Biochemical Society Focused Meeting

Regulation of Protein Function by SUMO Modification

Manchester Conference Centre, Manchester, U.K., 25–27 June 2007

Edited by R. Hay (Dundee, U.K.) and A. Sharrocks (Manchester, U.K.)

The role of <i>Schizosaccharomyces pombe</i> SUMO ligases in genome stability F.Z. Watts, A. Skilton, J.C.-Y. Ho, L.K. Boyd, M.A.M. Trickey, L. Gardner, F.-X. Ogi and E.A. Outwin	1379–1384
PCNA ^{SUMO} and Srs2: a model SUMO substrate–effector pair H.D. Ulrich	1385–1388
A role for SUMO modification in transcriptional repression and activation M.J. Lyst and I. Stancheva	1389–1392
Regulation of the dual-function transcription factor Sp3 by SUMO A. Valin and G. Gill	1393–1396
Daxx mediates SUMO-dependent transcriptional control and subnuclear compartmentalization H.-M. Shih, C.-C. Chang, H.-Y. Kuo and D.-Y. Lin	1397–1400
Pc2 and SUMOylation D. Wotton and J.C. Merrill	1401–1404
PIAS proteins as regulators of small ubiquitin-related modifier (SUMO) modifications and transcription J.J. Palvimo	1405–1408
SUMO: getting it on J. Anckar and L. Sistonen	1409–1413
Signalling pathways and the regulation of SUMO modification B. Guo, S.-H. Yang, J. Witty and A.D. Sharrocks	1414–1418
Viral control of the SUMO pathway: Gam1, a model system S. Chiocca	1419–1421
Selected oral communications	
Small ubiquitin-related modifiers in chains A.C.O. Vertegaal	1422–1423
SUMOylation-dependent function of a T-box transcriptional repressor in <i>Caenorhabditis elegans</i> T.L. Crum and P.G. Okkema	1424–1426
Modulation of transcriptional activity of the DEAD-box family of RNA helicases, p68 (Ddx5) and DP103 (Ddx20), by SUMO modification F.V. Fuller-Pace, A.-M.F. Jacobs and S.M. Nicol	1427–1429

Ubc9 fusion-directed SUMOylation (UFDS)
R. Niedenthal 1430–1432

Papillomaviruses and the host SUMOylation system
Y.-C. Wu, A.F. Deyrieux and V.G. Wilson 1433–1435

Pattern-Recognition Receptors in Human Disease

Queens' College, University of Cambridge, Cambridge, U.K., 8–10 August 2007

**Edited by C. Bryant (Cambridge, U.K.), K. Fitzgerald (University of Massachusetts Medical School, U.S.A.),
 N. Gay (Cambridge, U.K.), P. Morley (GlaxoSmithKline, U.K.) and L. O'Neill (Trinity College Dublin, Ireland)**

Building an immune system from nine domains
E.M. Pålsson-McDermott and L.A.J. O'Neill 1437–1444

Genetic polymorphisms within the human Toll-like receptor 2 subfamily
R.I. Tapping, K.O. Omueti and C.M. Johnson 1445–1448

Role of pattern-recognition receptors in cardiovascular health and disease
J.A. Mitchell, B. Ryffel, V.F.J. Quesniaux, N. Cartwright and M. Paul-Clark 1449–1452

Toll-like receptors in atherosclerosis
P.S. Tobias and L.K. Curtiss 1453–1455

HPV: from infection to cancer
M.A. Stanley, M.R. Pett and N. Coleman 1456–1460

Synthetic agonists of Toll-like receptors 7, 8 and 9
S. Agrawal and E.R. Kandimalla 1461–1467

The pharmacology of endosomal TLR agonists in viral disease
D.R. Averett, S.P. Fletcher, W. Li, S.E. Webber and J.R. Appleman 1468–1472

TLR4 signalling in the intestine in health and disease
M. Fukata and M.T. Abreu 1473–1478

Nod1 and Nod2 in innate immunity and human inflammatory disorders
L. Le Bourhis, S. Benko and S.E. Girardin 1479–1484

Immunostimulatory activity of Toll-like receptor 8 agonists towards human leucocytes: basic mechanisms and translational opportunities
V.J. Philbin and O. Levy 1485–1491

Toll-like receptor (TLR)-based networks regulate neutrophilic inflammation in respiratory disease
I. Sabroe and M.K.B. Whyte 1492–1495

Peptidoglycan recognition in *Drosophila*
K. Agrawal and N. Silverman 1496–1500

Selected oral communications

Targeting intracellular mediators of pattern-recognition receptor signalling to adjuvant vaccination
J. Wales, E. Andreakos, M. Feldmann and B. Foxwell 1501–1503

Conserved and distinct aspects of the avian Toll-like receptor (TLR) system: implications for transmission and control of bird-borne zoonoses A. Boyd, V.J. Philbin and A.L. Smith	1504–1507
A phylogenetic and functional overview of inflammatory caspases and caspase-1-related CARD-only proteins K. Kerse, T. Vanden Berghe, M. Lamkanfi and P. Vandenabeele	1508–1511
An arms race: innate antiviral responses and counteracting viral strategies M. Schröder and A.G. Bowie	1512–1514
Structure–function relationships of Toll-like receptor domains through homology modelling and molecular dynamics A. Kubarenko, M. Frank and A.N.R. Weber	1515–1518

British Yeast Group Meeting 2007

Paramount Palace Hotel, Buxton, U.K., 26–28 March 2007

Edited by A. Goldman (Sheffield, U.K.)

The contribution of the budding yeast histone H2A C-terminal tail to DNA-damage responses A.L. Chambers and J.A. Downs	1519–1524
Humanizing mismatch repair in yeast: towards effective identification of hereditary non-polyposis colorectal cancer alleles P.M.R. Aldred and R.H. Borts	1525–1528
Biological consequences of statins in <i>Candida</i> species and possible implications for human health K. Wikhe, C. Westermeyer and I.G. Macreadie	1529–1532
Zymocin, a composite chitinase and tRNase killer toxin from yeast D. Jablonowski and R. Schaffrath	1533–1537
Identifying <i>in vivo</i> pathways using genome-wide genetic networks J.V. Gray and S.A. Krause	1538–1541

7th International Conference on Protein Stabilization 2007

University of Exeter, Exeter, U.K., 11–14 April 2007

Edited by J. Littlechild (Exeter, U.K.)

New parameters controlling the effect of temperature on enzyme activity R.M. Daniel, M.J. Danson, R. Eienthal, C.K. Lee and M.E. Peterson	1543–1546
Pressure perturbation calorimetry, heat capacity and the role of water in protein stability and interactions A. Cooper, D. Cameron, J. Jakus and G.W. Pettigrew	1547–1550

Single-mutation-induced stability loss in protein lysozyme L. Ye, Z. Wu, M. Eleftheriou and R. Zhou	1551–1557
Natural methods of protein stabilization: thermostable biocatalysts J.A. Littlechild, J. Guy, S. Connelly, L. Mallett, S. Waddell, C.A. Rye, K. Line and M. Isupov	1558–1563
Probing the mechanical stability of proteins using the atomic force microscope D.J. Brockwell	1564–1568
Prediction of protein stability upon point mutations M.M. Gromiha	1569–1573
Enhancement of oligomeric stability by covalent linkage and its application to the human p53tet domain: thermodynamics and biological implications G.M.K. Poon	1574–1578
Insight into stability of CotA laccase from the spore coat of <i>Bacillus subtilis</i> E.P. Melo, A.T. Fernandes, P. Durão and L.O. Martins	1579–1582
Cross-linked enzyme aggregates (CLEA [®] s): stable and recyclable biocatalysts R.A. Sheldon	1583–1587
Stability and stabilization of D-amino acid oxidase from the yeast <i>Trigonopsis variabilis</i> B. Nidetzky	1588–1592
Advances in the design of new epoxy supports for enzyme immobilization–stabilization C. Mateo, V. Grazú, B.C.C. Pessela, T. Montes, J.M. Palomo, R. Torres, F. López-Gallego, R. Fernández-Lafuente and J.M. Guisán	1593–1601
Cation and strong co-solute effects on protein kinetic stability J.M. Broering and A.S. Bommarius	1602–1605
Structural stability of an enzyme biocatalyst P.A. Dalby, J.P. Aucamp, R. George and R.J. Martinez-Torres	1606–1609
Protein engineering applications of industrially exploitable enzymes: <i>Geobacillus stearothermophilus</i> LDH and <i>Candida methylica</i> FDH N.G. Karagüler, R.B. Sessions, B. Binay, E.B. Ordu and A.R. Clarke	1610–1615
Selected oral communications	
Stabilization of the active form(s) of human paraoxonase by human phosphate-binding protein D. Rochu, E. Chabrière, F. Renault, M. Elias, C. Cléry-Barraud and P. Masson	1616–1620
Immobilization of thermophilic enzymes in miniaturized flow reactors A.M. Hickey, L. Marle, T. McCreedy, P. Watts, G.M. Greenway and J.A. Littlechild	1621–1623
On the background of enhanced stability and reusability of enzymes in ionic liquids E. Fehér, B. Major, K. Bélafi-Bakó and L. Gubicza	1624–1627

6th Symposium of Post-Transcriptional Regulation of Plant Gene Expression

La Calanque, Carry-le-Rouet, France, 10–13 May 2007

Edited by **J. Doonan** (John Innes Centre, U.K.), **M. Kockerols** (Université de la Méditerranée, France) and **C. Robaglia** (Marseille, France)

The amazing diversity of cap-independent translation elements in the 3'-untranslated regions of plant viral RNAs W.A. Miller, Z. Wang and K. Treder	1629–1633
Control of protein translation by phosphorylation of the mRNA 5'-cap-binding complex O.A. Pierrat, V. Mikitova, M.S. Bush, K.S. Browning and J.H. Doonan	1634–1637
Riboregulators in plant development P. Laporte, F. Merchan, B.B. Amor, S. Wirth and M. Crespi	1638–1642
Pentatricopeptide repeat (PPR) proteins as sequence-specificity factors in post-transcriptional processes in organelles E. Delannoy, W.A. Stanley, C.S. Bond and I.D. Small	1643–1647
