder and M. Schweizer	1211-1214
Amino acid transporters and nutrient-sensing mechanisms: new targets for treating insulin-linked disorders? B. Reynolds, R. Laynes, M.H. Ögmundsdóttir, C.A.R. Boyd and D.C.I. Goberdhan	1215-1217
<hr/>	
Central Nervous System	
SECC Glasgow, U.K., 9-12 July 2007	
Edited by C. Dart (Liverpool, U.K.), M. Houslay (Glasgow, U.K.), M. Ludwig (Edinburgh, U.K.), R. Porter (Trinity College Dublin, Ireland) and J. Potts (Missouri-Columbia, U.S.A.).	
<hr/>	
Synaptic memory mechanisms: Alzheimer's disease amyloid β -peptide-induced dysfunction M.J. Rowan, I. Klyubin, Q. Wang, N.W. Hu and R. Anwyl	1219-1223
Linking glycolysis with oxidative stress in neural cells: a regulatory role for nitric oxide J.P. Bolaños, A. Herrero-Mendez, S. Fernandez-Fernandez and A. Almeida	1224-1227
Mitochondrial dysfunction in neurodegenerative disorders M. Baron, A.P. Kudin and W.S. Kunz	1228-1231
Do mitochondrial DNA mutations have a role in neurodegenerative disease? K.J. Krishnan, A.K. Reeve and D.M. Turnbull	1232-1235
Somatodendritic dynorphin release: orchestrating activity patterns of vasopressin neurons C.H. Brown, V. Scott, M. Ludwig, G. Leng and C.W. Bourque	1236-1242
The actin filament and dendritic peptide release V.A. Tobin and M. Ludwig	1243-1246
Central release of oxytocin and the ventromedial hypothalamus N. Sabatier, I. Rowe and G. Leng	1247-1251

Stimuli and consequences of dendritic release of oxytocin within the brain I.D. Neumann	1252–1257
Nitric oxide and respiratory rhythm in mammals: a new modulator of phase transition? O. Pierrefiche, A.P.L. Abdala and J.F.R. Paton	1258–1263
Physiological and pathophysiological roles of extracellular ATP in chemosensory control of breathing G.L. Ackland, V. Kasymov and A.V. Gourine	1264–1268
Respiratory plasticity following intermittent hypoxia: roles of protein phosphatases and reactive oxygen species J.E.R. Wilkerson, P.M. MacFarlane, M.S. Hoffman and G.S. Mitchell	1269–1272
Regulation of cAMP by the p75 neurotrophin receptor: insight into drug design of selective phosphodiesterase inhibitors B.D. Sachs and K. Akassoglou	1273–1277
Liprin- α proteins: scaffold molecules for synapse maturation S.A. Spangler and C.C. Hoogenraad	1278–1282
Dissecting DISC1 function through protein–protein interactions N.J. Brandon	1283–1286
Selected oral communications	
Neurotoxicity of tryptophan metabolites A.J. Smith, T.W. Stone and R.A. Smith	1287–1289
How do mammalian mitochondria synthesize proteins? J. Rorbach, R. Soleimanpour-Lichaei, R.N. Lightowlers and Z.M.A. Chrzanowska-Lightowlers	1290–1291
Interaction of integrin β 1 with cytokeratin 1 in neuroblastoma NMB7 cells N.-N. Chuang and C.-C. Huang	1292–1294

Exercise

SECC Glasgow, U.K., 9–12 July 2007

Edited by C. Downes (Dundee, U.K.), P. Greenhaff (Nottingham, U.K.) and P. Taylor (Dundee, U.K.).

IL-6 signalling in exercise and disease B.K. Pedersen	1295–1297
The role of nutrition in stimulating muscle protein accretion at the molecular level S.R. Kimball	1298–1301
Exercise- and nutrient-controlled mechanisms involved in maintenance of the musculoskeletal mass M.J. Rennie	1302–1305

Selected oral communications

Using systems biology to define the essential biological networks responsible for adaptation to endurance exercise training P. Keller, N. Vollaard, J. Babraj, D. Ball, D.A. Sewell and J.A. Timmons	1306–1309
--	------------------

Effect of exercise and insulin on SREBP-1c expression in human skeletal muscle: potential roles for the ERK1/2 and Akt signalling pathways T. Boonsong, L. Norton, K. Chokkalingam, K. Jewell, I. Macdonald, A. Bennett and K. Tsintzas	1310-1311
Mechanotransduction in striated muscle via focal adhesion kinase A.C. Durieux, D. Desplanches, D. Freyssenet and M. Flück	1312-1313
mVps34 is activated by an acute bout of resistance exercise M.G. MacKenzie, D.L. Hamilton, J.T. Murray and K. Baar	1314-1316

Bacteria

SECC Glasgow, U.K., 9-12 July 2007

Edited by G. Besra (Birmingham, U.K.) and S. Busby (Birmingham, U.K.).

Tuberculosis: evolution in millennia and minutes S.H. Gillespie	1317-1320
Towards new tuberculosis drugs S.T. Cole and P.M. Alzari	1321-1324
Structure, function and biosynthesis of the <i>Mycobacterium tuberculosis</i> cell wall: arabinogalactan and lipoarabinomannan assembly with a view to discovering new drug targets L.J. Alderwick, H.L. Birch, A.K. Mishra, L. Eggeling and G.S. Besra	1325-1328

Cancer

SECC Glasgow, U.K., 9-12 July 2007

Edited by D. Gillespie (Beatson Institute, Glasgow, U.K.) and H.M. Wallace (Aberdeen, U.K.).

Mouse models for <i>BRAF</i> -induced cancers C. Pritchard, L. Carragher, V. Aldridge, S. Giblett, H. Jin, C. Foster, C. Andreadi and T. Kamata	1329-1333
Conservation of DNA damage tolerance pathways from yeast to humans H.D. Ulrich	1334-1337
Cancer genetics: mouse models of intestinal cancer A.R. Clarke	1338-1341
Role played by BRCA1 in transcriptional regulation in response to therapy M.M. Murray, P.B. Mullan and D.P. Harkin	1342-1346
Characterization of cancer stem cells in chronic myeloid leukaemia H.G. Jørgensen and T.L. Holyoake	1347-1351
DNA replication-associated lesions: importance in early tumorigenesis and cancer therapy E. Petermann and T. Helleday	1352-1354

Dietary meat, endogenous nitrosation and colorectal cancer G.G.C. Kuhnle and S.A. Bingham	1355–1357
Determining the efficacy of dietary phytochemicals in cancer prevention M.M. Manson, B.E. Foreman, L.M. Howells and E.P. Moiseeva	1358–1363
Novel agents for cancer prevention based on nitric oxide B. Rigas	1364–1368
Selected oral communications	
Are multiple checkpoint mediators involved in a checkpoint linking histone gene expression with DNA replication? B. Müller, J. Blackburn, C. Feijoo, X. Zhao and C. Smythe	1369–1371
O-glycan regulation of apoptosis and proliferation in colorectal cancer cell lines G. Patsos, C. Robbe-Masselot, A. Klein, V. Hebbe-Viton, R. San Martin, D. Masselot, M. Graessmann, C. Paraskeva, T. Gallagher and A. Corfield	1372–1374
Toll-like receptor 4 regulates colitis-associated adenocarcinoma development in interleukin-10-deficient (IL-10 ^{-/-}) mice R. Zhang, Y. Li, P.L. Beck and D.-M. McCafferty	1375–1376
Inhibitory effect of lycopene on PDGF-BB-induced signalling and migration in human dermal fibroblasts: a possible target for cancer W.-B. Wu, H.-S. Chiang, J.-Y. Fang and C.-F. Hung	1377–1378
